After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on August 25, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorizations sought and upon consideration of the record,

The Commission finds:

(1) Applicant, Lone Star Gas Company a Texas corporation having its principal place of business in Dallas, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 11, 1944, in Docket No. G–442 (4 FPC 565).

(2) The facilities proposed to be abandoned, as hereinbefore described and as more fully described in the application herein, are used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and approval thereof should be granted as hereinafter ordered.

The Commission orders:

(A) Permission for and approval of the abandonment of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted to Applicant.

(B) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within 10 days of such abandonment.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

CITY OF PAWNEE ROCK, KANSAS AND NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP66-325

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued August 31, 1966)

On April 13, 1966, the City of Pawnee Rock, Kansas (Applicant), filed in Docket No. CP66-325 an application, as amended on August 2, 1966, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Natural Gas Pipeline Company of America (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in Applicant, all as more fully set forth in the application.

Applicant is located in Barton County in Western Kansas, approximately 14 miles southwest of Great Bend, Kansas, and 6 miles southeast of Respondent's main transmission line in Kansas. Applicant operates an existing municipal gas distribution system.

Applicant proposes to construct a 4-inch lateral transmission pipeline approximately six miles in length extending northwest from its border to an interconnection with Respondent's main transmission pipeline in Kansas.

The total estimated volumes of natural gas necessary to meet Applicant's annual and peak day requirements for the initial three-year period of proposed operations are as follows:

	First year	Second year	Third year
Annual (Mcf)	34,500	36,950	38,920
Peak day (Mcf)	286	306	324

The total estimated cost of Applicant's proposed facilities is $82,201, which cost will be financed through the issuance of Gas System Improvement Bonds.

After due notice, the State Corporation Commission of the State of Kansas filed its Notice of Intervention on May 13, 1966, but withdrew said intervention by a filing of its Withdrawal of Notice of Intervention on May 31, 1966. No other notice of intervention, petition to intervene or protest to the granting of the application has been filed.

The Commission finds:

(1) Respondent, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G-235 (3 FPC 830).

(2) Applicant, City of Pawnee Rock, Kansas, is a municipal corporation incorporated under the laws of the State of Kansas and is legally empowered to construct and operate natural gas facilities and to sell and distribute natural gas in said city.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transportation

system with the proposed facilities of Applicant and to sell and deliver up to 324 Mcf of natural gas per day to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as requested, will not place an undue burden upon Respondent nor impair its ability to render adequate service to existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 324 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

PLATEAU NATURAL GAS COMPANY,[1] DOCKET NO. CP65–418

ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued August 31, 1966)

On June 6, 1966, Plateau Natural Gas Company (Petitioner) filed in Docket No. CP65–418 a petition to amend the order issued to Kansas-Colorado Utilities, Inc. (K–C), in said docket on August 16, 1965, 34 FPC 515, requesting that the authorization to construct and operate 16 natural gas meter stations in Dallam and Hartley Counties, Texas, and Union County, New Mexico, be deleted therefrom, all as more fully set forth in the petition to amend.

The order issued in the instant docket on August 16, 1965, authorized the sale for resale of natural gas by K–C to Petitioner, necessitating the installation of the aforementioned 16 meter stations at an estimated cost of $29,480.

Pursuant to the order of the Commission issued in Docket No. CP66–154 on January 25, 1966, 35 FPC 153, K–C has merged with Petitioner and as a result K–C is no longer selling gas in interstate commerce to Petitioner. Consequently, there is no present need for the 16 meter stations and accordingly Petitioner requests that authorization therefor be deleted from the order issued in the instant docket.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order in Docket No. CP65–418 issued on August 16, 1965, be amended as hereinafter ordered.

---

[1] Successor to Kansas-Colorado Utilities, Inc.

The Commission orders:

(A) The Commission's order in Docket No. CP65–418 issued on August 16, 1965, is amended by deleting therefrom the authorization granted to Kansas-Colorado Utilities Inc., to construct and operate 16 meter stations in Dallam and Hartley Counties, Texas and Union County, New Mexico, and to sell natural gas through said facilities.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP66–415

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued August 31, 1966)

On June 15, 1966, United Gas Pipe Line Company (Applicant), filed in Docket No. CP66–415 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities, all as more fully set forth in the application.

Applicant proposes to construct and operate the following facilities: approximately 2.2 miles of 2-inch pipeline beginning at approximately Milepost 136.44 on Applicant's 30-inch Offshore to Kosciusko main pipeline and extending in a generally western direction to end at the sales meter station at a point in Section 51, Township 2 South Range 7 East, Tangipahoa Parish, Louisiana.

The facilities are proposed in order to provide for the transportation and delivery of natural gas to Kentwood Brick & Tile Manufacturing Company, Inc., Tangipahoa Parish, Louisiana, to meet the fuel requirements of Kentwood's brick and tile plant to be located near Kentwood, Tangipahoa Parish, Louisiana. The estimated third year peak day requirement of the plant is 704 Mcf of natural gas.

The total estimated cost of Applicant's proposed construction is $45,823, which cost will be financed out of current working funds.

The average rate for the estimated 206,000 Mcf of annual deliveries will be 30.08 cents per Mcf.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on August 25, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G–232 (3 FPC 863).

(2) The proposed construction and operation of facilities and the transportation and delivery of natural gas by Applicant to Kentwood Brick & Tile Manufacturing Company, Inc., as hereinbefore described, and as more fully

described in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and the transportation and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and the transportation and delivery of up to 704 Mcf per day of natural gas to Kentwood Brick & Tile Company, Inc. of Tangipahoa Parish, Louisiana, as described herein and as more fully described in the application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The certificate issued shall not entitle the industrial customers to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

(D) The facilities authorized shall be constructed and ready for operation within six months of the date of this order as required by Section 157.20(b) of the Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

UNITED NATURAL GAS COMPANY AND IROQUOIS GAS CORPORATION, DOCKET NO. CP66-349; TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP66-420

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued August 31, 1966)

On May 2, 1966, United Natural Gas Company (United) and Iroquois Gas Corporation (Iroquois) filed in Docket No. CP66-349 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in order to meet the increasing market demands on the Iroquois dis-

tribution system, particularly in the Buffalo-Niagara Falls distribution area, all as more fully set forth in the application in said docket.

Specifically, United and Iroquois propose to construct and operate the following facilities:

(a) United to construct and operate 8 miles of 24-inch pipeline from a point near its Ellisburg Compressor Station to the Pennsylvania State line in Potter County, Pennsylvania, together with a metering and regulating tie-in station at the end of said line, and

(b) Iroquois to construct and operate 75 miles of 24-inch pipeline from the terminus of United's proposed facilities to a point in Erie County, New York, near the City of Buffalo.

United's sales to Iroquois in the third year of operation of the subject proposals are estimated to be 221,000 Mcf on a peak day and 43,000 MMcf annually. Since it is not contemplated that operation of the proposed facilities will commence before November 1, 1967, Iroquois, in order to meet its 1966–67 winter peak day requirement of 173,000 Mcf, is negotiating a transportation arrangement with Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee). Under such arrangement Tennessee would transport for the account of Iroquois a maximum daily quantity of 70,000 Mcf and a maximum annual quantity of 5,300,000 Mcf of gas purchased by Iroquois from United.

The total estimated cost of the United-Iroquois facilities is $8,172,000, which cost would be financed in part from available company funds and in part from funds to be obtained by issuing to United-Iroquois' parent corporation, Natural Fuel Gas Company, notes or stock, or both, at face or par value.

On June 20, 1966, Tennessee filed in Docket No. CP66–420 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the above described transportation service for Iroquois for a period of one year (1967), all as more fully set forth in the application in said docket.

Tennessee proposes to receive, transport and deliver for Iroquois during the months of January, February, March, November and December of 1967, up to a maximum daily quantity of 70,000 Mcf and a maximum annual quantity of 5,300,000 Mcf. Tennessee states that it is able to render the proposed service because of unused peak day capacity on its Hebron-Hamburg Line and its Niagara Spur. Tennessee's Hebron-Hamburg Line extends from its Compressor Station No. 313 in Potter County, Pennsylvania, to its Compressor Station No. 229 in Erie County, New York. Gas will be transported through this line, a short section of Tennessee's main line and then through the Niagara Spur which crosses a section of Iroquois' distribution system. Tennessee states that it has interconnections with United in the storage area in Pennsylvania through which it can receive gas for the account of Iroquois.

Tennessee will require no additional facilities to render the proposed transportation service.

On June 8, 1966, Tennessee filed a petition to intervene in Docket No. CP66–349 in the event that a formal hearing is held in said docket.

After due notice, no other petition to intervene, notice of intervention or protest to the granting of the applications has been filed.

At a hearing held on August 25, 1966, the Commission on its own motion received and made a part of the record in these proceedings all evidence, including the applications and exhibits, submitted in support of the authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Natural Gas Company, a Pennsylvania corporation having its principal place of business in Oil City, Pennsylvania, is a "natural-

gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1943, in Docket No. G–328 (3 FPC 959).

(2) Applicant, Iroquois Gas Corporation, a New York corporation having its principal place of business in Buffalo, New York, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 23, 1943, in Docket No. G–384 (3 FPC 951).

(3) Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 12, 1947, in Docket No. G–910 (6 FPC 777).

(4) The facilities hereinbefore described, as more fully described in the application in Docket No. CP66–349, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by United and Iroquois are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) The proposed transportation and delivery of natural gas in interstate commerce hereinbefore described, as more fully described in the application in Docket No. CP66–420, are subject to the jurisdiction of the Commission and such transportation and delivery by Tennessee are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(6) Applicants are able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(7) The construction and operation of the proposed facilities by United and Iroquois and the proposed transportation and delivery of natural gas by Tennessee are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(8) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and, with respect to United and Iroquois, particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations, and, with respect to Tennessee, particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3) and (e) of said Section 157.20.

(9) In accordance with the Commission's Regulations under the Natural Gas Act, Tennessee should make appropriate rate filings with the Commission covering the proposed transportation service hereinafter authorized.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicants, United Natural Gas Company and Iroquois Gas Corporation, to construct and operate the proposed facilities as hereinbefore described, all as more fully described in the application in Docket No. CP66–349, upon the terms and conditions of this order.

(B) A certificate of public convenience and necessity is issued authorizing Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., to transport and deliver natural gas as hereinbefore described, all as more fully described in the application in Docket No. CP66–420, upon the terms and conditions of this order.

(C) The certificates issued by paragraphs (A) and (B) above and the rights granted thereunder are conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and, with respect to United and Iroquois, particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations, and, with respect to Tennessee, particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3) and (e) of said Section 157.20.

(D) The facilities authorized in paragraph (A) above shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act by January 1, 1968.

(E) The transportation and delivery of natural gas authorized in paragraph (B) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act by January 1, 1967.

(F) In accordance with the Commission's Regulations under the Natural Gas Act, Tennessee shall make appropriate rate filings with the Commission covering the proposed transportation service authorized in paragraph (B) above.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

WEST OHIO GAS COMPANY AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP66-383

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued August 31, 1966)

On May 20, 1966, West Ohio Gas Company (Applicant), filed in Docket No. CP66-383 an application pursuant to Section 7(a) of the Natural Gas Act for an order directing Michigan Wisconsin Pipe Line Company (Respondent) to extend its gas transportation facilities, to make physical connection with Applicant's proposed distribution facilities, and to sell natural gas to Applicant for resale and distribution in the Village of Convoy, Ohio, and the rural areas adjacent thereto, all as more fully set forth in the application.

Applicant states that Respondent's transmission pipeline extends within 1.75 miles of the village limits of Convoy. Deliveries to Applicant would be made by Respondent at a new delivery point located approximately 0.5 mile due west of the Village of Convoy in Van Wert County, Ohio. Applicant does not presently receive natural gas from Respondent at any other delivery points. Applicant proposes that Respondent construct approximately 1.25 miles of the required lateral pipeline pursuant to Respondent's "10-cent" formula.

Applicant states that Convoy had a 1960 population of 976 and there are 326 residences and 43 commercial establishments now located in Convoy and 13 residences along the route of the transmission pipeline. The estimated natural gas requirements during the first three years of proposed operations are as follows:

	First year	Second year	Third year
Annual (Mcf)	27,302	32,496	39,383
Peak day (Mcf)	268	320	392

Applicant proposes that Respondent deliver the natural gas pursuant to Respondent's SGS-1 rate schedule.

The estimated cost of the facilities to be constructed by Applicant is $103,505, which will be financed from internally generated funds.

Applicant has obtained the necessary franchise to supply natural gas in said community and will obtain authorization from the proper county and township regulatory authorities for those facilities installed outside of the corporate limits of Convoy.

On June 27, 1966, Michigan Wisconsin filed an answer to the application and stated therein it had no objection to the entry of an order requiring it to extend its facilities, establish connection and provide the requested service.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on June 7, 1966, (31 F.R. 8034). No protest, petition to intervene or request for hearing has been filed in this proceeding.

The Commission finds:

(1) Michigan Wisconsin Pipe Line Company, a Delaware corporation having its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order dated November 30, 1946, in Docket No. G-669.

(2) Applicant, is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Michigan Wisconsin to sell and deliver up to 392 Mcf of natural gas per day to Applicant, under a service agreement to be executed by Applicant with Michigan Wisconsin in accordance with the Commission's Regulations, for distribution and resale in the Village of Convoy and adjacent rural areas.

(4) Applicant should be prepared to receive natural gas from Michigan Wisconsin for distribution in the named community, and rural area, within one year from the date of the issuance of this order.

(5) The requirement that Respondent serve Applicant as hereinafter ordered will not impair Respondent's ability to render adequate service to its existing customers.

The Commission orders:

(A) Michigan Wisconsin Pipe Line Company is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant, as herein described and to sell and deliver to Applicant up to 392 Mcf of natural gas per day for distribution and resale as hereinbefore described in the Village of Convoy and rural areas adjacent thereto under a service agreement to be executed by Applicant with Michigan Wisconsin and filed by Michigan Wisconsin in accordance with the Commission's Regulations. Such service shall be rendered pursuant to Michigan Wisconsin's presently filed appropriate rate schedule.

(B) Michigan Wisconsin shall report to the Commission the date of commencement of service to Applicant within 10 days after such service begins.

(C) Applicant shall procure appropriate authorization from county, and/or township regulatory authorities for facilities outside the corporate limits of Convoy and be prepared to receive service as directed herein within one year from the issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

PACIFIC POWER & LIGHT COMPANY, PROJECT NOS. 421 AND 1136

ORDER ACCEPTING SURRENDER OF LICENSES (TRANSMISSION LINE)

(Issued September 1, 1966)

On May 31, 1966, Pacific Power & Light Company, licensee for transmission line Project Nos. 421 and 1136, filed applications for surrender of the licenses for the projects located in the State of Oregon and affecting lands of the United States within the Winema (Project No. 421) and within the Winema and Fremont (Project No. 1136) National Forests.

The applications for surrender are in compliance with the Commission's June 16, 1961 order, 25 FPC 1154 which, among other things, provided for the filing of the applications for surrender, subject to first obtaining authority from the appropriate Government agency for the continued occupancy by the lines of the Government lands involved.

Forest Service Special Use Permits (copies of which are on file with the Commission) were issued for the two sections of Project No. 421 within the Winema National Forest, effective February 1, 1963, and January 1, 1965, respectively; for the section of Project No. 1136 within the Winema National Forest, effective February 15, 1963, and for the section of the same line within the Fremont National Forest, effective January 1, 1965. Inasmuch as the annual charges under the Commission licenses for the lines have been paid through the calendar year 1965, we are making our approval of the surrenders effective as of December 31, 1965.

Public notice of the applications was waived in the licenses.

The Commission finds:

(1) The aforesaid transmission lines are not primary lines nor parts of a "project" as defined in Section 3(11) of the Federal Power Act.

(2) Acceptance of surrender of the licenses for the projects is appropriate.

The Commission orders:

Surrender of the licenses for transmission line Project Nos. 421 and 1136 is hereby accepted, effective as of December 31, 1965.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP66-208

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 2, 1966)

On June 2 and July 5, 1966, Michigan Wisconsin Pipe Line Company (Petitioner), filed in Docket No. CP66-208 petitions to amend the order of the Commission issued in said docket on May 24, 1966, 35 FPC 777, which order authorized Petitioner, *inter alia*, to sell and deliver additional natural gas to certain existing customers. By the instant filings, Petitioner requests that the order issued in the instant docket be amended so as to authorize deliveries of revised volumes of gas to fourteen (14) (inclusive of Wapello) customers under various rate schedules and that the Commission accept, concurrently, the corresponding service agreements for filing effective September 1, 1966, all as more fully set forth in the petitions to amend.

Petitioner states that since the preparation of the application in the instant docket its customers have reviewed their requirements in the light of their actual residential, commercial and industrial growth and operations experienced during this past winter and as a result of such review, certain of its customers have requested a modification in their Maximum Daily Quantity entitlement of gas and/or a change in rate schedule under which service will be rendered, as shown in Appendix A hereto.

The petitions to amend filed June 2, 1966 and July 5, 1966 state that the requested MDQ modifications result in a net aggregate increase of 27,370 Mcf of gas per day which can be served from a portion of Petitioner's unallocated volume of 52,000 Mcf of gas per day.

The requested modifications in MDQ, together with the requested changes in rate schedule under which the service will be rendered, are set forth in Appendix A hereto.

Petitioner requests that the Commission modify its order of May 24, 1966, so as to authorize deliveries to the above named customers of the revised volumes and under the rate schedules set forth in Appendix A where changes are indicated and, concurrently, accept the accompanying service agreements for filing effective September 1, 1966—the beginning of the contract year under Michigan Wisconsin's tariff.

Due notice of the filing of the application to amend and opportunity for hearing thereon have been given by publication in the Federal Register on July 16, 1966, (31 F.R. 9696). No protest or petition to intervene has been filed in the proceeding concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require (1) that the Commission's order issued May 24, 1966, in Docket No. CP66-208 be amended as hereinafter ordered, and (2) the executed service agreements filed with the Commission on June 2, 1966 and July 5, 1966 be accepted for filing, effective on September 1, 1966.

The Commission orders:

(A) The Commission's order, issued May 24, 1966, in Docket No. CP66-208 is amended by authorizing Michigan Wisconsin to change maximum daily quantities to conform with volumes designated in revised nominations as set forth herein in Appendix A, all as hereinbefore described and as set forth in the subject petition to amend.

(B) The service agreements filed with the Commission on June 2, 1966 and July 5, 1966 be accepted for filing, effective on September 1, 1966.

(C) In all other respects said order shall remain in full force and effect.

NORTHERN UTILITIES, INC., DOCKET NO. CP66-406

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 2, 1966)

On June 8, 1966, Northern Utilities, Inc. (Applicant) filed in Docket No. CP66-406 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the replacement of certain existing facilities, all as more fully set forth in the application.

Specifically, Applicant seeks authority for the construction, operation and replacement of the following facilities:

(1) The construction of approximately 16 miles of 8-inch pipeline from a point near Atlantic-Richfield Company's (formerly Atlantic Refining Company) Riverton Dome Gasoline Plant in Section 36, Township 1 South, Range 4 East of Wind River Meridian, southeasterly to connect with Applicant's Sand Draw Field, all in Fremont County, Wyoming, to replace the present pipeline between said two points, consisting of approximately 15 miles of 6-inch pipeline, approximately 3 miles of 6-inch loop pipeline, and approximately 3 miles of 4-inch loop pipeline; and

(2) The construction of approximately 1.30 miles of 16-inch pipeline loop, generally parallel to its present 12-inch pipeline, extending from a metering point near the Kansas-Nebraska Natural Gas Company, Inc. (Kansas-Nebraska) Compressor Station located east of Casper, Wyoming, to a point on the north side of the North Platte River, including a new and separate crossing of said river, all in Natrona County, Wyoming.

The instant proposal is in accordance with paragraph (c) of Section 1 of the transportation agreement between Applicant and Kansas-Nebraska dated September 14, 1965, which agreement provides for the expansion of Applicant's facilities in order to meet increased transportation requirements of Kansas-Nebraska resulting from the purchase of additional volumes of natural gas by Kansas-Nebraska from its sources of supply in Fremont or Natrona County, Wyoming.

The proposed construction will increase the capacity of Applicant's transmission facilities extending from the Riverton Dome Field to the Sand Draw Field from approximately 9,400 Mcf of gas per day to approximately 35,000 Mcf of gas per day and will enable Applicant to transport an additional 10,000 Mcf per day for the account of Kansas-Nebraska. The total estimated volume of natural gas to be transported by Applicant for the account of Kansas-Nebraska during the year 1967 is 20,525,000 Mcf, an increase of approximately 5,000,000 Mcf over the volume transported during the year 1965.

The total estimated cost of Applicant's proposed construction is $305,594, which cost will be financed from cash on hand and from funds generated from operations.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Utilities, Inc., a Wyoming corporation having its principal place of business in Casper, Wyoming, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 20, 1962, in Docket No. CP63-74 (28 FPC 1082).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Northern Utilities, Inc., authorizing the construction and operation of facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, one year from the date of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

PACIFIC GAS AND ELECTRIC COMPANY, PROJECT NO. 78; SACRAMENTO MUNICIPAL UTILITY DISTRICT AND PACIFIC GAS AND ELECTRIC COMPANY, PROJECT NO. 2155

ORDER APPROVING TRANSFER OF INTEREST IN LICENSE AND ACCEPTING SURRENDER OF LICENSE

(Issued September 2, 1966)

On August 28, 1962 (28 FPC 375) the Commission issued a license jointly to Sacramento Municipal Utility District (District) and Pacific Gas and Electric Company (PG&E) for proposed Chili Bar dam, reservoir and powerhouse on the South Fork of the American River in Eldorado County, California, designated as Project No. 2155. The joint license was issued pursuant to joint application therefor filed by District and PG&E following the execution of an agreement between the two, dated January 5, 1962, which, as the license recites, provided for joint development of the stretch of the river involved. In essence, the agreement provided for the filing of the joint application for license for the Chili Bar Project for a period coincident with that of District's license for Slab Creek Dam and Reservoir, Project No. 2101, and authorized construction of Chili Bar by District and its operation by District during the initial years. Under the agreement, District would have the right to operate Chili Bar for its own benefit until construction or operation of District's Project No. 2101 deprived PG&E's licensed major Project No. 78 of its water supply, at which time (but not later than December 31, 1970) District would convey its interest in Chili Bar and transfer its Commission license therefor to PG&E. The latter would thereupon surrender its license for Project No. 78 and take possession of and operate and maintain the Chili Bar Project. The Commission's license for Chili Bar Project No. 2155, which provided that PG&E should surrender its license for Project No. 78 upon taking possession of the Chile Bar Project, in effect provided for the termination of the license for Project No. 78 upon PG&E's taking possession of Chili Bar.

By way of compliance with the terms of the Commission's joint license for Chili Bar Project No. 2155: (1) PG&E, on August 23, 1965, filed application for surrender of its license for Project No. 78, located on the South Fork of American River in Eldorado and Alpine Counties, California, and affecting lands of the United States within Eldorado National Forest and other lands of the United States; and (2) PG&E and District, on September 2, 1965, filed application for transfer of District's interest in the license for Chili Bar Project No. 2155 to PG&E.

According to the filings by District and PG&E, heavy floods in December of 1964 destroyed a considerable portion of the flume conveying water to Project No. 78 and replacement of the destroyed project works was not considered economically feasible during the period of Slab Creek Dam construction. The flood damage to Project No. 78 precipitated District and PG&E: (1) to enter into an agreement dated March 8, 1965, (a copy of which is on file with the Commission) under which District transferred the project works comprising Chili Bar Project No. 2155 to PG&E, effective as of noon March 22, 1965, and (2) to file the applications for transfer and surrender in which we are asked to make our approval of the transfer of District's interest in the license for Chili Bar Project No. 2155 to PG&E, and our acceptance of PG&E's surrender of license for Project No. 78 effective as of March 22, 1965.

The Chief, Forest Service, has advised that the National Forest lands occupied by Project No. 78 have been restored to a condition satisfactory to the Service, and the Department of the Interior has advised that the project structures of Project No. 78 remaining on public lands of the United States will not conflict with the Bureau of Land Management's use of the lands.

Annual charges under the license for Project No. 78 have been paid through December 31, 1965.

The Commission finds:

(1) Acceptance of surrender of PG&E's license for Project No. 78 is appropriate.

(2) The transfer of District's interest in the license for Project No. 2155 to PG&E will not be inconsistent with the public interest.

The Commission orders:

(A) Surrender of the license for Pacific Gas and Electric Company's Project No. 78 is hereby accepted, effective as of March 22, 1965.

(B) The transfer of the interest of Sacramento Municipal Utility District in the license for Chili Bar Project No. 2155 to PG&E is hereby approved, effective as of March 22, 1965, leaving Pacific Gas and Electric Company as the sole owner and licensee of record for Project No. 2155.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

TRANSWESTERN PIPELINE COMPANY, ET AL., DOCKET NO. CP63-204, ET AL.

ORDER REQUIRING FILING OF STATEMENTS

(Issued September 2, 1966)

On July 19, 1966, the Commission issued Opinion No. 500, 36 FPC 176, in which it granted certificates of public convenience and necessity to El Paso Natural Gas Company and Transwestern Pipeline Company for expansion of service in California and denied a certificate of public convenience and necessity to Gulf Pacific Pipeline Company (Gulf Pacific). Gulf Pacific had proposed to transport up to 865,000 Mcf of natural gas daily to Southern California Edison Company (Edison) and the Department of Water and Power of the City of Los Angeles (Department) from the Katy and Pledger Fields in Texas. The utilities would purchase the gas from Humble Oil & Refining Company (Humble) and other producers pursuant to 20 year contracts.

It has come to the Commission's attention that some of the producers including Humble may have filed notices of termination of the contracts to sell to the utilities.[1] In view thereof, there is a distinct question whether there would be a gas supply available to Gulf Pacific to render the proposed service to the utilities.

Applications for rehearing having been filed *inter alia* by Gulf Pacific, Edison and Department (but not Humble), further Commission action in these proceedings is necessary. It would appear appropriate, however, that there be an indication whether some or all of the issues propounded by the applicants for rehearing herein have been rendered moot by the purported withdrawal of the Gulf Pacific-Edison and Department gas supply. The granting of rehearing to an applicant when the basic gas supply upon which its project is founded has been lost would be an exercise in futility by this Commission. Accordingly, it would appear advisable that these parties be required to file statements showing why the several issues raised in their applications for rehearing have not been rendered moot by such gas supply failure, and, consequently, why these proceedings should not be summarily terminated.

The Commission orders:

(1) Gulf Pacific and the intervenor/applicants for rehearing, Edison and Department, shall submit on or before September 13, 1966, copies of all notices of termination of gas supply which they may have received from those producers who were under contract to sell gas from the Katy and Pledger Fields, Texas, to Edison and the Department.

(2) In view of the possible cancellation of the gas supply available to the Gulf Pacific project, Gulf Pacific Pipeline Company, Edison, Department and

---

[1] In its Application for Rehearing, Gulf Pacific Pipeline Company noted that "the Commission's issuance of Opinion No. 500 has caused certain producers to file notices of termination."

all other parties filing applications for rehearing, shall, and the other interested parties to this proceeding may, submit statements to the Commission on or before September 16, 1966, showing whether some or all of the issues propounded by the applicants for rehearing herein have been rendered moot by the purported withdrawal of the Gulf Pacific-Edison and Department gas supply, and why these proceedings should not be summarily terminated.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

ARKANSAS LOUISIANA GAS COMPANY, DOCKET NO. CP66-421

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 6, 1966)

On June 20, 1966, Arkansas Louisiana Gas Company (Applicant), filed in Docket No. CP66-421 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the transportation and delivery of natural gas to the Western Electric Company plant, all as more fully set forth in the application.

Applicant seeks authorization to construct and operate a new lateral pipeline extending from its existing transmission facilities (Line N) to a new plant constructed by Western Electric Company located near Shreveport, Caddo Parish, Louisiana, which will use on an interruptible basis up to 2,880 Mcf of gas per day and approximately 400,000 Mcf of gas per year. The proposed facilities consist of approximately 26,400 feet of 8⅝-inch pipeline, and necessary regulating and metering equipment.

The total estimated cost of Applicant's proposed construction is $153,140, which will be financed from cash on hand.

The estimated average rate to be charged for the gas delivered will be 26.2¢ per Mcf.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, and exhibits submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, Arkansas Louisiana Gas Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued January 26, 1943, in Docket No. G-252 (3 FPC 910).

(2) The proposed construction and operation of facilities and transportation and delivery of natural gas as hereinbefore described, and as more fully described in the application, and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, transportation and delivery are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and transportation and delivery of up to 2,880 Mcf daily of natural gas as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation and transportation of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 3 months from the date on which this order issues.

(D) The certificate issued hereby is granted on the express condition that (1) the facilities authorized hereby shall not be used to transport more than 2,880 Mcf daily of interruptible gas to Western Electric Company and (2) the interruptible service authorized herein shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

(E) Applicant shall within 60 days after the issuance of this order file copies of the contract with Western Electric Company as required by Section 155.1 of Commission's Rules and Regulations and thereafter file an annual report in compliance with Section 155.1(c) thereof.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

CONCORD NATURAL GAS CORPORATION AND TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-14

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued September 6, 1966)

On July 21, 1966, Concord Natural Gas Corporation (Applicant) filed in Docket No. CP67-14 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Respondent) to establish physical connection of its natural gas transmission facilities with the facilities proposed to be constructed by Applicant, and to sell and deliver natural gas to Applicant for distribution and resale in the Village of Suncook, Merrimack County, New Hampshire, all as more fully set forth in the application.

Applicant proposes to construct 2,400 feet of 6-inch transmission pipeline extending in an easterly direction from a meter station on Respondent's transmission line in Merrimack County, New Hampshire, to the distribution system to be constructed in the Village of Suncook.

The total estimated volumes of natural gas necessary to meet Applicant's annual and peak day requirements for the initial three-year period of proposed operations are as follows:

	First year	Second year	Third year
Annual (Mcf)	24,700	31,800	38,420
Peak day (Mcf)	70	132	180

The total estimated cost of Applicant's proposed distribution system is $73,374, which cost will be financed by short-term borrowing of up to $50,000, with the remainder of the funds being provided by current operating income.

Although a copy of the application was served on Respondent it failed to file an answer within the time fixed by the Commission's Regulations under the Natural Gas Act.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed herein.

The Commission finds:

(1) Respondent, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of July 15, 1947, in Docket No. G-910 (6 FPC 777).

(2) Applicant, Concord Natural Gas Corporation, a corporation organized and existing under the laws of the State of New Hampshire, is authorized to construct and operate facilities and distribute and sell natural gas as proposed.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transmission facilities with the proposed facilities of Applicant and to sell and deliver up to 180 Mcf of natural gas per day to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as requested, will not place an undue burden upon Respondent nor impair its ability to render adequate service to existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant, and to sell and deliver up to 180 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

NANTAHALA POWER AND LIGHT COMPANY, DOCKET NO. E-7261

ORDER DENYING PETITION FOR REHEARING AND RECONSIDERATION

(Issued September 6, 1966)

Nantahala Power and Light Company on August 16, 1966, filed a petition for rehearing and reconsideration of the declaratory order issued on July 18, 1966, 36 FPC 119, which requires that Petitioner file applications for licenses under the Federal Power Act for its Nantahala, Thorpe, Queen's Creek, Tuckasegee, Cedar Cliff, Bear Creek, and Tennessee Creek hydroelectric developments in the Little Tennessee River basin.

The Commission finds:

The assignments of error and grounds for rehearing set forth in the above-described petition for rehearing and reconsideration of the declaratory order of July 18, 1966, present no facts or principles of law which, were not considered by the Commission when it issued the order or which, having now been reconsidered, warrant any change or modification of the order.

The Commission orders:

The above-described petition for rehearing and reconsideration of the declaratory order of July 18, 1966, is denied.

Before Commissioners: Lee C. White. Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

NATURAL GAS COMPANIES—INTEREST ON REFUNDS OF PORTION OF INCREASED RATES OF INDEPENDENT PRODUCERS RELATING TO ROYALTIES AND TAXES TO FEDERAL AND STATE GOVERNMENTAL AUTHORITIES, DOCKET NO. R-280

ORDER NO. 326

REVISING PARAGRAPH (C) AND ADDING A NEW PARAGRAPH (F) TO § 154.102 OF REGULATIONS UNDER THE NATURAL GAS ACT

(Issued September 6, 1966)*

On August 26, 1965, the Commission issued a notice of proposed rule-making in this proceeding (30 F.R. 11228, September 1, 1965) wherein it proposed to provide relief to independent producers from their obligation to pay interest on that portion of an increased rate found to be unjustified which relates to royalties and/or taxes they are required to pay to federal or state governmental authorities, to the extent that refunds are made without interest.

Comments were invited from interested persons to be submitted by October 19, 1965. All of the 19 responses to the notice,[1] including those from major and small producers, various independent producer associations, and a state commission, supported the proposed action.

Several of the responses point out that the relief is proposed only in those cases where governmental authorities "require" payment of royalties or taxes on amounts collected subject to refund and that the provision is too restrictive. They state that whether a producer is required by law or required by policy to make such payments raises a very difficult legal question that may appropriately be avoided by deleting the phrase "* * * where such authorities require payment of royalties or taxes on amounts collected subject to refund," from the proposed § 154.102(f) of said Regulations. The suggestion is meritorious and we shall adopt it.

Other comments sought to broaden the proposed relief by exempting the producer from paying interest on refunds representing royalty payments to all royalty owners, when such royalty owners do not pay interest to the producers. Our proposal, however, was intended to grant relief only in those instances where royalty payments were required (whether by law or policy) to be made to governmental authorities and producers were unable to protect themselves through the original lease negotiations or subsequent legal action to obtain interest on refundable amounts.

The remaining comments sought the reduction of the interest rate on refunds from 7 percent per annum now provided in § 154.102(c) of the Regulations to 4½ percent. In arguing that the interest rate on refunds should be reduced from 7 percent to 4½ percent per annum, the producers apparently misconstrue the reasons for allowing a lower rate of interest on retained refunds in Permian[2] and the cited settlement cases. The reason for permitting a lower rate of interest in those cases is that the producer has agreed to or has been found liable for refunds but has been ordered by the Commission to retain the refundable amounts pending Commission determination of the flow-through obligations of their purchasers.[3] In these circumstances, the producer has been given the option of utilizing the retained refunds in its operations upon the payment of the prime rate of interest at which it could presumably borrow funds for such operations.[4] However, this consideration has no applicability to the situation where the producer of his own volition has collected, subject to refund, a rate in excess of the just and reasonable rate. There is no justification in such a case for allowing such a low interest obligation.

The Commission further finds:

In view of the foregoing, and upon consideration of all relevant matters presented, including the arguments, contentions, suggestions and other views expressed in the comments received, it is necessary and appropriate for the administration of the Natural Gas Act, that the Regulations under the Natural Gas Act be amended as herein provided.

The Commission, acting pursuant to the authority granted by the Natural Gas Act, as amended, particularly sections 4, 5, and 16 thereof (52 Stat. 822, 823, 830; 15 U.S.C. 717c, 717d, 717o), *orders:*

(A) Part 154, Subchapter E, Regulations Under the Natural Gas Act, Chapter I of Title 18 of the Code of Federal Regulations, is amended by revising paragraph (c) and adding a new paragraph (f) to § 154.102 as follows:

§ 154.102 Suspended changes in rate schedules; motions to make effective at end of period of suspension; procedure.

* * * * *

(c) The independent producer shall be obligated to refund at such times and in such amounts to the persons entitled thereto, and in such manner as may be required by final order of the Commission, the portion of any increased rate found by the Commission in that proceeding not justified, together with interest thereon at the rate of 7 percent per annum from the date of payment to the producer until refunded, except as provided in paragraph (f) below; to bear all costs of any such refunding; to keep accurate accounts in detail of all amounts received by reason of the increased rates or charges effective as provided in the order, for each billing period, specifying by whom and in whose behalf such amounts were paid; and to report in writing and under oath to the Commission monthly, or quarterly if he so elects and so notifies the Commission within thirty days from the date the Secretary notifies the producer that the increased rates may be effective, for each billing period, and for each purchaser the billing determinants of natural gas sales to such purchasers and the revenues resulting therefrom, as computed under the rates in effect immediately prior to the effective date of the change, and under the rates which become effective pursuant to the motion, together with the differences in the revenues so computed;

[4] At the time of issuance of the Permian decision, the first case where the lesser interest obligation was authorized, the prime rate of interest was 4½%.

* * * * * * *

(f) No interest is required to be paid on any portion of a refund which represents payments of royalties or taxes to federal or state governmental authorities, except to the extent that such authorities pay interest to the producer when refunding overpayments of royalties or taxes.

[Secs. 4, 5, 16, 52 Stat. 822, 830; 15 U.S.C. 717c, 717d, 717o]

(B) This amendment herein adopted shall become effective upon the issuance of this order.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

PROVISION FOR RESERVE CAPACITY IN NATURAL GAS PIPELINE COMPANY CERTIFICATE APPLICATIONS, DOCKET NO. R-293

ORDER DISMISSING PROPOSED STATEMENT OF POLICY

(Issued September 6, 1966)*

On November 2, 1965, the Commission issued a Notice of Proposed Statement of Policy with respect to applications for certificates of public convenience and necessity which may be filed by natural gas companies pursuant to Sections 157.6, 157.13 and 157.14 of its Regulations under the Natural Gas Act. The proposed Statement of Policy was intended as a guide to the companies in the filing of their applications to permit them the necessary degree of flexibility to meet the anticipated future needs of their customers while at the same time protecting against uneconomic overbuilding. To that end we proposed a policy of encouraging applications incorporating reserve capacity in the order of one year's estimated normal market growth.

We indicated that it would be helpful to receive comments from interested parties "with regard both to its content and the advisability of its promulgation." As a result of the notice, comments were received from a number of natural gas pipeline companies and distributors. The comments, though generally sympathetic with the Commission's objective, expressed doubt that the procedures in the policy statement would effectuate the goal of the Commission. Upon a review of the comments, we have reached the conclusion that it would not be in the public interest to promulgate now the proposed Statement of Policy or any other similar formula for dealing with the problems of needed reserve capacity for peak requirements and the avoidance of emergency situations. Accordingly, we shall terminate the docket and dismiss the proposed rule. However, while we think that any specific expansion formula would not attain the goals sought, we remain convinced that all pipelines can and should plan for their expansion in a way which will normally provide for possible

---

*Published in the Federal Register on September 10, 1966 (31 F.R. 11947).

emergency situations and avoid the necessity of requests for temporary authorizations.

The Commission orders:

The proceedings in Docket No. R-293 are terminated and the proposed rule therein is dismissed.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP66-180

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING FOR FILING TARIFF SHEETS

(Issued September 6, 1966)

On June 30, 1966, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Petitioner), filed in Docket No. CP66-180 a petition to amend the order of the Commission issued in said docket on May 10, 1966, 35 FPC 715, requesting **that the subject order be amended so as to specifically authorize the interim natural gas service to provide a portion of the increased winter requirements of** nine of Petitioner's New England customers, all as more fully set forth in the **petition to amend.**

Petitioner states that while its exhibits to the application filed in the instant proceeding reflected the aforementioned interim service, a specific request for same was inadvertently overlooked in the text of the application because of the insignificant volume involved. The total amount of such service is 8,248 Mcf of gas per day. Exhibit Z-1, column 5 of pages 1 and 2 of Petitioner's original application reflects the aforementioned interim service to the nine New England customers as follows:

Line No.	General Service Customer	Contracted Demand or Maximum Contract Quantity		
		Rate Sched.	Presently Authorized	Proposed Interim
7,8	Connecticut Gas Company (Wallingford)	G-6	4,327	638
16	Greenwich Gas Company	G-6	11,741	337
17	Haverhill Gas Company	G-6	12,138	203
18	Lawrence Gas Company	G-6	16,088	1,345
22	Mystic Valley Gas Company	G-6	38,404	2,922
23	New Britain Gas Light Company	G-6	11,549	799
24	Northampton Gas Light Company	G-6	4,073	242
25	North Shore Gas Company (Beverly-Salem)	G-6	12,345	759
39	Valley Gas Company	G-6	18,462	1,003
	Total New Service			8,248

Petitioner states that while it is of the opinion that the Commission's order of May 10, 1966, did in fact authorize the Interim General Service, the order is not specific in this regard and Petitioner, therefore, respectfully requests that said order be amended in such a manner as to specifically authorize the interim service specified above.

Petitioner filed the subject tariff sheets[1] on June 24, 1966, to initiate an interim service, designated Interim General Service, Rate Schedule IG-6, to certain of its general service customers in its New England zone. The purpose of the service is to supply additional gas supplies to these customers from its mainline facilities during the forthcoming winter and subsequent months pending the completion of its liquefied natural gas facilities (LNG) in New England. Upon the availability of the LNG service, on or about October 1, 1967, the interim service would terminate and the customers would obtain supplies from the LNG facilities.[2]

Due notice of the filing of the petition to amend and opportunity for hearing thereon have been given by publication in the Federal Register on July 16, 1966 (31 F.R. 9695). No protest, petition to intervene, or notice of intervention has been filed in this proceeding concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require (1) that the Commission's order issued on May 10, 1966, in Docket No. CP66-180 be amended so as to specifically authorize Petitioner to provide the interim service proposed in its tariff filing of June 24, 1965, and (2) that Rate Schedule IG-6 (Interim General Service) consisting of Original Sheets Nos. 66A, 66B, 66C, 66D, and 146B and Second Revised Sheet No. 146A to Tennessee's Eighth Revised Volume No. 1 be accepted for filing to be effective on the date of issuance of this order.

The Commission orders:

(A) The Commission's order issued May 10, 1966, in Docket No. CP66-180 is amended so as to specifically authorize Petitioner to provide the interim service proposed (Interim General Service, IG-6) for its general service customers in its New England Zone in its Rate Schedule filed June 24, 1966, as described hereinbefore and as more fully described in the petition to amend.

(B) Tennessee Gas Pipeline Company's Original Sheets Nos. 66A, 66B, 66C, 66D, and 146B and Second Revised Sheet No. 146A to its Eighth Revised Volume No. 1 are accepted for filing effective on the date of issuance of this order.

(C) In all other respects said order, as amended, shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

UNITED NATURAL GAS COMPANY AND THE MANUFACTURERS LIGHT AND HEAT COMPANY, DOCKET NO. CP64-67

FINDINGS AND ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 6, 1966)

On June 15, 1966, United Natural Gas Company (United) and The Manufacturers Light and Heat Company (Manufacturers), collectively referred to as

---

[1] Original Sheets Nos. 66A, 66B, 66C, 66D, and 146B and Second Revised Sheet No. 146A to Eighth Revised Volume No. 1.

[2] Tennessee was authorized to construct and operate its LNG plant by order issued July 26, 1965, in Docket No. CP65-352, 34 FPC 115.

Petitioners, filed in Docket No. CP64–67 a joint petition to amend the order issued in said docket on March 25, 1964, 31 FPC 699, so as to permit Petitioners to establish a new delivery point for their existing gas exchange arrangement, all as more fully set forth in the petition to amend.

Petitioners now exchange natural gas in Brush Valley Township, Indiana County and in Benezette Township, Elk County, Pennsylvania, pursuant to the certificate of public convenience and necessity issued by the Commission in the instant docket on March 25, 1964. As a part of the exchange arrangement Manufacturers delivers locally produced gas to United at United's Medix Run Compressor Station in Benezette Township, Elk County, Pennsylvania, for compression into United's 12-inch Line No. F–100. Manufacturers pays United a pro-rata share of United's cost in operating and maintaining the Medix Run Compressor Station, based upon the ratio of the volume of gas pumped for Manufacturers to the total volume pumped through the station.

By the instant filing, Petitioners propose to move the delivery point located at the Medix Run Compressor Station to a point in Gibson Township, Cameron County, Pennsylvania where Manufacturers' existing production facilities cross United's Line No. F–100. The proposed new delivery point is approximately 14 miles from the existing Medix Run delivery point.

In bypassing United's Medix Run Compressor Station and redelivering the same volumes of gas to United at the proposed new delivery point on United's Line No. F–100, Manufacturers will save an estimated $6,000 per month which is the approximate amount now being paid to United for compression services.

In order to effectuate the proposed change in Manufacturers' delivery point to United, United will use an existing 4-inch tap on its Line No. F–100 and Manufacturers will move the meter used at the present delivery point and install it at the new delivery point, together with installing the necessary materials and fittings required to connect Manufacturers' existing production facilities to the existing tap on Line No. F–100.

The total estimated cost to Manufacturers for installing the proposed meter and connecting facilities is $5,500.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued on March 25, 1964, in Docket No. CP64–67 be amended as hereinafter ordered and conditioned.

The Commission orders:

(A) The Commission's order issued on March 25, 1964, in Docket No. CP64–67 is amended by authorizing Petitioners to move their existing point of delivery located near Medix Run, Benezette Township, Elk County, Pennsylvania, on United's Line F–100 to a new location on the same line in adjoining Gibson Township, Cameron County, Pennsylvania, as hereinbefore described and as more fully set forth in the petition to amend.

(B) The authorization granted in paragraph (A) above is conditioned upon the filing by United Natural Gas Company of an application pursuant to Section 7(b) of the Natural Gas Act, within 90 days of the issuance of said order, requesting authorization to abandon the above-described Medix Run Compressor Station.

(C) The authorization granted herein is further conditioned upon the amendment by United Natural Gas Company of its Rate Schedules X-3 and X-4 and the amendment by The Manufacturers Light and Heat Company of its Rate Schedules X-14 and X-15, so as to reflect the new delivery point authorized herein.

(D) In all other respects the certificate of public convenience and necessity issued in the instant docket on March 25, 1964, shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

CITY OF ANCHORAGE, ALASKA, PROJECT NO. 2405

ORDER EXTENDING PERIOD OF PRELIMINARY PERMIT

(Issued September 7, 1966)

Application was filed on May 4, 1966, and modified on May 31, 1966, by City of Anchorage, Alaska, permittee for proposed Project No. 2405, for a 12-month extension of the period of the permit. The preliminary permit was issued by the Commission on May 11, 1964, 31 FPC 1143, for a period of 24 months, effective May 1, 1964. The project is proposed to be located on Eagle River, approximately 2 miles upstream from the Glen Highway crossing, in the Third Judicial Division, Alaska, affecting public lands of the United States in the general vicinity of Anchorage, Eagle River and Chugiak.

The permittee has advised that the rehabilitation of municipal works damaged by the March 27, 1964 earthquake took priority over planning for new projects. Commission staff in its San Francisco Regional Office advises that in the circumstances the permittee has proceeded diligently under the permit with the investigations of the proposed project.

The Commission finds:

It is not inconsistent with the public interest to extend the period of the preliminary permit as applied for.

The Commission orders:

The period of the preliminary permit for proposed Project No. 2405 is hereby extended through April 30, 1967.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

ELIZABETHTOWN GAS COMPANY, DOCKET NO. CP66-425

DECLARATION OF EXEMPTION

(Issued September 7, 1966)

Elizabethtown Gas Company (Applicant) filed an application on June 24, 1966, for exemption from the provisions of the Natural Gas Act, pursuant to Section 1(c) thereof.

Applicant owns and operates a distribution system in portions of Union and Middlesex Counties, New Jersey, and purchases or will purchase gas from Transcontinental Gas Pipe Line Corporation and Texas Eastern Transmission Corporation for resale at wholesale to its wholly-owned subsidiary, Northwest Jersey Natural Gas, Inc. This gas is received at one delivery point in Warren County, New Jersey, and at two delivery points in Hunterdon County, New Jersey. All of the gas purchased by Applicant is received and consumed within the boundaries of New Jersey.

The New Jersey Board of Public Utility Commissioners has certified to the Federal Power Commission that it has and will be exercising regulatory jurisdiction over the rates, service and facilities of Applicant, including the proposed sales to Northwest Jersey Natural Gas, Inc.

Wherefore, the Commission declares, by reason of the foregoing:

> Elizabethtown Gas Company is exempt from the provisions of the Natural Gas Act, and the orders, rules and regulations of this Commission issued thereunder.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP64-314

ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 7, 1966)

On July 5, 1966, Southern Natural Gas Company (Petitioner) filed in Docket No. CP64-314 a petition to amend the order issued in said docket on June 8, 1966, in the proceeding entitled *Transcontinental Gas Pipe Line Corporation, et al.*, Docket No. CP64-270, *et al.* (Opinion No. 493, 35 FPC 917), requesting authorization to permit the construction of the 22.24 miles of its Macon-Atlanta loop pipeline authorized by said order to commence at Petitioner's Griffin Gate Valve which is located at M.P. 40.155 on its Macon-Atlanta line rather than at M.P. 1.659 as presently authorized, all as more fully set forth in the petition to amend.

Petitioner's two main transmission lines, North and South Lines, are presently interconnected between Macon and Atlanta, Georgia, by its Macon-Atlanta pipeline. The additional 22.24 miles of loop pipeline authorized by the subject order was to commence at the Macon end of the Macon-Atlanta pipeline and extend northwesterly toward Atlanta. By the instant filing, Petitioner proposes that the loop commence near the center of its Macon-Atlanta pipeline and extend northwesterly for the same distance. The capacity of the subject length of pipeline will remain the same whether it commences at Atlanta or as now proposed.

The purpose of the instant proposal is to provide Petitioner with increased flexibility in future planning for additional market requirements.

Due notice of the filing of the petition to amend and opportunity for hearing thereon has been given by publication in the Federal Register on July 7, 1966 (31 F.R. 9696). No protest, petition to intervene, notice of intervention or request for hearing has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate of public convenience and necessity issued in Docket No. CP64-314 be amended as hereinafter ordered.

The Commission orders:

(A) The certificate of public convenience and necessity issued to Southern Natural Gas Company in Docket No. CP64-314 on June 8, 1966, is amended by authorizing the construction of the 22.24 miles of pipeline authorized by said certificate to commence at the Griffin Gate Valve located at M.P. 40.155 on the Macon-Atlanta line, as hereinbefore described and as more fully described in the petition to amend.

(B) In all other respects said certificate shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge

MISCELLANEOUS AMENDMENTS TO F.P.C. FORM NO. 1; REPORT FORM PRESCRIBED FOR CLASS A AND CLASS B ELECTRIC UTILITIES AND OTHERS SUBJECT TO THE FEDERAL POWER ACT, DOCKET NO. R-284

ORDER NO. 311-A

AMENDING § 141.1 OF THE COMMISSION'S REGULATIONS

(Issued September 8, 1966)*

Order No. 311, issued in this proceeding on December 8, 1965 (34 FPC 1437, 30 F.R. 15465), amended the Annual Report FPC Form No. 1 by, among other things, deleting certain schedules and changing the "Verification" page to an "Attestation." The list of schedules contained in the form which appears in paragraph (d) of § 141.1 of the regulations should have been amended so as to correctly list the current contents of the report form. We are here supplying the inadvertent omission.

The Commission finds:

Notice of this amendment prior to adoption is unnecessary and good cause exists for making it effective immediately.

The Commission, acting pursuant to the provisions of section 309 of the Federal Power Act as amended, (49 Stat. 858; 16 U.S.C. 825h), *orders:*

(A) Paragraph (d) of § 141.1, Part 141, Subchapter D, Chapter I of Title 18 of the Code of Federal Regulations, is revised by deleting the four schedule titles "Special Funds," "Special Deposits," "Notes Receivable" and "Accounts Receivable" and changing the last title, "Verification," to "Attestation."

(B) The revisions here adopted shall be effective upon the issuance of this order.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

*Published in the Federal Register on September 15, 1966 (31 F.R. 12055).

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

ANNUAL REPORTS OF CLASSES A, B, C, & D NATURAL GAS COMPANIES SUBJECT TO THE NATURAL GAS ACT—MISCELLANEOUS AMENDMENTS TO FPC FORMS 2 AND 2-A, DOCKET NO. R-283[1]; TELEGRAPHIC REPORTING OF ACCIDENTS INVOLVING CERTIFICATED FACILITIES OF NATURAL GAS PIPELINE COMPANIES, DOCKET NO. R-291

ORDER NO. 327

REPORTING OF PIPELINE ACCIDENTS AND FAILURES

(Issued September 8, 1966)*

This order amends Part 260 of the Commission's Regulations to require natural gas companies (a) to notify the Commission by telegram or telephone of certain pipeline failures, defined in the rule, occurring on facilities certificated by the Commission and (b) to submit a detailed report by mail within 20 days. In addition the pipeline company is required to furnish a copy of both of these reports to the state regulatory commission in the state or states where the accident or failure occurred and the telegraphic report to the state commission in those states where service might be affected. In order to expedite attention to serious accidents, this order provides for telephonic reports of accidents which cause a fatality or interruption of service to a wholesale customer. Finally, the company in its annual report to the Commission shall list and supply summary information with respect to the failures which had been individually reported during the year covered by the report. The information furnished pursuant to the rule will keep the Commission informed of serious accidents or failures and will assist it in developing comprehensive data on the causes of pipeline failures.

Notice was issued in Docket No. R-283 on September 20, 1965 (30 F.R. 12361, September 28, 1965) and in Docket No. R-291 on November 2, 1965 (30 F.R. 14111, November 9, 1965).

Eleven natural gas companies,[2] the Independent Natural Gas Association of America (INGAA), and the Public Service Commission of Michigan submitted comments in Docket No. R-291.

We received comments in Docket No. R-283 on the specific data which we propose to require to be submitted in the report of details from eight pipeline companies,[3] the Kansas State Corporation Commission, INGAA, and Martin T. Bennett, a consulting engineer.

---

[1] The notice issued in Docket No. R-283 proposed, among other things, the revision of the schedule "Service Interruptions and Property Damage" in F.P.C. Form 2 and the addition of such a schedule to F.P.C. Form 2-A. The Commission deferred consideration of these matters when it issued Order No. 310, in that docket, on December 8, 1965, 34 FPC 1436, 30 F.R. 15465. Since those proposals relate, generally, to the subject matter of the proceeding in Docket No. R-291, they will now be considered.

*Published in the Federal Register on September 14, 1966 (31 F.R. 12015).

[2] Algonquin Gas Transmission Company, Columbia Gas System Service Corporation, El Paso Natural Gas Company, Equitable Gas Company, Lone Star Gas Company, Michigan Gas Storage Company, Northern Natural Gas Company, Pacific Gas Transmission Company, Panhandle Eastern Pipe Line Company, Texas Eastern Transmission Corporation, Transwestern Pipeline Company.

INGAA and several companies requested that the Commission defer action on Docket Nos. R-283, R-290, and R-291, until the whole matter of safety could be comprehensively analyzed and discussed by a select committee of the industry and the Commission. A conference was held on January 19, 1966, between INGAA and the Commission to discuss the proposals in these three proceedings. We have given careful consideration to all industry comments and have adopted many of the suggestions for improvement of the regulations.

As originally noticed, the proposed rules called for reports on accidents or failures (1) which required taking any segment of pipeline out of service; or (2) in which gas escaped and ignited; or (3) which caused property damage of $1,000 or more; or (4) which caused a fatality or injury requiring hospitalization. The rule, as noticed in Docket No. R-291, required first a telegraphic report and then a detailed report within 10 days. Docket No. R-283 then proposed to require a repetition in the annual report of the information supplied in the individual report. The major objection of the industry in Docket No. R-291 (applicable also to Docket No. R-283) was that the definition reportable accident would require the reporting of numerous unimportant incidents and failures because it was not clear whether testing or maintenance shutdowns were to be included. Consequently, at the January 19th conference INGAA recommended a narrower definition of reportable accident than we had proposed.[4] Although, we do not fully adopt INGAA's suggestion, we have narrowed our definition of reportable accident substantially to make it clear that occurrences connected with routine maintenance or construction, pinhole leaks, and testing failures are not to be reported except under certain circumstances and also to make $5,000 rather than $1,000 of estimated property damage the reporting threshold. Several companies thought that $1,000 was too low, a majority suggested $5,000 and a few $10,000 or higher. Some suggested that the limit only refer to the non-company property while others did not want to report separate estimate of damage to non-company property on the grounds that it might prejudice them in subsequent litigation. We believe that an estimate of damage only to non-company property is not as relevant as an estimate of total damage for the purposes of determining the seriousness of a failure and consequently will require only a combined total. In place of the monetary estimate of company damage, we are requiring a brief description of the actual damage. The possibility of prejudice in a damage suit will be lessened by the fact that an estimate of combined damage, not damage to others, is to be reported. We have added a fifth category of reportable accidents, suggested by the discussion with INGAA at the January 19, conference—those which are in the judgment of the company significant, but which do not meet the other criteria specifically named.

---

[3] Columbia Gas System Service Corporation, El Paso Natural Gas Company, Natural Gas Pipeline Company of America, Panhandle Eastern Pipe Line Company, Texas Gas Transmission Corporation, Trunkline Gas Company, Union Light, Heat and Power Company, United Gas Pipe Line Company.

[4] INGAA's proposed definition was: "an accident or transmission operating failure involving facilities operated under certificate authorization from the Commission shall be a rupture or break in the pipeline material, valve or pipe fitting, or a failure in a compressor station which results in (i) fatality or personal injury requiring hospitalization, (ii) loss of service to a market of the company, (iii) ignition of the total stream of gas moving in the pipeline, or (iv) estimated damage to property of third parties of $10,000 or more."

Several states require the reporting of a natural gas company's accidents to the state public utility commission,[5] and a number define a reportable accident to include more incidents than our rule. For example, the only three states which use specific estimates of damage as criteria for determining a reportable accident, Massachusetts, Rhode Island, and New Jersey, require the reporting of accidents resulting in property damage of over $500. Michigan requires reports on accidents "* * * resulting in serious property damage or loss of gas" and Washington requires reports on accidents "causing * * * substantial damage to property."

We are also requiring that the company send a copy of the telegram and the detailed written report to the state commission where the failure occurred, and also, in response to a suggestion by the Michigan Public Service Commission, which itself requires accident reports, we are requiring that copies of the telegraphic reports be sent to the state regulatory commission in the state or states where service might be affected by the occurrence. We believe that such reporting may prove particularly useful to states dependent upon out-of-state supplies, although we note that Kansas Corporation Commission (which also requires accident reports) advises that it would have no direct need at this time for the specific data to be reported in the detailed report under our rule.

Natural Gas Pipeline Company of America and Panhandle Eastern Pipe Line Company challenged the Commission's statutory authority to require telegraphic reports. Panhandle contended that such reports were not needed or required by the Commission because the reports would be after the fact and could in no way aid the Commission in its regulation of rates, extension of facilities, and other matters relating to the transportation and sale of natural gas in interstate commerce. We are convinced that such reports individually and collectively will assist both the Commission and the industry to fulfill their obligation to the public of better service through increased efficiency and reliability. We also believe we have full statutory authority to issue this order under section 7 (which applies to the extension, abandonment and certification of facilities, section 10 (which authorizes the Commission to prescribe reports as necessary or appropriate to assist it in administering the Act), section 13 (which authorizes complaints by States, municipalities and State commissions), section 14 (which authorizes investigations), and section 16 (which deals with the administrative powers of the Commission).

We found the comments on the specific data which we proposed to require helpful and have adopted many of the changes suggested. We have altogether eliminated three items as not necessary.[6] A few companies commented that some of the data asked for in the detailed report would not be relevant for some failures. For example, data on cathodic or other corrosion protection are not relevant if earth-moving equipment punctures the pipe. Our rule, therefore, makes clear that certain data may be omitted if it is not relevant to the cause of the failure.

---

[5] Connecticut P.U.C., Order March 12, 1962, Docket No. 10050, section 37; P.S.C. of Indiana, Rules for Gas Utilities, Cause No. 30281, Approved April 2, 1964, Rule 22; Kansas State Corp. Commission; Rules and Regulations Relating to Standards of Quality, Pressure, Accuracy of Measurement, Safety and Service of Natural Gas, Docket 34856–U, January 16, 1961 sec. 705; Maryland P.S.C., Regulations Governing Service Supplied by Gas Companies, Order No. 5567, July 1, 1964, section 203.6; Massachusetts Dept. Pub. Util., Order, January 23, 1963, D.P.U. 9734–B, section 8; Michigan P.S.C. Gas Safety Code, Order D–3913, section R–460.862.1; New Hampshire P.U.C., Rules and Regulations Prescribing Standards for Gas Utilities, Order No. 7790, January 11, 1962, sec. 30; New Jersey Department of Public Utilities, Order in Docket No. 6663, section 29; Oregon, Rules and Regulations of the Public Utility Commissioner, section 24–045; Pennsylvania, P.U.C., Gas Regulations, effective January 1, 1963, section 202, rule 1; Rhode Island Dept. of Bus. Reg., Div. of Pub. Utils. November 1, 1955, section 15; Washington P.S.C. Consolidated Causes No. U–8799 and U–8800, Rule 25.

[6] Design operating pressure; measurable pit depths; reconstruction costs.

Others commented that the specific data asked for in the detailed report will not always be available in 10 days. We have relaxed the rule as proposed and it now provides 20 days for submission of the report of details. The rule further states that any additions or changes to the 20-day report should be submitted when they become known, in a supplement to that report. We have also revised some of the items to make them more specific and meaningful.[7] We have added four items: three of these more specifically ask for data on the pipeline facility using the ASA B31.8 Code as a reference point[8] and one is a more specific question on the environment in which the pipe is located.[9]

The rule proposed in Docket No. R-283 would have required the complete contents of the written individual reports to be included also in the annual report. It was mentioned at the meeting with INGAA that this is not necessary and we are by this order, in fact, reducing the amount of information on each reported accident below that which is now required in the annual reports. Since we need only one detailed report of each failure, the annual report schedule here prescribed requires only an identification of each failure and the dates on which the detailed written report and any supplements were filed. Martin T. Bennett made two other specific suggestions which we have not adopted. One was to require the location class at the time of the accident. We believe this is included in the definition of construction type which we are prescribing. The other was that we require the distance to the nearest upstream compressor station, and the discharge pressure before the failure as well as the nearest pressure reading both upstream and downstream. We do not believe this information is necessary for our purposes in view of the related information being required.

The Commission finds:

(1) The adoption of these amendments is necessary and appropriate for the administration of the Natural Gas Act.

(2) The revisions and additional items of information which we have added in the written detailed report and which did not appear in the original notice are supplementary to and add specificity to items originally noticed and do not constitute substantive changes in the reporting requirement proposed. Further notice and opportunity for comment thereon pursuant to section 4(e) of the Administrative Procedure Act prior to adoption and promulgation is therefore unnecessary.

---

[7] Estimated property damage; description of affected facility; applicable safety code.

[8] 1) "Construction type required for facility by ASA B31.8, paragraph 841, if installed at time of accident." The construction type, as used in the ASA code, determines the highest pressure, for safety purposes, expressed as a percent of the minimum yield strength which a pipe in any given locality may use under the ASA standards. The main factor determining construction type is the population density.

2) "Maximum allowable operating pressure allowed for facility by ASA B31.8 if installed at time of accident." This indicates the maximum safe pressure which the most current ASA safety code would allow.

3) "Maximum pressure allowed by state law." This may in some cases be lower than that prescribed by the ASA code.

[9] Extra protection needed for pipe due to special environmental conditions. This will indicate if any conditions which could affect the life of the pipe were present.

The Commission, acting pursuant to the authority of the Natural Gas Act particularly sections 7, 10, 13, 14 and 16 (52 Stat. 824, 826, 827, 828, 830; 56 Stat. 84; 15 U.S.C. 717f, 717i, 717l, 717m, 717o), *orders:*

(A) Part 260, Subchapter G, Chapter I, of Title 18 of the Code of Federal Regulations is amended by adding a new § 260.9 to read as follows:

§ 260.9 Reports by natural gas pipeline companies on pipeline system accidents or failures.

(a) Every natural gas pipeline company shall report to the Federal Power Commission any pipeline system accident or failure involving facilities operated under certificate authorization from the Commission which:

(1) causes any fatality or personal injury requiring hospitalization or;

(2) requires the taking of any segment of pipeline out of service; or

(3) results in gas escaping from the pipeline and igniting; or

(4) causes estimated damage to the property of the company and others of a combined total of at least $5,000; or

(5) is significant. in the judgment of the company, even though it does not meet the criteria of subparagraphs (1) through (4). Plant or equipment shutdowns, reductions in pressure, the escape and ignition of gas, or the taking of a segment of pipeline out of service, solely as a consequence of, or in connection with, planned or routine maintenance or construction; pinhole leaks in the pipe; and failures during testing of pipe or equipment, are not to be reported, except under conditions of subparagraphs (1), (4), and (5) of this paragraph.

(b) Natural gas pipeline companies shall report such accidents by telephone or telegram to the Chief, Pipeline Division, Bureau of Natural Gas, Federal Power Commission, 441 "G" Street, N. W., Washington, D. C., at the earliest feasible moment following the accident or failure and shall state briefly the (1) location and (2) time thereof and (3) the extent of injuries, and (4) all other significant facts known then to the company relevant to the cause of the failure or the extent of damages. Any such accidents which result in a fatality or interruption of service to a wholesale customer shall be reported by telephone (Area Code 202, 393-0100).

(c) To the extent that such information is then available, natural gas pipeline companies shall furnish to the Commission within 20 days of each pipeline system failure or accident defined in paragraph (a) of this section a written detailed report of such failure containing the following information:

(1) Date and hour.

(2) Location — city, county, state, line designation and milepost number.

(3) Number of deaths, if employee, so specify.

(4) Number of injuries, if employee, so specify.

(5) (i) Combined monetary estimate of damage to the property of the company and others.

(ii) Brief description of damage to affected facility.

(6) Service interruption.

(i) Customers affected (specify by customer class).

(ii) Duration of interruption.

(7) Description of cause of accident or failure, to the knowledge of the reporting company.

(8) Emergency actions taken.

(9) Description of affected facility. Give: (i) description and year installed. If pipe also give: (ii) length, (iii) diameter, (iv) wall thickness, (v) steel specification number, (vi) grade, and (vii) pipe class per ASA B31.8, para. 841.12; if coupling or joint involved. denote type.

(10) Has any extra protection been necessary due to special conditions in the environment of the pipe such as stream-bed, high-tension lines, or highway crossing? If so, what extra protection was provided?

(11) Construction type per ASA Code B31.8, para. 841 required for the facility if installed at time of accident.

(12) (i) Maximum allowable operating pressure per ASA Code B31.8 for the facility if installed at time of accident. If company uses a standard other than ASA Code B31.8, give also the maximum allowable pressure under such standard and an explanation of such standard.

(ii) Maximum operating pressure allowed by state law, if applicable.

(13) Operating pressure at time of accident or failure (psig).

(14) Results of any metallurgical tests made on facility involved in failure. Indicate the degree of corrosion and reduction in net effective wall thickness of the segment and preventive measures taken, if applicable.

(15) Method used in testing affected facility to withstand design operating pressure. Describe any periodic leak tests. Describe any upgrading or downgrading of operating pressure.

(16) Description of coating and wrapping materials, method of application and frequency of inspection. If not coated, state why.

(17) Was facility subject to cathodic protection? If so, state the frequency of inspection of protective device and facility affected. If not cathodically protected, state why.

(18) Results of any soil resistivity and soil chemical tests in the area of the facility affected. Indicate degree to which soil bed or the terrain (such as level, rolling, steeply graded) might have contributed to corrosion or failure of the facility.

(d) The company shall file supplements to this detailed report if complete information later becomes available or changes are necessary after this report is filed. The data in items (11) through (18) may be omitted if they are not relevant to the cause of the failure. In these cases the reporting company shall briefly indicate why such information is not relevant.

(e) Copies of both the telegraphic report and the written report shall be sent to the state regulatory commission in the state where the failure occurred. Copies of the telegraphic report shall also be sent to the state commission in those states where service might be affected by the failure.

(f) Natural gas companies shall submit to the Commission an original and three conformed copies of the 20-day report of details and any supplements thereto.

(B) The schedule, "Service Interruptions and Property Damage" on page 568 of F.P.C. Form No. 2, prescribed by § 260.1 of said Part 260 is deleted and the following schedule is substituted in its place:

PIPELINE SYSTEM ACCIDENTS AND FAILURES

For each pipeline facility accident or failure during the reporting year for which the Commission requires a report under § 260.9 of this part and for any unreported supplements to accident reports of preceding years, furnish the following information. This information correlates with items (1) through (6) of the detailed report required to be submitted to the Commission on each such accident or failure.

(1) (a) Date of accident or failure.

(b) Date or dates on which accident reports were filed pursuant to § 260.9 of this part.

(2) Location—city, county, state.

(3) Number of deaths, if any.

(4) Number of injuries, if any.

(5) Brief description of damage to affected facility.

(6) Service Interruptions.

(i) Customers affected (specify by customer class).

(ii) Duration of interruption.

(C) F.P.C. Form No. 2-A, prescribed by § 260.2 of the said Part 260 is amended by adding a new schedule on page 13, to read as set out in ordering paragraph (B).

(D) In order to correctly list the new schedules, §§ 260.1 (c) and 260.2 (c) are revised as follows:

(1) In § 260.1 (c) revise the schedule title "Service Interruptions and Property Damage" to read "Pipeline System Accidents and Failures."

(2) In § 260.2 (c), add to follow schedule title "Expenditures for Certain Civic, Political and Related Activities," a new title reading "Pipeline System Accidents and Failures."

(Secs. 7, 10, 13, 14, 16, 52 Stat. 824, 826, 827, 828, 830; 56 Stat. 84; 15 U.S.C. 717f, 717i, 717l, 717m, 717o).

(E) The proceeding in Docket No. R-283, insofar as it relates to the proposed schedule "Pipeline Systems Accidents and Failures" in both Form No. 2 and Form No. 2-A, is terminated.

(F) The amendment prescribed herein requiring telegraphic and detailed written reports shall be effective November 1, 1966. The amendments to the Annual Report, Forms 2 and 2-A, shall be effective for the reporting year 1966 and thereafter.

(G) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

WESTERN TRANSMISSION CORPORATION, DOCKET NO. CP66-416

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 8, 1966)

On June 15, 1966, Western Transmission Corporation (Applicant), filed in Docket No. CP66-416 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas transmission facilities and the transportation of natural gas, all as more fully set forth in the application.

Applicant seeks authorization to construct and operate 9.2 miles of 4-inch pipeline installed on the surface and appurtenant facilities to enable it to take into its certificated system and to deliver to Colorado Interstate Gas Company (CIG) natural gas to be produced from the Cherokee Creek Unit area in Carbon County, Wyoming, and purchased from U.S. Natural Gas Corporation (U.S. Natural).

By order issued May 26, 1964, in Docket No. CP63-329, *et al.* (31 FPC 1295), the Commission authorized Applicant to sell to CIG for resale natural gas purchased from and produced by U.S. Natural in an area including the Cherokee Creek Unit. Delivery and sale to CIG by Applicant is in Sweetwater County, Wyoming.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, has been filed.

At a hearing held on September 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence including the application, and exhibits submitted in support of the authorizations sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Western Transmission Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued May 26, 1964, in Docket No. CP63-329 (31 FPC 1295).

(2) The proposed construction and operation of facilities, and transportation of natural gas in interstate commerce as hereinbefore described, and as more fully described in the application, and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The proposed construction and operation of facilities, and transportation of natural gas in interstate commerce as hereinbefore described are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant in this proceeding authorizing the construction and operation of facilities, and transportation of natural gas in interstate commerce as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities authorized to be constructed and operated by Applicant shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations by January 1, 1967.

(D) Applicant shall file within 30 days after issuance of this order the required revisions of its tariff reflecting the subject facilities in accordance with the Commission's Regulations reflecting the terms and conditions of the transportation, sale and delivery of natural gas to Colorado Interstate Gas Company.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

EL PASO NATURAL GAS COMPANY, DOCKET NOS. G-8932 AND CP66-315

ORDER DENYING MOTION TO CHANGE PLACE OF HEARING

(Issued September 9, 1966)

On August 15, 1966, the Public Utility Commissioner of the State of Oregon filed a motion requesting that the hearing in the above-entitled matter be changed from Washington, D.C., to Portland, Oregon. The following parties filed statements in support of said motion: El Paso Natural Gas Company, Washington Water Power Company, Northwest Natural Gas Company, Cascade Natural Gas Corporation, The People of the State of California and the Public Utilities Commission of the State of California, and The Idaho Public Utilities Commission. Staff filed an answer in opposition.

Our consistent practice over the past decade has been to hold hearings under the Natural Gas Act in Washington, D.C. See *Transwestern Pipeline Company, et al.*, Docket No. CP63-204, *et al.* (January 9, 1964); *Southern California Edison Company, et al.*, 28 FPC 266 (1962). There have been few exceptions to this well established practice. On those few occasions, hearings were scheduled in other locations primarily to accommodate those having limited financial capacity to support small; but significant, interests in proceedings before this Commission. For example, we have ordered hearings to be held in the area where a hydroelectric project is proposed to be located to afford local interests of limited means an opportunity to be heard. In the present proceeding, we do not believe a sufficient showing has been made to depart from our established policy. We will therefore deny the motion of the Public Utility Commissioner of the State of Oregon.

The Commission finds:

The public interest does not require that hearing in this proceeding be changed from Washington, D.C. to Portland, Oregon.

The Commission orders:

The motion filed by the Public Utility Commissioner of the State of Oregon on August 15, 1966, requesting that hearing be held in Portland, Oregon, is denied.

OPINION NO. 497-A

MIDWESTERN GAS TRANSMISSION COMPANY, DOCKET NOS. RP61-19 AND RP62-7 (REOPENED); KNOXVILLE UTILITIES BOARD, ET AL. v. EAST TENNESSEE NATURAL GAS COMPANY, DOCKET NO. RP65-4

OPINION AND ORDER DENYING APPLICATIONS FOR REHEARING AND EXTENDING TIME LIMITATIONS FOR FILING

(Issued September 9, 1966)*

Syllabus

1. Fact that significant share of ordered rate reductions stem from plant additions in 1963 and thereafter as to which neither company elected to

apply liberalized depreciation is not relevant; where Commission concludes use of liberalized depreciation will result in a tax saving this conclusion will apply to all eligible property whether or not company has taken liberalized depreciation thereon. P. 600.

2. **It was not incumbent upon Commission to use settlement tax allowance in computing pipeline's tax allowance for rate making purposes; having required refunds and tariff filing changes to reflect use of liberalized depreciation from October 13, 1964, Commission was precluded from using the straight-line depreciation deduction [used in settlement] which would have been proper had Midwestern been allowed to switch from liberalized to straight-line depreciation. PP. 601, 602.**
3. **Commission makes certain modifications in prior opinion and order; *extends* filing limitations and *denies* applications for rehearing.**

Commissioner O'Connor *dissenting*.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

BLACK, *Commissioner:* By its Opinion No. 497 and accompanying order issued July 15, 1966, 36 FPC 61, in the above-entitled proceeding, the Commission ordered Midwestern Gas Transmission Company (Midwestern) and East Tennessee Natural Gas Company (East Tennessee) to file reduced rates effective January 1, 1967, to reflect reductions in their costs of service and revenue requirements resulting from the computation of Federal income taxes on the basis of liberalized depreciation tax deductions, even though both companies have reverted to the use of straight-line tax depreciation in their tax returns. The Commission also ordered Midwestern to make refunds for the period from October 13, 1964 through December 31, 1966. Applications for rehearing have been filed by both Midwestern and East Tennessee and by Natural Gas Pipeline Company of America (NGPL), the City of Chicago (Chicago), and the Independent Natural Gas Association of America (INGAA). In addition to their various allegations of error in the Opinion, Midwestern and East Tennessee have requested an extension in the time allowed therein for the filings required by our order.

Most of the arguments advanced in the applications for rehearing have been previously made and fully considered. In a number of instances the identical legal points were argued at greater length in the briefs and in the oral argument. Our re-examination of these arguments, and the many allegations of error addressed to other matters in the Opinion fully discussed therein, gives us no cause to depart from our basic determinations herein. A few of the matters raised in the applications may, however, benefit from a further discussion.

Both Midwestern and East Tennessee point out that a significant share of the rate reductions ordered by us stem from plant additions made in 1963 and thereafter as to which neither company has elected to apply liberalized depreciation. This is not relevant. It is clear that where we conclude that use of liberalized depreciation will result in a tax saving, this conclusion will apply to all eligible property whether or not the company has taken liberalized depreciation thereon. In the present case, the effect of such determination is made prospective insofar as East Tennessee is concerned. Only Midwestern's voluntary adherence to a rate settlement expressly providing for retroactive treatment of the question precluded similar treatment in the case of Midwestern.

Midwestern contends that our *Alabama-Tennessee* opinion contemplated tax savings at a constant level and that it would require regular annual plant growth of over 4 percent (to prevent a decline in its net tax depreciable plant on which liberalized depreciation is computed) to produce such "true and continuing" tax savings. East Tennessee makes a similar argument. Both misconceive our *Alabama-Tennessee* opinion and our holdings here. Neither the *Alabama-Tennessee* opinion nor our opinion in these proceedings are premised on a conclusion that the annual amount of the tax saving will be constant or even that tax savings will be realized in each and every year. Instead both concluded only that a significant tax saving would result in the long run from the use of liberalized depreciation by a natural gas company maintaining at least a stable gross plant. The validity of our position is demonstrated by the very chart which Midwestern attaches to its rehearing application to make its point. For as this chart (Appendix C to the staff's initial brief) shows, in the case of Midwestern the use of liberalized depreciation will result in a significant *aggregate* tax savings over any full depreciation cycle under the 1.5 percent annual addition to gross plant situation there postulated.[1] The same would be true (though the *aggregate* saving would be less) if the gross plant remained stable. The essential reason why this is true is that over the cycle there will be need for plant replacement. Of course, the extent of the saving will vary with the rate of growth. It is for this reason that we have elected to use the average savings over a five-year period. The companies are free at any time to re-examine the appropriateness of the level of savings computed from the use of liberalized depreciation and to take such action as is appropriate.

Midwestern observes that on page 82 of the Opinion we incorrectly indicated that its decision to change from liberalized to straight-line depreciation came less than two weeks after the *Alabama-Tennessee* decision. As made clear in the chronology shown on pages 67, 68, the statement should have read that its decision came less than two weeks after the initial decision in this case requiring liberalized depreciation.

Finally, Midwestern contends that we have erred in ordering a flow-through refund retroactive to October 13, 1964. We have read its argument with great care and can find no reason therein for changing or otherwise disturbing our resolution of the issue regarding the time of effectiveness of the reduction required by our decision, which we believe is required by the December 1964 settlement order.[2]

Chicago contends that we erred by understating the amount of the liberalized tax depreciation to be used in computing Midwestern's tax allowance for rate-making purposes. It points out that the straight-line depreciation of $2,598,405 used in the settlement was a reduction of $342,500 from the depreciation allowance used in Opinion No. 444 and contends that it was incumbent upon us to use the settlement tax allowance in our computations.

---

[1] The calculations shown in Appendix A to Opinion No. 497 differ from those shown in Appendix C to staff's initial brief due to revisions in 1965 and 1966 additions based on 1965 actual additions and Midwestern's estimate of its 1966 additions. The projected additions shown in Appendix A to Opinion No. 497 for the period 1967–71 are lower than shown in Appendix C to staff's initial brief because of the smaller gross plant at December 31, 1966. Correction of the staff schedule using the same figures used in preparation of Appendix A of Opinion No. 497 shows a significant aggregate tax savings over the full depreciation cycle, and in no way supports Midwestern's argument that there is no tax saving.

[2] 32 FPC 1548. Although it appeared initially that Midwestern might be subjected to a tax expense under straight-line depreciation of some $2 million in excess of the tax allowance permitted in the cost of service for the period from October 13, 1964 through December 31, 1966, Midwestern has indicated in its application for rehearing (p. 32, footnote 36) that it has obtained conditional permission from the Internal Revenue Service to resume the use of liberalized tax depreciation effective January 1, 1966.

This misses the point of the reduction in tax depreciation in the settlement. The tax depreciation agreed to by all parties (including Chicago) in the settlement was decreased from that established in Opinion No. 444, 32 FPC 993, to reflect the lower tax depreciable base available to Midwestern on the property on which it had utilized liberalized depreciation during the years 1959 through 1962. Our action in Opinion No. 497 in restoring the reduction insures that both the company and its customers are in the identical circumstance as if the company had continued to take liberalized depreciation in accordance with its past practice. Thus, we have established the tax depreciation and the related revenue deduction on the assumed cost which would have been appropriate if straight-line depreciation had always been used as compared with the costs appropriate if liberalized depreciation had been continued. Our findings requiring Midwestern to make refunds and file tariff changes reflecting the use of liberalized depreciation tax deductions from October 13, 1964, precludes us from using a straight-line remaining life tax depreciation deduction which would have been the proper tax deduction had we allowed Midwestern to switch from liberalized to straight-line depreciation.

Disagreeing with our projection of a 4 percent annual growth rate, East Tennessee takes issue in its application with our calculations as to its past growth. It shows that its system sales were 51,192,893 Mcf in 1956 and 57,886,074 Mcf in 1965 for an annual growth rate of only 1.45 percent. The annual sales figures used in the Opinion of 17,371,000 Mcf in 1956 and 34,242,444 Mcf in 1965, equivalent to an average yearly increase of approximately 10 percent, were only for jurisdictional sales as compared to the figures shown above for total system sales.[3] The statistics show that over the years East Tennessee has progressed from a system having 66 percent industrial sales and only 34 percent jurisdictional sales in 1956 to its 1965 position where 59 percent of its sales are made for resale and 41 percent are of an industrial nature. Considering the drastic reduction in purchases by East Tennessee's largest industrial customer resulting from the curtailment of activities at Oak Ridge,[4] East Tennessee has shown a remarkable ability to supplant lost sales with new customers when the need arises. The evidence shows that East Tennessee has a good potential for growth and that the growth of which it is capable actually has been experienced in the past years, particularly in the sales for resale category.

East Tennessee takes issue with our calculations in Appendix C to Opinion No. 497 regarding the annual reduction in its revenue requirements for the period to 1971 due to the use of liberalized depreciation deductions for tax purposes. The "adjustment for 1954–63 additions" is especially highlighted as erroneous. The figure used for the cited adjustment was based on testimony of record, the accuracy of which was not contested by East Tennessee in the proceeding. While we find no reason to change our projection of a 4 percent annual growth rate for East Tennessee, a growth rate which is conservative when compared to the 5-year and 15-year growth histories reflected in the Opinion, we believe that East Tennessee should be given an opportunity to submit, with suitable supporting material, any proposal for a revision in the calculations regarding the 1954–1963 adjustment, as well as any recomputation of the $6,668,182 plant addition which we had assumed to be depreciable for the first time in 1965 but as to which we are now informed East Tennessee took depreciation on in 1964 on a straight-line basis.

---

[3] The same is true for peak-day sales wherein we have utilized jurisdictional peak sales and East Tennessee cites total system peak sales. Our conclusions are not affected thereby.

[4] East Tennessee's Form 2 report for the year 1954 shows sales of 25,593,357 Mcf to A.E.C., or more than 50 percent of total system sales. By 1965 this sale had declined to only 1,834,677 Mcf annually.

As in the case of Midwestern, East Tennessee states in its application for rehearing that it has received permission from the Internal Revenue Service to revert to liberalized depreciation for the 1966 tax year upon the acceptance of certain conditions. As brought out in the Opinion, the only reason for not ordering the rate reduction prior to January 1, 1967, was our belief that, under Internal Revenue Service rulings, this was the earliest date possible for the reversion. Subject to the unspecified conditions attached by the Internal Revenue Service, the basis for the selection of the January 1, 1967 date may now have been vitiated. If so, and if East Tennessee does in fact file its final 1966 tax return using liberalized depreciation,[5] it should be required under the Opinion to flow-through the difference to its customers. This matter will be left open for the present pending the final determination of whether the 1966 taxes are computed on an accelerated or straight-line basis. A copy of the Internal Revenue Service ruling should be provided the Commission by East Tennessee.

The applications for rehearing filed by NGPL and INGAA are, essentially restatements of their previous arguments. We find nothing in these filings requiring a detailed re-examination.

As noted above, both Midwestern and East Tennessee have asked for an extension in the filing requirements of the order accompanying Opinion No. 497. The time requested is 30 days after the order on rehearing. We believe the time requested by Midwestern should be granted. As to East Tennessee, the company will be permitted a period of 30 days after Commission approval of any proposed revisions to Appendices C and D as may be forthcoming within which to submit the substitute tariff sheets required by our order.

The Commission further finds:

The assignments of error and grounds for rehearing set forth in the applications for rehearing filed by Natural Gas Pipeline Company of America on August 11, 1966, by East Tennessee Natural Gas Company and Midwestern Gas Transmission Company on August 12, 1966, and by the City of Chicago and the Independent Natural Gas Association of America on August 15, 1966, present no new facts or legal principles which would warrant any change or modification in the Commission's Opinion No. 497 and order except as specified below.

The Commission orders:

(A) Not later than October 3, 1966, East Tennessee shall file any proposed revisions to Appendices C and D of Opinion No. 497 with the Commission for its approval. The revised calculation shall be prepared in accordance with the Opinion and shall reflect not less than a 4 percent average annual growth rate. Copies of any proposal so made also shall be served on the other parties to this proceeding. Any party wishing to comment thereon shall submit a statement to the Commission and the other parties not later than October 17, 1966.

---

[5] East Tennessee states that "it does not intend to use liberalized depreciation in 1966 and in the future unless compelled to do so by an order of the Commission which becomes final."

(B) Final decision is reserved on the effective date of the use of the liberalized depreciation method in the computation of East Tennessee's tax costs for ratemaking purposes. In any event, such date shall not be prior to July 15, 1966.

(C) The time limitations specified in paragraphs (A) and (B) of the order accompanying Opinion No. 497 are extended with regard to Midwestern for a period of 30 days after the date of issuance of this order. With regard to East Tennessee, the time specified in paragraph (A) shall extend for a period of 30 days after Commission approval of any revisions to Appendices C and D accompanying Opinion No. 497.

(D) In all other respects, the applications for rehearing filed in this proceeding are denied.

Commissioner O'Connor *dissenting.*

Commissioner Bagge *dissenting* for the reasons set forth in his statement accompanying Opinion No. 497 issued July 15, 1966, 36 FPC at p. 91.

O'CONNOR, *Commissioner, dissenting:*

I would grant rehearing for the reasons stated in my dissent, 36 FPC at p. 89 to the initial opinion in the hope that in so doing the majority would more fully consider and reverse its erroneous decision. Since rehearing is not to be granted, there are two further issues upon which I am compelled to comment.

The majority states in its order denying rehearing (p. 600) that, "It is clear that where we conclude that use of liberalized depreciation will result in a tax saving, this conclusion will apply to *all eligible property* whether the company has taken liberalized depreciation thereon." [emphasis added] It is difficult to discern from this vague language whether the majority is implying a repudiation of the *United* and *Wisconsin Michigan* cases wherein a unanimous Commission declined to force those companies to take liberalized depreciation. I should hope that no such implication is intended, but rather that those two opinions would remain unimpaired so that in the future, if the problems they represented are again directly before us, the Commission would adhere to the philosophy of those cases, and abide by their precedents. If, however, the Commission is repudiating those cases, then it is in fact taking the third step to which I referred in my dissenting statement (p. 89) regarding the forcing of a company never having utilized liberalized depreciation to do so. To this course, I would most vigorously dissent.

Through use of its plethora of recondite figures and a reliance on speculative projections and tables reflecting alleged "tax savings" to be realized as a result of using liberalized depreciation, the majority indicates that the companies will be paying less taxes under liberalized than straight-line depreciation. An example is to be found in footnote 19, p. 71, of the majority's opinion.

"The Statistics for Interstate Natural Gas Pipeline Companies reveal that $47,850,000 in deferred tax monies was accrued by all Class A and B pipelines in the year 1963. This amount, if flowed-through to the consumers in 1963, would have resulted in an industry-wide rate reduction of approximately $100 million."

It follows, therefore, that the reduced taxes which would have been payable to the Treasury will have to be made up in some other way and it takes very little imagination to figure who will ultimately bear the burden of making up the difference. In the regulated utility industry, the consumer and taxpayer are one and the same, a fact not dealt with by the majority. Consequently, the alleged "savings" are not so attractive as they might seem under the persuasion of the majority's opinion.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

POWER SYSTEM STATEMENTS — MISCELLANEOUS AMENDMENTS TO F.P.C. FORMS NOS. 12, 12-A, 12-D, DOCKET NO. R-289

ORDER NO. 312-A

AMENDING § 141.51 OF THE COMMISSION'S REGULATIONS

(Issued September 9, 1966) *

Order No. 312, issued in this proceeding on December 20, 1965 (34 FPC 1499, 30 F.R. 16106), among other things, amended the Annual Report Form No. 12 by revising certain existing schedules and adding a new schedule. The list of schedules contained in the form which appears in paragraph (c) of § 141.51 of the regulations should have been amended so as to correctly list the current contents of the report form. We are here supplying the inadvertent omission.

The Commission finds:

Notice of this amendment prior to adoption is unnecessary and good cause exists for making it effective immediately.

The Commission, acting pursuant to the provisions of section 309 of the Federal Power Act as amended, (49 Stat. 858; 16 U.S.C. 825h), *orders:*

(A) Paragraph (c) of §141.51, Part 141, Subchapter D, Chapter I of Title 18 of the Code of Federal Regulations, is revised by changing item 4 in the list of schedules to read "4. Conventional hydroelectric plant data." and adding a new item 4-A to read "4-A. Pumped storage plant data."

(B) The revisions here adopted shall be effective upon the issuance of this order.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

OPINION NO. 465-A

RUMFORD FALLS POWER COMPANY, PROJECT NO. 2333

MEMORANDUM OPINION ON REMAND

(Issued September 9, 1966)

*Published in the Federal Register on September 16, 1966 (31 F.R. 12098).

interstate compact; it does not require that in every case person must have the rights *before* application is filed and Commission acts thereon. P. 607.

2. From its context in Federal Power Act, it appears that phrase "beneficial public uses" does not mean that uses must be by public agencies. P. 608.
3. Joint use is a public use if it has a public benefit; it has a public benefit if it is consistent with a comprehensive plan for development of the waterway—thus, use of a project reservoir for cooling water for a steam electric plant could be a public use even though plant belonged to privately owned utility. P. 608.
4. Commission objective in Article 31 is to provide some continuing control of water resources with respect to policy for future use of project properties which may enhance optimum utilization of water-way while carefully safeguarding licensee's interest in his development. P. 608.
5. Article 31 specifically states that licensee will be compensated by joint user and order makes clear that compensation will be at least sufficient to prevent an adverse effect on economics of development—consequently phrase "consistent with primary objective of the project" is deleted as unnecessary. P. 608.
6. Standard of compensation respecting joint use of project property discussed; Commission intends that licensee at least be made whole for any damages or expenses incurred by joint use. PP. 608, 609.
7. Article 31 (relating to multiple uses of project works for water supply purposes) is not intended to supersede, wholly or partially, any other condition or provision in licenses in which it is included. P. 609.
8. Upon remand, Commission *modifies* Article 31 of the license.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, David S. Black and Carl E. Bagge.

Ross, *Commissioner:*

This proceeding, which is before the Commission on remand from the First Circuit, is to clarify Article 31 of the license for the Rumford Falls Power Company's hydroelectric development, Project No. 2333, on the Androscoggin River at Rumford, Maine. We issued the order granting license on May 14, 1965, 33 FPC 1016. Applying for rehearing, Rumford Falls contended that Article 31 was unauthorized by statute, was unreasonable and arbitrary, and violated due process. We denied the application in Opinion No. 465 on July 12, 1965, 34 FPC 27. On review the First Circuit found that the article was unclear in a number of respects, and it remanded "for clarification, either by revision of the article itself, or by way of an opinion responsive to the questions * * * raised * * *" *Rumford Falls Power Co.* v. *F.P.C.*, 355 F. 2d 683 (1966) at page 688.

Article 31, as it appears in the order issuing license, reads:

> On the application of any person, association, corporation, Federal agency, State or municipality, the Licensee shall, after notice and opportunity for hearing, permit such reasonable use of its reservoirs or other project works or parts thereof as may be ordered by the Commission in the interest of comprehensive development of the waterway or waterways involved and the conservation and utilization of water resources of the region for water supply for steam-electric, irrigation, industrial, municipal or similar purposes, consistent with the primary objective of the project. The Licensee shall receive such reasonable compensation as may be appropriate for use of its reservoirs or other project works or parts

> thereof for such purposes, any such compensation to be fixed either by Commission approval of an agreement between the Licensee and the party or parties benefiting or by the Commission in the event the parties are unable to agree. Applications shall contain information in sufficient detail to afford a full understanding of the proposed use, including satisfactory evidence that the applicant possesses necessary water rights pursuant to applicable State law, or a showing of cause why such evidence cannot be submitted, and a statement as to the relationship of the proposed use to any State or municipal plans or orders which may have been adopted with respect to the use of such waters.

The court said that this language raised four questions which required answers before it could reach the issue of the article's validity.

(1) Does a person, in order to apply for joint use of a reservoir or other property in a licensed project, have to possess necessary state water rights? The question arises because Article 31 provides that an applicant for joint use of project property, as an alternative to submitting evidence that he has such rights, may show cause why the evidence cannot be submitted.

Article 31 contemplates that when water rights needed for a joint use are owned by some entity other than the licensee or by the licensee for nonproject uses, such as for industrial processing, the joint user secure the necessary water rights under state law or interstate compact. The article does not require, however, that in every case the person must have the rights *before* he files the application or the Commission acts on it. If the joint user has the capacity to obtain the rights and the intention to do so, it may be sufficient that he so aver. This makes it possible for the applicant to proceed simultaneously in securing permission to make joint use of project property and in obtaining necessary water rights. It also resolves the difficulty, which an applicant may face in some states, of having to be able to put the water to beneficial use before being able to obtain rights in it. If the Commission were to grant an application to make joint use before the applicant had the necessary water rights, the grant would be made subject to his perfecting these rights.

When the water rights which the joint user seeks to employ are owned by the licensee for project use, the Commission can require the licensee to permit their use under the article, as it can require him to permit the use of other project property. We do not, however, intend to require a licensee to obtain water rights (or, for that matter, other property rights) to permit their use by a third party under Article 31.

Unless a person is a licensee, he does not have the benefit of the power of eminent domain conferred by Section 21 of the Act (16 U.S.C. 814). If he must obtain rights in water or realty for the joint use from persons other than the licensee, he must do it under state law (or, possibly in a few water rights situations, under interstate compact). The same is true if he must obtain rights from the licensee which are not for project use.

The Commission has authority to require joint use irrespective of state law for the purpose of protecting life, health, or property. See Section 10(c) of the Act (16 U.S.C. 803(c)) and the standard license article adopted pursuant to it (Article 6 of Form L-3 (32 FPC 1115)). Joint use for such purpose, it is noted, could be required either with or without compensation.

(2) May the joint use of project property be for private, nonmunicipal uses? The question arises because Section 10(a) of the Federal Power Act requires that the Commission in licensing a project find that it "will be best

adapted * * * for * * * beneficial *public* uses" (16 U.S.C. 803(a)). [Emphasis added.]

It appears from its context in the Act that the phrase "beneficial public uses" does not mean that the uses must be by public agencies. Section 10(a) specifies that one beneficial public use is "waterpower development," which, pursuant to the Act, may be undertaken by either private or state entities. See Section 4(e) of the Act, which authorizes the Commission "To issue licenses to citizens of the United States, or to any association of such citizens, or to any corporation organized under the laws of the United States or any State thereof, or to any State or municipality" (16 U.S.C. 797(e)). In our view, a joint use is a public use if it has a public benefit, and it has a public benefit if it is consistent with a comprehensive plan for development of the waterway. Thus, the use of a project reservoir for cooling water for a steam-electric plant could be a public use even though the steam plant belonged to a privately owned utility.

(3) May the joint use in any way adversely affect the licensee's operation of the project for power? Article 31 provides that the joint use must be "consistent with the primary objective of the project." The Court noted at page 687 of its opinion that the clause could be interpreted to mean that the Commission is "limited only to what it might determine to be a reasonable consistency." However, as noted by the Court at pages 686 and 687 and in note 4, the brief for the Commission before the court interpreted this clause as meaning that the joint use could not impair in any way the licensee's power operations at the project.

Rapid changes in the technology of power production and in the relative urgency of the need for water for various uses make it impossible to foretell with assurance, when a license is issued, what will be the best use of the water resource throughout the next fifty years, the usual term of a license. In these circumstances, some continuing control to promote comprehensive development is necessary. Our objective in Article 31 is to provide such control with respect to policy for future use of project properties for water supply which may enhance optimum utilization of water-way while carefully safeguarding the licensee's interest in his development.

We did not intend, by using the phrase "consistent with the primary objective of the project," that a joint use which would contribute to comprehensive development of the waterway would be precluded simply because it might impair, to some degree, the power operations of the development. The phrase, or a variation of it, has been used in a number of license provisions under which the licensee may be required to assume some future obligations, but without compensation. See, for example, Article 15 of the license for the Rumford Falls development, which is the Commission's standard article on facilities for fish and wildlife protection (32 FPC 1116). But Article 31 is not such a provision. It specifically states that the licensee will be compensated by the joint user, and in this order, we make clear that the compensation will be at least sufficient to prevent an adverse effect by the authorized joint use on the economics of the development. Consequently, upon further consideration, we conclude that the phrase "consistent with the primary objective of the project" is unnecessary, and we delete it.

(4) What is the standard of compensation? Article 31 provides that the licensee shall receive "such reasonable compensation as may be appropriate." The Commission orders had given no real indication as to the nature of any compensation contemplated or the standards intended to be applied.

It is our intention that the licensee at least be made whole for any damages or expenses which the joint use causes him to incur.

Suppose, for example, that the joint use results in an impairment in the licensee's power operations. Typically, the Commission's licensees are electric utilities having multiple generating stations and interconnections with other systems, and if power is not produced at the licensed project, it can be produced at another station or purchased from another utility. When, as in the present case, the licensee has only one generating source, it can presumably purchase power from the electric utility servicing the area. The annual compensation for the power impairment would be the annual additional cost of obtaining the power from an alternate source.

Similarly, if new project structures are needed because of the joint use, or if existing project works have to be modified, the compensation would include the construction cost, with an adjustment to take account of any additional value which they might have to the licensee.

In some circumstances, it might be appropriate for a joint user to make a payment in addition to damages or expenses incurred by the licensee. An example might be when an electric utility proposes to use another utility's project reservoir for cooling water for a steam-electric plant. Such use could result in considerable savings to the joint user. It seems doubtful to us that the joint user should be the exclusive beneficiary of the savings. We believe that he might properly be required to make a payment in addition to the licensee's damages and expenses.

We also wish to make clear that we do not intend that Article 31 supersede, wholly or partially, any other condition or provision in licenses in which it is included.

Where it appears appropriate, we modify Article 31 in accord with the above discussion.

The Commission finds:

It is appropriate and in the public interest in administering Part I of the Federal Power Act, particularly Sections 10(a) and 10(g) thereof (16 U.S.C. 803(a), 803(g)), that Article 31 of the license order of May 14, 1965, for the Rumford Falls Power Company's Project No. 2333 be modified as hereinafter provided.

The Commission orders:

Article 31 of the license order of May 14, 1965, for the Rumford Falls Power Company's Project No. 2333 is hereby modified to provide as follows:

> On the application of any person, association, corporation, Federal agency, State or municipality, the Licensee shall, after notice and opportunity for hearing, permit such reasonable use of its reservoirs or other project properties, including works, lands and water rights, or parts thereof, as may be ordered by the Commission in the interest of comprehensive development of the waterway or waterways involved and the conservation and utilization of water resources of the region, for water supply for the purpose of steam-electric, irrigation, industrial, municipal or similar uses. The Licensee shall receive reasonable compensation, at least full reimbursement for any damages or expenses which the joint use causes him to incur, for use of its reservoirs or other project properties or parts thereof for such purposes, any such compensation to be fixed by the Commission either by approval of an agreement between the Licensee and the party or parties benefiting or after notice and op-

portunity for hearing. Applications shall contain information in sufficient detail to afford a full understanding of the proposed use, including satisfactory evidence that the applicant possess necessary water rights pursuant to applicable State law, or a showing of cause why such evidence cannot be concurrently submitted, and a statement as to the relationship of the proposed use to any State or municipal plans or orders which may have been adopted with respect to the use of such waters.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP64-270; SOUTHERN NATURAL GAS COMPANY, CP64-314; CITY OF BUFORD, GEORGIA, CP65-11, CP65-20; CITY OF SUGAR HILL, GEORGIA, CP65-10, CP65-19; CITY OF AUSTELL, GEORGIA, CP65-74

FINDINGS AND ORDER OMITTING INTERMEDIATE DECISION PROCEDURE, GRANTING IN PART AND DENYING IN PART APPLICATIONS FOR CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND GRANTING AND DENYING APPLICATIONS PURSUANT TO SECTION 7(a)

(Issued September 9, 1966)

By Opinion No. 493, issued June 8, 1966, in Docket No. CP64-270, *et al.*, 35 FPC 917, the Commission, *inter alia*, remanded for further proceedings the mutually exclusive competitive proposals of Transcontinental Gas Pipe Line Corporation (Transco) in Docket No. CP64-270, and Southern Natural Gas Company (Southern) in Docket No. CP64-314 for the delivery of additional gas to Atlanta Gas Light Company (Atlanta Gas) in the Atlanta market area. We further indicated, among other things, (1) that the record was inadequate to support certification of the Transco proposal and (2) the type of proposal we felt would be in the public interest for service to Atlanta. In view of the remand of the above proposals, action on the applications of City of Buford, Georgia in Docket Nos. CP64-11 and CP65-20, City of Sugar Hill, Georgia in Docket Nos. CP65-10 and CP65-19, and City of Austell, Georgia in Docket No. CP65-74 for orders directing service under Section 7(a) of the Natural Gas Act (Act) was also deferred.

On August 1, 1966, Transco filed its second amendment to its application in Docket No. CP64-270 in which it proposes to construct 36.75 miles of 16-inch pipeline and 17.72 miles of 12-inch pipeline from a point on its main line near Monroe, Georgia, extending to Ball Ground, Georgia, together with 3 new sales meter and regulator stations for the purpose of delivering 40,000 Mcf per day to Atlanta Gas. These facilities are in lieu of the more costly 20-inch pipeline facilities originally proposed by Transco for the delivery of gas to Atlanta Gas. Transco also proposes the same main line and gathering facilities as proposed in its first amendment to the application in said Docket No. CP64-270, namely, 22.17 miles of 36-inch main line loops and 35.09 miles of 30-inch loop lines along Transco's southeast Louisiana gathering system.

Pursuant to said Opinion No. 493, the Presiding Examiner by notice issued August 8, 1966, convened a hearing on August 25, 1966. At said hearing, the parties presented evidence with respect to proposals which (1) are not mutually exclusive, (2) permit a resolution of the issues in these remanded proceedings consistent with our findings in Opinion Nos. 493, *supra*, and 493–A, 36 FPC 335, and (3) render the required services to Atlanta Gas and to all of the 7(a) applicants. Transco's second amendment to its application, and appended exhibits, whereby Transco proposes to construct the facilities heretofore described and render service of 40,000 Mcf per day to Atlanta Gas, were received in evidence. Southern introduced exhibits whereby it proposes to sell 10,000 Mcf per day of gas to Atlanta Gas, pursuant to a letter agreement between the parties dated August 24, 1966. However, it now seeks to construct and operate approximately 23 miles of 14-inch line on the proposed North Atlanta Line route, instead of the more costly 45.5 miles of 16-inch line proposed originally, terminating such line in the vicinity of Marietta, Georgia. In addition, Southern proposes to serve the City of Austell, Georgia, from such pipeline as requested by Austell in Docket No. CP65–74.

The total estimated cost of the facilities proposed by Transco in its second amended application, including its main line loops and gathering facilities, is $12,709,000, of which $3,407,806 represents the estimated cost of the Monroe to Ball Ground extension and the 3 meter stations. The estimated cost of Southern's proposed pipeline to Marietta, including a measuring station at Marietta, Georgia, for the delivery of gas to Atlanta Gas and a measuring station at Austell for the delivery of gas to Austell, is $1,663,810 as opposed to an estimated $3,168,241 for its original project. Based on the evidence introduced by the applicants, each of said projects is economically feasible and can be financed. Atlanta Gas has now, unlike its showing on the original record,[1] clarified and identified its market requirements in the Atlanta Area.

In Docket Nos. CP65–11 and CP65–10, respectively, Buford and Sugar Hill (existing customers of Transco) request a new delivery point from Transco on the proposed Monroe-Ball Ground line. In the alternative, in Docket Nos. CP65–20 and CP65–19, respectively, the cities request a supply of gas from Southern. In view of our action authorizing Transco to construct and operate the proposed Monroe-Ball Ground line, and Transco's consent to the said new delivery point, the applications in CP65–11 and CP65–10 should be granted and the alternative applications in CP65–20 and CP65–19 should be denied.

Austell's Section 7(a) application against Southern in Docket No. CP65–74 requests that Southern provide Austell with an additional delivery point on Southern's proposed pipeline to Marietta. Southern has consented to Austell's application. In view of our action authorizing Southern to construct and operate its proposed pipeline to Marietta, the application of Austell in Docket No. CP65–74 should be granted.

At the conclusion of the hearing held on August 25, 1966, staff counsel in behalf of the staff and all other parties requested waiver of the intermediate decision procedure. The Examiner thereupon certified the record to the Commission.

Upon consideration of the entire record in this proceeding, the Commission *finds:*

(1) Due and timely execution of the Commission's functions imperatively and unavoidably require the omission of the intermediate decision procedure in these proceedings.

(2) Transcontinental Gas Pipe Line Corporation and Southern Natural Gas Company are engaged in the transportation of natural gas in interstate com-

---

[1] See Opinion No. 493, 35 FPC at p. 926.

merce and in the sale in interstate commerce of natural gas for resale and ultimate public consumption and each is, therefore, a "natural-gas company" within the meaning of the Natural Gas Act.

(3) The facilities which Transco proposes to construct and operate, as described herein and as more fully described in its second amendment to the application in Docket No. CP64–270, and the facilities which Southern proposes to construct and operate, as described herein and as more fully described in its revised exhibits in the remanded proceeding, will be used in the transportation and sale of natural gas in interstate commerce for resale, subject to the jurisdiction of the Commission, and the construction and operation of such facilities are subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) Transco and Southern are each able and willing properly to do all the acts and to make the sales and perform the services proposed by each, and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) The construction and operation of the facilities proposed by Transco and Southern are (1) not mutually exclusive, (2) required by the public convenience and necessity and (3) supported by the market estimates of Atlanta Gas. Certificates therefor should be issued as hereinafter ordered and conditioned.

(6) No undue burden will be placed on Transco and it is necessary and in the public interest that Transco be directed to establish connection with the Cities of Buford and Sugar Hill, Georgia, from its Monroe-Ball Ground pipeline, as requested by said cities in Docket Nos. CP65–11 and CP65–10, respectively; the applications of said cities in Docket Nos. CP65–20 and CP65–19 should be denied.

(7) No undue burden will be placed on Southern and it is necessary and in the public interest that Southern be directed to establish connection with the City of Austell, Georgia, from its pipeline to Marietta as requested by Austell in Docket No. CP65–74.

(8) The public convenience and necessity require that the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4) and (e) of Section 157.20 of the Commission's Regulations under the Act shall attach to the certificates herein issued to Transco and Southern and to the exercise of the rights granted thereunder, and that the time within which the facilities authorized by this order shall be constructed and placed in actual operations shall be fixed at six months from the date of issuance of the order herein.

The Commission orders:

(A) A certificate of public convenience and necessity is hereby issued to Transcontinental Gas Pipe Line Corporation, upon the terms and conditions of this order, authorizing Transco to construct and operate the facilities hereinbefore described, as more fully described in its second amendment to application in Docket No. CP64–270, and to sell and deliver to Atlanta Gas Light Company a volume of 40,000 Mcf per day under Transco's Rate Schedule CD–1, inclusive of the 15,000 Mcf per day heretofore temporarily authorized in said docket.

(B) A certificate of public convenience and necessity is hereby issued to Southern Natural Gas Company, upon the terms and conditions of this order, authorizing Southern to construct and operate the facilities and to render the service to Atlanta Gas Light Company as hereinbefore described, and as more fully described in its exhibits in the remanded proceeding. Certification of the facilities proposed by Southern in Docket No. CP64–314 which are not specifically authorized herein or have not been heretofore authorized in Opinion Nos. 493 and 493–A, issued June 8, 1966, and July 29, 1966, respectively, is hereby denied.

(C) The applications of the Cities of Buford, Sugar Hill and Austell, Georgia, in Docket Nos. CP65–11, CP65–10, and CP65–74, respectively, are hereby granted. The applications of the Cities of Buford and Sugar Hill, Georgia, in Docket Nos. CP65–20 and CP65–19, respectively, are hereby denied.

(D) The certificates issued by paragraphs (A) and (B) above and the rights granted thereunder are conditioned upon compliance by the applicants with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(E) The facilities authorized in paragraphs (A) and (B) above shall be completed and placed in actual operation within six months from the date of this order.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

COLORADO INTERSTATE GAS COMPANY, DOCKET NO. CP61–143; NATURAL GAS PIPELINE COMPANY OF AMERICA, CP61–149; ARKANSAS LOUISIANA GAS COMPANY, CP61–163

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING TARIFF SHEETS FOR FILING

(Issued September 12, 1966)

Colorado Interstate Gas Company (Colorado Interstate) on June 27, 1966, Natural Gas Pipeline Company of America (Natural) on June 24, 1966, Arkansas Louisiana Gas Company (Arkansas Louisiana) on June 17, 1966, and supplemented on July 29, 1966, filed in the above-designated dockets their respective applications to further amend an order of the Commission issued on January 3, 1963, in Docket No. CP61–143, *et al.*, 29 FPC 8, and amended December 30, 1963, 30 FPC 1615, June 2, 1964, 31 FPC 1332, and May 25, 1965, 33 FPC 1065, which order and amendments authorized (1) construction and operation of certain facilities, (2) the exchange of natural gas between Natural and Colorado Interstate and (3) the sale to Arkansas Louisiana limited in duration to May 1, 1966, all as more fully set forth in their respective applications.

Colorado Interstate, Natural, and Arkansas Louisiana seek to amend the order issuing certificates of public convenience and necessity in the above dockets so as to extend the short-term interruptible sale and exchange of natural gas authorized therein to May 1, 1967 from the present expiration date of May 1, 1966. In addition to the requested extension of duration of the exchange period and short-term interruptible sale, Colorado Interstate and Natural seek authorization to change the delivery point for said sale and exchange from Texas County, Oklahoma to Beaver County, Oklahoma.

The order of the Commission issued January 3, 1963, as amended December 30, 1963, June 2, 1964, and May 25, 1965 in the subject dockets authorized Colorado Interstate to sell up to 35,000 Mcf of natural gas daily to Arkansas Louisiana from the Mocane Laverne area in the Oklahoma Panhandle area on a short-term interruptible basis and the exchange of equivalent volumes of natural gas between Colorado Interstate and Natural in order to effect said sale. Deliveries are made to Arkansas Louisiana by Natural at a point in Grady County, Oklahoma for the account of Colorado Interstate, and equivalent volumes are delivered by Colorado Interstate to Natural at an interconnection between their two systems in Texas County, Oklahoma.

Colorado Interstate and Natural state that by letter agreement dated April 22, 1966, Colorado Interstate and Arkansas Louisiana have amended the exchange agreement to extend the term thereof to May 1, 1967. Colorado Interstate and Natural further state that the exchange agreement has also been amended to change the point of delivery of exchange gas to be delivered to Natural by Colorado Interstate from the previous location at Natural's Compressor Station No. 101, Texas County, Oklahoma, to a new point of delivery in Beaver County, Oklahoma, at which point Colorado Interstate will sell and deliver gas to Natural, pursuant to Colorado Interstate's rate schedule H-1. Authorization for the required facilities was issued June 13, 1966, 35 FPC 979, to Colorado Interstate and Natural by orders issued in Docket Nos. CP66-316 and CP66-318, respectively.

The petitions to amend of Colorado Interstate and Natural states that the redelivery point of the exchange gas by Natural to Arkansas Louisiana, for the account of Colorado Interstate will continue to be made at the existing point of delivery in Grady County, Oklahoma.

Colorado Interstate states in the instant petition that its applicable rate schedule has been revised (Revised Rate Schedule X-12) and filed concurrently herewith, which revised rate schedule calls for a price of 18.0 cents per Mcf for gas sold by Colorado Interstate to Arkansas Louisiana. The gas sold by Colorado Interstate is delivered to Natural and redelivered by Natural to Arkansas Louisiana pursuant to Colorado Interstate's Rate Schedule X-14.

Arkansas Louisiana states that the purpose of the instant filing is to amend its certificate, as heretofore amended, in Docket No. CP61-163:

(1) to extend the term of Arkansas Louisiana's authorization to 12:01 a.m., May 1, 1967,

(2) to increase during the period September 1, 1966, through April 30, 1967, the daily average deliveries from 10,000 Mcf to 18,000 Mcf,

(3) to increase during the period September 1, 1966, through April 30, 1967, the daily minimum deliveries from 8,000 Mcf to 10,000 Mcf, and

(4) to increase the price of all gas delivered after April 30, 1966, from 14.5 cents to 18.0 cents per Mcf.

Natural filed revised tariff sheets[1] to its exchange Rate Schedule X-8 reflecting extension of term to May 1, 1967, and change in point of receipt of gas from Colorado Interstate to Beaver County, Oklahoma.

Colorado Interstate filed revised tariff sheets to its Rate Schedule X-12[2] providing for the following changes for the sale to Arkansas Louisiana:

(1) During the period September 1, 1966, through April 30, 1967, Arkansas Louisiana shall take-or-pay for an average daily quantity of 18,000 Mcf instead of the present quantity of 10,000 Mcf. Reduced by the amount

---

[1] Rate Schedule X-8, to Natural's FPC Tariff, Second Revised Volume No. 2. Fourth Revised Sheet No. 32; Sixth Revised Sheet Nos. 33 and 34; Original Sheet No. 33A.

[2] Rate Schedules X-12, to Colorado Interstate's FPC Gas Tariff, Second Revised Volume No. 2.

Seventh Revised Sheet No. 38; Fifth Revised Sheet No. 39; Fourth Revised Sheet No. 39A; Second Revised Sheet No. 39B; Original Sheet No. 39C.

of curtailment in the event Colorado Interstate is unable to deliver the above quantity.

(2) Minimum deliveries shall be 10,000 Mcf instead of 8,000 Mcf per day.

(3) The contract term is extended for another year to May 1, 1967.

(4) The price of all gas delivered under the new contract term shall be 18.0 cents per Mcf instead of the old price of 14.5 cents per Mcf.

Colorado Interstate filed also revised tariff sheets to its exchange Rate Schedule X-14[3] reflecting extension of term to May 1, 1967, and change of delivery point to Beaver County, Oklahoma.

Due notice of the subject petitions to amend and opportunity for hearing has been given by publication in the Federal Register on July 19, 1966 (31 F.R. 9761) in Docket No. CP61-143; on July 19, 1966 (31 F.R. 9761) in Docket No. CP61-149; and July 2, 1966 (31 F.R. 9142) in Docket No. CP61-163. No protest, petition to intervene, notice of intervention or request for hearing has been filed concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require (1) that the Commission's order issued on January 3, 1963, in Docket No. CP61-143, and amended on December 30, 1963, June 2, 1964, and May 25, 1965, be further amended, as requested by Colorado Interstate, Natural and Arkansas Louisiana in their respective petitions to amend, so as to (a) extend the period of authorization for the short-term interruptible sale and exchange of natural gas authorized in the Commission's order issued January 3, 1963, from May 1, 1966, to May 1, 1967, and (b) authorize requested changes with respect thereto and (c) change the delivery point for said sale and exchange from a point in Texas County, Oklahoma, to a new point in Beaver County, Oklahoma, and (2) accept for filing the revised tariff sheets filed by Colorado Interstate on June 27, 1966, and on July 7, 1966; and by Natural on June 27, 1966 to become effective on the date of issuance of this order.

The Commission orders:

(A) The Commission's order issued on January 3, 1963, in Docket No. CP61-143, *et al.*, and amended on December 30, 1963, June 2, 1964, and May 25, 1965, be further amended, as requested by Colorado Interstate, Natural, and Arkansas Louisiana in their respective petitions to amend, so as to (1) extend the period of authorization for the short-term interruptible sale and exchange of natural gas authorized in the Commission's order issued January 3, 1963, from May 1, 1966, to May 1, 1967, (2) authorize requested changes with respect thereto and (3) change the delivery point for said sale and exchange from a point in Texas County, Oklahoma, to a new point in Beaver County, Oklahoma, and (4) accept for filing the revised tariff sheets filed by Colorado Interstate on June 27, 1966[4], and on July 7, 1966[5]; and by

Natural on June 27, 1966[6] to become effective on the date of issuance of this order.

(B) In all other respects said orders shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

IDAHO POWER COMPANY, PROJECT NO. 1971

ORDER APPROVING PROJECT EXHIBIT L DRAWINGS

(Issued September 12, 1966)

On August 4, 1966, Idaho Power Company, licensee for Project No. 1971 in the Middle Snake River, filed for Commission approval, pursuant to provisions of the Commission's order issued January 28, 1966, 35 FPC 162, two Exhibit L drawings (FPC 1971-216 and 217) of facilities for passing upstream migrant salmonids at the Hells Canyon dam. The structure consists of a floating barge moored to the left (Oregon) shore abutment adjacent to the powerhouse, but free to follow fluctuations in tailwater, and includes pumps to provide jet attraction flows across the face of the powerhouse and trapping and holding flows in the trap, a fish entrance, a false weir leading into a hopper, and a jib crane to transfer the hopper with fish to trucks for transport to artificial propagation facilities or to other waters pursuant to the Commission's order of January 28, 1966.

By letter of July 29, 1966, from the Acting Program Director of the Columbia Fisheries Program Office, Bureau of Commercial Fisheries, prior approval of the drawings by the fishery agency technicians has been given subject to the development of detail design drawings. An engineer of the Columbia Fisheries Program Office was designated "coordinating engineer" for the Hells Canyon fish facilities in a letter from that office dated March 31, 1966.

The drawings have been reviewed by the Commission's staff and found adequate to pass the numbers of anadromous fish anticipated at the Hells Canyon development. Licensee shall continue to cooperate with the fishery agencies during the preparation of detail design drawings, construction and operation to ensure facilities best suited to function for the purpose designed.

The Commission finds:

The following Exhibit L drawings, designated as the Hells Canyon Development, Permanent Fish Facilities, conform to the Commission's rules and regulations and should be approved for construction, generally as shown, as part of Project No. 1971.

Title	*FPC No.*
General Arrangement	1971-216, and,
Trapping Barge—Plans and Sections	1971-217

The Commission orders:

The Exhibit L drawings described in the above finding are hereby approved for construction as part of Project No. 1971, generally as shown;

---

[6] Rate Schedule X-8, to Natural's FPC Tariff, Second Revised Volume No. 2. Fourth Revised Sheet No. 32; Sixth Revised Sheet Nos. 33 and 34; Original Sheet No. 33A.

provided that the Licensee shall continue to cooperate with the fishery agencies during the preparation of detail design drawings, construction and operation; and provided further that nothing herein shall be construed as full compliance with the provisions of Article 35 of the license for Project No. 1971.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP66-208

ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 12, 1966)

On July 25, 1966, Michigan Wisconsin Pipe Line Company (Petitioner) filed in Docket No. CP66-208 a petition to amend the order of the Commission issued in said docket on May 24, 1966, 35 FPC 777, requesting an increase in the Maximum Daily Quantity (MDQ) of natural gas to be delivered by Petitioner to Madison Gas and Electric Company, all as more fully set forth in the petition to amend.

The certificate of public convenience and necessity issued in the instant docket on May 24, 1966, authorized Petitioner to construct and operate certain natural gas facilities and to lease the Loreed Field, in west central Michigan, from Michigan Consolidated Gas Company in order to increase by 264,000 Mcf its daily system sales capacity and to sell and deliver additional gas to existing customers and to accommodate anticipated requests for service to new communities.

By the instant filing, Petitioner seeks authority to increase its natural gas delivery to Madison Gas by an additional 5,000 Mcf per day, or a total MDQ of 67,000 Mcf for the contract year commencing September 1, 1966.

No change in rate is proposed by Petitioner. The proposed service will be rendered pursuant to Petitioner's effective FPC Rate Schedule ACQ-1.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed herein.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate of public convenience and necessity heretofore issued in Docket No. CP66-208 be amended as hereinafter ordered.

The Commission orders:

(A) The certificate of public convenience and necessity issued to Michigan Wisconsin Pipe Line Company by the Commission on May 24, 1966, in Docket No. CP66-208 is amended by authorizing an increase of 5,000 Mcf in the Maximum Daily Quantity of natural gas to be delivered to Madison Gas and Electric Company, as hereinbefore described and as more fully described in the petition to amend.

(B) In all other respects said certificate shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

ST. JOSEPH LIGHT & POWER COMPANY AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP66-417

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued September 12, 1966)

On June 16, 1966, St. Joseph Light & Power Company (Applicant), filed in Docket No. CP66-417 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Michigan Wisconsin Pipe Line Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in Craig, Missouri, all as more fully set forth in the application.

Applicant states that Craig, Missouri, is located approximately eight miles from Mound City, Missouri, and has a population of approximately 488. Applicant further states that there are 196 residences and 56 commercial establishments now located in Craig.

Applicant proposes to construct a new distribution system in Craig to provide natural gas service to the residences and commercial establishments of Craig for cooking, water heating, clothes drying, spaceheating, and other associated uses. Service to Craig will require approximately 660 feet of lateral construction, extending from Respondent's existing lateral pipeline to a proposed town border station. Applicant proposes that said lateral be constructed by Respondent pursuant to that Company's "10-cent formula".

The total estimated volumes of natural gas involved to meet Applicant's annual and peak day requirements for the initial three year period of proposed operations are stated to be:

	First year	Second year	Third year
Annual (Mcf)	15,200	18,600	21,000
Peak day (Mcf)	160	200	230

The total estimated cost of Applicant's proposed construction is $61,600, which cost will be financed by internally generated funds.

On May 5, 1966, the City of Craig, Missouri, granted Applicant a franchise to sell and distribute natural gas in said City. The Public Service Commission of the State of Missouri on August 11, 1966, granted Applicant a certificate authorizing the construction and operation of the necessary facilities and service to the public in the City of Craig, Missouri.

On July 5, 1966, Respondent filed an answer to the application stating that it has no objections to providing the proposed service. Respondent states that it can provide the requested service from existing sources of gas supply without the construction of additional main line facilities and will construct within the limits of the 10-cent formula, the requested 660 feet of lateral.

Due notice of the filing of the application and opportunity for hearing thereon was published in the Federal Register on July 2, 1966 (31 F.R. 9144). No protests, petition to intervene or notice of intervention has been filed.

The Commission finds:

(1) Respondent, Michigan Wisconsin Pipe Line Company, a Delaware corporation having its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G–669 (5 FPC 953).

(2) Applicant is a public utility company in the State of Missouri and is authorized to construct and operate facilities to distribute and sell natural gas to inhabitants of the State of Missouri.

(3) It is necessary and desirable in the public interest that Respondent be directed to extend its lateral facilities 660 feet and establish physical connection of its transportation facilities with the facilities proposed by Applicant and to sell and deliver up to 230 Mcf of natural gas per day to Applicant as hereinbefore described and as more fully set forth in the application, as hereinafter ordered and conditioned.

(4) The requirement that Respondent serve Applicant, as requested, will not place an undue burden upon Respondent nor impair its ability to render adequate service to existing customers.

The Commission orders:

(A) Respondent is directed to extend its lateral facilities 660 feet and to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 230 Mcf of natural gas per day to Applicant, under a service agreement to be executed by Applicant with Michigan Wisconsin and filed by Michigan Wisconsin with the Commission in accordance with the Commission's Regulations, for transportation, distribution and resale as hereinbefore described. Such service shall be rendered pursuant to Michigan Wisconsin's presently filed appropriate rate schedule, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

ST. JOSEPH LIGHT & POWER COMPANY AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP66–429

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued September 12, 1966)

On June 30, 1966, St. Joseph Light & Power Company (Applicant) filed in Docket No. CP66–429 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Michigan Wisconsin Pipe Line Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in the Village of Bigelow, Holt County, Missouri, all as more fully set forth in the application.

The Village of Bigelow, Missouri, is located approximately three miles from Mound City, Missouri, and has a population of approximately 100, 35 residences and 7 commercial establishments.

Applicant proposes to construct approximately 1,000 feet of 2-inch pipeline to connect Respondent's Oregon-Forest City lateral with Applicant's proposed Bigelow distribution system. Service to Bigelow will require no added construction on the part of Respondent, in that its existing facilities serving Forest City and Oregon will come within 1,000 feet of the corporate limits of Bigelow.

The total estimated volumes of natural gas necessary to meet Applicant's annual and peak day requirements for the initial three year period of proposed operations are stated to be:

	First year	Second year	Third year
Annual (Mcf)	3,800	4,500	5,100
Peak day (Mcf)	38	46	51

The total estimated cost of Applicant's proposed facilities is $16,850, which cost will be financed by internally generated funds.

In its answer filed August 4, 1966, Respondent, Michigan Wisconsin, stated it had no objection to providing the requested service.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

The Commission finds:

(1) Respondent, Michigan Wisconsin Pipe Line Company, a Delaware corporation with its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G-669 (5 FPC 953).

(2) Applicant, St. Joseph Light & Power Company, is legally authorized to construct and operate the necessary facilities and to engage in the local distribution of natural gas to the public, within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver up to 51 Mcf of natural gas per day to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant's being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as requested, will not place an undue burden upon Respondent nor impair its ability to render adequate service to existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 51 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

SHENANDOAH GAS COMPANY, DOCKET NO. CP66-428 AND ATLANTIC SEABOARD CORPORATION, DOCKET NO. CP67-2

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 12, 1966)

On June 28, 1966, Shenandoah Gas Company (Shenandoah) filed in Docket No. CP66-428 an application, as supplemented on July 12, 1966, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities and the transportation of natural gas for resale and distribution in New Market, Shenandoah County, Virginia, the operation of relocated facilities, and the operation of facilities and the transportation of natural gas to four direct industrial customers, all as more fully set forth in the application.

On July 11, 1966, Atlantic Seaboard Corporation (Atlantic Seaboard) filed in Docket No. CP67-2 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities for the sale of natural gas to Shenandoah for resale and distribution in New Market, Virginia, all as more fully set forth in the application.

Shenandoah proposes to construct and operate approximately 7,250 feet of 2.375-inch O.D. lateral pipeline from Atlantic Seaboard's 24-inch pipeline to the distribution regulator in New Market, all in Shenandoah County, Virginia. Shenandoah also proposes to construct and operate metering and odorizing facilities near the tap on Atlantic Seaboard's pipeline. The estimated cost of the proposed pipeline and appurtenant facilities is $26,975, which will be financed with open account advances from Shenandoah's parent, Washington Gas Light Company.

Shenandoah has heretofore constructed and is operating without Commission authorization facilities for the direct sale of gas to Continental Clay Products Company, near Martinsburg, West Virginia; C. H. Musselman Company plant, now owned by Pet Milk Company, in Inwood, West Virginia; Corning Glass Works, near Inwood, West Virginia; and Minnesota Mining and Manufacturing Company, near Middleway, West Virginia. Shenandoah has installed 26,772 feet of 2, 3, 4 and 6-inch pipeline and appurtenant facilities at a cost of $116,961 to serve these customers. Shenandoah has replaced without Commission authorization 13,802 feet of 6-inch pipeline with 14,964 feet of 6, 8 and 12-inch pipeline near Stephens City and Middletown, Virginia, due to highway construction. The cost of the original facilities was $49,093, and the replacement cost was $187,630 with $149,234 reimbursement supplied by the Commonwealth of Virginia. Shenandoah requests authorization to continue operating these facilities.

In its application filed in Docket No. CP67-2 Atlantic Seaboard proposes to construct and operate measuring and regulating facilities to supply gas to Shenandoah for transportation to and for resale and distribution in New Market. The estimated cost of the proposed facilities is $2,650, to be financed with internally generated funds. Atlantic Seaboard will supply gas to Shenandoah to serve New Market pursuant to existing authorization. The estimated natural gas requirements to serve New Market for the first three years of operations are as follows:

	Mcf (1,025-Btu gas)	
	Peak day	Annual
Year:		
1	139	12,720
2	156	15,110
3	183	18,290

After due notice, no petition to intervene, notice of intervention or protest to the granting of the applications has been received.

At a hearing held on September 8, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the applications, as supplemented, and exhibits thereto, submitted in support of the authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Shenandoah Gas Company, a Virginia corporation having its principal place of business in Washington, D.C., is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 30, 1954, in Docket No. G-1448 (13 FPC 593).

(2) Atlantic Seaboard Corporation, a Delaware corporation having its principal place of business in Charleston, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of March 16, 1943, in Docket No. G-284 (3 FPC 941).

(3) The facilities hereinbefore described, as more fully described in the applications in this proceeding, will be used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation of natural gas by Applicants are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) Applicants are able and willing properly to do the acts and to perform the service proposed and conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) The construction and operation of facilities and the transportation of natural gas by Applicants are required by the public convenience and necessity, and certificates therefor should be issued as hereinafter ordered and conditioned.

(6) The certificates issued hereinafter and the rights granted thereunder should be conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) Certificates of public convenience and necessity are issued to Applicants authorizing the construction and operation of facilities, including those facilities heretofore constructed by Shenandoah and presently being operated without Commission authorization as described in the application in Docket No. CP66–428, and the transportation of natural gas as hereinbefore described and as more fully described in the applications in this proceeding, upon the terms and conditions of this order.

(B) The certificates issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The construction of facilities authorized herein shall be completed and the transportation of natural gas shall commence, as provided by paragraph (b) of Section 157.20 of the Regulations under the Natural Gas Act, within one year from the date of this order.

(D) The certificate issued in Docket No. CP66–428 shall not entitle the industrial customers to whom firm deliveries are authorized therein to any priorities to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP67–4 AND MARENGO CORPORATION, DOCKET NO. CP67–5

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 12, 1966)

On July 11, 1966, Transcontinental Gas Pipe Line Corporation (Transco) filed in Docket No. CP67–4 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the increase of its interruptible sales to Gulf States Paper Company (Gulf States) and to American Can Company (American Can)[1] as more fully set forth in the application.

Transco seeks authorization to transport and deliver 9,500 Mcf daily on an interruptible basis to Gulf States, an increase from the presently authorized maximum of 6,000 Mcf per day, and to American Can from the presently authorized maximum of 4,000 Mcf per day to a maximum of 10,000 Mcf per day.

By order issued August 16, 1957, in Docket No. G–12763 (18 FPC 182), Transco was authorized to transport and deliver gas in an amount up to 6,000 Mcf per day on an interruptible basis to Gulf States for use in the latter's paper mill in Marengo County, Alabama, and to deliver such gas to

---

[1] Formerly Marathon Southern Corporation.

Marengo Corporation (Marengo) for the account of Gulf States. The same order authorized Marengo in Docket No. G–12764 to transport the gas from the point of delivery from Applicant to the Gulf States plant near Linden, Alabama.

By order issued March 17, 1958, in Docket No. G–13911 (19 FPC 399), Transco was authorized to transport and deliver gas in an amount up to 1,000 Mcf per day on an interruptible basis to American Can for use in the latter's paper mill in Choctaw County, Alabama, and to deliver such gas to Marengo for the account of American Can. The same order authorized Marengo in Docket No. G–13912 to transport the gas from the point of delivery from Transco to American Can's plant near Naheola, Alabama. By subsequent order issued April 12, 1960 (23 FPC 599) in Docket No. G–20119 (Applicant) and G–20320 (Marengo), the Commission authorized an increase in the interruptible delivery by Transco to American Can from 1,000 Mcf per day to 4,000 Mcf per day and a corresponding increase in the volume Marengo was authorized to transport.

On July 11, 1966, Marengo filed in Docket No. CP67–5 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an increase in its transportation of gas to two of its customers, the aforementioned Gulf States and American Can, and for authority to construct facilities to increase the supply of gas to American Can, all as more fully set forth in the application.

Marengo proposes to construct and operate 3.3 miles of 4½-inch O.D. steel pipeline loop extending from Transco's main to the Naheola, Alabama plant of American Can together with the requisite pressure regulating facilities.

Marengo states that the purpose of the instant application is to increase its transportation of natural gas to Gulf States from 6,000 Mcf per day to 9,500 Mcf per day, and its transportation of natural gas to American Can from 4,000 Mcf per day to 10,000 Mcf per day.

The estimated cost of the new construction is $41,990, which cost will be financed by Marengo from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 8, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Marengo Corporation, an Alabama corporation having its principal place of business in Linden, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of August 16, 1957, in Docket No. G–12764, *et al.* (18 FPC 182).

(2) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of May 29, 1948, in Docket No. G–704 (7 FPC 24).

(3) The proposed transportation, and delivery by Transco and the construction and operation of facilities and transportation by Marengo of natural gas as hereinbefore described, and as more fully described in the applications, filed in these proceedings, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid transportation and delivery by Transco and construction and operation of facilities and transportation by Marengo are required by the public convenience and necessity and certificates therefor should be issued as hereinafter ordered and conditioned.

(5) Transco and Marengo are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Transco's and Marengo's compliance with Section 155.1 and all other applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations applicable to Marengo and (a), (e) and (f) thereof applicable to Transco.

The Commission orders:

(A) Certificates of public convenience and necessity are issued to Marengo Corporation in Docket No. CP67-5, authorizing the construction and operation of facilities and the transportation and delivery of natural gas as hereinbefore described and to Transco authorizing the transportation and delivery of natural gas in Docket No. CP67-4, all as more fully described herein and as more fully described in the applications and exhibits in these proceedings, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificates issued by paragraph (A) above and the rights granted thereunder are conditioned upon Transco's and Marengo's compliance with Section 155.1 and all other Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations applicable to Marengo and (a), (e) and (f) thereof applicable to Transco.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 6 months of the date on which this order issues.

(D) The certificate issued Transco is granted on the express condition that the interruptible service authorized therein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Transco for firm service to its customers.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

UNITED FUEL GAS COMPANY, DOCKET NO. CP66-379

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued September 12, 1966)

On May 18, 1966, United Fuel Gas Company (Applicant) filed in Docket No. CP66-379 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon a total of 11.7 miles of 14-inch and 16-inch pipeline facilities located in Putnam County, West Virginia, all as more fully set forth in the application.

Specifically, Applicant proposes to retire by transfer to its distribution plant approximately 0.8 mile of 16-inch pipeline and to abandon in place approximately 10.9 miles of 14-inch and 16-inch pipeline extending eastward from the Town of Hurricane to the Kanawha River in Putnam County, West Virginia.

All customers served by the portion of the pipeline to be transferred to Applicant's distribution plant will continue to be served as retail customers of Applicant's West Virginia distribution operations. All other customers previously served from that portion of Applicant's pipeline proposed to be retired have been disconnected either by agreement or pursuant to authorization by the West Virginia Public Service Commission.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on September 8, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Fuel Gas Company, a West Virginia corporation having its principal place of business in Charleston, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued March 1, 1944, in Docket No. G-341 (4 FPC 534).

(2) The facilities to be abandoned, as hereinbefore described, and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered.

The Commission orders:

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, all as more fully described in the application in this proceeding, are granted.

(B) The time within which the abandonment of the facilities hereinbefore described, as authorized in paragraph (A) above, shall be accomplished is fixed at 6 months from the date of this order.

(C) Applicant shall advise the Commission of the date of said abandonment within 10 days thereof.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

IOWA ELECTRIC LIGHT AND POWER COMPANY, DOCKET NO. E-7305

SUPPLEMENTAL ORDER AUTHORIZING ISSUANCE OF FIRST MORTGAGE BONDS

(Issued September 13, 1966)

By order issued August 29, 1966, 36 FPC 543, in the above-entitled matter, the Commission authorized Iowa Electric Light and Power Company, (Applicant), to issue and sell at competitive bidding $15,000,000 principal amount of First Mortgage Bonds, due 1996, subject among others, to the provisions set forth in paragraph (B) of that order as follows:

> (B) The proposed issuance and sale of Bonds at competitive bidding shall not be consummated until:
>
> (i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.
>
> (ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

Applicant on September 13, 1966 filed an amendment pursuant to the requirements of the aforementioned Commission order, setting forth, among other things, that it proposes to accept as providing the lowest annual cost of money to it, the joint bid of Merrill, Lynch, Pierce, Fenner & Smith, Inc. and Salomon Brothers & Hutzler to purchase the proposed issuance of $15,000,000, principal amount of Bonds, for the price of 100.211% principal amount, with an interest rate of 6¼%. Additionally, Applicant's amendment advises that its invitation for bids to purchase the proposed Bonds as published specified a price therefor of not less than 99% and not more than 102¾% of the principal amount thereof. Prior to the issuance of the Commission's August 29, 1966 order, Applicant had advised that its invitation for bids would specify a purchase price of less than the principal amount of the proposed bonds (100%), and not more than 102¾% thereof. Applicant's amendment filed September 13, 1966 advises that the inclusion of 100% of principal amount was a clerical error in its application.

The Commission finds:

(1) Applicant has satisfactorily complied with the requirements of paragraph (B) of the Commission's order issued August 29, 1966, in the above docket, and under the bid it proposes to accept for the Bonds, the price to be received by Applicant therefor and the interest rate thereof are reasonable.

(2) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by the Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

The Commission orders:

(A) The price to be received by Applicant for the proposed Bonds and the interest rate thereof under the bid referred to above, are approved as reasonable.

(B) The proposed issuance and sale of Bonds referred to above upon the terms and conditions and for the purposes specified in the application, as supplemented by the amendment referred to above, are authorized, subject only to the provisions of paragraphs (A), (C), (D) and (E) of the Commission's order issued August 29, 1966, in the above docket.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

ORDER TO SHOW CAUSE

(Issued September 14, 1966)

Each of the above-captioned proceedings concerns an application for a certificate of public convenience and necessity filed under Section 7 of the Natural Gas Act to make sales of natural gas which appear to be similar to the so-called sales restricted by contract to compressor fuel or company use only, which are the subject of the Supreme Court's decision in *California* v. *Lo-Vaca Gathering Company, et al.*, 379 U.S. 366. The aforesaid sales are being made from three separate areas, *i.e.*, Texas Railroad District No. 4, South Louisiana, and Texas Railroad District No. 6, all as more fully described in the Appendix attached hereto and in the respective applications which are on file with the Commission and open to public inspection.

All of the above sales are presently being made and initial service commenced without authorization by the Federal Power Commission. It appears that all sales except those to Lone Star Gas Company may be classified as sales purportedly restricted by contract for compressor fuel or company use within the state of purchase by the pipeline but commingled with gas purchased from other producers which is moving in interstate commerce. The sales to Lone Star are likewise sales restricted by contract for intrastate use but we are advised that Lone Star commingles such gas with natural gas purchased from other producers and that some of such commingled gas is transported to points in states other than that state in which such gas is produced and sold by Respondent.

All Respondents indicate that they have heretofore considered that their sales were nonjurisdictional and that no filings with the Commission were required in connection therewith. However, each of the Respondents was advised by letter that on the basis of information furnished by the purchasing pipelines such sales appear to come within the scope of the Supreme Court's decision in *California* v. *Lo-Vaca Gathering Company, et al.* (*supra*), holding that sales of this type are jurisdictional and requesting that each Respondent promptly submit the necessary certificate application. Various of the Respondents have specifically indicated that their application is submitted in response to, and in compliance with, said Commission letter but that a certificate is requested only in event that, after examination of said contract, the Commission determines that said sale does, in fact, come within the scope of *Lo-Vaca*.

The Commission finds:

(1) It is necessary and appropriate to carry out the provisions of the Natural Gas Act that the above-captioned Respondents appear and show cause, if any, as hereinafter ordered, why they should not be required to apply for and obtain, *nunc pro tunc*, certificates of public convenience and necessity authorizing the sales of gas which they have been making without authorization.

(2) It is appropriate and in the public interest that the above-captioned matters be consolidated for hearing and decision as hereinafter ordered.

(3) The expeditious disposition of these proceedings may be effectuated by holding a prehearing conference and to that end a prehearing conference should be held on October 26, 1966, as hereinafter ordered.

The Commission orders:

(A) The above-entitled Respondents shall appear and show cause, if any there be, at a public hearing to be held in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., commencing November 14, 1966, at 10 a.m., EDT, why they should not be required to apply for, and obtain, *nunc pro tunc*, certificates of public convenience and necessity authorizing them to make the sales specified in their respective applications which they have previously made without authorization, and whether the initial price for such sales should not be fixed at the appropriate in-line price prevailing at the date deliveries commenced for the area in which such sales are being made, *i.e.*, South Louisiana, Texas District No. 4, and Texas District No. 6.

(B) The above-named respondents shall also appear and show cause at the above-ordered hearing why they should not be required to refund the difference between the initial price determined in accordance with paragraph (A) above and the price actually charged for the related deliveries of gas. The date from which refunds shall be made, if any, by the respondents, shall be determined in this proceeding and evidence may be offered by any party as to the appropriate amount of refunds, if any, and the date from which liability for such refunds should be fixed.

(C) The above-captioned matters are hereby consolidated for the purposes of hearing and decision.

(D) Pursuant to the provisions of Section 1.18 of the Commission's Rules of Practice and Procedure, a prehearing conference before a duly designated presiding examiner shall commence at 10:00 a.m. (EDST) on October 26, 1966, in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., for the purpose of effectuating the expeditious disposition of these consolidated proceedings.

(E) The purpose of such conference shall be to consider all matters at issue in the above dockets, the manner in which evidence shall be presented, to fix dates for the distribution of such evidence, to fix the date on which the consolidated hearing shall commence, and to consider any and all matters which might contribute to an expeditious disposition of these consolidated proceedings.

(F) Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before October 14, 1966. Protestants and Petitioners shall state with particularity the dockets in which they claim to have an interest.

PORTLAND GENERAL ELECTRIC COMPANY, PROJECT NO. 2195

ORDER EXTENDING TIME FOR FILING EXHIBIT R

(Issued September 14, 1966)

On June 27, 1966, the Portland General Electric Company, Portland, Oregon, licensee for Project No. 2195, filed an application for a modification of Article 42 of the order amending license, issued April 23, 1965, 33 FPC 876, extending the time for the filing of an Exhibit R. Article 42 presently provides for the filing of an Exhibit R within one year from the date of the license. Licensee desires to extend the time to 18 months from April 23, 1965, the date upon which the order requiring the filing of an Exhibit R was issued. Licensee states that it is in the process of preparing a revised Exhibit R and expects to file it within the time requested.

The Commission finds:

It is appropriate and in the public interest that Article 42 be modified as hereinafter provided.

The Commission orders:

Article 42 of the license for Project No. 2195 is modified to read as follows:

> *Article 42.* The Licensee shall, within eighteen (18) months from April 23, 1965, file with the Commission for approval an Exhibit R conforming to Section 4.41 of Commission Regulations under the Federal Power Act. The plan shall be prepared after consultation with appropriate Federal, state and local agencies and shall include recreational improvements which may be provided by others in addition to the improvements the licensee plans to provide.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

SOCONY MOBIL OIL COMPANY, INC., DOCKET NO. CI65-1227

ORDER TO SHOW CAUSE

(Issued September 14, 1966)

On July 14, 1965, Socony Mobil Oil Company, Inc. (Socony) received a permanent certificate of public convenience and necessity in Docket No. CI65-1227, authorizing it to make sales of natural gas to Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) from the Second Bayou Field, Cameron Parish, Louisiana, at a rate of 20¢ per Mcf, pursuant to a contract dated May 3, 1965. At the time of the Commission's certification of this sale it appeared to be an initial service, since no reference was made by Socony to any prior sale from the acreage dedicated under the above contract.

A subsequent investigation disclosed, however, that the same acreage in the Second Bayou Field had previously been dedicated by Socony to Tennessee, pursuant to contracts dated September 28 and November 16, 1959, and production therefrom was restricted by terms of the contract to use in compressor fuel located in Louisiana. It appears that such gas was commingled by Tennessee with gas purchased from other producers which moved in interstate commerce. No request for authorization by the Commission to make these sales to Tennessee was submitted by Socony.

On January 18, 1965, the Supreme Court, in *California* v. *Lo-Vaca Gathering Company*, 379 U.S. 366, sustained the Commission's Opinion No. 348, 26 FPC 606, issued on October 23, 1961, to the effect that the sale of natural gas to an interstate pipeline company for compressor fuel, although such natural gas would contractually be restricted to consumption by the purchaser in its intrastate operations, would be a sale of natural gas in interstate commerce for resale when commingled with gas from other sources which will, in fact, be sold out of state. It appears, consequently, that the Commission has not authorized the aforementioned sales of gas for compressor fuel although they are jurisdictional sales under the holding of the Supreme Court.

The Commission finds:

(1) It is necessary and appropriate to carry out the provisions of the Natural Gas Act that Socony Mobil Oil Company, Inc. appear and show cause, if any, as hereinafter ordered, why it should not be required to apply for and obtain, *nunc pro tunc*, a certificate of public convenience and necessity authorizing the sales of gas which it has been making without authorization from the Second Bayou Field in South Louisiana to Tennessee.

(2) It is necessary and appropriate to carry out the provisions of the Natural Gas Act that Socony Mobil Oil Company, Inc. respond to this order pursuant to Section 1.9(c) of the Commission's Rules of Practice and Procedure.

The Commission orders:

(A) Socony Mobil Oil Company, Inc. shall appear and show cause, if any there be, at a public hearing to be held in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., commencing November 14, 1966, at 10:00 a.m., EST, why it should not be required to apply for and obtain, *nunc pro tunc*, a certificate of public convenience and necessity authorizing it to make the sales of compressor fuel gas to Tennessee from the Second Bayou Field, Cameron Parish, South Louisiana, which it has made up to July 14, 1965, without authorization of the Commission and whether the initial price for such sale should not be fixed at the appropriate in-line price for South Louisiana as of the date deliveries were commenced.

(B) Socony Mobil Oil Company, Inc. shall also appear and show cause at the above-ordered hearing why it should not be required to refund the difference between the initial price determined in accordance with paragraph (A) above and the price actually charged for the related deliveries of gas. The date from which refunds shall be made by Socony Mobil Oil Company, Inc. (up to the date Socony initiated deliveries under its permanent certificate in Docket No. CI65-1227) shall be determined in this proceeding, and evidence may be offered by any party as to the appropriate amount of refunds, and the date from which liability for refund should commence.

(C) At the hearing ordered herein Socony Mobil Oil Company, Inc. shall open and close. The presiding examiner shall determine the order in which other parties and the Commission's staff shall present evidence, if any, which they desire to present.

(D) Socony Mobil Oil Company, Inc. shall file with the Commission prepared written testimony and other evidence comprising its case-in-chief on or before October 14, 1966, and shall serve copies thereof on the Commission's staff and on petitioners to intervene.

(E) Notices and petitions to intervene and protests may be filed with the Commission in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure on or before October 14, 1966.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

SOUTHERN CALIFORNIA EDISON COMPANY AND IMPERIAL IRRIGATION DISTRICT, PROJECT NO. 325

ORDER FURTHER AMENDING LICENSE (TRANSMISSION LINE)

(Issued September 14, 1966)

On August 1, 1966, application[1] was filed by Southern California Edison Company (Applicant), joint licensee with Imperial Irrigation District for transmission line Project No. 325, for amendment of the license to eliminate therefrom Applicant's 4,918 feet long 15-kv, 3-phase wood-pole line running north from the southern boundary of Sec. 34, T. 4 S., R. 5 E., S. B. B. & M., upon tribal lands within the Agua Caliente Indian Reservation in Riverside County, California, and to eliminate Applicant from the license for Project No. 325.

The application for amendment is pursuant to the Commission's October 1, 1963, 30 FPC 889, order which, among other things, found that transmission line Project No. 325 is not part of a "project" as defined in Section 3(11) of the Federal Power Act, and provided for the filing of an application for surrender of the license for transmission line Project No. 325, subject to first obtaining authority from the appropriate Government agency for the continued occupancy by the lines comprising the project of the lands of the United States involved. The license for transmission line Project No. 325 includes another portion of transmission line owned solely by Imperial Irrigation District.

It now appears that the occupancy by Applicant's line of the tribal Indian lands involved was approved by the Department of the Interior on January 3, 1946, as shown on a map which accompanied the application for amendment.

The removal of the Applicant's portion of transmission line from the license for Project No. 325 will reduce the amount of annual charges fixed in the license for occupancy by the line of tribal Indian lands from $9.65 to $5.00. Annual charges under the license for Project No. 325 have been paid through December 31, 1965.

The Commission orders:

(A) The license for Project No. 325 is hereby further amended, effective as of December 31, 1965, to eliminate therefrom Southern California Edison Company's 15-kv, 3-phase, wood-pole line running 4,918 feet north from the southern boundary of Sec. 34, T. 4 S., R. 5 E., S. B. B. & M., lying 16 feet west of the east line of said Sec. 34, and to eliminate Southern California Edison Company as joint licensee under the license, leaving Imperial Irrigation District as the sole owner and licensee of record for Project No. 325.

---

[1] This application supersedes an application filed March 21, 1966.

(B) The amount of annual charges specified in Article 14 of the license for transmission line occupancy of tribal Indian lands is by this amendment reduced to $5.00.

(C) License Exhibit F (FPC No. 325-4), showing the excluded transmission line is hereby eliminated from the license, and license Exhibit G, revised to reflect the exclusion of the said line, is hereby reapproved as part of the license.

(D) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license amendment. In acknowledgement of the acceptance of this license amendment, it shall be signed for Southern California Edison Company and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross and Carl E. Bagge.

THE SUPERIOR OIL COMPANY, DOCKET NO. CI67-287

ORDER TO SHOW CAUSE

(Issued September 14, 1966)

In *California* v. *Lo-Vaca Gathering Co.*, 379 U.S. 366, the Supreme Court held that the sale of natural gas to an interstate pipeline company under a contract purporting to require the pipeline company to use the gas for its own purposes in or out of the state of origin, was a sale of natural gas in interstate commerce for resale. In May 1965 the Federal Power Commission sent letters to Tennessee Gas Transmission Company (Tenneco),* Houston, and other natural gas pipeline companies which requested them to furnish to the Commission a list of all independent producers, if any, from whom Tenneco is purchasing gas which is commingled with a stream of gas transported out of the state of origin and for which there is not on file with this Commission a producer application requesting a certificate of public convenience and necessity or an outstanding certificate of public convenience and necessity authorizing such sales.

In letters dated May 21, 1965, and February 17, 1966, responding to inquiries from the Commission, Tenneco stated that it purchases for compressor fuel from The Superior Oil Company, Houston, natural gas produced in the South Bon Air Field, Calcasieu Parish, Louisiana; that such gas, amounting to approximately 500 Mcf per day, enters Tenneco's Grand Chenier lateral and is then transported to Tenneco's station 823 along with other natural gas gathered by Tenneco in the area; that Tenneco consumes as fuel in said station approximately 2500 Mcf of gas per day, and that gas not so consumed is transported out of the state of origin.

The Commission has not authorized said sales of gas.

---

*Now Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

In response to letters from the Commission requesting Superior to apply for a certificate of public convenience and necessity authorizing said sales and file a rate schedule covering them, Superior stated, in substance, that said sales are being made under an oral agreement on a temporary basis pending action on Superior's petition for judicial review of the Commission's orders accompanying Opinion Nos. 436 and No. 436-A, 32 FPC 254, 952, relating to Superior's application under Docket No. CI61-1481 for a permanent certificate authorizing Superior to sell gas from the South Bon Air field to Tenneco, and concluded that no certification of said sales should be required.

The Commission finds:

(1) It is necessary and appropriate to carry out the provisions of the Natural Gas Act that The Superior Oil Company appear and show cause, if any, as hereinafter ordered, why it should not be required to apply for and obtain *nunc pro tunc* a certificate of public convenience and necessity authorizing the sale of gas which it has been making without authorization from the South Bon Air field in Louisiana to Tenneco.

(2) It is necessary and appropriate to carry out the provisions of the Natural Gas Act that Superior respond to this order pursuant to Section 1.9(c) of the Commission's Rules of Practice and Procedure and furnish other information as hereinafter ordered.

The Commission orders:

(A) The Superior Oil Company shall appear and show cause, if any there be, at a public hearing to be held in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., commencing November 15, 1966, at 10:00 a.m., EST, why it should not be required to apply for and obtain *nunc pro tunc* a certificate of public convenience and necessity authorizing it to make the sale of gas to Tenneco which it has been making without authorization from the South Bon Air field, Calcasieu Parish, Louisiana, and whether the initial price for such sale should not be fixed at the appropriate in-line price for South Louisiana as of the date delivery was commenced, and why it should not be required to refund the difference between the lawful initial price and the price actually charged for the related deliveries of gas. The date from which refunds shall be made by Superior shall be determined in this proceeding, and evidence may be offered by any party as to the appropriate amount of refunds and the date from which liability for such refunds should be fixed.

(B) Superior shall respond to this order on or before October 14, 1966, by filing with the Commission an answer in writing fully in accordance with the provisions of Section 1.9(c) of the Commission's Rules of Practice and Procedure. Superior shall file also with said answer further information in writing and under oath as required below:

(1) A complete statement of all of the terms (including price) of the oral agreement, as amended or modified, under which Superior has sold or is selling to Tenneco natural gas produced in said South Bon Air field, and, if such agreement has been reduced to writing, file copies of such writing.

(2) On or about what date was said oral agreement made?

(3) What are the names and official positions of the persons who acted for Superior and Tenneco, respectively, in making said agreement?

(4) On or about what date did Superior first deliver to Tenneco natural gas produced in said South Bon Air field?

(5) Commencing with Superior's first delivery to Tenneco of gas from said South Bon Air field, list by calendar months the following information: The

total metered volumes of such gas delivered by Superior to Tenneco and state the pressure base and temperature at which such gas was measured; the maximum volume of such gas delivered on any one day in each month; the total amount of money and any other consideration received by Superior for such gas delivered to Tenneco in each month; the delivery point or points.

(6) Is Tenneco's Kinder, Louisiana compressor station, as mentioned in the third paragraph of Superior's letter of January 12, 1966, to the Commission, known also as Tenneco's compressor station No. 823?

(C) At the hearing ordered herein Superior shall open and close. The presiding examiner shall determine the order in which other parties and the Commission's staff shall present evidence, if any, which they desire to present.

(D) Superior shall file with the Commission prepared written testimony and other evidence comprising its case-in-chief on or before October 14, 1966, and shall serve copies thereof on the Commission's staff and on petitioners to intervene.

(E) Notices and petitions to intervene and protests may be filed with the Commission in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure on or before October 14, 1966.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

BROWN-NEW HAMPSHIRE, INC., PROJECT NO. 2422

ORDER APPROVING REVISED PROJECT EXHIBIT L DRAWING

(Issued September 15, 1966)

On April 22, 1966, Brown-New Hampshire, Inc., licensee for Project No. 2422, filed for Commission approval a revised Exhibit L drawing for the project, known as the Sawmill Project, located on the Androscoggin River in Berlin, New Hampshire.

The drawing shows the reconstruction of a portion of the dam which was undertaken by the licensee as an emergency measure, a section of the timber crib structure having deteriorated to such an extent that it had developed excessive leakage and presented a hazardous condition. The timber crib structure was replaced with a concrete gravity section. The licensee also stopped a leakage in the powerhouse by facing a portion of the old rock-filled timber crib foundation with reinforced concrete, a repair which will make possible a more efficient operation of the project. The aforementioned reconstruction and repair were accomplished between June 7 and August 31, 1965.

The U.S. Corps of Engineers has approved the revised Exhibit L tracing pursuant to Section 4(e) of the Federal Power Act.

The Commission finds:

Exhibit L, sheet 1, Plan and Sections of powerhouse and dam (FPC No. 2422-8) conforms to the Commission's rules and regulations and should be approved as part of the license for the project, and license Exhibit L (FPC No. 2422-7) which has been superseded should be eliminated from the license for the project.

The Commission orders:

Exhibit L, sheet 1 described in the above finding is hereby approved as part of the license for Project No. 2422, and the superseded license exhibit mentioned in the same finding is hereby eliminated from the license for the project.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

ORANGE AND ROCKLAND UTILITIES, INC., DOCKET NO. E-7246

ORDER EXTENDING TIME FOR THE MATURITY OF PROMISSORY NOTES

(Issued September 15, 1966)

On November 24, 1965 the Federal Power Commission issued an order pursuant to Section 204 of the Federal Power Act authorizing Orange and Rockland Utilities, Inc. (Applicant) to issue short-term promissory notes in the aggregate principal amount of $15,000,000 outstanding at any one time. The order was conditioned on the final maturity of said notes being not later then December 31, 1966.

By a letter dated August 22, 1966 to the Secretary of the Commission the Applicant requested an extension of time until June 30, 1967 for the final maturity date of the promissory notes. The Applicant states that it does not plan to issue any long term debt or additional equitable securities in 1966. It does, however, expect to do permanent financing sometime in 1967 in an amount at least sufficient to pay off the then outstanding promissory notes. In order that the Applicant may continue subsequent to December 31, 1966, to issue short-term promissory notes within the $15,000,000 limit, it has requested this extension of the final maturity date of the notes.

The Commission finds:

Under the circumstances recited by the Applicant it is appropriate and in the public interest to grant the requested extension of time.

The Commission orders:

The date for the final maturity of the promissory notes authorized to be issued by the Applicant in the above-entitled proceeding is hereby extended from December 31, 1966, to June 30, 1967.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

PENOBSCOT COMPANY, PROJECT NO. 2312

ORDER APPROVING REVISED PROJECT EXHIBIT L DRAWING

(Issued September 15, 1966)

On May 18, 1966, Penobscot Company, licensee for Project No. 2312, located on the Penobscot River, Maine, filed for Commission approval a revised Exhibit L drawing showing the reconstruction of the east abutment of the dam which was undertaken by the licensee as an emergency measure.

A portion of the east abutment of the dam which had failed was replaced by a new timber crib abutment. An examination of the east end of the dam showed that it was in poor condition and this was stabilized by adding a new concrete capped timber crib section immediately downstream. The reconstruction was accomplished between July and October, 1965, pursuant to Article 4 of the license.

The U.S. Corps of Engineers has reported that the revised Exhibit L drawing is satisfactory insofar as the interest of navigation is concerned.

The Commission finds:

Exhibit L, Details of Dam (FPC No. 2317-9) conforms to the Commission's rules and regulations and should be approved as part of the license for the project, and license Exhibit L (FPC No. 2312-7) which has been superseded should be eliminated from the license for the project.

The Commission orders:

Exhibit L (FPC No. 2312-9) is hereby approved as part of the license for Project No. 2312, and superseded license Exhibit L (FPC No. 2317-7) is hereby eliminated from the license for the project.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

CITIES SERVICE GAS COMPANY, DOCKET NO. CP67-7

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 16, 1966)

On July 13, 1966, Cities Service Gas Company (Applicant), filed in Docket No. CP67-7 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of additional compression facilities at its Grabham and Saginaw Compressor Stations, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate the following:

(1) One 2,000 horsepower unit at Applicant's existing Grabham Compressor Station in the Northeast Quarter (NE 1/4) of Section 27, Township 33 South, Range 15 East, Montgomery County, Kansas, thereby increasing the horsepower at such compressor station from 11,000 to 13,000; and

(2) One block mounted 1,350 horsepower compressor unit and one skid mounted 660 horsepower compressor unit at Applicant's existing Saginaw Compressor Station in the Southeast Quarter (SE 1/4) of Section 36, Township 27 North, Range 33 West, Newton County, Missouri, thereby increasing the horsepower of such compressor station from 1,700 to 3,710.

The facilities are stated to be necessary to enable Applicant to transport additional volumes of gas at adequate pressures to meet critical shortages which Applicant anticipates will develop in its Joplin-Springfield market area during the 1966-67 winter season, which anticipated shortages are occasioned by the likelihood that Applicant and Arkansas Louisiana Gas Company (Arkla) will fail to obtain certification of facilities for the proposed sale by Arkla to Applicant of 100,000 Mcf of gas per day, pending in Docket Nos. CP62-219 (Phase II), CP64-125 and CP64-131, consolidated in Docket No. CP66-226, *et al.*, by order issued January 24, 1966, 35 FPC 128 (31 F.R. 1345), in sufficient time to permit construction of the facilities therein proposed by the 1966-67 winter season.

The proposed facilities will enable it to transport on a peak day basis additional volumes of 5,440 Mcf of gas per day from existing sources of supply.

The total estimated cost of the project is estimated to be $1,235,000, which amount will be paid from treasury cash.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 14, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G-298 (4 FPC 471).

(2) The proposed construction and operation of facilities and transportation of natural gas, as hereinbefore described and as more fully described in the application in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Cities Service Gas Company authorizing the construction and operation of facilities and transportation of natural gas as hereinbefore described and as more fully described in the application in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

FLORIDA GAS TRANSMISSION COMPANY, DOCKET NO. CP67-24

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 16, 1966)

On August 3, 1966, Florida Gas Transmission Company (Applicant), filed in Docket No. CP67-24 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities, all as more fully set forth in the application.

Applicant seeks authorization for and proposes to construct during the twelve-month period following certification and operate various gas-sales and/or gas-transportation facilities to be used for the transportation and sale of volumes of natural gas previously authorized under certificates for transportation or sale of gas to existing distributor customers of Applicant at rates on file with the Commission, for resale in an existing market area, or areas, in which such distributor has obtained all requisite state and local authorization; and making of direct sales of natural gas to consumers located in areas outside the franchise area of any local distributor.

Applicant also proposes to effect miscellaneous rearrangements of existing pipeline facilities such as changes in existing field operations or relocations of existing sales or transportation facilities when required by highway construction, dam construction or other similar purposes, without, however, resulting in any change of service rendered by means of such rearranged facilities.

The estimated maximum facilities to be installed during the authorized construction period are as follows:

Type of Project	Number of Delivery Points	Estimated Cost of Each Facility
Transportation and sale of volumes previously authorized to existing distributor customers	3	$30,000
Direct sales of natural gas to consumers located outside local distributors' franchise areas	5	$20,000
Miscellaneous rearrangements	20	$7,000

Applicant states that deliveries of gas to any one distributor or consumer through the facilities proposed to be installed hereunder will not exceed 100,000 Mcf of gas annually and that the gas so delivered will not be used by such distributor or consumer for boiler fuel purposes. Applicant further states the facilities herein proposed will not be used to serve any distributor served or proposed to be served by any other natural gas company, and that no distributor served hereunder will be required to make a contribution to the Applicant for the cost of construction of the proposed facilities.

The total estimated cost of the gas-sales or gas transportation facilities proposed herein will not exceed $300,000, and will be financed with internally generated funds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 14, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, Florida Gas Transmission Company, a Delaware corporation having its principal place of business in Winter Park, Florida, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued July 3, 1963, in Docket No. CP63–277 (30 FPC 27).

(2) The facilities hereinbefore described, as more fully described in the application, in this proceeding, are proposed to be used in the transportation and/or sale of natural gas in interstate commerce and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the 12 month period following the issuance of this order. The total expenditures for facilities to be constructed thereunder should be limited to a maximum of $300,000, with the total deliveries to any one customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(8) The certificate issued hereinafter should be conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is hereby issued authorizing Applicant, to construct during the 12 months following the issuance of this order the proposed facilities hereinbefore described, as more fully described in the application, in this proceeding, and to operate such facilities to sell natural gas to direct customers and to distributors for resale as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is hereby limited to construction during the 12 months following the issuance of this order. The total expenditures for facilities to be constructed thereunder are hereby limited to a maximum of $300,000, with the total deliveries to any one customer limited to a maximum of 100,000 Mcf of natural gas per year.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued by paragraph (A) above is expressly conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations and, further, shall not entitle any industrial customer to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

GULF RESOURCES, INCORPORATED, DOCKET NO. CI61-282

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 16, 1966)

On July 26, 1966, Gulf Resources, Incorporated, and Natural Gas Gathering Company, Inc. (Petitioners), filed in Docket No. CI61-282 a petition to amend the order issuing a certificate of public convenience and necessity in said docket by authorizing Gulf Resources, Incorporated, to continue the transportation of natural gas heretofore authorized to be made by both Petitioners, all as more fully set forth in the petition to amend.

By order issued May 10, 1966, 35 FPC 704, in Docket No. CI61-282 Petitioners were authorized to construct and operate facilities and to transport natural gas purchased from producers thereof by Tennessee Gas Pipeline Company, a Division of Tenneco Inc. Natural Gas Gathering Company, Inc., a wholly owned subsidiary of Gulf Resources, Incorporated, is the owner of a one-half interest in the project; and Gulf Resources, Incorporated, owns the other undivided one-half interest and is the operator of the facilities and the project.

Petitioners propose to liquidate and dissolve Natural Gas Gathering Company, Inc., and to transfer its assets and liabilities to Gulf Resources, Incorporated, which will continue the authorized service without change.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the petition has been received.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the order issuing a certificate of public convenience and necessity to Petitioners in Docket No. CI61-282 should be amended as hereinafter ordered.

The Commission orders:

(A) The order issuing a certificate of public convenience and necessity to Petitioners in Docket No. CI61-282 is amended by authorizing Gulf Resources, Incorporated, to acquire and operate as its own the undivided one-half interest in the authorized facilities owned by Natural Gas Gathering Company, Inc.; and in all other respects said order shall remain in full force and effect.

(B) Gulf Resources, Incorporated, shall file appropriate revisions to its tariff to reflect the acquisition and operation of facilities owned by Natural Gas Gathering Company, Inc.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP67-12

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 16, 1966)

On July 19, 1966, Natural Gas Pipeline Company of America (Applicant), filed in Docket No. CP67-12 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of an additional Daily Contract Quantity of 1,800 Mcf of natural gas to Iowa Electric Light and Power Company (Iowa Electric), all as more fully set forth in the application.

Applicant proposes to sell and deliver the additional contract demand quantity of 1,800 Mcf on a firm basis to Iowa Electric under Applicant's Rate Schedule CD-1. Iowa Electric requires the additional volume to meet an increase in the requirements of the Monsanto Company, an existing customer for use as a raw material in the manufacture of agricultural fertilizers. No additional facilities are required.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 14, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 7, 1958, in Docket No. G-9966 (20 FPC 694).

(2) The proposed sale and delivery of natural gas by Applicant to Iowa Electric Light and Power Company as hereinbefore described, and as more fully described in the application, in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed sale and delivery of natural gas is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Natural Gas Pipeline Company of America, authorizing the sale and delivery of natural gas to Iowa Electric Light and Power Company as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (e) and (f) of Section 157.20 of such Regulations.

(C) Applicant and Iowa Electric Light and Power Company shall execute and file a superseding service agreement in accordance with the Commission's Regulations reflecting the increase in Iowa Electric's daily contract quantity of 1,800 Mcf.

(D) The service authorized herein shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations by December 1, 1966.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP67-31

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 16, 1966)

On August 11, 1966, Natural Gas Pipeline Company of America (Applicant) filed in Docket No. CP67-37 an application pursuant to Sections 7(c) and 7(b) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities necessary to establish a new delivery point on Applicant's system for the continuation of deliveries of natural gas to Northern Illinois Gas Company (Northern Illinois) for distribution in the Princeton, Illinois, market area, and for permission and approval to abandon the existing facilities now used for deliveries to Northern Illinois for distribution in said market area, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate a measuring station, approximately 800 feet of 6-inch pipeline and other appurtenant facilities necessary to establish the aforementioned new delivery point to Northern Illinois. Applicant further proposes to abandon the existing delivery facilities, consisting of 1.3 miles of 2-inch and 3-inch parallel branch lines and a measuring station.

The market area being served by the present delivery facilities is expanding in the direction of the present measuring station and would require Applicant to increase the capacity of its delivery facilities in the near future. The proposed relocation will enable Northern Illinois to receive gas delivered by Applicant in a less congested industrial and residential area and to advantageously reorient its distribution facilities.

The total estimated cost of Applicant's proposed construction is $26,000. The facilities to be abandoned will be removed at an estimated cost of $2,000, and salvage is estimated at $4,029.14. Applicant will finance its cost of construction from current working funds.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on September 14, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 13, 1942, Docket No. G-235 (3 FPC 830).

(2) The proposed construction and operation of facilities by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of facilities by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) The facilities to be abandoned, as hereinbefore described, and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(6) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered.

(7) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Natural Gas Pipeline Company of America, authorizing the construction and operation of facilities as hereinbefore described, and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c) (1), (c) (3), (e) (4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations, by December 1, 1966.

(D) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted.

(E) Applicant shall advise the Commission of the date of abandonment of said facilities within 10 days thereof.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP65-196

ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 16, 1966)

On June 29, 1966, Northern Natural Gas Company (Petitioner) filed in Docket No. CP65-196 a petition to amend the order of the Commission issued in said docket on May 25, 1966 (Opinion No. 491, 35 FPC 790), requesting authorization to construct and operate additional facilities in order to extend the presently authorized Annandale-Maple Lake, Minnesota, branchline to the communities of South Haven, Kimball and Watkins, Minnesota, to provide initial service to said communities and to deliver gas to Wisconsin Gas Company in lieu of Natural Gas, Inc., for distribution in the Village of Baldwin, Wisconsin, all as more fully set forth in the petition to amend.

The Commission's order issued in the instant proceeding on May 25, 1966, authorized Petitioner, *inter alia*, to construct and operate 14.1 miles of 4-inch pipeline and measuring and regulating facilities to serve the communities of Annandale and Maple Lake, Minnesota. By the instant filing, Petitioner requests authority to construct and operate additional facilities consisting of 15.3 miles of 2 and 3-inch branch pipeline and three town border stations in order to initiate gas service to South Haven, Kimball and Watkins, Minnesota.

Petitioner estimates that in the third year of service, it will deliver a total of 685 Mcf of gas per day to North Central Public Service Company for resale in the communities of South Haven, Kimball and Watkins. Third year annual sales are estimated to be 191,840 Mcf.

The third year incremental revenues attributable to the proposed five community branchline exceed the incremental cost of service, including the cost of gas in the field plus incremental transmission expenses, by $3,469.

The Commission's order issued in the instant proceeding also authorized Petitioner to deliver volumes of natural gas to Natural Gas, Inc. (Natural Gas) for resale in the Village of Baldwin, Wisconsin (Baldwin). The Public Service Commission of Wisconsin issued an order dated June 2, 1966, authorizing Wisconsin Gas Company (Wisconsin Gas) to purchase the franchise, gas allocation, and operating rights of Natural Gas in Baldwin. Wisconsin Gas has agreed to make the contribution required by Paragraph (C) of the Commission's order issued in the subject docket. Accordingly Petitioner requests that it be authorized to deliver gas to Wisconsin Gas in lieu of Natural Gas for resale and distribution in Baldwin.

The total estimated cost of Petitioner's proposed construction is $232,800, which will be financed as part of the original project.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate of public convenience and necessity heretofore issued in Docket No. CP65-196 be amended as hereinafter ordered.

The Commission orders:

(A) The certificate of public convenience and necessity issued to Northern Natural Gas Company by the Commission order of May 25, 1966, in Docket No. CP65-196 is amended by authorizing the construction and operation of additional natural gas facilities on the presently authorized Annandale-Maple Lake, Minnesota, branchline, the sale of up to 685 Mcf of natural gas per day to North Central Public Service Company for resale to the Communities of South Haven, Kimball and Watkins, Minnesota, and the sale and delivery of natural gas to Wisconsin Gas Company in lieu of Natural Gas, Inc., for resale in Baldwin, Wisconsin, all as hereinbefore described and as more fully described in the petition to amend.

(B) In all other respects said certificate shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-33

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 16, 1966)

On August 15, 1966, Northern Natural Gas Company (Applicant) filed in Docket No. CP67-33 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a sales measuring station and appurtenant facilities in order to establish an additional delivery point for the sale of natural gas to Wisconsin Gas Company (Wisconsin Gas), an existing customer, for resale to the Radio Corporation of America/McCoy Job Corps Center (Job Corps Center), all as more fully set forth in the application.

Wisconsin Gas has requested that Applicant establish a delivery point at Camp McCoy, Monroe County, Wisconsin, for initial service to the Job Corps Center. Wisconsin Gas will utilize its existing allocation of contract demand to deliver maximum daily and annual volumes of natural gas in amounts of 670 Mcf and 131,200 Mcf, respectively, to the Job Corps Center. Sales to Wisconsin Gas by Applicant will be made under Applicant's existing rate schedule for firm service for Zone B.

The total estimated cost of Applicant's proposed construction is $18,690, which cost will be financed from cash on hand with reimbursement for actual costs by Wisconsin Gas.

After due notice, Wisconsin Gas has petitioned to intervene in support of the instant proposal. No other petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 14, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation with its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued on April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Northern Natural Gas Company, authorizing the construction and operation of facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by October 15, 1966.

(D) The certificate issued by paragraph (A) above is conditioned upon the filing by Applicant of a revised service agreement with Wisconsin Gas Company in accordance with the Commission's Regulations under the Natural Gas Act.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

CITIES OF PRINCETON AND MERCER, MISSOURI, AND LINEVILLE, IOWA, DOCKET NO. CP66-240

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 16, 1966)

On June 16, 1966, the Cities of Princeton and Mercer, Missouri, and Lineville, Iowa (Petitioners) filed in Docket No. CP66-240 a petition to amend the order issued in said docket on May 24, 1966, 35 FPC 782, requesting that paragraph (D) of said order be amended so as to remove the requirement that Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) file with the Commission a service agreement with each Petitioner, all as more fully set forth in the petition to amend.

The order of the Commission issued May 24, 1966, directs Michigan Wisconsin to make physical connection and deliver natural gas to Princeton and Mercer, Missouri and Lineville, Iowa, for local distribution. Paragraph (D) of said order requires Michigan Wisconsin to file service agreements with each of the parties.

In support of the above request Petitioners state that the gas delivered to Lineville will be separately metered at Lineville; that the deliveries of gas for Princeton and Mercer will be made to Princeton at the terminus of Michigan Wisconsin's portion of the lateral line; that the sales by Michigan Wisconsin to Princeton of the gas intended for Princeton and Mercer will be metered as one sale; and that deliveries of gas to Mercer will be made by Princeton by means of its transmission line.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on August 4, 1966 (31 F.R. 10484). No petition to intervene, notice of intervention, or protest to the granting of the petition has been filed.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued May 24, 1966, in Docket No. CP66-240, be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued May 24, 1966, in Docket No. CP66-240, is amended so as to modify the provisions of Ordering Paragraph (D) requiring Michigan Wisconsin to file with the Commission separate service agreements with each of the Cities of Princeton and Mercer, Missouri, and Lineville, Iowa, and to provide instead that Michigan Wisconsin file service agreements only with Lineville, Iowa, and Princeton, Missouri.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

SUN OIL COMPANY, DOCKET NO. CI62-1003

ORDER DENYING OFFER OF SETTLEMENT

(Issued September 16, 1966)

On July 14, 1966, Sun Oil Company (Sun) submitted an offer of settlement in this proceeding pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure involving a sale of natural gas by Sun to El Paso Natural Gas Company (El Paso) from the Jameson Plant, Millican Field, Coke County, Texas (Texas Railroad Commission District No. 7-C) under Sun's FPC Gas Rate Schedule No. 143. The sale is made pursuant to a contract dated January 26, 1962, which provided for delivery of casinghead gas, or residue derived therefrom, but upon reclassification of the field by the Texas Railroad Commission on September 1, 1965, as a gas-well gas field, the contract was amended by the parties to provide for the delivery of gas-well gas or residue derived therefrom.[1]

Sun now proposes to produce the remaining gas and sell and deliver it to El Paso. It requests that the Commission issue it a permanent certificate at an initial rate of 17.44¢ per Mcf of natural gas at 14.65 psia, which is the applicable area rate (16.5¢ plus 0.94¢ Btu adjustment) found by the Commission in its Opinion No. 468, 34 FPC 159, (as amended by Opinion No. 468-A, 34 FPC 1068) for "new" gas-well gas meeting specified quality standards. Additionally, Sun requests that this proceeding be severed from the proceeding initiated by our Show Cause Order issued August 5, 1965, 34 FPC 424, concurrently with the issuance of Opinion No. 468.

It appears that from 1955 until at least 1965 Sun utilized residue gas derived from casinghead gas for pressure maintenance purposes by reinjection of such residue gas into the reservoir. It is not possible, at this time, to ascertain the quantity of natural gas that was contained in the gas cap which existed at the time production first commenced, and that which resulted from reinjection. Such a determination could be made upon evidence to be introduced by Sun, if it chooses so to do, in the pending show cause proceeding. Since Sun proposes that all the remaining amount in the reservoir be certificated for sale as gas-well gas, we cannot at this time approve the offer of settlement filed by Sun on July 14, 1966.

In the alternative, however, Sun requests that the rate condition (condition (2)) in the temporary certificate issued March 27, 1962, be waived to allow it to file for an increased rate of 17.44¢ per Mcf, which is the applicable area rate if all of the gas is residue gas derived from "new" gas-well gas. Where a producer is operating under a temporary with respect to sales in the Permian area, it is our general policy not to allow rate filings in excess of the applicable just and reasonable ceiling determined in Opinion No. 468.[2] That policy does not apply here, however, because Sun asserts that it proposes only to charge the just and reasonable rate, contending that the ceiling for residue gas derived from gas-well gas is applicable to its sales, in lieu of the ceiling for residue gas derived from casinghead gas. Since we cannot determine at this time whether Sun's position is correct, we conclude that it would be appropriate to allow Sun to file for a rate increase up to the 17.44¢ per Mcf level applicable to the sale of residue gas derived from gas-well gas. Such a filing will be subject to suspension pending determination of the applicable ceiling, and if the moratorium provision in Opinion No. 468 is ultimately upheld upon judicial review[3] and the applicable ceiling for the subject sales is determined to be the ceiling for residue gas derived from casinghead gas, the filing will be rejected *ab initio.*

---

[1] Sun was issued a temporary certificate conditioned to an initial rate of 16¢ per Mcf of natural gas at 14.65 psia, and which prohibited the filing of a rate increase until such time as a permanent certificate is issued.

[2] *Sun Oil Company*, order issued October 21, 1965, 34 FPC 1195; *Union Oil Company of California*, Docket No. CI65-683, order issued December 20, 1965, 34 FPC 1505; and *Sohio Petroleum Company*, Docket No. G-17012, order issued June 6, 1966, 35 FPC 900.

The Commission orders:

(A) The offer of settlement filed by Sun on July 14, 1966, in this proceeding is denied.

(B) The condition set forth in the temporary certificate issued March 27, 1962, prohibiting Sun from filing a rate increase until such time as it is issued a permanent certificate in this proceeding is waived so as to permit such a filing.

(C) The amendatory agreement to Sun's FPC Gas Rate Schedule No. 143 filed by it on October 21, 1965, is designated as Supplement No. 3 to such rate schedule, and is accepted as a change in rate schedule effective as of November 21, 1965, *provided however:* such acceptance does not constitute approval of, or acquiescence with, the provisions, terms or statements contained in the amendatory agreement, nor does the filing of the amendatory agreement constitute a notice of change in rate.

---

[3] In addition to the moratorium in Sun's temporary, the moratorium in Opinion No. 468 is also applicable to Sun's sales but has been stayed.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

TIDEWATER OIL COMPANY (OPERATOR), ET AL., DOCKET NOS. G-16928, CI66-556 AND RI65-129

ORDER RESCINDING ABANDONMENT AUTHORIZATION, REINSTATING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND RATE SUSPENSION PROCEEDING

(Issued September 16, 1966)

On August 2, 1966, Tidewater Oil Company (Operator), *et al.* (Applicant) filed an application for a certificate of public convenience and necessity authorizing the sale of casinghead gas to Wunderlich Development Company from certain acreage in the Southwest Ponca City Field, Kay County, Oklahoma. In Docket No. G-16928 Applicant had been issued a certificate of public convenience and necessity to sell gas from the identical acreage under the same basic contract.[1] On December 30, 1965, in Docket No. CI66-556, Applicant filed an application to abandon this sale and a motion to terminate the rate suspension proceeding on the ground that production had declined to an uneconomic level. This abandonment and termination of proceeding was permitted by Commission order issued June 27, 1966*.

---

[1] By order issued August 7, 1964, the Commission suspended a proposed rate increase for the sale of this gas from 6.2¢ to 7.2¢ per Mcf in Docket No. RI65-129. The suspended rate was placed in effect subject to refund on February 1, 1965.

Applicant now alleges that commercial volumes of gas became available for delivery to Wunderlich again following a change in unit operations by Tidewater. On June 20, 1966 (prior to the time abandonment had been authorized) Applicant entered a letter agreement with Wunderlich reinstating the September 12, 1958, contract, in effect providing for a price for this "initial service" of 7.2¢, the previously suspended rate.

Under the circumstances involved herein, it would be inappropriate to issue a new certificate for the sale of gas by Applicant. Rather, since the same acreage and gas fields are involved, Applicant should be put into the same position existing at the time it filed an application to abandon service and terminate the proceeding.

The Commission orders:

(A) The permission to abandon its sales from this acreage previously issued to Tidewater Oil Company (Operator), *et al.*, in Docket No. CI66-556 is rescinded.

(B) The permanent certificate of public convenience and necessity heretofore issued to Tidewater in Docket No. G-16928 is reinstated.

(C) The rate suspension proceeding in Docket No. RI65-129 is reinstated.

(D) The Commission's acceptance of the notice of cancellation of Tidewater's gas sales contract designated as Supplement No. 3 to FPC Gas Rate Schedule No. 78 is rescinded and said rate schedule is reinstated.

(E) The letter agreement dated June 20, 1966, between Tidewater and Wunderlich Development Company is designated Supplement No. 4 to Tidewater's related FPC Gas Rate Schedule No. 78 and is accepted to be effective as of the date of resumption of service.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

ATLANTIC SEABOARD CORPORATION, DOCKET NO. CP66-390

ORDER GRANTING CONDITIONED CERTIFICATE

(Issued September 20, 1966)

On May 26, 1966, Atlantic Seaboard Corporation filed the instant application in which it seeks authorization pursuant to Section 7(c) of the Natural Gas Act to interconnect and operate approximately 1185 feet of 36-inch O.D. by 0.250-inch wall thickness electric weld, grade X-100 steel pipeline as a segment of its transmission pipeline system in Grant County, West Virginia. A supplement to the application was filed on July 12, 1966, and additional information was filed on August 9, 1966, in response to a request of the Secretary of the Commission. Public notice of the application was made on June 3, 1966, and no protests or petitions to intervene have been filed.

The section of pipe in question originally was installed without certification by Seaboard on an experimental basis in November, 1964; it was capped on

---

*Unreported.

each end and was attached to Seaboard's transmission pipeline system by means of a 2-inch line in order to react to line pressure as a storage vessel for testing purposes. Thereafter, on November 27, 1965, Seaboard interconnected the segment in question to a 10-mile loop on its transmission system without obtaining prior approval from the Commission. Construction and operation of that loop had been authorized in a temporary certificate issued on June 17, 1965, in Docket No. CP65-122; however, the pipe material specified in that application was 36-inch O.D. by 0.406-inch and 0.469-inch wall thickness grade API 5LX-60 steel. In its completion report in Docket No. CP65-122 filed on January 7, 1966, Seaboard revealed that it had substituted approximately 1185 feet of grade X-100 pipe for grade API 5LX-60 pipe as a portion of the 10-mile loop. After receiving Seaboard's completion report the Commission staff pointed out to Seaboard that it had no authorization to use the X-100 pipe. Seaboard then, on February 10, 1966, filed to amend its application in Docket No. CP65-122 and to amend the temporary certificate that had been issued in that docket so as to be permitted to install and operate the section of X-100 pipe in question. Seaboard's request to amend was denied by letter-order issued April 8, 1966, and Seaboard was directed to remove the pipe from service. The requested amendment was denied because of the fact that the X-100 pipe conformed to no standards of the American Petroleum Institute or the American Standards Association and because amendment would cause hearings in the proceeding in which Docket No. CP65-122 was consolidated[1] to be reopened, thus disrupting and delaying the disposition of applications in that proceeding. Seaboard complied with the Commission directive and discontinued operation of the grade X-100 line pipe on April 12, 1966. Since that line section is not separately interconnected to Seaboard's mainline system, but is an integral part of the 10-mile loop, Seaboard chose to remove the entire loop from service to comply with the order.

The X-100 pipe proposed to be used is composed of "quenched and tempered" steel which is markedly different (both in physical properties and in manufacturing process) from those types of steel of which API 5LX pipe is composed. Neither the American Standards Association nor the American Petroleum Institute has published specifications or standards for the manufacture, design, installation, or operation of grade X-100 line pipe (or, for that matter, of any "quenched and tempered" steel) for high pressure gas transmission lines. Seaboard and the manufacturer, United States Steel Corporation, during the experimentation and unauthorized operation, did establish a comprehensive and detailed program to develop procedures and tests relating to all aspects of the manufacture, design, installation, and utilization of the X-100 line pipe. In addition to these efforts, tests and evaluations were conducted by the Battelle Memorial Institute of Columbus, Ohio, whose special evaluation report has been submitted in this docket.

Despite the tests conducted to date and the care exercised in the manufacture and installation of this pipe we do not believe that its use should be authorized until after approval by the B31 Code Committee of the American Standards Association (ASA). The American Standard Code For Pressure

---

[1] Columbia Gulf Transmission Co., *et al.*, Docket No. CP65-102, *et al.*

Piping — Gas Transmission and Distribution Piping System, ASA B31.8-1963, is the safety code generally followed by the natural gas pipeline industry, although compliance with that Code is voluntary. It is our belief, however, that, pending action on the legislation this Commission has proposed in this area, compliance with the Code should be a (but not necessarily the only) prerequisite to Commission certification of new construction under the terms of Section 7(c) of the Natural Gas Act as required by public convenience and necessity. As pointed out below, while the ASA Code, as presently drafted, does not directly establish standards for quenched and tempered steel as a pipe material, it does appear to provide a procedure by which the X-100 pipe can be qualified for use provided that it can be justified to the Code Committee. As indicated, the existing ASA standards and specifications provide no guidance whatsoever with respect to the appropriateness of quenched and tempered steel as a pipe material. That Code does adopt by reference various standard material specifications and requirements for pipe[2], but none of these specifications adopted relates to quenched and tempered steel for high pressure gas transmission pipelines.

This of course does not end the inquiry. There will always be new developments in the pipeline industry which do not conform to existing standards, and it is essential that there be an appropriate procedure by which such new developments can be qualified for operation. The question is what is the appropriate procedure under the present code provisions.

Seaboard claims that the X-100 pipe has been developed and installed in conformance with Section 811.24 of the ASA Code which provides:

> Items of a type for which no standards or specifications are listed in this Code (811.1[d]) may be qualified by the user by investigation and tests (if needed) that demonstrate that the item of material or equipment is suitable and safe for the proposed service, and provided further that the item is recommended for that service from the standpoint of safety, by the manufacturer. Examples: Gas compressors, pressure relief devices.

A letter from the Secretary of the B31 Code Committee, while not referring to X-100 or any other type of pipe, suggests that this section would apply to the "development stage of new materials, designs, or components". However, as pointed out below, such interpretation, if it is applied to radically new types of pipe like the X-100, seems wholly inconsistent with other sections of the Code and could render these important provisions nugatory. Thus, while obviously the ultimate interpretation of the Code is a matter for the ASA rather than the Commission, we are unable in the absence of a ruling by the appropriate Committee to accept the Seaboard contention.

The Code provisions for qualification of materials and equipment are set out in Section 811 thereof. Subsection 811.1 establishes five categories of such material and equipment of which the two most relevant here are 811.1(b) and (d).[3] These cover:

---

[2] Section 813 of the ASA Code provides:

813.1 Standard specifications for various materials are listed in Appendices A and B.

813.2 Cold expanded pipe shall meet the mandatory requirements of API Standard 5LX.

> (b) Items that are important from a safety standpoint, of a type for which standards or specifications are listed in this Code, but the specific item in question does not conform to a listed standard. Example: Pipe manufactured to a specification not listed in the Code.
>
> * * * * * * *
>
> (d) Items of a type for which no standard or specification is listed in this Code: Example, Gas compressor.

It seems to us that the pertinent provisions of the ASA Code insofar as the present problem is concerned are Sections 811.22 and 811.221 which provide [emphasis supplied]:

> 811.22 Important items of a type for which standards or specifications are listed in this Code, *such as pipe,* valves and flanges, but which do not conform to standards or specifications listed in this Code (811.1 *b*) *shall be qualified* as described in 811.221 or 811.222.[4]
>
> 811.221 By petitioning the Code Committee for approval. If possible, the material shall be identified with a comparable material, and it should be stated that the material will comply with that specification except as noted. Complete information as to chemical composition and physical properties shall be supplied to the Code Committee, and their approval shall be obtained before this material may be used.

The plain meaning of the above language seems to impose a requirement for petitioning the Code Committee for approval when important items *such as pipe* which do not conform to listed standards or specifications and which vary materially from them. The language is unequivocal and imposes a mandatory requirement.

It seems equally clear that section 811.24 upon which Seaboard relies for its claim of Code compliance does not apply to items such as pipe. In the first place, that section is not phrased in the disjunctive to section 811.22 but, rather, is directed to types of items which are different from those contemplated in section 811.22. Section 811.22 refers to items of a type listed in section 811.1(b), ("items that are important from a safety standpoint, of a type for which standards or specifications are listed in this Code") for which the example of "pipe manufactured to a specification not listed in the Code" is given. Section 811.24 on the other hand refers to items of a type listed in section 811.1(d) for which the example of gas compressor is given. 811.24 itself gives as examples gas compressors and pressure relief devices. Unlike pipe there are no standards or specifications in the Code by reference or otherwise, governing the design or material composition of gas compressors or pressure relief devices.

---

[3] 811 QUALIFICATION OF MATERIALS AND EQUIPMENT

811.1 Materials and equipment fall into five categories insofar as methods of qualification for use under this Code are concerned:

(a) Items which conform to standards of specifications listed in this Code.

(b) Items that are important from a safety standpoint, of a type for which standards or specifications are listed in this Code, but the specific item in question does not conform to a listed standard. Example: Pipe manufactured to a specification not listed in the Code.

(c) Items of a type for which standards or specifications are listed in this Code but which do not conform to the standards and are relatively unimportant from a safety standpoint because of their small size or because of the conditions under which they are to be used.

(d) Items of a type for which no standard or specification is listed in this Code: Example: Gas compressor.

(e) Unidentified or used pipe.

[4] Section 811.222 permits the use of only those materials which do not vary materially from a listed specification and is clearly inapplicable to X-100 pipe because of the markedly different physical properties of quenched and tempered steel as compared with materials now in use. That section provides:

> 811.222. Materials conforming to specifications which do not vary materially from a listed specification and which meet the minimum requirements of this Code with respect to quality of materials and workmanship may be used. This paragraph shall not be construed to permit deviations which would tend to adversely affect weldability or ductility. If the deviations tend to reduce strength, full allowance for the reduction shall be provided for in the design.

Accordingly, in the absence of a contrary interpretation by the Code Committee, we shall require Seaboard to comply with the requirements of section 811.221 of the ASA Code prior to the interconnection and operation of the X-100 pipe in question.

In light of our evaluation of the extensive testing conducted to date and the results thereof, it appears that the X-100 material would be suitable for use if the Code Committee, after its evaluation, grants specific approval pursuant to Section 811.221 of the Code. As indicated below, such approval will be also conditioned upon Seaboard making reports to the Commission with respect to the behavior, history and testing operations related to this pipe.

At a hearing held on September 19, 1966, the Commission on its own motion received and made a parts of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission further finds:

(1) Atlantic Seaboard Corporation, a Delaware corporation having its principal place of business in Charleston, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission (3 FPC 941).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Seaboard is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Seaboard's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Atlantic Seaboard Corporation, to install and operate the proposed facilities and to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned as follows:

(1) Prior to the installation and operation of the facilities in question Seaboard must petition and obtain express approval of the pipe proposed for use from the B31 Code Committee of the American Standards Association as provided in section 811.221 of the American Standard Code For Pressure Piping—Gas Transmission and Distribution Piping Systems, ASA B31.8-1963.

(2) Seaboard shall: (a) report immediately, any abnormality in the behavior of the grade X-100 line segment; (b) file at six month intervals from the date of the issuance of this order progress reports to include, but not be restricted to, operating pressure history, leak survey data, and cathodic protection pipe-to-soil potential survey data on the grade X-100 pipeline. Such reports shall also include a status report on the hydrogen-stress field tests on grade X-100 steel concurrently being carried on by the Battelle Memorial Institute.

(3) Seaboard shall comply with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the sale and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within six months from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

TRANSWESTERN PIPELINE COMPANY, DOCKET NOS. CP63-204 AND CP64-19; GULF PACIFIC PIPELINE COMPANY, CP63-223; EL PASO NATURAL GAS COMPANY, CP64-76

ORDER GRANTING REHEARING FOR PURPOSES OF ADEQUATE CONSIDERATION

(Issued September 21, 1966)

Southern California Edison Company (Edison), on August 23, 1966, the City of Los Angeles and its Department of Water and Power (LADWP) on August 24, 1966, and Gulf Pacific Pipeline Company, the People of the State of California and the Public Utilities Commission of the State of California, and the United States Department of Health, Education, and Welfare (HEW) on August 25, 1966, have filed applications for rehearing with respect to our Opinion No. 500 and order issued July 26, 1966, 36 FPC 176. In accordance with Section 19 of the Natural Gas act these applications may be deemed denied unless the Commission acts within 30 days after their filing.

After the receipt of these applications, information came to the Commission's attention indicating that some of the producers contracting to supply gas to Edison and LADWP to be transported by Gulf Pacific had filed notices of termination of their contracts. Consequently, on September 2, 1966, *supra*, p. 577, we issued an order providing that Gulf Pacific, Edison and LADWP should submit by September 13, 1966, copies of such notices of termination and that Gulf Pacific, Edison, LADWP should and other parties might submit by September 16, 1966, statements showing why the proceedings should not be sum marily terminated as moot. In accordance with this order copies of contract terminations and statements have been filed.

On September 6, 1966, in response to our order of August 19, 1966, 36 FPC 491, correcting certain ordering clauses in Opinion No. 500, California filed an additional application for rehearing.

In order to provide time for adequate consideration of the responses to our order of September 2, 1966, and California's application for rehearing of our order of August 19, 1966, we shall grant rehearing of Opinion No. 500 and order, and our order of August 19, 1966.

In view of this limited reason for granting rehearing and the opportunity afforded all parties to file statements in response to our order of September 2, 1966, we see no need for responses to be filed with respect to the applications for rehearing of Opinion No. 500, and will not delay our further orders herein to await any such filings. However, a response by El Paso would be appropriate to the application for rehearing filed by California with respect to our order of August 19, 1966. Any such response should be filed by September 27, 1966.

While we are granting the applications for rehearing to insure adequate consideration, this should not be considered a stay of our Opinion No. 500 and order as amended by our order of August 19, 1966.

The Commission orders:

The applications for rehearing filed with respect to our Opinion No. 500 and order and the application filed with respect to our order of August 19, 1966, are hereby granted for purposes of adequate consideration by the Commission.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

ALABAMA POWER COMPANY, PROJECT NO. 2165

ORDER ON REHEARING FIXING ANNUAL CHARGES FOR USE OF A GOVERNMENT DAM

(Issued September 23, 1966)

The Commission on September 28, 1965, 34 FPC 971, issued an order fixing annual charges of $92,000 to the Alabama Power Company for its use in the John Hollis Bankhead Powerhouse development, Project No. 2165, of the United States' John Hollis Bankhead navigation dam, also known as Lock and Dam No. 17, on the Black Warrior River in Alabama. The charges were made effective from July 12, 1963, when the powerhouse development was put in commercial operation.

The licensee filed an application for rehearing, and the Commission granted rehearing for purposes of further consideration. The order fixing hearing, issued on April 21, 1966, specified that subjects examined would include "not only the issues raised by the Alabama Power Company's application for rehearing * * * but also the question of what basic method should be employed for fixing annual charges for the use of the Government dams."

Prehearing conferences were held before Presiding Examiner Harry C. Shriver on May 10, June 15, June 24, and June 28, 1966. At the last of these conferences, it was stated that the licensee and the Commission staff had reached an agreement on the proposed annual charges incorporated in this order. The licensee, citing *The Montana Power Co.* v. *F.P.C.*, 298 F. 2d 335 (CA9–1962), states that it is the reasonableness of the end result, not the reasonableness of the method of computing the payment, which is the statutory standard for determining annual charges, and that the proposed charges are reasonable. The licensee and the Commission staff joined in a motion to the Examiner to certify the proposed charges to the Commission for its approval. The motion was granted, and the proceeding is before us on the Examiner's certification.

The annual charges fixed by the order of September 28, 1965, were computed according to the so-called sharing-of-the-costs method, in which the annual costs of the Government joint-use facilities (*i.e.*, the dam and reservoir) are apportioned between the United States and the licensee in the ratio which the benefits of the facilities to the one bear to the benefits of the facilities to the other. Although annual charges were computed by this method on several occasions in the early 1920's, it has not been used, so far as we are aware, since then. Our order of September 28, 1965, was an inadvertent return to that method.

The annual charges now proposed for our approval are computed by the so-called sharing-of-the benefits method, which has been in general use since about 1925. The proposed charges are as follows: (1) $43,100 for the period of July 12, 1963, through December 31, 1963; (2) $89,600 per year for the period of January 1, 1964, until the filling of the reservoir is completed at the United States' downstream Holt navigation dam (Lock and Dam No. 13); (3) $74,000 per year for the period thereafter until any readjustment of the charges pursuant to Section 10(e) of the Act (16 U.S.C. 803 (e)).

The sharing-of-the benefits method consists of four basic steps, as follows: (1) finding the annual costs of the powerhouse development to the licensee; (2) finding the gross annual benefits of the powerhouse development to the licensee; (3) subtracting the annual costs from the annual benefits of the powerhouse development; and (4) sharing the net annual benefits equally between the United States and the licensee.

The sharing-of-the benefits method, we note, assures that all licensees pay (and hence receive) the same proportion of the value of the benefits of their powerhouse developments. Under a sharing-of-the-costs method, some licensees might be required to pay virtually all of the value of the benefits and others virtually none, depending on the factual situation. Moreover, under such method, once the pay-out or amortization period of the Government project has run, the annual charges would be drastically reduced (they would consist merely of a part of the operation, maintenance, and replacement costs). We are persuaded by these considerations to adhere to the sharing-of-the benefits method for fixing annual charges for the use of Government dams. This method, we observe, is to be used to fix the charges to the Alabama Power Company for the use in its Holt Powerhouse development, Project No. 2203, of the United States' Holt navigation dam. See: *Alabama Power Co.*, Project No. 2203, October 7, 1965, 34 FPC 1108 (Article 44 (ii)).

Other significant differences between the derivation of the annual charges proposed for our approval here and the derivation of those fixed by the order of September 28, 1965, are as follows:

(1) The proposed charges are based on a cost of money to the licensee of six percent. The order of September 28, 1965, utilized a cost of money of 5.5 percent.

(2) The proposed charges are based on a value of dependable capacity to the licensee at the time it decided to construct the project of $21.00 per kilowatt

per year. A value of $23.50 was used in the order of September 28, 1965. (3) For the proposed charges, a dependable capacity of 52,000 kilowatts is used; after the filling of the downstream Holt reservoir, which will back up against the Bankhead dam and decrease the head, a dependable capacity of 50,000 kilowatts is used. The order of September 28, 1965, assumed that the dependable capacity was the same as the nameplate rating of 45,000 kilowatts.

The decrease in the proposed annual charges from those fixed in the order of September 28, 1965, is the result not of the use of the sharing-of-the benefits method, but primarily of the use of a lesser value for dependable capacity and to some extent the greater cost of money to licensee.

The Commission finds:

It is appropriate and in the public interest in administering Part I of the Federal Power Act, particularly Section 10(e) thereof, to fix the annual charges as set forth below to the Alabama Power Company for the use in its John Hollis Bankhead development, Project No. 2165, of the United States' John Hollis Bankhead navigation dam.

The Commission orders:

(A) The order of September 28, 1965, fixing annual charges to the Alabama Power Company for the use in its John Hollis Bankhead Powerhouse development, Project No. 2165, of the United States' John Hollis Bankhead navigation dam is hereby rescinded.

(B) The license for Project No. 2165 is hereby amended, effective as of July 12, 1963, the date of the commencement of the commercial operation of the licensee's generating unit at the United States' John Hollis Bankhead navigation dam, by modifying subparagraph (iii) of Article 42 to read as follows:

> (iii) The annual charge for the purpose of recompensing the United States for the use of the John Hollis Bankhead navigation dam shall be as follows: (1) $43,100 for the period of July 12, 1963, through December 31, 1963; (2) $89,600 per year for the period of January 1, 1964, until the filling of the reservoir is completed at the United States' downstream Holt navigation dam (Lock and Dam No. 13); and (3) $74,000 per year for the period thereafter. The charges may be readjusted in the future pursuant to the provisions of Section 10(e) of the Federal Power Act.

(C) Acknowledgment of acceptance of all of the provisions, terms, and conditions of this license amendment shall be made by the licensee and returned to the Commission within 30 days from the date of issuance of this order.

Commissioner Ross *concurring* with the result simply because the parties have agreed to a stipulation which seems reasonable. However, he does not join in the purported rationale of the order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CENTRAL MAINE POWER COMPANY, DOCKET NO. E-7290

ORDER DENYING APPLICATION FOR REHEARING

(Issued September 23, 1966)

Central Maine Power Company (Applicant or Company) filed an application on August 26, 1966, seeking rehearing of the Commission's order of July

29, 1966, 36 FPC 323, authorizing the Applicant to acquire the electric facilities of Maine Consolidated Power Company and of its wholly-owned subsidiary, Phillips Electric Light and Power Company. Applicant requests the Commission to modify its order insofar as it requires the Company to amortize an acquisition adjustment of $563,934 through Account 425, Miscellaneous Amortization, as an income deduction over a period not to exceed five years. Applicant submits that it should be allowed to amortize this amount through charges to operating expenses over a period of 15 years.

The accounting disposition of amounts classified in Account 114 Electric plant acquisition adjustments[1] is provided in the Commission's Uniform System of Accounts Prescribed for Class A and Class B Public Utilities and Licensees (18 CFR 84, 131), as follows:

> C. The amounts recorded in this account with respect to each property acquisition shall be amortized, or otherwise disposed of, as the Commission may approve or direct.

Absent a showing that the expenditures in excess of original cost depreciated, in themselves, are of benefit to the company's consumers, the Commission's Regulations and established practice contemplate that Applicant will charge off such amount, $563,934, below the line over a reasonable period—on the facts of this case a period not to exceed five years.[2]

In support of its accounting disposition, the Company directs attention to projected utility rate revisions and operations arising from consummation of the merger transaction; background facts associated with its negotiations to acquire the two companies, including a competing offer for their purchase; reproduction cost appraisal procedures covering the properties involved; and rate base valuation procedures and findings observed in another regulatory jurisdiction.

Careful review of all of these considerations does not persuade us that Applicant has discharged its obligation of meeting this Commission's consumer benefit test of requests to amortize acquisition adjustments through changes to operating expenses or of establishing the reasonableness of the 15-year amortization period it seeks.

The Commission finds:

The assignments of error and grounds for rehearing set forth in the above-described application for rehearing of the order of July 29, 1966, present no facts or principles of law which were not considered by the Commission when it issued the order or which, having now been reconsidered, warrant any change or modification of the order.

The Commission orders:

The above-described application for rehearing of the Commission's order of July 29, 1966, is denied.

---

[1] Amounts classifiable therein are as described in Account Instruction Paragraph A, Account 114:

> A. This account shall include the difference between (a) the cost to the accounting utility of electric plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation, or otherwise, and (b) the original cost, estimated, if not known, of such property, less the amount or amounts credited by the accounting utility at the time of acquisition to accumulated provisions for depreciation and amortization and contributions in aid of construction with respect to such property.

[2] Alternatively, Applicant without prior Commission permission may charge off acquisition adjustments directly to Account 216 earned surplus. Section 120.4 Electric plant acquisition adjustment accounts, Regulations under the Federal Power Act (18 CFR 141).

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

VILLAGE OF CIRCLE PINES, MINNESOTA v. NORTHERN NATURAL GAS COMPANY AND NORTH CENTRAL PUBLIC SERVICE COMPANY, DOCKET NO. CP67-17

ORDER DISMISSING COMPLAINT

(Issued September 23, 1966)*

On July 18, 1966, the village of Circle Pines, Minnesota (Circle Pines), a municipality which purchases gas from Northern Natural Gas Company (Northern) for distribution to customers in Circle Pines and a portion of the adjacent village of Lino Lakes, Minnesota, filed a complaint against Northern and North Central Public Service Company (North Central) alleging that the franchise issued to it by Lino Lakes grants it the right to extend natural-gas service to the entire community but that North Central has succeeded in obtaining a non-exclusive franchise authorizing the latter also to distribute gas in Lino Lakes. Circle Pines avers that neither Northern nor North Central has ever filed an application seeking Commission authorization allowing Northern to deliver gas to North Central for distribution in Lino Lakes, whereas Circle Pines was granted an increase of 200 Mcf in its contract demand in November 1965 for initiation of natural-gas service in Lino Lakes. Circle Pines claims that Northern and North Central's contractual arrangement under which they propose to provide natural-gas service to Lino Lakes is unjust, unreasonable, unduly discriminatory or preferential under Section 5(a) of the Natural Gas Act in view of Northern's existing contractual relations with Circle Pines. Consequently Circle Pines asks that the Commission (1) order Northern not to deliver any gas to North Central for use in Lino Lakes, (2) cancel any contract between Northern and North Central providing for the interconnection of facilities to render service to Lino Lakes, and (3) reconfirm the Commission's prior allocation of gas to Circle Pines for use in Lino Lakes.

North Central and Northern filed answers to Circle Pines' complaint on August 22 and August 30, 1966, respectively, in which they deny that either of them has failed to comply with the Natural Gas Act in any way and allege that Circle Pines' complaint fails to state a cause of action under the Natural Gas Act. They agree that Lino Lakes did issue a non-exclusive franchise to Circle Pines in October 1961 and that Circle Pines does in fact distribute natural gas in a small portion of Lino Lakes, but they point out that on June 13, 1966, Lino Lakes granted a non-exclusive franchise to North Central authorizing it to distribute natural gas in Lino Lakes *except* for the portion of the village already being served with natural gas by Circle Pines. Accompanying Northern's answer is a copy of a letter sent to the Utilities Commission of Circle Pines advising the latter that Lino Lakes had issued a franchise to North Central authorizing it to distribute natural gas in Lino Lakes, except for that portion being served by Circle Pines, and stating that Lino Lakes desired to amend the franchise granted to Circle Pines to provide for this division of distribution territory so as to "* * * eliminate any possible future misunderstanding on the question of gas service as between North Central Public Service Company and the Circle Pines Utilities Commission."

North Central states that Circle Pines merely extended its distribution system into Lino Lakes and utilized its existing contract demand authorization to provide the additional service to Lino Lakes. North Central claims that it is planning to provide service to Lino Lakes in the same manner, that is, by extension of its existing distribution system in Blaine, Minnesota, to Lino Lakes. North Central further alleges that since both it and Circle Pines have provided for service to Lino Lakes from existing distribution facilities not subject to Commission jurisdiction and have utilized, or plan to utilize, existing contract demand volumes of gas heretofore certificated by the Commission, that there is no need for either Circle Pines or North Central to seek specific authorization from the Commission to provide natural-gas service in Lino Lakes.

---

*Rehearing denied by order issued November 18, 1966, 36 FPC 873.

Northern states that the dispute between North Central and Circle Pines is a matter within the competence of the Minnesota state courts and notes that Circle Pines has in fact already instituted an action against Lino Lakes and North Central in a Minnesota state court to enforce its franchise rights.

It is clear that the dispute between North Central and Circle Pines is purely a local dispute as to the franchise rights granted to Circle Pines and North Central by the village of Lino Lakes. We have left such matters to the determination of local authorities in similar cases. See, *e.g.*, *American Louisiana Pipe Line Co.*, 28 FPC 41, 42, and *Northern Natural Gas Co.*, 22 FPC 164, 175-76. However, in each of those cases we were at least required to take some action because the competing distributors were seeking specific allocations of gas from pipeline companies in order to initiate natural-gas service, whereas the factual situation with respect to Lino Lakes shows that each of the competing distributors already has sufficient contract demand under prior Commission orders to permit either of them to provide natural-gas service in Lino Lakes. Northern's facilities are already connected to each competitor's existing distribution system and Northern is authorized to sell and deliver gas to each competitor under existing service agreements approved by the Commission.

Although Circle Pines purports to have received an increase of 200 Mcf in contract demand to provide service to Lino Lakes, it does not cite the Commission order which is supposed to have provided for the specific increase for Lino Lakes. Circle Pines does state that the increase became effective in November 1965, so presumably Circle Pines' reference to an increase of 200 Mcf in contract demand is related to Northern's application in Docket No. CP65-188 wherein we issued an order on March 31, 1965, 33 FPC 659, authorizing Northern to increase its system capacity by 47,741 Mcf, including an increase of 200 Mcf in Circle Pines' contract demand. Northern's application in Docket No. CP65-188 made no mention of the fact that Circle Pines needed the additional gas to initiate natural-gas service in the village of Lino Lakes. In order for this authorization to have the meaning which Circle Pines seeks to attach to it, Circle Pines would have had to present evidence in Docket No. CP65-188 showing, *inter alia*, the estimated gas requirements of Lino Lakes and demonstrating the economic feasibility of distributing natural gas in that community. In the absence of any such evidence of record in Docket No. CP65-188, that proceeding cannot be used on a retroactive basis to formulate the argument that we authorized Northern to deliver a specific volume of gas to Circle Pines for initiation of natural-gas service in Lino Lakes.

The foregoing discussion shows that the only questions raised by Circle Pines' complaint relate to the proper interpretations to be given under Minnesota law to the non-exclusive franchise issued by Lino Lakes to both Circle Pines and North Central. We believe that these matters should be left for determination by the local authorities in Minnesota.

The Commission finds:

Circle Pines' complaint against Northern Natural Gas Company and North Central Public Service Company should be dismissed for failure (1) to state any facts showing that either Northern or North Central has done anything or omitted to do anything in contravention of the Natural Gas Act, or of the Commission's orders, rules, or regulations issued thereunder, or (2) to show that the nature of the dispute between Circle Pines and North Central is a matter properly to be decided by the Commission.

The Commission orders:

The Complaint filed July 18, 1966, by the village of Circle Pines in Docket No. CP67-17 is dismissed.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

FLORIDA GAS TRANSMISSION COMPANY, DOCKET NO. CP67-19

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 23, 1966)

On July 25, 1966, Florida Gas Transmission Company (Applicant), filed in Docket No. CP67-19 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of the facilities necessary to sell and deliver natural gas on a direct firm and so-called Preferred Interruptible basis to Hudson Pulp and Paper Corporation (Hudson) for use in its pulp and paper plant located near Palatka in Putnam County, Florida, all as more fully set forth in the application which is on file with the Commission.

Applicant specifically proposes to construct and operate approximately 4.40 miles of 6-inch pipeline extending from its existing 8-inch Palatka lateral pipeline in Putnam County, Florida in a general northerly direction to Hudson, together with the necessary metering and regulating facilities to render the proposed service.

Applicant estimates the maximum deliveries to Hudson will be 442 MMBtu daily and 88,400 MMBtu annually of preferred interruptible gas and 380 MMBtu daily of firm natural gas.

The estimated cost of the proposed facilities is approximately $125,000, which cost is proposed to be financed out of funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 22, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, Florida Gas Transmission Company, a Delaware corporation having its principal place of business in Winter Park, Florida, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by

the Commission in its order issued July 3, 1963, in Docket No. CP63-277 (30 FPC 27).

(2) The proposed construction and operation of facilities and transportation and delivery of natural gas, as hereinbefore described and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and transportation and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with Section 155.1 and all other applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate be granted on the express condition that the interruptible service authorized herein should be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and the transportation and delivery of up to 380 MMBtu per day of firm and 442 MMBtu of interruptible natural gas per day as hereinbefore described and as more fully described in the application in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with Section 155.1 and all other applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed as authorized in paragraph (A) above as provided for in paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 6 months from the date on which this order issues.

(D) The certificate issued in paragraph (A) above is granted on the express condition that the interruptible service auhorized herein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

(E) The certificate issued shall not entitle the industrial customer to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

THE MANUFACTURERS LIGHT AND HEAT COMPANY, AND CUMBERLAND AND ALLEGHENY GAS COMPANY, DOCKET NO. CP66-407

FINDINGS AND ORDER AFTER STATUTORY HEARING, PERMITTING AND APPROVING ABANDONMENT AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 23, 1966)

On June 8, 1966, The Manufacturers Light and Heat Company (Applicant), filed in Docket No. CP66-407 an application and amendment on August 16, 1966, joining Cumberland and Allegheny Gas Company (C and A), an affiliate, as an Applicant, pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas pipeline facilities and for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline facilities, all as more fully set forth in the application and amendment.

Manufacturers seeks authorization to construct and operate, (1) 1.0 mile of 8-inch pipeline as a replacement of its 1.0 mile, 6-inch Line No. 1058 in Buffalo District, Brook County, West Virginia; (2) 2.0 miles of 6-inch pipeline as a replacement of a 2.0 mile section of its 4-inch Line No. 1144 in Magnolia and Proctor Districts, Wetzel County, West Virginia; and (3) a tap on its Line No. 1804 and 199 feet of 6-inch gas transmission pipeline in Elk Lick Township, Somerset County, Pennsylvania, to provide a point for delivery of gas by C and A to Applicant under an exchange arrangement with C and A. Applicant also requests permission and approval to abandon, (1) 1.7 miles of its 8-inch Line No. 17 in Richhill Township, Greene County, Pennsylvania, and (2) its entire Line No. 949, consisting of 1.1 miles of 2-inch pipeline in Liberty District, Marshall County, West Virginia.

Applicant states that the pipelines are to be replaced and abandoned due to age and condition and to maintain dependable service.

The total estimated cost of Applicant's proposed construction is $129,400 which cost will be financed as a part of Applicant's 1966 construction program through the issuance and sale of installment promissory notes or common stock to its parent company, The Columbia Gas System, Inc.

Cumberland and Allegheny Gas Company (C and A) made application on August 16, 1966, filed as an amendment to the application of Manufacturers, for authorization to construct and operate 5 miles of combined 4-inch and 6-inch pipeline for the purpose of establishing an additional point of exchange between Manufacturers and Cumberland and Allegheny Gas Company.

The 5.0 mile combined 4-inch and 6-inch pipeline will extend from the site of the completed well in Garrett County, Maryland, north to the Maryland-Pennsylvania state line, where it will connect with the southerly end of the 199 feet of 6-inch pipeline proposed to be constructed under Project No. 5 in the original Application in Somerset County, Pennsylvania. The estimated construction cost of the facilities is $164,000, and will be financed as part of its total construction program through the issuance and sale of notes or common stock to its parent company, The Columbia Gas System, Inc.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application and amendment has been filed.

At a hearing held on September 22, 1966, the Commission on its own motion received and made a part of the record in the proceeding all evidence, including the application and exhibits, submitted in support of the authorizations sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, The Manufacturers Light and Heat Company, a Pennsylvania corporation and a subsidiary of The Columbia Gas System, Inc., having its principal place of business in Pittsburgh, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 29, 1944, in Docket No. G-593, *et al.* (4 FPC 821).

(2) Applicant, Cumberland and Allegheny Gas Company, a West Virginia corporation having its principal place of business in Pittsburgh, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued January 5, 1944, in Docket No. G-387 (4 FPC 472).

(3) The facilities proposed to be abandoned by Manufacturers as hereinbefore described and as more fully described in the application herein, are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the abandonment thereof is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(4) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and approval therefor should be granted as hereinafter ordered.

(5) The proposed exchange of natural gas, construction and operation of facilities, by Manufacturers and Cumberland and Allegheny and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application and amendment and exhibits filed in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(6) The aforesaid proposed exchange of natural gas, construction and operation of facilities and the transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(7) Applicants are able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(8) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Manufacturers' and Cumberland's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) Permission for and approval of the abandonment of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted to Applicant, The Manufacturers Light and Heat Company.

(B) Manufacturers shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

(C) A certificate of public convenience and necessity is issued to Applicants, The Manufacturers Light and Heat Company and Cumberland and Allegheny

Gas Company, authorizing the exchange of natural gas, the construction and operation of facilities and the transportation of natural gas in interstate commerce, as hereinbefore described, all as more fully described in the application and amendment and exhibits filed in this proceeding, upon the terms and conditions of this order.

(D) The certificate issued by paragraph (C) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(E) The facilities authorized by paragraph (C) above shall be completed and placed in operation with 12 months from the date of the issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP67–29

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 23, 1966)

On August 8, 1966, Natural Gas Pipeline Company of America (Applicant), filed in Docket No. CP67–29 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an increase in the firm quantity of natural gas to be transported and delivered to Phillips Petroleum Company (Phillips), an existing customer of Applicant, all as more fully set forth in the application.

Applicant is presently authorized to transport and deliver to Phillips, for use in its Beatrice, Nebraska, ammonia plant, 24,000 Mcf of gas per day on a firm basis and up to 2,000 Mcf of gas per day on an off-peak basis[1]. Applicant states that pursuant to the exercise of an option granted in Article V of its contract with Phillips dated July 7, 1964, Phillips has elected to convert 1,000 Mcf per day of off-peak gas to firm gas increasing the total firm delivery quantity to 25,000 Mcf per day. Applicant further states that with the commencement of the additional firm deliveries of 1,000 Mcf per day the quantity of off-peak gas will be correspondingly reduced by 1,000 Mcf so that the total off-peak quantity will be 1,000 Mcf of gas per day.

Applicant will not require additional facilities to make the proposed sale.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 22, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

---

[1] Pursuant to Commission orders issued October 12, 1964, in Docket No. CP65–16, 32 FPC 980, issued August 13, 1965, in Docket No. CP65–169, 34 FPC 507, and issued May 27, 1966, in Docket No. CP66–262, 35 FPC 831.

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 7, 1958, in Docket No. G–9966 (20 FPC 694).

(2) The proposed transportation and delivery of natural gas by Applicant to Phillips as hereinbefore described, and as more fully described in the application, in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed transportation and delivery of natural gas is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with Section 155.1 and all other applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, authorizing the transportation and delivery of natural gas to Phillips, as hereinbefore described and as more fully described in the application in this proceeding, and upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with Section 155.1 and all other Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The services authorized shall be commenced, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 6 months of the date on which this order issues.

(D) The certificate issued shall not entitle the industrial customer to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

UNITED GAS PIPE LINE COMPANY AND TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. CP67-26

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 23, 1966)

On August 8, 1966, United Gas Pipe Line Company (United Gas) and Texas Eastern Transmission Corporation (Texas Eastern), collectively referred to as Applicants, filed in Docket No. CP67-26 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of two additional points of delivery for the exchange of natural gas, all as more fully set forth in the application.

Applicants propose pursuant to their letter agreement of July 12, 1966, to construct and operate two interconnections, with the requisite facilities, between their respective pipeline systems for the exchange of natural gas at the following locations:

(1) At the intersection of Texas Eastern's 24-inch Provident City-Blessing line and United's 30-inch Agua Dulce-Sterlington line in Jackson County, Texas.

(2) At a point on Texas Eastern's 36-inch Venice line where it crosses United's 12-inch Valentine Field Line, Lafourche Parish, Louisiana.

Applicants exchange natural gas under exchange agreements between them dated August 5, 1948, and March 29, 1954, as supplemented and amended. The exchange agreements are on file and in effect with the Commission as United's Rate Schedules X-2 and X-3 and Texas Eastern's Rate Schedule X-6.

The total estimated cost of the proposed facilities is $180,795, which cost will be financed out of general funds with United constructing and financing the Jackson County, Texas, interconnection and Texas Eastern constructing and financing the Lafourche Parish, Louisiana, interconnection.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 22, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorizations sought and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G-232 (3 FPC 863).

(2) Applicant, Texas Eastern Transmission Corporation, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1949, in Docket No. G-1089 (8 FPC 228).

(3) The proposed exchange of natural gas between the Applicants, and the construction and operation of the proposed facilities for the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the joint application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid proposed exchange and delivery of natural gas and the construction and operation of facilities are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Applicants are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that United Gas and Texas Eastern shall amend their respective FPC Rate Schedules to include the new delivery points in accordance with the applicable Commission Regulations.

(7) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicants in this proceeding, jointly, authorizing the exchange and delivery of natural gas as hereinbefore described, and the construction and operation of facilities for the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the joint application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 6 months of the date on which this order issues.

(D) United Gas and Texas Eastern shall file amended rate schedules to their respective FPC Gas Tariffs in accordance with the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

CITIES SERVICE GAS COMPANY, DOCKET NO. CP66-419

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 26, 1966)

On June 20, 1966, Cities Service Gas Company (Applicant) filed in Docket No. CP66-419 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the delivery and sale of natural gas to The Gas Service Company (Gas Service) for resale and the transportation and delivery of natural gas to Magnolia Pipe Line Company (Magnolia) for use by the latter as fuel at its Williamstown Pump Station, Jefferson County, Kansas, all as more fully set forth in the application in this proceeding.

Specifically, Applicant proposes the following:

(1) The construction and operation of approximately 2.6 miles of 2-inch line in Douglas and Jefferson Counties, Kansas, connecting Applicant's existing

6-inch line with Magnolia's pump station, together with the necessary metering and appurtenant facilities,

(2) The tapping of Applicant's existing 16-inch line in Shawnee County, Kansas, and the construction and operation of the necessary metering and appurtenant facilities for the sale and delivery of natural gas to Gas Service for resale in and about the Shawnee Heights Area, Shawnee County, Kansas, and

(3) The sale and delivery of natural gas by means of existing Kansas City area facilities to Gas Service for resale in and about the City of Greenwood, Jackson County, Missouri.

Applicant and Magnolia have entered into a gas sales contract, dated February 4, 1966, providing for the proposed direct sale to Magnolia. Magnolia's estimated third year peak day and annual requirements are 340 Mcf and 124,320 Mcf, respectively.

The estimated third year peak day and annual requirements for the Shawnee Heights Area are 160 Mcf and 16,327 Mcf, respectively, and for the City of Greenwood 1,127 Mcf and 88,400 Mcf, respectively. The proposed sales for resale will be made pursuant to Applicant's effective FPC Gas Rate Schedules F–2, C–2 and I–2.

The total estimated cost of Applicant's proposed facilities is $23,360, $10,000 of which will be paid by Magnolia, with the remaining costs to be financed by Applicant from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 22, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G–298 (4 FPC 471).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and/or sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and/or sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and/or sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs

(a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Cities Service Gas Company, to construct and operate the proposed facilities and to sell and/or transport and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the sale and/or transportation and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within six months from the date on which this order issues.

(D) This certificate shall not entitle the industrial customer to whom firm deliveries are authorized herein to any priorities to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

CITIES SERVICE GAS COMPANY, DOCKET NO. CP67-25

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 26, 1966)

On August 3, 1966, Cities Service Gas Company (Applicant) filed in Docket No. CP67-25 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued operation of certain installed facilities and the transportation and sale of natural gas for resale in interstate commerce in connection therewith, all as more fully set forth in the application.

Applicant seeks authority to tap its 4-inch field gathering line in Section 222, H & GN Survey, R. R. Co. Block B-2, Gray County, Texas, and there install and operate metering and appurtenant regulating facilities and sell up to 995 Mcf of natural gas daily to Rimrock Gas Company (Rimrock) for resale for irrigation and incidental farm purposes to customers in the Groom, Texas, area. Applicant states that the sale will be made under its FPC Gas Rate Schedule IRG-1.

Applicant estimates that the total cost of the facilities is $1,440, which will be financed from cash on hand.

Applicant states the related facilities were installed and service was commenced on July 16, 1966, as an emergency measure under the provisions of Section 157.22 of the Regulations. Applicant advised the Commission of its actions by letter, filed July 18, 1966. Rimrock has contracted to sell gas to farmers in the area for irrigation and other farm uses.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 22, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G–298 (4 FPC 471).

(2) The proposed continued operation of facilities, and transportation and sale of natural gas by Applicant as hereinbefore described and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid continued operation of facilities and transportation and sale of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Cities Service Gas Company, authorizing the continued operation of facilities and the transportation and sale of natural gas as more fully described in the application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(4) and (e) of Section 157.20 of such Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

DUKE POWER COMPANY, PROJECT NO. 2503

ORDER ISSUING LICENSE (MAJOR)

(Issued September 26, 1966)

On January 4, 1965, Duke Power Company (Applicant), filed an application seeking a license pursuant to Section 4(e) of the Federal Power Act for the development of the Keowee-Toxaway hydroelectric project (Project No. 2503), to be located on the Keowee, Little, Whitewater, Toxaway, Thompson and

Horsepasture Rivers, all tributaries of the Savannah River. The project, which has an estimated cost of $86,319,000, would impound the waters of these rivers in Oconee and Pickens Counties, South Carolina and in Transylvania County, North Carolina.

The Horsepasture, Toxaway, Thompson and Whitewater Rivers arise on the southerly slopes of the Blue Ridge Mountains in Jackson and Transylvania Counties, North Carolina and flow into northwestern South Carolina and join to form the Keowee River which unites with 12 Mile Creek to form the Seneca River which in turn joins with the Tugaloo River to form the Savannah River about 297 miles above the mouth of the Savannah River.

The project proposed by the Applicant would consist of two hydroelectric developments, the Keowee Development and the Jocassee Development. The Keowee Development will consist of two dams impounding the waters of the Little and Keowee Rivers in Oconee and Pickens Counties, South Carolina. One dam and a series of saddle dikes would be built on the Little River near Newry, South Carolina, 2.7 miles from the mouth of the Little River and 347.3 miles from the mouth of the Savannah. This dam and associated saddle dikes would divert the entire flow of the Little River, except for some minor withdrawals, through a connecting canal into the Keowee Valley. A dam on the Keowee near Old Pickens would back up the waters of the Keowee and complete the impoundment. This dam would be located 351.5 miles from the mouth of the Savannah. The waters backed up by these two dams will be connected by a diversion canal located in a small saddle and will form a single reservoir impounding the flows of both the Keowee and Little Rivers. The powerhouse would be built at the dam near Old Pickens and would contain two units rated at 70,000 kilowatts each.

The Jocassee Development will be located on the Keowee River at the head of Lake Keowee and just below the confluence of the Whitewater and Toxaway Rivers. The Jocassee dam will be located about 366 miles upstream from the mouth of the Savannah. The reservoir formed by this dam would back up the Whitewater, Horsepasture, Thompson and Toxaway Rivers and would extend into Transylvania County, North Carolina. The powerhouse would be located at the dam and would contain one conventional unit rated at 160,000 kilowatts and three pumped-storage units rated at 150,000 kilowatts each.

Applicant will initially construct the Keowee development and will commence construction of certain Jocassee diversion works approximately one year after commencing construction on the Keowee development.

The Hartwell and Clark Hill dams constructed by the Corps of Engineers are located on the Savannah River downstream from the proposed project at river miles 305 and 239 respectively. The Trotters Shoals dam site proposed to be developed by the Corps is located between these two dams at river mile 276. Construction and operation of the Keowee-Toxaway project would affect the operation of these dams.

The Keowee and Little Rivers on which the project will be located are tributaries of the Savannah River, a navigable water of the United States. See *United States* v. *Twin City Power Co.*, 350 U.S. 222. Power produced from the project will be marketed to customers of the Applicant in North and South Carolina and will be marketed by other members of the CARVA Pool[1] serving in the two Carolinas and Virginia.

---

[1] The members of the CARVA Pool are: Duke Power Company, Carolina Power & Light Company, South Carolina Electric & Gas Company, and Virginia Electric and Power Company.

The United States Corps of Engineers recommended the development of a number of hydroelectric sites in the Savannah River Basin in its report to Congress in 1944 (House Document 657, 78th Congress, 2d Session). Included among the developments recommended by the Corps was one at the site of Applicant's proposed Keowee Development. The name given at that time to the Corps' proposed site was Newry-Old Pickens. The Corps' plans, like those of the Applicant, contemplated a reservoir with an elevation of 800 feet to be formed by two dams at this site, one on the Keowee River and one on the Little River with respective reservoirs connected by a canal. The Corps' proposal, however, provided for maximum drawdowns and an installed capacity different from those now proposed by the Applicant. The studies of the Corps at that time did not contemplate any developments upstream from the Newry-Old Pickens or Keowee site.

In 1963 the U.S. Study Commission, Southeast River Basins, issued its report on the Savannah River Basin (*Appendix 1, Report of U.S. Study Commission, Southeast River Basins*). The Study Commission reviewed the Corps' 1944 report and recommended development of the Newry-Old Pickens (Keowee) site along the same lines as originally proposed by the Corps and as now proposed by the Applicant. In addition the Study Commission recommended the development upstream on the Keowee River of the Jocassee site. The dam site and powerhouse location proposed by the Study Commission for the Jocassee site are similar to those now proposed by the Applicant. The upper reservoir elevation at Jocassee proposed by the Applicant, however, would be 10 feet higher than that proposed by the Study Commission for this site. In addition the Study Commission recognized pumped-storage operations at Jocassee using the Newry-Old Pickens reservoir as a lower pool as a potential advantage of this development.

The Applicant's plans for the development of this stretch of the Savannah River Basin include not only the Keowee and Jocassee developments to which its present application relates but also contemplate the construction of future steam and pumped storage plants. Applicant expects Lake Keowee to furnish condenser cooling waters for up to 7000 mw of steam generated electric power, and as part of its application for the Keowee and Jocassee developments it is asking this Commission to approve the use of the Keowee reservoir for the generation of up to 3000 mw of steam electric power. This plant would be located near the Keowee River dam. A low level intake would be provided for this plant on the bottom of Keowee Lake; and after passing through the condensers, the water would be discharged through a canal into the Little River arm of Lake Keowee. Applicant currently is planning to construct at this site on Lake Keowee two nuclear fired steam units with a combined net peak capability of 1,644 mw. The estimated cost of these nuclear units is $207,000,000. Contracts for these units have been let and Applicant's construction schedule calls for their commercial operation by May 1971 and May 1972 respectively.

Applicant's plans for the future development of this waterway also contemplate the construction of pumped-storage units on the Horsepasture River. Such units would use the presently proposed upper Jocassee reservoir as a source for pumping water for any such pumped-storage developments. To date Applicant has made preliminary design studies for such a future pumped-storage development with a peak capability of 2,300 mw. The total head would be 1,180 feet. This plant would be located on the Horsepasture River at a site called Bad Creek and would cost approximately $136.8 million. Applicant estimates that such additional peaking power will be needed by approximately 1984.

By order dated May 12, 1966, the Commission set the subject application for hearing. Testimony and exhibits were filed by the Applicant and by the Commission Staff and a public hearing was held on August 16, 1966, before a Presiding Examiner of this Commission.

At this hearing Applicant's witnesses testified, among other things, as to the need for the power to be produced by the project, the alternative sources of power considered by the Applicant, the additional economic power developments both thermal and hydro which the Applicant believes will be made possible by the construction of the Keowee-Toxaway project and finally as to the recreational program proposed by the Applicant at the project.

Staff witnesses, among other things, testified as to the future requirements for peaking power in the CARVA Pool service area; the estimated economic advantages of some 60 potential hydro projects in the CARVA Pool area, including the Keowee-Toxaway and Trotters Shoals projects; the safety and adequacy of the proposed project; the estimated costs of alternative sources of power for the Applicant; and as to the adequacy of the recreation program proposed by the Applicant.

It appears from the record made in this proceeding that the output from the Keowee-Toxaway Project will complement existing CARVA peaking capacity in supplying the peak demands of the CARVA Pool loads in the years in which the project is scheduled to be in service, and that the proposed project would develop the entire head available between elevation 660 feet, the water surface of the Hartwell Reservoir, and elevation 1,110 feet, the maximum water surface elevation of the upper Jocassee Reservoir.

Witnesses for the Applicant compared the estimated fixed annual costs of the proposed project with similar estimated costs for an alternate fossil-fuel plant, an alternate pumped-storage plant, and an alternate gas turbine plant. In each case the estimated costs of the proposed project were the lower. A witness for the staff compared an estimated cost of the proposed project with the following alternatives: each of 60 potential hydro sites in the CARVA Pool area, a fossil-fuel plant, a pumped-storage project, a gas turbine plant, and a nuclear plant. In each case, the estimated costs of the proposed project were lower than any of the alternatives studied by the staff.

Applicant has filed a recreational plan pursuant to the Commission's Regulations which provides for 455 acres of access areas at the Keowee development and 265 acres of access areas at the Jocassee development. A witness for the staff, while noting a number of aspects of the recreational program which might require improvement and expansion to meet future needs, recommended approval of the Exhibit R filed by the Applicant.

On May 7, 1965 the Corps of Engineers submitted its comments on the subject application and reported that the applicant's proposed project structures affecting navigation are satisfactory. The Corps recommended that any license issued should include provisions to insure that construction and operation of Applicant's project would not impair realization of the benefits associated with operation of the downstream Corps projects. The Corps also recommended that Applicant's project and the Corps projects be hydraulically coordinated in the interest of achieving maximum public benefits. By Articles 31, 32, 33, and 34 we are including license conditions to protect the interests of the United States in its projects.

The Department of Health, Education, and Welfare (HEW) in its comments filed on May 7, 1965 reported that the effects of the project on water supply and water pollution are not expected to be significant in that area of the project located in South Carolina, since the area is undeveloped and appears likely to continue that way. HEW further reported that the State of North Carolina has indicated that the proposed development in that State should be beneficial, and that there are no known pollution sources which would affect water supplies or recreation.

The Secretary of the Interior in a letter, dated July 28, 1965, made the following recommendations with respect to the proposed project: (1) the project should be fully integrated, both hydraulically and electrically, with downstream Federal projects, (2) reservoir filling procedures should be agreed upon with Southeastern Power Administration and the Corps of Engineers, (3) conditions for the protection of fish and wildlife should be included in the license, (4) the license should require a detailed plan of development for free public utilization of project waters and adjacent project lands for recreation purposes pursuant to Federal regulations as set forth in FPC Order No. 260-A, 29 FPC 777, (5) Applicant should be required to safeguard natural beauty values, (6) the National Park Service should be provided $2,500 with which to conduct an archeological survey.

In a letter dated April 7, 1966, Interior indicated its support of the Applicant's proposed maximum drawdowns and reported that studies carried out by the Fish and Wildlife Service enabled it to conclude that the thermal effects of a 3000 mw nuclear plant at a site on Lake Keowee designated as "Site L" would produce no detrimental effects upon the fishery resources within Lakes Jocassee or Keowee. However, the Department recommended that any license issued for the proposed project require Commission approval prior to the installation on the Keowee reservoir of thermal-electric plants additional to 3000 mw. It recommended two articles, for inclusion in any license issued, which would require (1) that construction of steam plants, other than the proposed 3000 mw plant at "Site L", be subject to the approval of the Commission based on Interior's recommendations, (2) that data from monitoring thermal effects of steam plant operations at "Site L" be furnished to Interior for its use in making recommendations on steam plants that may be proposed for construction in the future.

By a letter dated May 20, 1966, Interior reported that the recreational development plan proposed by the Applicant affords an adequate base for the development of the recreation potential of the project and recommended that conditions relating to future recreation development be included in any license issued for the project.

License conditions are contained herein to protect the interests of the Corps of Engineers and the Department of the Interior. The reservoir filling agreement requested by Interior and the Corps is provided for by Article 31. By Article 32 Applicant is being required to enter into an operating agreement with the Corps and with the Interior Department for the protection of capability of the downstream Federal projects. Interior's request with respect to archeological exploration is met by Article 39 and Interior's concern for the protection of fish and wildlife is met by Articles 16 and 17 of Form L-11 which is being made a part of this license, *infra*, p. 687. Interior's request for license conditions to assure future recreation development at the project is provided for by Article 41.

Petitions to intervene in opposition to the application were filed by the Bi-State Power Committee[2], a group representing various REA cooperatives in the States of Georgia and North Carolina; by the Blue Ridge Electric Membership Corporation; by the Oconee Electric Membership Corporation; and by the Secretary of the Interior. Bi-State and the two aforesaid cooperatives were permitted to intervene in this proceeding (Interveners). The Secretary of the Interior, however, withdrew his petition to intervene prior to any Commission action on his petition. Bi-State filed several pleadings in this proceeding in opposition to the application, all of which were adopted by the two intervening cooperatives.

---

[2] The petition was originally filed in the name of Tri-State Power Committee. An amendment to this petition filed on September 22, 1965, advised the Commission that the name of the intervener had been changed to Bi-State Power Committee.

Originally interveners asked the Commission to deny the application and pursuant to Section 7(b) of the Federal Power Act to recommend federal development of all remaining potential projects in the Savannah River Basin. Interveners later amended their petitions by omitting their request for federal development and by taking the position instead that the construction of the Keowee-Toxaway Project before the development of the Trotters Shoals site on the Savannah River would violate the plan for the comprehensive development of the Savannah River Basin adopted and approved by Congress in the Flood Control Act of 1944 (58 Stat. 887, 894).

On July 25, 1966, after the application had been set for hearing, interveners filed a notice of withdrawal of their petitions to intervene in this proceeding. As a reason for their withdrawal they pointed out that various "key officials of the State of South Carolina" who had previously opposed the Trotters Shoals development, had recently elected, along with the Duke Power Company, to endorse federal development of that site and to work for Congressional authorization of Trotters Shoals this year. The interveners concluded in their notice of withdrawal that these developments remove the primary basis for their objection to the Keowee-Toxaway Project application.

Although interveners withdrew their request for federal development of the Keowee-Toxaway Project at an early stage in this proceeding, we have, nevertheless, examined the record on our own to determine whether there may be some reason why this project should be developed by the federal government. Our review of this record and our general knowledge of the Savannah River Basin reveals no reason to warrant a recommendation to Congress pursuant to Section 7(b) of the Federal Power Act that this project be developed by the federal government. In our judgment there are not any significant improvements or benefits which might accrue as a result of federal development in addition to those proposed by the Applicant or otherwise provided for by this order. Accordingly, we are not recommending federal development of the site proposed for development by Applicant. Nor do we believe that either legally or factually there is any reason to defer the licensing of the Keowee-Toxaway Project until after the development of the Trotters Shoals site.

At the public hearing held on this application, a resident of Winston-Salem, North Carolina, Mr. Lawrence G. Pfefferkorn, objected to the issuance of any license to Duke Power Company for this project which did not contain a condition prohibiting Duke Power Company from opposing the development of various projects on the Yadkin River in North Carolina. However, the activity of a licensee in opposing the development of hydroelectric sites does not appear to be one which this Commission has been empowered to curtail except to the extent that such activity may be in violation of Section 10(h) of the Federal Power Act. That section proscribes, *inter alia*, combinations or agreements to limit the output of electrical energy. On the basis of the statements made on this record, assuming their factual validity, it does not appear that the Duke Power Company's opposition to various projects on the Yadkin River has constituted a violation of Section 10(h). See *Eastern Railroad Conference* v. *Noerr*, 365 U.S. 127.

At the conclusion of the hearing the Applicant made a motion to waive the filing of briefs, the presentation of proposed findings, and oral argument and to omit the intermediate decision of the examiner. The Staff concurred in this motion which was granted pursuant to Section 1.30(c) of the Commission's Rules of Practice and Procedure.

The Commission finds:

(1) The Applicant is a corporation organized under the laws of North Carolina and has submitted satisfactory evidence of compliance with all applicable state laws insofar as necessary to effectuate the purposes of the license for the proposed project.

(2) Public notice of the filing of the application has been given. Except for the petitions to intervene, hereinbefore discussed, no other petitions to intervene or formal protests have been filed and no conflicting application is before the Commission.

(3) The project will be located on a tributary of a navigable water of the United States.

(4) Electric energy to be generated at the project will at times be transmitted into the states of North Carolina and Virginia and therefore the interests of interstate commerce will be affected by the proposed project.

(5) The power to be produced by the project is needed to meet the load growth in the service areas of the Applicant and of Applicant as a member of the CARVA Pool.

(6) The applicant has submitted satisfactory evidence of its financial ability to construct and operate the project.

(7) The estimated cost of developing the Keowee-Toxaway Project when compared with estimated costs to the Applicant of developing alternative sources of power appears reasonable.

(8) The use of the Keowee Reservoir at the site designated on Exhibit K (FPC No. 2503-4) as a source of condenser cooling waters for up to 3000 mw of steam generated electric power will produce no detrimental effects upon the fishery resources within Lake Keowee and such use is compatible with a comprehensive plan for improving and developing the subject waterway.

(9) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water power development, and for other beneficial public uses, including recreational purposes.

(10) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 1,000,000 horsepower and the amount of annual charges based on such capacity to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable.

(11) The issuance of a license as hereinafter provided will not affect the development of any water resources for public purposes which should be undertaken by the United States.

(12) The exhibits designated and described in paragraph (B) following conform to the Commission's rules and regulations with respect to the project boundary, capacities of reservoirs, size of water passages, capacities of generating units, general design of structures and recreation development of the

project and should be approved as part of this license. The Applicant should, as hereinafter provided, supply revised exhibits for Commission approval.

The Commission orders:

(A) This license is hereby issued to the Duke Power Company of Charlotte, North Carolina (Licensee), under Section 4(e) of the Federal Power Act for a period of 50 years effective as of September 1, 1966, for the construction, operation and maintenance of Project No. 2503 located on the Keowee and Little Rivers, South Carolina and North Carolina subject to the terms and conditions of the Act and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) Project No. 2503 consists of:

(i) all lands constituting the project area and enclosed by the project boundary or limits which are otherwise defined, and/or interest in such lands necessary or appropriate for the purposes of the project, whether such lands or interests therein are owned or held by the Licensee or by the United States—such project area and project boundary being more specifically shown and described by certain Exhibits of the application for license which are designated as follows:

Exhibit J	*FPC No. 2503*	*Title*
Sheet 1	–2	"General Map and Profile"
Sheet 2	–3	"Transmission System Map"

Exhibit K	*FPC No. 2503*	*Title*
Sheet 1	–4	"Keowee Development, Project Area"
Sheet 2	–5	"Keowee Development, Project Area"
Sheet 3	–6	"Jocassee Development, Project Area"

Exhibit K is approved only to the extent that it shows the reservoir areas at pool elevations 800 feet and 1,110 feet for Lakes Keowee and Jocassee, respectively.

(ii) Projects which are described as follows:

Keowee Development—(1) an earth-fill dam 150 feet high and 1,800 feet long on Little River 2.7 miles above its mouth; (2) an earth-fill dam 170 feet high and 3,500 feet long on Keowee River at river mile 351.5 above the mouth of the Savannah; (3) several saddle dikes; (4) two reservoirs having a total capacity of 911,000 acre-feet at full pond elevation 800 feet USGS, 388,000 acre-feet usable, connected by a canal diverting practically the entire flow of Little River into the Keowee Reservoir; (5) a concrete spillway 176 feet wide equipped with tainter gates with ogee crest at elevation 765 feet USGS located at Keowee Dam; (6) two concrete and steel penstocks at Keowee Dam; (7) an indoor type powerhouse containing two Francis type turbines each connected to a vertical generator rated at 70,000 kw (140,000 kw total); (8) generator leads; (9) 13.8/230 kv step-up transformer; and (10) appurtenant facilities.

Jocassee Development—(1) a rockfill dam with impervious core, 385 feet high and 1,750 feet long on Keowee River at river mile 366.5 above the mouth of the Savannah; (2) a reservoir with total capacity of 1,143,000 acre-feet at full pond elevation 1,110 feet USGS; (3) a concrete spillway 88 feet wide equipped with tainter gates having ogee crest at elevation 1,078 feet USGS; (4) an intake structure and two concrete and steel penstocks; (5) an outdoor type powerhouse containing initially, one conventional 160,000 kw vertical generating unit driven by a Francis type turbine and one vertical motor-generator and pump-turbine unit rated at 150,000 kw (310 mw total initial generating capacity) with provisions for two future similar motor-generator and pump-turbine units (610 mw total ultimate generating capacity); (6) the

Keowee Reservoir, serving as a lower pool for the pumped-storage operation; (7) generator leads; (8) 13.8/230 kv step-up transformers; and (9) appurtenant facilities; the location, nature and character of which are more specifically shown and described by the exhibits hereinbefore cited and by certain other exhibits which also formed part of the application for license and which are designated and described as follows:

Exhibit 1	*FPC No. 2503*	*Showing Keowee-Toxaway Project*
Sheet 1	–17	Keowee Development Plan
Sheet 2	–18	Keowee Development Sections and Details
Sheet 3	–19	Jocassee Development Plan
Sheet 4	–20	Jocassee Development Sections
Sheet 5	–11	Keowee and Jocassee Developments One Line Diagrams, only insofar as they show the general layout of the project.

Exhibit M, entitled "General Description of Mechanical, Electrical, and Transmission Equipment", consisting of five typewritten pages, filed on January 4, 1965, and amended on September 2, 1965.

(iii) Recreational and public access areas which are designated and described as follows:

(1) Exhibit R (FPC No. 2503–25, 26, 27, 28)

(2) Eight drawings entitled "Proposed Recreational Plan, Sites No. 1 through 8, dated March 30,

(3) Five typewritten sheets entitled respectively:

(a) "Type and Number of Recreation Facilities (Revised—March 30, 1966) Lake Keowee Access Areas, Lake Jocassee Access Areas."

(b) "Development Costs—Keowee-Jocassee Access Area (Revised March 30, 1966) Lake Keowee"

(c) "Development Costs—Keowee-Jocassee Access Areas (Revised March 30, 1966) Lake Jocassee [and] Total Development Costs of Access Areas—*Keowee and Jocassee Lakes* (Revised—March 30, 1966)"

(d) "Initial Development Costs (Revised March 30, 1966)"

(e) "Keowee-Jocassee Access Areas (Revised March 30, 1966) Estimated Initial and Ultimate Use."

(4) Seven typewritten pages entitled "Exhibit R Recreational Use Plan", and dated August 16, 1965.

(iv) all other structures, fixtures, equipment or facilities used or useful in the maintenance and operation of the project and located on the project area, including such portable property as may be used or useful in connection with the project or any part thereof, whether located on or off the project area, if and to the extent that the inclusion of such property as part of the project is approved or acquiesced in by the Commission; also, all riparian or other rights, the use or possession of which is necessary or appropriate to the maintenance or operation of the project.

(C) This license is also subject to conditions set forth in Form L–11 (Revised September 1, 1966) entitled "Terms and Conditions of License for Unconstructed Major Project Affecting The Interests of Interstate or Foreign Commerce," which terms and conditions designated as Articles 1 through 26 are attached hereto and made a part hereof, *infra*, p. 687, and subject to the following special conditions set forth herein as additional Articles:

Article 27. Licensee shall submit in accordance with the Commission's rules and regulations Exhibits J and L drawings showing final designs of the project works and the Licensee shall not begin construction of the project structures until the Commission has approved such exhibits. The stability of the fill-type dams and dikes shall be based on the properties of the materials of construction and shall conform to the design notes shown on the Exhibit L drawings (FPC Nos. 2503–18 and 20). The properties of the foundations for these dams and dikes should also be investigated and taken into consideration in the stability analyses.

Article 28. Licensee shall not initiate construction on Lake Keowee or Jocassee of any steam electric plant additional to the proposed 3000 mw plant at "Site L" (Exhibit K–FPC No. 2503–4) without prior approval of the Federal Power Commission.

Article 29. The Licensee will establish and carry out adequate monitoring of the thermal effects of "Site L" plant operation and collection of climatological data necessary for the Commission to establish the thermal effects of any steam-electric plants and Licensee may propose for construction in addition to the "Site L" plant.

Article 30. The Licensee shall operate the project in such a manner as to not exceed the maximum drawdowns at the Keowee and Jocassee reservoirs as stated below:

1. Maximum Drawdown without Pumped-Storage:
    Keowee, 22 feet (minimum elevation 778 feet).
    Jocassee, 24 feet (minimum elevation 1086 feet).
2. Maximum Drawdown with Pumped-Storage:
    Keowee, 25 feet (minimum elevation 775 feet).
    Jocassee, 30 feet (minimum elevation 1080 feet).

Article 31. The Licensee shall enter into a reservoir filling agreement with the authorized representative of the Chief of Engineers, Department of the Army, and of The Department of the Interior prior to initial filling of the reservoirs to insure either sufficient releases to the Federal Hartwell and Clark Hill projects consistent with the portion of the watershed affected by Project No. 2503 or take other acceptable measures to assure the firm power capacity of the Hartwell and Clark Hill projects which would have been available in the absence of Project No. 2503. A copy of the agreement shall be filed with the Commission. If agreement cannot be reached within six months prior to the proposed initiation of filling of the reservoirs, the Commission will prescribe the reservoir filling schedule, after notice and opportunity for hearing upon a finding based on substantial evidence that such schedule is necessary and desirable and consistent with the provisions of the Act.

Article 32. The Licensee shall, prior to beginning of operation, enter into an agreement with an authorized representative of the Chief of Engineers, Department of the Army and of The Department of the Interior requiring that the project be operated in such a manner as to assure the capability of the downstream existing Federal Projects (Hartwell and Clark Hill) to meet power generating requirements as would have been available in the absence of Project No. 2503. Further, such agreement should recognize the requirements for releases from Clark Hill reservoir for low flow control and other responsibilities in connection with operation of the Hartwell and Clark Hill reservoirs. A copy of the agreement should be filed with the Commission. If agreement cannot be reached within six months prior to the proposed date of operation of the project, the Commission will prescribe the method of operation, after notice and opportunity for hearing and upon a finding based on substantial evidence that such method is necessary and desirable and consistent with the provisions of the act.

Article 33. The Licensee shall operate the project reservoirs during flood periods so as not to cause peak discharges downstream greater than those which would have occurred in the absence of Project No. 2503 except due to acts of God.

Article 34. The Licensee shall furnish the authorized representative of the Chief of Engineers, Department of the Army such information as he may require, pertinent to the operation conditions at the project as may be necessary for forecasting flows downstream from the project.

Article 35. The Licensee shall commence construction of the project within one year from the effective date of the license and shall complete the construction of all project works at the Keowee Development by May 31, 1971. All of the project works of the Jocassee Development except for the final two units shall be completed by December 31, 1974. The final two units at Jocassee will be installed by May 31, 1978.

Article 36. The Commission reserves the right to determine what additional transmission facilities, if any, shall be included in this license as part of the project.

Article 37. The Licensee shall file, within three years of the effective date of this license revised Exhibits F and K, in accordance with Commission rules and regulations, to describe and show the project boundary as proposed by the Licensee.

Article 38. The Licensee shall cooperate with the South Carolina Water Pollution Control Authority, and, for the periods and duration requested by that Authority in the interest of pollution abatement and other beneficial public uses, Licensee shall release from the Keowee Development a minimum daily average flow of up to 152 cfs or such lesser amount as may be specified by the Authority. The discharge of water from the Keowee Development shall include all water flowing from the development, whether from leakage, spillage, generation, or otherwise. For purposes of checking compliance with this provision, the flows may be estimated from the operation of the turbines and from estimates of leakage checked by periodic actual measurements of discharge where pool conditions do not prevent such measurements.

Article 39. Licensee shall provide $2,500 to the South Carolina Department of Archeology to finance an archeological survey at the site of the Keowee and Jocassee Reservoirs.

Article 40. For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, the Licensee shall pay to the United States a reasonable annual charge effective as of September 1, 1966, as determined by the Commission in accordance with the provisions of its regulations, in effect from time to time. The authorized installed capacity for such purposes is 1,000,000 horsepower.

Article 41. The Licensee shall submit for Commission approval supplements to the Exhibit R (FPC No. 2503–25, 26, 27, 28) which shall include, but not to be limited to, the following planning information:

(1) Not later than 18 months prior to completion of reservoir filling and preceding construction of any recreational facilities thereon, functional site development plans for the campsites, public access areas, and access service area at Jocassee Reservoir designated on Exhibit R, sheet 3, revised March

30, 1966, (FPC No. 2503-27) entitled "Keowee-Toxaway Project-Jocassee Development".

(2) Not later than one year prior to completion of each reservoir filling and preceding the construction of any recreational facilities thereon: (a) functional plans for any additionally needed recreational facilities or improvements such as: trails, natural swimming areas (beaches or swimming floats), boat docks, buffer zones around and within recreational areas, visitor centers, tailrace fishing access areas, access to islands, landscaping and tree planting, observation sites, shelters, and such safety features as markers, booms, signal beacons and navigation aids; (b) a construction schedule for all recreational facilities and improvements which shall include consideration in the initial construction period of any needed public use, health, and safety facilities; and (c) following a review and analysis of anticipated public use of the project, a report on the amount and location of any additional lands needed throughout the license period for recreational development and use. Said lands, if any, shall be included within the project boundary as delimited on final Exhibit K maps.

Article 42. The Licensee shall include within the project boundary all public access and recreational development areas designated on Exhibit R (FPC Nos. 2503-25, 26, 27), except the game management area shown on 2503-27 above contour elevation 804 feet approximately and shall include all islands within the project boundary as delimited on Exhibit K maps to be filed with the Commission.

Article 43. The Licensee shall, during planning for the relocation of all roads, highways, or other public or private ways across or over any portions of the areas to be inundated by the Keowee and Jocassee reservoirs, keep the Commission informed of plans for boat passageways to insure full recreational utilization of project waters.

Article 44. The Licensee shall engage a board consisting of at least three qualified independent consultants for the purpose or reviewing the plans and specifications for the dams and dikes, including their foundations, and the board shall submit a final report to the Commission approving the plans and specifications prior to initiation of construction of these structures. The board shall also make periodic inspections during construction and shall submit a final report to the Commission covering the construction of the dams and dikes upon their completion.

Article 45. The Licensee shall within six months of the date of issuance of this license submit for Commission approval a plan for clearing the reservoir area and upon approval the clearing shall be done to the satisfaction of the Commission's representative. The clearing plan shall be prepared following consultation with the Department of the Interior and the appropriate South and North Carolina conservation, health, and recreation agencies.

(D) The Licensee is hereby authorized to use Lake Keowee reservoir at a site designated as "Site L" on Exhibit K (FPC No. 2503-4) as a source for condenser-cooling waters for up to 3000 mw of steam-generated electric power.

(E) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgment of the acceptance of this license, it shall be signed for the Licensee and returned to the Commission within 60 days from the date of issuance of this order.

FORM L-11 (SEPTEMBER 1, 1966)

TERMS AND CONDITIONS OF LICENSE FOR UNCONSTRUCTED MAJOR PROJECT AFFECTING THE INTERESTS OF INTERSTATE OR FOREIGN COMMERCE

Article 1. The entire project, as described in the order of the Commission, shall be subject to all the provisions, terms, and conditions of the license.

Article 2. No substantial change shall be made in the maps, plans, specifications, and statements described and designated as exhibits and approved by the Commission in its order as a part of the license until such change shall have been approved by the Commission: *Provided, however:* That if the Licensee or the Commission deems it necessary or desirable that said approved exhibits, or any of them, be changed, there shall be submitted to the Commission for approval amended, supplemental, or additional exhibit or exhibits covering the proposed changes which, upon approval by the Commission, shall become a part of the license and shall supersede, in whole or in part, such exhibit or exhibits theretofore made a part of the license as may be specified by the Commission.

Article 3. Said project works shall be constructed in substantial conformity with the approved exhibits referred to in Article 2 herein or as changed in accordance with the provisions of said article. Except when emergency shall require for the protection of navigation, life, health, or property, no substantial alteration or addition not in conformity with the approved plans shall be made to any dam or other project works under the license without the prior approval of the Commission; and any emergency alteration or addition so made shall thereafter be subject to such modification and change as the Commission may direct. Minor changes in the project works or divergence from such approved exhibits may be made if such changes will not result in decrease in efficiency, in material increase in cost, or in impairment of the general scheme of development; but any of such minor changes made without the prior approval of the Commission, which in its judgment have produced or will produce any of such results, shall be subject to such alteration as the Commission may direct. Upon the completion of the project, or at such other time as the Commission may direct, the Licensee shall submit to the Commission for approval revised maps, plans, specifications, and statements insofar as necessary to show any divergence from or variations in the project area and project boundary as finally located or in the project works as actually constructed when compared with the area and boundary shown and the works described in the license or in the maps, plans, specifications, and statements approved by the Commission, together with a statement in writing setting forth the reasons which in the opinion of the Licensee necessitated or justified variations in or divergence from the approved maps, plans, specifications, and statements. Such revised maps, plans, specifications, and statements shall, if and when approved by the Commission, be made a part of the license under the provisions of Article 2 hereof.

Article 4. The construction, operation, and maintenance of the project and any work incident to additions or alterations shall be subject to the inspection and supervision of the Regional Engineer, Federal Power Commission, in the region wherein the project is located, or of such other officer or agent as the Commission may designate, who shall be the authorized representative of the Commission for such purposes. The Licensee shall cooperate fully with said representative and shall furnish him a detailed program of inspection by the

Licensee that will provide for an adequate and qualified inspection force for construction of the project. Construction of the project works or any feature thereof shall not be initiated until the program of inspection for the project works or any such feature thereof has been approved by said representative. The Licensee shall also furnish to said representative such further information as he may require concerning the construction, operation, and maintenance of the project, and of any alteration thereof, and shall notify him of the date upon which work will begin, as far in advance thereof as said representative may reasonably specify, and shall notify him promptly in writing of any suspension of work for a period of more than one week, and of its resumption and completion. The Licensee shall allow him and other officers or employees of the United States, showing proper credentials, free and unrestricted access to, through, and across the project lands and project works in the performance of their official duties. The Licensee shall comply with such rules and regulations of general or special applicability as the Commission may from time to time prescribe for the protection of life, health, or property.

Article 5. The Licensee within two years from date of issuance of the license shall acquire title in fee or the right to use in perpetuity all lands, other than lands of the United States, necessary or appropriate for the construction, maintenance and operation of the project. The Licensee, its successors and assigns shall, during the period of the license, retain the possession of all project property covered by the license as issued or as later amended, including the project area, the project works, and all franchises, easements, water rights, and rights of occupancy and use; and none of such properties shall be voluntarily sold, leased, transferred, abandoned, or otherwise disposed of without the prior written approval of the Commission, except that the Licensee may lease or otherwise dispose of interests in project lands or property without specific written approval of the Commission pursuant to the then current regulations of the Commission. The provisions of this article are not intended to prevent the abandonment or the retirement from service of structures, equipment, or other project works in connection with replacements thereof when they become obsolete, inadequate, or inefficient for further service due to wear and tear; and mortgage or trust deed or judicial sales made thereunder, or tax sales, shall not be deemed voluntary transfers within the meaning of this article.

Article 6. In the event the project is taken over by the United States upon the termination of the license, as provided in Section 14 of the Act, or is transferred to a new licensee under the provisions of Section 15 of the Act, the Licensee, its successors and assigns will be responsible for and will make good any defect of title to or of right of occupancy and use in any of such project property which is necessary or appropriate or valuable and serviceable in the maintenance and operation of the project, and will pay and discharge, or will assume responsibility for payment and discharge, of all liens or incumbrances upon the project or project property created by the Licensee or created or incurred after the issuance of the license: *Provided,* That the provisions of this article are not intended to require the Licensee, for the purpose of transferring the project to the United States or to a new Licensee, to acquire any different title to or right of occupancy and use in any of such project property than was necessary to acquire for its own purposes as Licensee.

Article 7. The actual legitimate original cost of the original project, and of any addition thereto or betterment thereof, shall be determined by the Commission in accordance with the Act and the Commission's rules and regulations thereunder.

Article 8. After the first 20 years of operation of the project under the license, six percent per annum shall be the specified rate of return on the net investment in the project for determining surplus earnings of the project for the establishment and maintenance of amortization reserves, pursuant to Section 10(d) of the Act; one-half of the project surplus earnings, if any, accumulated after the first 20 years of operation under the license, in excess of six percent per annum on the net investment, shall be set aside in a project amortization reserve account as of the end of each fiscal year: *Provided*, that, if and to the extent that there is a deficiency of project earnings below six percent per annum for any fiscal year or years after the first 20 years of operation under the license, the amount of such deficiency shall be deducted from the amount of any surplus earnings accumulated thereafter until absorbed, and one-half of the remaining surplus earnings, if any thus cumulatively computed, shall be set aside in the project amortization reserve account; and the amounts thus established in the project amortization reserve account shall be maintained therein until further order of the Commission.

Article 9. For the purpose of determining the stage and flow of the stream or streams from which water is diverted for the operation of the project works, the amount of water held in and withdrawn from storage, and the effective head on the turbines, the Licensee shall install and thereafter maintain such gages and stream-gaging stations as the Commission may deem necessary and best adapted to the requirements; and shall provide for the required readings of such gages and for the adequate rating of such stations. The Licensee shall also install and maintain standard meters adequate for the determination of the amount of electric energy generated by said project works. The number, character, and location of gages, meters, or other measuring devices, and the method of operation thereof, shall at all times be satisfactory to the Commission and may be altered from time to time if necessary to secure adequate determinations, but such alteration shall not be made except with the approval of the Commission or upon the specific direction of the Commission. The installation of gages, the ratings of said stream or streams, and the determination of the flow thereof, shall be under the supervision of, or in cooperation with, the District Engineer of the United States Geological Survey having charge of stream-gaging operations in the region of said project, and the Licensee shall advance to the United States Geological Survey the amount of funds estimated to be necessary for such supervision or cooperation for such periods as may be mutually agreed upon. The Licensee shall keep accurate and sufficient record of the foregoing determinations to the satisfaction of the Commission, and shall make return of such records annually at such time and in such form as the Commission may prescribe.

Article 10. The Licensee shall install additional capacity or make other changes in the project as directed by the Commission, to the extent that it is economically sound and in the public interest to do so, after notice and opportunity for hearing.

Article 11. The Licensee shall, after notice and opportunity for hearing, coordinate the operation of the project, electrically and hydraulically, with such other projects or power systems and in such manner as the Commission may direct in the interest of power and other beneficial public uses of water resources, and on such conditions concerning the equitable sharing of benefits by the Licensee as the Commission may order.

Article 12. Whenever the Licensee is directly benefited by the construction work of another licensee, a permittee, or of the United States of a storage reservoir or other headwater improvement, the Licensee shall reimburse the owner of the headwater improvement for such part of the annual charges for interest, maintenance, and depreciation thereon as the Commission shall determine to be equitable, and shall pay to the United States the cost of making such determination as fixed by the Commission. For benefits provided by a storage reservoir or other headwater improvement of the United States the Licensee shall pay to the Commission the amounts for which it is billed from time to time for such headwater benefits and for the costs of making the determinations pursuant to the then current Commission Regulations under the Federal Power Act within 60 days from the date of rendition of a bill therefore and, upon failure to do so, shall thereafter be subject to the payment of the penalties specified in the then current Regulations. The Licensee shall have the right to pay such amounts under protest within the 60-day period and to reconsideration of the determination of the amounts billed or a hearing as provided by the then current Regulations under the Act.

Article 13. The United States specifically retains and safeguards the right to use water in such amount, to be determined by the Secretary of the Army, as may be necessary for the purposes of navigation on the navigable waterway affected; and the operations of the Licensee, so far as they affect the use, storage and discharge from storage of waters affected by the license, shall at all times be controlled by such reasonable rules and regulations as the Secretary of the Army may prescribe in the interest of navigation, and as the Commission may prescribe for the protection of life, health, and property, and in the interest of the fullest practicable conservation and utilization of such waters for power purposes and for other beneficial public uses, including recreational purposes; and the Licensee shall release water from the project reservoir at such rate in cubic feet per second, or such volume in acre-feet per specified period of time, as the Secretary of the Army may prescribe in the interest of navigation, or as the Commission may prescribe for the other purposes hereinbefore mentioned.

Article 14. On the application of any person, association, corporation, Federal agency, State or municipality, the Licensee shall, after notice and opportunity for hearing, permit such reasonable use of its reservoirs or other project properties, including works, lands and water rights, or parts thereof, as may be ordered by the Commission in the interest of comprehensive development of the waterway or waterways involved and the conservation and utilization of water resources of the region, for water supply for the purpose of steam-electric, irrigation, industrial, municipal or similar uses. The Licensee shall receive reasonable compensation, at least full reimbursement for any damages or expenses which the joint use causes him to incur, for use of its reservoirs or other project properties or parts thereof for such purposes, any such compensation to be fixed by the Commission either by approval of an agreement between the Licensee and the party or parties benefiting or after notice and opportunity for hearing. Applications shall contain information in sufficient detail to afford a full understanding of the proposed use, including satisfactory evidence that the applicant possesses necessary water rights pursuant to applicable State law, or a showing of cause why such evidence cannot be concurrently submitted, and a statement as to the relationship of the proposed use to any State or municipal plans or orders which may have been adopted with respect to the use of such waters.

Article 15. In the construction or maintenance of the project works, the Licensee shall place and maintain suitable structures and devices to reduce to a reasonable degree the liability of contact between its transmission lines and telegraph, telephone and other signal wires or power transmission lines constructed prior to its transmission lines and not owned by the Licensee, and shall also place and maintain suitable structures and devices to reduce to a reasonable degree the liability of any structures or wires falling or obstructing traffic or endangering life. None of the provisions of this article are intended to relieve the Licensee from any responsibility or requirement which may be imposed by other lawful authority for avoiding or eliminating inductive interference.

Article 16. The Licensee shall, for the conservation and development of fish and wildlife resources, construct, maintain, and operate, or arrange for the construction, maintenance and operation of such facilities and comply with such reasonable modifications of the project structures and operation as may be ordered by the Commission upon its own motion or upon the recommendation of the Secretary of the Interior or the fish and wildlife agency or agencies of any State in which the project or a part thereof is located, after notice and opportunity for hearing and upon findings based on substantial evidence that such facilities and modifications are necessary and desirable, reasonably consistent with the primary purpose of the project, and consistent with the provisions of the Act.

Article 17. Whenever the United States shall desire, in connection with the project, to construct fish and wildlife facilities or to improve the existing fish and wildilfe facilities at its own expense, the Licensee shall permit the United States or its designated agency to use, free of cost, such of Licensee's lands and interest in lands, reservoirs, waterways and project works as may be reasonably required to complete such facilities or such improvements thereof. In addition, after notice and opportunity for hearing, the Licensee shall modify the project operation as may be prescribed by the Commission, reasonably consistent with the primary purpose of the project, in order to permit the maintenance and operation of the fish and wildlife facilities constructed or improved by the United States under the provisions of this article. This article shall not be interpreted to place any obligation on the United States to construct or improve fish and wildlife facilities or to relieve the Licensee of any obligation under this license.

Article 18. The Licensee shall construct, maintain and operate or shall arrange for the construction, maintenance and operation of such recreational facilities including modifications thereto, such as access roads, wharves, launching ramps, beaches, picnic and camping areas, sanitary facilities and utilities, and shall comply with such reasonable modifications of the project structures and operations as may be prescribed hereafter by the Commission during the term of this license upon its own motion or upon the recommendation of the Secretary of the Interior or other interested Federal and State agencies, after notice and opportunity for hearing and upon findings based upon substantial evidence that such facilities and modifications are necessary and desirable, and reasonably consistent with the primary purpose of the project.

Article 19. So far as is consistent with proper operation of the project, the Licensee shall allow the public free access, to a reasonable extent, to project waters and adjacent project lands owned by the Licensee for the purpose of full public utilization of such lands and waters for navigation and recreational purposes, including fishing and hunting, and shall allow to a reasonable extent for such purposes the construction of access roads, wharves, landings, and other facilities on its lands the occupancy of which may in appropriate circumstances be subject to payment of rent to the Licensee in a reasonable amount: *Provided, that* the Licensee may reserve from public access, such portions of the project waters, adjacent lands, and project facilities as may be necessary for the protection of life, health, and property and *Provided, further,* that the Licensee's consent to the construction of access roads, wharves, landings, and other facilities shall not, without its express agreement, place upon the Licensee any obligation to construct or maintain such facilities. These facilities are in addition to the facilities that the Licensee may construct and maintain as required by the license.

Article 20. The Licensee shall be responsible for and shall take reasonable measures to prevent soil erosion on lands adjacent to the stream and to prevent stream siltation or pollution resulting from construction, operation or maintenance of the project. The Commission upon request, or upon its own motion, may order the Licensee to construct and maintain such preventive works to accomplish these purposes and to revegetate exposed soil surface as the Commission may find to be necessary after notice and opportunity for hearing.

Article 21. There is reserved to the appropriate department or agency of the United States, or of the State or county involved, the right to take over maintain, and supervise the use of any project road as a public road.

Article 22. The Licensee shall clear and keep clear to an adequate width lands along open conduits, shall clear lands within the bottom and margin of reservoirs (except as may be otherwise specified in the license), and shall dispose of all temporary structures, unused timber, brush, refuse, or inflammable material resulting from the clearing of lands or from the maintenance or alteration of the project works. In addition, all trees along the margins of reservoirs which may die during operations of the project shall be removed. The clearing of the lands and the disposal of the material shall be done with due diligence and to the satisfaction of the authorized representative of the Commission.

Article 23. If the Licensee shall cause or suffer essential project property to to be removed or destroyed or to become unfit for use, without adequate replacement, or shall abandon or discontinue good faith operation of the project for a period of three years, or refuse or neglect to comply with the terms of the license and the lawful orders of the Commission mailed to the record address of the Licensee or its agent, the Commission will deem it to be the intent of the Licensee to surrender the license, and not less than 90 days after public notice may in its discretion terminate the license.

Article 24. Upon abandonment of the project the Licensee shall remove all structures, equipment and power lines from the stream and restore said stream to a condition satisfactory to the Commission's authorized representative and shall fulfill such other obligations under the license as the Commission may prescribe.

Article 25. The right of the Licensee and of its transferees and successors to use or occupy waters, over which the United States has jurisdiction, under the license, for the purpose of maintaining the project works or otherwise, shall absolutely cease at the end of the license period, unless Licensee has obtained a new license pursuant to the then existing laws and regulations or an annual license under the terms and conditions of this license.

Article 26. The terms and conditions expressly set forth in the license shall not be construed as impairing any terms and conditions of the Federal Power Act which are not expressly set forth herein.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP66-405

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 26, 1966)

On June 7, 1966, Northern Natural Gas Company (Applicant), filed in Docket No. CP66-405 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the transportation of natural gas in interstate commerce, all as more fully set forth in the application.

Applicant proposes to construct and operate 2,800 feet of 4-inch pipeline and to transport approximately 5,500 Mcf per day of additional natural gas for use as fuel and shrinkage in its hydrocarbon extraction plant located near Hobbs, New Mexico. Present hydrocarbon extraction facilities consist of an ambient temperature absorption process which extracts certain volumes of propane, butane and natural gasoline. The present facilities have a capacity to process 220,000 Mcf of natural gas per day.

Applicant proposes to modify the Hobbs Extraction Plant and to install minor piping in the Hobbs Yard, which will be installed under the provisions of Paragraph 2.55 of the Commission's Rules of Practice and Procedure.

Applicant proposes to modify the present extraction facilities by installing a refrigerated absorption process. The proposed modifications to the extraction facilities will not increase the capacity of the plant to process volumes in excess of 220,000 Mcf of gas per day, but will increase the amount of hydrocarbons removed, thereby increasing the volumes of fuel and shrinkage by approximately 5,500 Mcf of gas per day.

The total estimated cost of construction for Applicant's proposed project is $3,031,310, which cost will be financed out of cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 22, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G-280 (3 FPC 967).

(2) The proposed construction and operation of facilities and transportation of natural gas by Applicant, as hereinbefore described, and as more fully

described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and transportation of natural gas as hereinbefore described and as more fully described in the application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations by March 1, 1967.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge

OHIO VALLEY GAS CORPORATION AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP66-328

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued September 26, 1966)

On April 18, 1966, Ohio Valley Gas Corporation (Applicant) filed in Docket No. CP66-328 an application, as supplemented on August 25, 1966, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Michigan Wisconsin Pipe Line Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in the communities of Ferdinand and Saint Meinrad, Indiana, all as more fully set forth in the application.

The town of Ferdinand is located in Dubois County, Indiana, approximately 3,200 feet from Respondent's main transmission line and the unincorporated village of Saint Meinrad is located approximately 6 miles southeast of Ferdinand.

Applicant proposes that Respondent construct, pursuant to its "10-cent" formula, approximately 4.6 miles of 4-inch lateral pipeline extending from its transmission line to the border of Ferdinand and further toward the unincorporated village of Saint Meinrad. Applicant proposes to extend said lateral approximately 1.51 miles to Saint Meinrad and to construct separate distribution systems in both of the aforementioned communities.

Applicant's estimated third year annual and peak day requirements are 143,656 Mcf and 1,091 Mcf of natural gas, respectively.

The total estimated cost of Applicant's proposed project is $196,792, which cost will be financed from cash on hand and from liquid assets.

On May 20, 1966, Respondent filed an answer to the application herein, stating that it has no objection to the issuance by the Commission of an order as requested by Applicant.

On May 23, 1966, Community Natural Gas Company, Inc., Mt. Carmel, Illinois, filed a petition to intervene in the instant proceeding, but withdrew its intervention on July 25, 1966. No other petition to intervene, notice of intervention or protest has been filed herein.

The Commission finds:

(1) Respondent, Michigan Wisconsin Pipe Line Company, a Delaware corporation with its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G-669 (5 FPC 953).

(2) Applicant, Ohio Valley Gas Corporation, a corporation organized and existing under the laws of the State of Indiana, is authorized to construct and operate facilities and distribute and sell natural gas as proposed.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transmission facilities with the proposed facilities of Applicant and to sell and deliver natural gas to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 1,091 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

THE TOWN OF OSGOOD, INDIANA AND TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. CP67-15

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued September 26, 1966)

On July 21, 1966, the Town of Osgood, Indiana (Applicant), filed in Docket No. CP67-15 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Texas Eastern Transmission Corporation (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in the Town of Osgood and environs, Ripley County, Indiana, all as more fully set forth in the application.

Applicant proposes to construct and operate approximately 6.8 miles of 4-inch steel lateral pipeline, together with the requisite pressure and odorization facilities, extending in a northwesterly direction from the town to Respondent's transmission system. Applicant also proposes to construct and operate a local distribution system for service to the residents of the Town of Osgood and environs.

Applicant's estimated third year annual and peak day requirements are 98,680 Mcf and 1,103 Mcf of natural gas, respectively.

The total estimated cost of Applicant's proposed facilities is $306,000, which cost will be financed through the sale of revenue bonds to be amortized over a thirty year period.

On August 22, 1966, Respondent filed an answer to the application herein, stating that it has no objection to the issuance by the Commission of an order as requested by Applicant.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

The Commission finds:

(1) Respondent, Texas Eastern Transmission Corporation, a Delaware corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued on March 30, 1949, in Docket No. G-1089.

(2) Applicant, the Town of Osgood, Indiana, is a municipal corporation incorporated under the laws of the State of Indiana and is legally empowered to construct and operate natural gas facilities and to sell and distribute natural gas in said town.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver up to 1,103 Mcf of natural gas per day to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 1,103 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within ten days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PENNSYLVANIA ELECTRIC COMPANY AND THE CLEVELAND ELECTRIC ILLUMINATING COMPANY, PROJECT NO. 2280

ORDER APPROVING REVISED EXHIBIT L PROJECT DRAWINGS AND MODIFYING LICENSE

(Issued September 26, 1966)

On March 11, 1966, Pennsylvania Electric Company and The Cleveland Electric Illuminating Company, licensees for proposed Kinzua Project No. 2280, filed for Commission approval revised Exhibit L drawings for the project, which is a pumped storage development proposed to be located at the Allegheny Government Dam on the Allegheny River in Warren County, Pennsylvania, and which will affect lands of the United States within the Allegheny National Forest.

The revised Exhibit L drawings were filed pursuant to Article 42 of the license for the project which requires their approval by the Commission prior to commencement of construction of the project works.

By our order of May 27, 1966, 35 FPC 834, we approved two of the Exhibit L drawings referred to above in order that early commencement of construction of the Low Head Hydraulic Structures could proceed. We are, therefore, herein concerned only with respect to the remaining unapproved Exhibit L drawings.

The provisions of Article 40 of the license require the licensees to retain a board of consultants to review for safety and adequacy the specifications, design, and construction of the project works, and to submit a report to the Commission concerning each portion of the project prior to submittal of the revised Exhibit L drawings therefor. Such a report was timely submitted which approves of the basic designs of the major project structures which include the upper reservoir, upper intake and high head conduit, powerstation, low head conduit, and lower intake. The Exhibit L drawings show that the shape of the upper reservoir has been changed from rectangular to circular resulting in the elimination of a long section of dike parallel to the crest of the hillside adjacent to the Allegheny Government Dam, which improves the stability of the hillside and is more economical. The upper reservoir will be lined with asphaltic concrete in lieu of impervious soil to prevent leakage into the sandstone caprock. An extensive system of drainage behind the reservoir lining will be used to prevent uplift as the reservoir is unwatered. According to the report, the effectiveness of the lining will be constantly checked by measuring the discharge from the drains, but the use of piezometers installed in the sandstone foundations around the periphery of the dikes and by the use of strain gauges in the foundation to indicate the opening of cracks. Careful monitoring of the movements in the hillside between the upper reservoir and the Allegheny Government Dam will be performed to assure the safety of the latter dam against possible slides. The board of consultants has approved the use of an emergency spillway for the upper reservoir, as provided by license Article 38. The revised Exhibit L drawings show the upper reservoir intake as a morning-glory type of structure which the board considers adequate. However, the board's report states that model studies will be made which might result in some changes to the intake and approaches thereto. As a result of economic studies, the high head conduit diameters have been increased and the drawings show one section of conduit as having a slope of 55° with the horizontal, which will be constructed as a vertical shaft. Drains have been added behind the tunnel lining to prevent the transfer of upper reservoir water pressure to low-lying rock strata. The board's report generally approved the design and relocation of the powerhouse several hundred feet downstream from its originally planned location in order that the powerhouse excavation would not endanger the Allegheny Government Dam. Finally, the board's report approved the design of the low head conduits which have been increased in size to reduce the effects of water hammer resulting from the increased length of conduits made necessary by the relocation of the powerhouse. The proposed changes shown on the exhibits drawings are improvements in the design of the project works.

Article 41 of the license requires the licensees to submit for Commission approval a stability analysis of a typical (maximum height) dike section for the upper reservoir using actual strengths of materials to be used. Such an analysis was submitted and is considered satisfactory.

The Secretary of the Army and the Chief of Engineers, have approved the plans of the project structures affecting navigation insofar as the interest of navigation is concerned, pursuant to Section 4(e) of the Federal Power Act. In accordance with license Article 43, the plans and specifications of the project features which could affect the structures and operations of the Allegheny Government Dam have been reviewed by the Corps and have been found satisfactory.

Upon the suggestion of the Pennsylvania Fish Commission and with the acquiescence of the licensees, we are including in the license Article 60 requiring the licensees to cooperate with the Pennsylvania Fish Commission during development of details of project design and during construction and operation in an effort to reach an agreement thereon in the interest of protecting the fishery resources of the project area.

The following described revised Exhibit L drawings conform to the Commission's rules and regulations and should be approved as part of the license for the project and superseded license drawings designated as Exhibit L, sheets 1, 2, 3, 4, 5 and

7 (FPC Nos. 2280–24, 25, 26, 27, 28 and 30, respectively) should be eliminated from the license for the project:

Revised Exhibit L	*F.P.C No.*	*Title*
		Kinzua Project
Sheet 1	2280–32	General Layout.
Sheet 2	2280–33	High Head Conduit.
Sheet 3	2280–34	Pumping and Generating Station Vicinity.
Sheet 4A	2280–35	Pumping and Generating Station Plan—El-1188.0.
Sheet 4B	2280–36	Pumping and Generating Station Plan—El-1232.0.
Sheet 5A	2280–37	Pumping and Generating Station Sections—Sheet 1.
Sheet 5B	2280–38	Pumping and Generating Station Sections—Sheet 2.
Sheet 6	2280–39	Low Head Conduits.
Sheet 7	2280–40	Upper Hydraulic Structures.

The Commission orders:

(A) The revised Exhibit L drawings described in the above finding are hereby approved as part of the license for Project No. 2280, and the superseded license Exhibit L drawings described in the same finding are hereby eliminated from the license for the project.

(B) The license for Project No. 2280 is hereby modified to include the following article:

Article 60. Licensees shall during development of details of project design and during construction and operation cooperate with the Pennsylvania Fish Commission in the interest of protecting the fishery resources. In the event the licensees and the Fish Commission fail to reach agreement on facility design, including that of the water intake structure screens or racks, the Commission reserves the right to make such determination after notice and opportunity for hearing.

(C) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this order. In acknowledgment of the acceptance of this order, it shall be signed for the licensees and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-13

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 26, 1966)

On July 20, 1966, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant) filed in Docket No. CP67-13 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience

and necessity authorizing the construction and operation of certain natural gas facilities, all as more fully set forth in the application.

Applicant proposes to construct and operate 2.6 miles of 16-inch pipeline extending from West Delta Block 69–K to Grand Isle Block 43, offshore area, south Louisiana, in order to connect offshore gas reserves to its existing offshore facilities. The gas reserves proposed to be connected are owned by The Atlantic Refining Company, Cities Service Oil Company, Continental Oil Company, and Tidewater Oil Company (collectively referred to as CATCO) and were dedicated to Applicant by contract dated January 31, 1956.

The subject application has been filed pursuant to a letter amendment to the aforementioned contract dated August 31, 1964, providing that Applicant build one mile of pipeline for each ten billion cubic feet of reserves discovered. Sufficient reserves have now been developed to justify the construction of the proposed 2.6 miles of 16-inch pipeline.

The total estimated cost of Applicant's proposed facilities is $715,876, which cost will be financed from general funds or revolving credit.

After due notice, no petition to intervene, notice of intervention or protest to the application has been filed.

At a hearing held on September 22, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., a Delaware corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of July 15, 1947, in Docket No. G–910 (6 FPC 777).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., authorizing construction and operation of the facilities hereinbefore described, as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Regulations under the Natural Gas Act, within one year from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ALABAMA POWER COMPANY, DOCKET NO. E-6893

HEADWATER BENEFITS DETERMINATION

(Issued September 28, 1966)*

This order, issued under Section 10(f) of the Federal Power Act (16 U.S.C. 803(f)), determines payments of the Alabama Power Company to the United States for benefits provided in the Coosa River basin by the Federal Allatoona headwater improvement to the Company's downstream Weiss and Lay hydroelectric developments, Project No. 2146, and Mitchell and Jordan developments, Project Nos. 82 and 618, respectively, during the period of January 1, 1961, through December 31, 1963.

On October 13, 1965, the Company paid to the Commission an interim or partial billing of $235,261 for headwater benefits from the Allatoona project for the years 1961–1963. On January 18, 1966, representatives of the Company, the Department of the Interior, the Corps of Engineers, and the Commission staff met in Washington, D.C., to discuss final payments for the period. After the conference, written submissions were made by the Company and Interior. The payments fixed below take into consideration the suggestions made in these submissions.

The Commission finds:

(1) It is appropriate and in the public interest in administering Part I of the Federal Power Act, particularly Section 10(f) thereof, that the following payments be made by the Alabama Power Company to the United States for headwater benefits provided in the Coosa River basin by the Federal Allatoona project to the Company's downstream Weiss and Lay hydroelectric developments, Project No. 2146, and Mitchell and Jordan developments, Project Nos. 82 and 618, respectively:

Year:	*Amount*
1961	$70,233
1962	98,768
1963	127,002
Total	$296,003
Interim payment	235,261
Amount due	60,742

---

*Order issued November 23, 1966 granting rehearing, etc., 36 FPC 883.

(2) The cost of the headwater benefits determination for the period through the issuance date of this order is $18,724.

The Commission orders:

The Alabama Power Company within thirty days of this determination shall pay to the Commission $79,466 ($60,742 plus $18,724).

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

DUKE POWER COMPANY, DOCKET NO. E-7266

ORDER DENYING REHEARING

(Issued September 28, 1966)

Duke Power Company (Duke) on September 6, 1966, filed an application for Rehearing of our Opinion No. 503 and Order Determining Jurisdiction Over Acquisition of Facilities, issued August 9, 1966, 36 FPC 399, where we determined that Section 203 of the Federal Power Act requires that Duke, a "public utility" within the meaning of the Federal Power Act obtain approval for the acquisition of electric facilities valued in excess of $50,000 owned by Clemson University. The points made by Respondent were covered in the briefs submitted earlier and were disposed of in our opinion. No further discussion is necessary.

The Commission further finds:

The assignments of error and grounds for rehearing set forth in the application for rehearing filed by Duke in this proceeding present no new legal principles which would warrant any change or modification of the Commission's Opinion No. 503 and order.

The Commission orders:

The application for rehearing filed by Respondent is denied.

Commissioner Carver *not participating.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

SOUTHERN CALIFORNIA EDISON COMPANY, PROJECT NO. 1582

ORDER ACCEPTING SURRENDER OF LICENSE (TRANSMISSION LINE)

(Issued September 28, 1966)

On August 22, 1966, Southern California Edison Company, licensee for transmission line Project No. 1582, filed application for surrender of the license for the project located in Mono County, California, and affecting lands of the United States within the Mono National Forest.

The application was filed pursuant to the Commission's October 1, 1963 order, 30 FPC 889, in which the Commission found, among other things, that transmission line Project No. 1582 is not part of a "project" as defined in Section 3(11) of the Federal Power Act, and provided for the filing of an application for surrender of the license for the transmission line, subject to first obtaining authority from the appropriate Government agency for the continued occupancy by the line of the lands of the United States involved.

The licensee filed with its application for surrender a copy of a Special Use Permit issued by the U.S. Forest Service on July 8, 1966 for the continued occupancy by the line of lands of the United States within the Mono National Forest. Filed also, was the licensee's copy of its license.

Annual Charges have been paid under the license through December 31, 1965. Public notice of the filing of the application for surrender was waived in the license.

The Commission finds:

Acceptance of surrender of the license for the project is appropriate as hereinafter provided.

The Commission orders:

Surrender of the license for transmission line Project No. 1582 is hereby accepted, effective as of July 8, 1966, subject to the payment of annual charges owing under the license through said date in the amount of $6.43.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

WISCONSIN MICHIGAN POWER COMPANY, PROJECT NO. 2357

ORDER APPROVING REVISED PROJECT EXHIBIT L DRAWINGS

(Issued September 28, 1966)

On January 14, 1965, Wisconsin Michigan Power Company, licensee for the White Rapids Project No. 2357 located on the Menominee River in Wisconsin and Michigan, near Amberg, Wisconsin, filed for Commission approval revised Exhibit L drawings showing certain changes in the powerhouse intake gates.

Replacement of head gates at the water passages of the intake structure became necessary because they had deteriorated. The revised drawings show that the gates have been replaced by portable steel lift gates which will operate in vertical guide slots in the face of each pier in the water passages. A permanent overhead hoist rail with crane and supporting steel framework have been constructed on the powerhouse deck to operate the gates.

The Chief of Engineers and the Secretary of the Army have approved the revised Exhibit L drawings pursuant to Section 4(e) of the Federal Power Act.

The Commission finds:

The following described revised Exhibit L drawings conform to the Commission's rules and regulations and should be approved as part of the license for the project, and the license Exhibit L drawings mentioned herein as being superseded should be eliminated from the license for the project:

Exhibit L	*Showing*	*FPC No.*	*FPC No. Superseded*
Sheet 2	Cross Section of Plant	2357–12	2357–4
Sheet 4	Plant Floor and Sectional Plans	2357–13	2357–6
Sheet 5	Plant Elevations	2357–14	2357–7

The Commission orders:

The revised Exhibit L drawings described in the above finding are hereby approved as part of the license for Project No. 2357, and the license Exhibit L drawings referred to in the same finding as being superseded are hereby eliminated from the license for the project.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

ALABAMA POWER COMPANY, PROJECT NO. 2146

ORDER FURTHER EXTENDING TIME FOR COMPLETION OF CAUSEWAY

(Issued September 30, 1966)

By letter of September 8, 1966, the Alabama Power Company advised that Mr. J. W. Goodgame had requested a further extension to complete Causeway No. 4, located in the reservoir of the Company's Logan Martin hydroelectric development, Project No. 2146, on the Coosa River in Alabama. The Company was authorized to grant permission to construct this causeway by the Commission's order of May 26, 1965, 33 FPC 1105. That order provided that the construction be completed not later than March 31, 1966. By order of May 26, 1966 [unreported], the Commission extended the completion date to September 30, 1966.

The Company states that Mr. Goodgame has made periodic progress on the causeway construction, but that construction has been hampered during the summer by recreation activity on and around Goodgame Island and by the increase in the reservoir level during the recreation season. The Company recommends that the completion date be further extended to March 31, 1967. Unless the causeway is completed by this date, the Company is authorized and directed to secure its removal from the reservoir as a project work not completed according to specifications.

The Commission finds:

It is consistent with the public interest in carrying out the provisions of the Federal Power Act that the Alabama Power Company be authorized to grant an extension for the completion of Causeway No. 4 in the Logan Martin reservoir as hereinafter provided.

The Commission orders:

The Alabama Power Company is hereby authorized to grant an extension for completion of Causeway No. 4 in the Logan Martin reservoir until March 31, 1967.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

IDAHO POWER COMPANY, DOCKET NO. E-7307

ORDER AUTHORIZING THE ISSUANCE OF FIRST MORTGAGE BONDS

(Issued September 30, 1966)

Idaho Power Company (Applicant), incorporated under the laws of the State of Maine and qualified to do business in the States of Idaho, Nevada and Oregon, with its principal business office at Boise, Idaho, filed an application with the Federal Power Commission on August 19, 1966, as amended at various times thereafter, for authorization pursuant to Section 204 of the Federal Power Act, to issue and sell at competitive bidding $30,000,000, principal amount of First Mortgage Bonds, due 1996.

Applicant proposes to issue the new Bonds as a series of an issue of First Mortgage Bonds under a Mortgage and Deed of Trust dated as of October 1, 1937, and as supplemented and amended by 16 supplemental indentures and as to be further amended by a 17th supplemental indenture to be dated as of October 1, 1966 between the Applicant and Bankers Trust Company of New York and J. C. Kennedy, as Trustees. The new Bonds are to be dated as of October 1, 1966. The interest rate of the Bonds will be determined by competitive bidding.

On or about October 3, 1966, the Applicant proposes to invite sealed written bids for the purchase of the Bonds by newspaper publication of a public invitation for proposals, setting forth terms and conditions relating thereto. All bids, whether from a single bidder or group of bidders, must be in writing on the Form of Bid furnished by Applicant and must be for the purchase of the entire amount of the Bonds. Each bid must specify, among other things: (1) the interest rate to be borne by the Bonds, which rate shall be a multiple of ⅛th of 1% and (2) the price to be paid to the Applicant, which price shall not be less than 99% of principal amount. Each bid shall provide that accrued interest from October 1, 1966 to date of payment therefor and delivery thereof will be paid to the Applicant by the purchaser or purchasers.

Unless postponed, all bids for the purchase of the proposed issuance of Bonds must be delivered to the Applicant's representative at the Bankers Trust Company, 11th Floor, 100 Broadway, New York, New York, before 11:30 a.m. New York time on October 11, 1966, and be accompanied by the deposit of $900,000. Unless the Applicant shall reject all bids or exclude a bid or bids for reasons set forth in the invitation, it will accept the bid which provides for the lowest cost of money.

According to the Applicant, the Bonds are to be issued for the purpose of obtaining funds for the payment of short-term notes and the remaining balance of the net proceeds of the sale of said securities is to be used for construction purposes, principally the Hells Canyon unit of Project No. 1971, now under construction and scheduled for completion early in 1968. Applicant now has short-term notes outstanding in the amount of $10,900,000 and Applicant estimates that it will acquire and make additional short-term bank loans aggregating approximately $9,000,000 prior to the issuance of the First Mortgage Bonds. Between the period July 1, 1966 to December 31, 1967, Applicant expects to spend $34.5 million on the Hells Canyon unit of Project No. 1971, approximately $7 million on transmission lines and approximately $11 million on distribution lines and substations.

Written notice of the application has been given to the Idaho Public Utilities Commission, Nevada Public Service Commission, Oregon Public Utility Commissioner and the Governor of each of those states. Notice has also been given by publication in the Federal Register on September 8, 1966 (31 F.R. 11774), stating that any person desiring to be heard or to make any protest with reference to the application, should file petitions or protests on or before September 23, 1966, with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commis-

sion as heretofore described and set forth in the Commission's order issued November 7, 1957, *Idaho Power Company*, Docket No. E-6781 (18 FPC 603).

(2) The proposed issuance and sale of Bonds, as described above, will constitute an issuance of securities within the purview of Section 204 of the Federal Power Act.

(3) Applicant is not organized and operating in a State under the laws of which the security issue here involved is regulated by a State commission within the meaning of Section 204(f) of the Act, and the proposed issuance of securities is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(4) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purpose of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

(5) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) The proposed issuance and sale of Bonds, upon the terms and conditions and for the purpose specified in the application, as described above are authorized, subject to the provisions of this order.

(B) The proposed issuance and sale of Bonds at competitive bidding shall not be consummated until:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

(C) This authorization shall expire unless the transaction hereby authorized is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission.

(E) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States with respect to any securities to which this order relates.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PACIFIC POWER & LIGHT COMPANY, DOCKET NO. E-7300

ORDER AUTHORIZING TRANSMISSION OF ELECTRIC ENERGY TO CANADA

(Issued September 30, 1966)

Pacific Power & Light Company (Applicant) a corporation organized under the laws of the State of Maine and authorized to do business in the States of Oregon and Washington, California, Idaho, Montana and Wyoming with its principal business office at Portland, Oregon, filed an application on June 27, 1966, as supplemented on July 26, 1966 and August 22, 1966, seeking an order pursuant to Section 202(e) of the Federal Power Act authorizing it to sell electric energy to British Columbia Hydro and Power Authority (B.C. Hydro), Vancouver, province of British Columbia, Canada.

According to the application, Applicant proposes to export to B.C. Hydro electric energy in an amount not in excess of 500,000,000 kwh annually at a rate not in excess of 170,000 kw. The energy is to be delivered over existing transmission interconnections between Bonneville Power Administration (BPA) and B.C. Hydro. Alternatively, Applicant will make the energy available from exchange account energy balances due Applicant from BPA[1], from secondary hydro energy available to Applicant from other sources or from thermally generated energy supplied from Applicant's Dave Johnston steam-electric generating plant in Wyoming.

Applicant's contractual arrangements with B.C. Hydro provide for delivery of the energy during the period October 1, 1966 through April 30, 1967 with renewal provisions covering the periods October 1, 1967 through April 30, 1968 and October 1, 1968 through April 30, 1969.

According to Applicant the energy is expected to be delivered to BPA at a greater rate during off-peak hours, such as during night-time hours and on weekends, than at other times. BPA's schedules of deliveries to B.C. Hydro will be as agreed upon between their representatives, with BPA being obligated to make deliveries on demand whether on peak or off peak.

The energy to be exported will be delivered by BPA over its existing interconnection with B.C. Hydro near Blaine, Washington[2]. This interconnection includes two 230 kv circuits with one circuit designed for 500 kv. The latter circuit is expected to begin operation at design voltage in the fall of 1968; the interconnection has more than sufficient capacity to deliver the requested amount. Moreover, the amount of energy to be delivered is subject to determination by the BPA that transmission capacity is available in excess of other requirements for the system.

Applicant has completed transmission arrangements with Utah Power & Light Company and Idaho Power Company for displacement deliveries of any energy generated at Applicant's Wyoming steam-electric generating facilities. Those arrangements are reflected in Utah Power & Light Company's Rate Schedules FPC Nos. 102A and 102B, Idaho Power Company's Rate Schedules FPC Nos. 28 and 46, and Applicant's Rate Schedules FPC Nos. 69A and 69B. Applicant would deliver such energy from the Dave Johnston plant to Utah Power & Light Company which would then credit Idaho Power Company with these deliveries. Idaho Power Company would then deliver energy to Applicant's Oregon system.

B.C. Hydro will pay Applicant each month 4.25 mills per kwh delivered plus any wheeling charges assessed against Applicant by Idaho Power Company and plus any wheeling charges or losses assessed by BPA. To the extent Applicant is required to schedule energy from its Wyoming system to

---

[1] For the purpose of achieving efficient utilization of productive capacity, BPA and Applicant exchange, upon request, excess hydro-generated energy. Applicant upon request by BPA, supplies to BPA's customers excess hydro-generated and thermal-generated energy as Applicant may have available, and transfers energy over its system to customers of BPA for the account of BPA. That energy is credited to Applicant in an exchange energy account and is returned to the supplier at times and at rates of delivery mutually agreed upon (Applicant's Rate Schedule FPC Nos. 28 and 45).

[2] BPA will transmit the energy to Canada over facilities authorized by a Presidential Permit of October 27, 1945, as amended November 30, 1965, FPC Docket No. IT-5959.

Idaho for transfer to BPA, Applicant will pay Idaho Power Company and will charge B.C. Hydro 0.5 mills per kwh transmitted in excess of 75,000,000 kwh plus an annual minimum of $37,500 whether or not energy is transmitted. Idaho Power Company agrees to consider its losses to be zero for the displacement of energy across its system.

The proposed exportation of electric energy to B.C. Hydro will not impair the sufficiency of electric supply within the United States. Generating capacity is available to Applicant throughout its interconnected electric facilities to meet electric loads including the proposed exportation of energy.

Written notice of the application has been given to the Oregon Public Utility Commissioner, Washington Utilities and Transportation Commission, Idaho Public Utilities Commission, to the Montana Board of Railroad Commissioners, the Wyoming Public Service Commission and to the California Public Utilities Commission and the Governors of those States. Notice of the application has also been given by publication in the Federal Register on July 13, 1966 (31 F.R. 9514), stating that any person desiring to be heard or to make any protest with reference to the application should, on or before July 25, 1966, file with the Federal Power Commission, Washington, D.C. 20426, a petition or protest in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) The proposed transmission of electric energy from the United States to Canada as limited herein and as hereinafter authorized will not impair the sufficiency of electric supply within the United States and will not impede or tend to impede the coordination in the public interest of facilities subject to the jurisdiction of the Commission.

(2) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) Applicant is hereby authorized to transmit electric energy from the United States to Canada in accordance with the terms and conditions set forth in the application and subject to the provisions of this order.

(B) The electric energy which Applicant is hereby authorized to transmit from the United States to Canada shall be in an amount not in excess of 500,000,000 kwh per year at a transmission rate not to exceed 170,000 kw, and the energy shall be transmitted over the facilities specified in the application.

(C) The authorization herein granted may be modified from time to time or terminated by further order of the Commission, but in no event shall such authorization extend beyond April 30, 1969.

(D) Applicant shall conduct all operations pursuant to the authorization herein granted in accordance with the provisions of the Federal Power Act and pertinent rules, regulations or orders issued by the Commission.

(E) No electric energy shall be delivered under this authorization when such energy would otherwise be utilized to serve ultimate consumers in the United States who would be deprived of service or suffer a material limitation, curtailment, or impairment of service.

(F) Applicant shall provide for the installation and maintenance of adequate metering equipment to measure the flow of all energy transmitted from the United States to Canada pursuant to the authority herein granted; shall make, keep and preserve full and complete records with respect to the movement of such energy; and shall furnish, in triplicate, to the Commission, with respect to such transmission of electric energy, reports annually on or before February 15, showing the kw hours delivered, the maximum kw of transmission, and the consideration received therefor during each month of the preceding year.

(G) This authorization to transmit electric energy from the United States to Canada shall not be transferable or assignable, but in the event of the involuntary transfer of the facilities used for such transmission by operation of law (including such transfers to receivers, trustees, or purchasers under foreclosure or judicial sale) said authorization shall continue in effect temporarily for a reasonable time thereafter, pending the making of an application for permanent authorization and decision thereon, provided notice is promptly given in writing to the Commission accompanied by a statement that the physical facts relating to sufficiency of supply, rates, and nature of use remain substantially the same as before the transfer.

(H) This authorization shall be without prejudice to the authority of any State or State regulatory commission for the exercise of any lawful authority vested in the State or State regulatory commission over Applicant.

(I) This authorization is without prejudice to the authority of this Commission, or any other regulatory body, with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission, or any other regulatory body, and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP65-181 (PHASE II)

ORDER PERMITTING INTERVENTION

(Issued September 30, 1966)

On August 30, 1966, Citizens for Clean Air, Inc. (CCA) filed a motion for leave to intervene out of time and a petition to intervene in the above-entitled proceedings [1] which involve the proposed sale of an additional 55,000 Mcf per day of contract demand gas (Rate Schedule CD-3) by Transcontinental Gas Pipe Line Corporation (Transco) to Consolidated Edison Company of New York, Inc. (Con Ed) in substitution for deliveries of 55,000 Mcf per day of Transco's storage service (Rate Schedule GSS) now being rendered. This proposal originally was consolidated with other applications in Columbia Gulf Transmission Co., *et al.*, Docket No. CP65-102, *et al.* However, on March 25, 1966, after the close of hearings in those proceedings, but prior to an Examiner's decision, the United States Department of Health, Education, and Welfare (Department) filed a motion for leave to intervene out of time, confining its interest to the issue of air pollution which is involved in Transco's proposed service to Con Ed. Certain matters raised by the Department required that the record be reopened for the presentation of additional evidence and, accordingly, the Commission severed this portion of Transco's application and provided for further hearings which are now scheduled to commence October 4, 1966.[2]

---

[1] No party has filed an answer to the motion or opposed CCA's intervention.

CCA alleges that it is an organization of New York area residents concerned about the city's air pollution problem, that it is familiar with the views of New York area residents and is cognizant of local efforts being made to combat air pollution, and that it should be permitted to intervene in order to present its views based on its knowledge of the local situation. CCA contends that the desirability of its participation in this proceeding was not apparent prior to the order of April 29, 1966, permitting the Department's intervention and severing proceedings. CCA also states that the full extent of the Commission's interest in the air pollution issue was not revealed until the Presiding Examiner issued his initial decision of June 13, 1966, in which this issue was discussed. CCA requests permission to present witnesses at the hearings, to file briefs before the Examiner and the Commission, to participate in oral argument, if any, before the Commission, and to exercise all rights and prerogatives of a party to the proceeding.

It may be that CCA represents an interest not otherwise represented in the proceedings although we note that the City of New York is a party to the proceeding and has presented evidence directed to the air pollution issue. However, in order to assure a full record we will grant CCA's motion and permit it to intervene in the proceedings. Although we are generally reluctant to grant intervention out of time, considerations exist with respect to CCA's motion to intervene which, we think, justify granting its intervention. We did not provide for additional interventions after severing the proceedings and, since the Department of Health, Education, and Welfare's intervention injected a new emphasis on the air pollution issue, we can appreciate that CCA may have realized that it had an interest in the proceeding which was not previously apparent to it. CCA's motion and petition to intervene were filed on August 30, 1966, and its proposed direct testimony in the reopened proceedings was served on September 21, 1966, prior to the scheduled resumption of the hearings on October 4, 1966. Therefore, its intervention and participation will not disrupt the orderly procedures in this case.

The Commission finds:

(1) Although the petition to intervene filed by Citizens for Clean Air, Inc. was not filed within the time required by Section 1.8(d) of the Commission's Rules of Practice and Procedure (18 CFR 1.8(d)), good cause exists to permit the late filing.

---

[2] The order permitting intervention and severing proceedings was issued April 29, 1966, in Columbia Gulf Transmission Co., *et al.*, Docket No. CP65-102, *et al.* Dates for service of evidence and commencement of hearings were postponed by notices issued May 13, 1966, and June 24, 1966.

(2) It is desirable and in the public interest to allow Citizens for Clean Air, Inc. to intervene in these proceedings in order that it may establish the facts and the law from which the nature and validity of its alleged rights and interests may be determined and show what further action may be appropriate under the circumstances in the administration of the Natural Gas Act.

The Commission orders:

Citizens for Clean Air, Inc. is hereby permitted to become an intervenor in these proceedings subject to the rules and regulations of the Commission: *Provided, however,* that its participation shall be limited to matters affecting asserted rights and interests as specifically set forth in its petition for intervention; and *provided, further,* that the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

CITIES SERVICE GAS COMPANY, DOCKET NO. CP67-37

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 3, 1966)

On August 18, 1966, Cities Service Gas Company (Applicant) filed in Docket No. CP67-37 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the sale and delivery of natural gas to The Gas Service Company (Gas Service) for resale to customers in and about the cities of Dearborn, Camden Point, Edgerton and Gower and the villages of Grayson, New Market and Trimble, Missouri, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate approximately 4.9 miles of 6-inch pipeline and two metering and related appurtenant facilities all in Platte County, Missouri.

The estimated third year peak day and annual natural gas requirements of Gas Service are 996 Mcf and 76,885 Mcf, respectively. The proposed sale for resale will be made under Applicant's F-2, C-2 and I-2 FPC Gas Rate Schedules.

The total estimated cost of Applicant's proposed facilities is $82,200, which cost will be financed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on September 29, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Cities Service Gas Company, a Delaware corporation with its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G-298 (4 FPC 471).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The aforesaid construction and operation of facilities and transportation and sale of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Cities Service Gas Company, authorizing the construction and operation of facilities and transportation and sale of natural gas hereinbefore described, as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Regulations under the Natural Gas Act, within six months from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

GEORGE H. COATES, DOCKET NOS. G–19824 AND RI61–369

ORDER GRANTING MOTION FOR CLARIFICATION AND TERMINATING PROCEEDINGS

(Issued October 3, 1966)

By order issued April 12, 1966, 35 FPC 490, in the above-entitled proceedings the Commission deferred the obligation of George H. Coates (Coates) to pay interest on refunds relating to increased production taxes paid to the State of Texas until action was taken on his motion for clarification. By such motion Coates sought relief from the obligation in the settlement order issued August 20, 1965, 34 FPC 550, herein to pay interest on refunds insofar as such refunds related to increased production taxes paid to the State of Texas. Coates has made all of the refunds, including interest, required by the August 20 order except for the $310.43 interest amount in dispute here.

Action on Coates' motion has been deferred pending disposition of the rulemaking proceeding in Docket No. R–280 relating to this same subject. By Order No. 326 issued September 6, 1966, 36 FPC 582, the Commission revised § 154.102 of its Regulations under the Natural Gas Act to relieve independent producers from their obligation to pay interest on that portion of an increased rate found to be unjustified which relates to royalties or taxes they are required to pay to federal or state governmental authorities to the extent refunds are made by such authorities without interest.

Coates in his motion states that he will not be paid any interest by the State of Texas on any portion of the increased production taxes which were refunded herein. Consistent with our action in Order No. 326 we conclude that Coates should be relieved of any interest obligation on refunds relating to such increased production taxes. Since Coates has complied with all of the provisions of the August 20 order except for the interest payment involved here, it is appropriate to terminate the above-entitled proceedings without requiring further refunds.

The Commission orders:

For the reasons set forth above, Coates is relieved of his obligation to pay interest on refunds attributable to increased production taxes paid to the State of Texas, and Docket Nos. G-19824 and RI61-369 are severed from Docket No. AR64-2 and terminated.

ORDER CONSOLIDATING ORDERS TO SHOW CAUSE AND SETTING PROCEDURES

(Issued October 3, 1966)

On September 14, 1966, 36 FPC 632, 628, orders to show cause were issued separately by the Commission in the following proceedings:

(a) Socony Mobil Oil Company, Inc., Docket No. CI65-1227 and

(b) George Despot, Agent (Operator), *et al.*, Docket No. CI65-974, *et al.*

The latter proceeding (*i.e.*, George Despot, Agent (Operator), *et al.*) represents a consolidation of 20 dockets involving common questions of law and fact.

It appears that Docket No. CI65-1227 involves essentially the same issues of law and fact as the consolidated dockets captioned George Despot, Agent

(Operator), *et al.*, Docket No. CI65–974, *et al.*, *i.e.*, that in all of the above-mentioned dockets the Commission has not authorized the sales of gas for compressor fuel or other purported intrastate use and that under the holding of the Supreme Court in *California* v. *Lo-Vaca Gathering Co.*, 379 U.S. 366 they appear to be jurisdictional sales.

Docket Nos. CI67–338 and CI67–170 involve applications for certificates to sell natural gas pursuant to new contracts rededicating acreage from which sales were previously made without authorization from the Commission on the purported ground that such sales were nonjurisdictional. Docket No. CI67–132 involves an application to sell gas to Lone Star Gas Company similar to certain sales already consolidated in George Despot, *et al.*, Docket No. CI65–974, *et al.* Docket No. G–16141 involves an amended letter agreement which now dedicates acreage to jurisdictional sales from which previous sales have been made without Commission authorization. Docket Nos. CI66–1099, CI67–364 and CI67–365 involve sales to El Paso similar to the sales to Lone Star previously consolidated in George Despot, Agent (Operator), *et al.*, Docket No. CI65–974, *et al.*, *i.e.*, sales restricted by contract for intrastate use but commingled with gas purchased from other producers and transported to points outside the state. It is apparent that all of the above sales, with some minor variation in the facts, are nevertheless jurisdictional sales under the holding of the Supreme Court in *California* v. *Lo-Vaca Gathering Co.*, *supra.*

Consequently, in order to avoid unnecessary duplication of a trial record on substantially the same issues it would be in the public interest to consolidate the above dockets including the already issued order to show cause in Docket No. CI65–1227 and to provide uniform procedures for presentation of evidence and dates of hearing.

The Commission finds:

(1) It is appropriate and in the public interest that the above-captioned matters be consolidated for hearing and decision as hereinafter ordered.

(2) The expeditious disposition of these proceedings may be effectuated by providing a uniform procedure for prehearing conference and dates of public hearing.

The Commission orders:

(A) Docket Nos. CI65–1227, CI67–338, CI67–170, CI67–132, G–16141, CI66–1099, CI66–1167, CI67–364, and CI67–365 are hereby consolidated with Docket No. CI65–974, *et al.* for the purposes of hearing and decision.

(B) The prehearing conference provided for on October 26, 1966, in paragraph (D) of the order to show cause captioned George Despot, Agent (Operator), *et al.*, Docket No. CI65–974, *et al.*, as well as the other procedures in that order shall also apply to the following companies:

	Docket Nos.
Mobil Oil Corp	CI65–1227
Do	CI67–338
Texaco Inc. (Operator), *et al*	CI67–170
J. C. Trahan, Drilling Contractor, Inc. (Operator), *et al*	CI67–132
Gulf Oil Corp	G–16141
Continental Oil Co	CI66–1099
Union Texas Petroleum, a division of Allied Chemical Corp., *et al*	CI66–1167
Mobil Oil Corp	CI67–364
Sinclair Oil & Gas Co	CI67–365

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP66-409 (PHASE I) *

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 3, 1966)

On June 10, 1966, Northern Natural Gas Company (Applicant) filed in Docket No. CP66-409 (Phase I), as supplemented on August 15, 1966, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in order to sell and deliver increased quantities of natural gas to certain existing utility customers and, through its Peoples Natural Gas Division, to increase firm natural gas service to John Deere Dubuque Tractor Works of Deere & Co. (Deere Tractor) and to Erie Mining Company (Erie) and to initiate firm natural gas service to Central Farmers Fertilizer Company (Central Farmers), Cenex, Inc. and the National Steel Pellet Plant of the Hanna Mining Company (Hanna), all as more fully set forth in the application in this proceeding.

Applicant proposes to increase its system capacity by 26,231 Mcf of gas per day. Of this amount, 15,060 Mcf per day is to enable Applicant's utility customers to meet the necessary growth requirements for presently served communities and 11,173 Mcf per day is for industrial service through the Peoples Division or for the industrial service of Applicant's utility customers. Applicant has entered into contracts dated May 5, 1966, and April 13, 1966, with Hanna and Erie, respectively, providing for maximum daily deliveries by Applicant of 8,200 Mcf to Hanna and 17,000 Mcf to Erie. However, Hanna and Erie may exercise their respective rights to have the daily delivery volume reduced to a minimum of 7,200 Mcf in the case of Hanna and 15,000 Mcf in the case of Erie after each buyer has determined what its respective precise maximum daily requirement will be. In the event Hanna or Erie exercises its right to reduce the daily volume, Applicant shall be required to file a petition to amend the subject order to authorize any lower contract demand.

Applicant also requests approval of reductions in effective maximum daily deliveries for certain communities and industrial customers presently served by three of its utility customers, North Central Public Service Co., Western Power & Gas Co. and Applicant's Peoples Division. These reductions to individual communities or industrial customers do not constitute a decrease in the overall effective contract demands of the three utility customers involved.

Specifically, Applicant proposes to construct and operate: (1) approximately 37.3 miles of 30 and 36-inch pipeline loop in the states of Kansas, Nebraska, Iowa and Minnesota, (2) approximately 2.2 miles of 10-inch branchline, together with necessary measuring facilities, for service to Hanna's plant at Keewatin, Minnesota, and (3) piping yard changes in Beaver, Oklahoma.

The total estimated cost of the proposed facilities in Phase I is $5,568,138, which cost will be financed from cash on hand, reserve accruals and retained earnings.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

---

* This application, as supplemented, is divided into two Phases. This order pertains exclusively to Phase I of said application, as supplemented.

At a hearing held on September 29, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and exhibits submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The facilities hereinbefore described, as more fully described in the application, as supplemented, in this proceeding (Phase I), are to be used in the transportation and/or sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and/or sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and/or sales of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(6) Applicant should file a petition to amend the subject order to authorize any lower contract demand for Hanna and Erie should their respective precise demands to be subsequently determined be lower than the maximum daily volume of 8,200 Mcf for Hanna and 17,000 Mcf for Erie hereinafter authorized to be transported and delivered to said companies.

(7) The authorization hereinafter granted should be without prejudice to Applicant's right to request amendment of the subject order to authorize Phase II facilities.

(8) This certificate should not entitle the industrial customers to whom firm deliveries are authorized herein to any priorities to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Northern Natural Gas Company, to construct and operate the proposed facilities and to sell and/or transport and deliver the maximum daily firm volumes of natural gas as set forth in column 7 of pages 6, 7 and 8 of Exhibit I of the subject application, as hereinbefore described, all as more fully described in the application, as supplemented, in this proceeding (Phase I), upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the sales and/or transportation and deliveries of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by November 1, 1967.

(D) Applicant shall file a petition to amend the subject order to authorize any lower contract demand for Hanna and Erie should their respective precise contract demands to be subsequently determined be lower than the maximum daily volume of 8,200 Mcf for Hanna and 17,000 Mcf for Erie authorized in paragraph (A) above to be transported and delivered to said companies.

(E) The authorization granted in paragraph (A) above is without prejudice to Applicant's right to request amendment of the subject order to authorize Phase II facilities.

(F) This certificate shall not entitle the industrial customers to whom firm deliveries are authorized herein to any priorities to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ALABAMA POWER COMPANY AND MOUNT VERNON MILLS, INC., DOCKET NO. E-7314

ORDER APPROVING HEADWATER BENEFITS SETTLEMENT

(Issued October 4, 1966)

This order, issued under Section 13.1 of the Commission's Regulations under the Federal Power Act, approves a settlement between the Alabama Power Company (Alabama Power) and Mount Vernon Mills, Inc. (Mount Vernon Mills), that Alabama Power's Martin development, Project No. 349, and its Yates development, Project No. 2407, in the Tallapoosa River basin in Alabama do not provide headwater benefits to the generating facilities of Mount Vernon Mills at the downstream Thurlow development, Project No. 2408. The settlement, dated March 22, 1966, was filed on April 4, 1966.

Alabama Power and Mount Vernon Mills are joint applicants for a license for the Thurlow development. Alabama Power owns two 25,000 kilowatt generating units at the project, and Mount Vernon Mills owns an 8,000 kilowatt unit. The Commission issued a license order on April 5, 1965, 33 FPC 670; at the request of the joint applicants, rehearing of the order was granted. The proceeding is now pending before the Commission on rehearing.

By an indenture dated June 8, 1923, Alabama Power and Mount Vernon Mills settled a dispute concerning their rights in the stream flow of the Tallapoosa. Mount Vernon Mills conveyed to Alabama Power certain rights in land and water; it reserved, as a condition of the conveyance, the right to generate up to 475,000 kilowatt-hours of electric energy in a calendar week at a maximum rate of 10,000 electrical horsepower (about 8,000 kilowatts). Alabama Power agreed to make sufficient releases from its upstream developments to permit generation as needed within these limits or to provide substitute energy.

Under the indenture, Alabama Power is entitled to all energy in excess of the requirements of Mount Vernon Mills which its 8,000 kilowatt unit is capable of generating. Thus, the specified amount of energy to which Mount Vernon Mills is entitled was not changed by the construction by Alabama Power of the Martin and Yates projects.

The Commission finds:

It is appropriate and in the public interest in administering Part I of the Federal Power Act that the above-described settlement be approved under Section 13.1 of the Regulations under the Federal Power Act, in lieu of a headwater benefits determination under Section 10(f) of the Act (16 U.S.C. 803(f)).

The Commission orders:

The settlement dated March 22, 1966, between the Alabama Power Company and Mount Vernon Mills, Inc., is hereby approved under Section 13.1 of the Commission's Regulations under the Federal Power Act.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

SOUTH GEORGIA NATURAL GAS COMPANY, DOCKET NO. CP65-392

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 5, 1966)

On August 10, 1966, South Georgia Natural Gas Company (Applicant) filed in Docket No. CP65-392 an application to amend the order of the Commission issued July 27, 1965, 34 FPC 122, as amended March 14, 1966, 35 FPC 382, authorizing, among other things, the construction and operation of facilities. The Commission in its said order fixed the times for completion of facilities and commencement of service to and including August 1, 1966. By the subject request Applicant seeks extension of the time period to March 1, 1967, all as more fully set forth therein.

Applicant states it has commenced construction of the facilities authorized in the above-captioned docket by the Commission's order issued July 27, 1965. Applicant further states the construction of the facilities authorized by the above-described orders has been subsequently completed except for minor clean-up and paint-up but that The City of Jasper, Florida (Jasper) proposed to be served by South Georgia, is not ready to accept delivery of gas. South Georgia is advised by representatives of Jasper that Jasper has completed its financial arrangements, has received construction bids for the construction of a proposed gas distribution system and expects to place a work order to begin construction within the next few days. Jasper engineers have advised South Georgia that gas service is expected to be initiated by Jasper by February 28, 1967.

The Commission orders:

(A) The Commission's order issued July 27, 1965, in Docket No. CP65-392 is further amended by extending the time for completion of facilities to March 1, 1967, all as hereinbefore described and as set forth in the subject application to amend.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CITY OF TACOMA, WASHINGTON, PROJECT NO. 1862

ORDER AUTHORIZING SALE AND LEASE OF PARCELS OF PROJECT LANDS AND APPROVING REVISED PROJECT EXHIBIT

(Issued October 5, 1966)

On April 18, 1966, the Department of Public Utilities, on behalf of the City of Tacoma, Washington, licensee for Project No. 1862, filed application for Commission authorization of certain changes in the project boundary involving a sale of a parcel of project lands and the leasing of another parcel of project lands. We are asked also to approve a revised Exhibit K reflecting the changes in project boundary.

The licensee proposes to sell approximately 0.9 acre and lease approximately 4 acres of project lands to a private individual for expansion of a resort development at Alder Reservoir. Both the lands to be sold and the lands to be leased lie in the SW¼, Section 11, T. 15 N., R. 4 E., W. M., Pierce County, Washington. By our order of March 29, 1965, 33 FPC 653, we authorized a sale and lease of parcels of the project lands to the same individual for resort purposes, and the parcel now proposed to be sold is a part of the land we approved to be leased in our March 29, 1965 order, and will be used to provide an area for the purchaser's permanent facilities, which include a lodge and cafe. The lands to be leased will be used to encompass the permanent recreational facilities to be constructed by the licensee's Light Division, which will include a boat ramp and house, a picnic shelter, comfort station and tenting sites. All of the lands will be open to the public, with some uses on a fee basis, and will provide greater public enjoyment of outdoor recreational opportunity at Alder Reservoir. Adequate lands for future recreational development are available, including lands administered by the U.S. Forest Service and the State of Washington, and lands owned by the licensee within the project boundary.

The lands proposed to be sold lie wholly above the 1,207 foot elevation which is the extreme design flood level of Alder Reservoir. The lands proposed to be leased lie mainly below the 1,207 foot elevation.

The Commission finds:

It will not be inconsistent with the public interest to authorize the sale and leasing of the subject parcels of project lands as hereinafter provided, and to approve the revised Exhibit K.

The Commission orders:

(A) City of Tacoma, Washington, is hereby authorized to effect the sale of the project land herein involved, as hereinafter provided.

(B) City of Tacoma, Washington, is hereby authorized to lease the parcel of project land herein involved, subject to the reservation in the lease of the rights of the licensee, its successors and assigns to use such land for project purposes.

(C) Our approval of the sale and leasing of the parcels of project lands herein involved is subject to the condition that the licensee incorporate in any agreements effectuating such sale and lease, a covenant or condition ensuring that the use of such parcels will not endanger health, create a nuisance or otherwise be incompatible with paragraph (C) of the Commission's Order No. 313, issued December 27, 1965, 34 FPC 1546 (18 CFR 2.7(c)).

(D) The licensee shall file copies of the deed of conveyance and lease with the Commission within 30 days of the date or dates of their execution.

(E) Revised Exhibit K (FPC No. 1862–39) is hereby approved as part of the license for Project No. 1862.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP66–50

ORDER ON RECONSIDERATION

(Issued October 6, 1966)

On August 10, 1966, 36 FPC 417, the Commission issued a temporary certificate of public convenience and necessity to Panhandle Eastern Pipe Line Company (Panhandle) to transport and deliver up to 3000 Mcf of natural gas to H. K. Porter Co., Inc. (Porter). Delivery was to be made through the existing facilities of the City of Fulton, Missouri (Fulton), in which the Porter plant is located. The application of Panhandle for a temporary certificate to construct and operate 1.25 miles of new pipeline facilities to convey the gas directly to Porter without the use of Fulton's facilities was denied. On September 6, 1966, Panhandle filed an application for reconsideration or alternatively for rehearing of the August 10, 1966 order. Panhandle stated that it could not accept the temporary certificate offered and urged that the temporary certificate be modified to accord with that requested by Panhandle.

Fulton and Panhandle are engaged in a contest in this proceeding. Each seeks to supply Porter's gas requirements. To grant the temporary certificate requested by Panhandle would permit the construction of facilities which would not be useful to anyone beyond the term of the temporary certificate in the event Fulton should be successful in obtaining a permanent certificate. The Commission therefore sought a way in which gas might be furnished to Porter during the period while this case is under consideration, without construction of new facilities which might prove to be useless in the light of the later decision of the Commission. Since the Fulton facilities for delivery are in place, it seemed that gas could be delivered without further construction of any kind, and the status quo between the parties be thus preserved until a final determination could be made. To authorize construction that could be used by one party only might well be considered prejudicial to an objective ultimate determination.

Panhandle argues that it could not be expected to inject its own gas into Fulton's facilities for delivery to Porter because Fulton's system has lost one eighth of all gas delivered to it by Panhandle in the last four years. This argument is quite beside the point. Fulton would be obligated to deliver gas to Porter in amounts equal to the gas received from Panhandle for that purpose, and Panhandle would bear no risk of loss. Equally unfounded is Panhandle's argument that it would be necessary to construct a measuring station to determine the volume of gas delivered to Porter. Fulton would meter the gas delivered through its facilities to Porter. Panhandle can measure the gas delivered to Fulton for that purpose with its existing facilities. No additional new facilities are needed under the temporary certificate proposed by the Commission.

Panhandle states that to accept a temporary certificate to deliver up to 3000 Mcf of gas without a cut-off date might impair service to its other customers when cold weather comes, since there is not the capacity in the present lateral to deliver 3000 Mcf for Porter except by taking capacity away from Fulton, Harbison-Walker, or Missouri Power and Light Company, the three existing customers served by the existing lateral. Additional facilities must be completed by the time cold weather arrives in order to avoid this, Panhandle urges, but it cannot be sure the Commission will reach a determination in time to permit this to be done.

We are informed that the City of Fulton is delivering gas to Porter in the interim period, it would appear that the temporary certificate for Panhandle may no longer be necessary. Nevertheless, to remove any possibility of doubt our prior order will be modified to provide that delivery of 3000 Mcf a day to Fulton for delivery to Porter shall be made by Panhandle only to the extent that it has gas available for such delivery after the demands of existing customers upon the existing lateral have been satisfied. In the event of interruption of gas delivery by reason of mainline limitation, Porter is to be treated in the same manner as interruptible customers.

With the modification indicated, the order of August 10, 1966, will be adhered to.

The Commission finds:

(1) The order of August 10, 1966 in this proceeding, issuing a temporary certificate of public convenience and necessity to Panhandle Eastern Pipe Line Company, should be modified by providing that delivery of gas for H. K. Porter Co., Inc. should be subject to the limitation that in so far as the physical capacity of the existing Fulton lateral may limit the supply of gas available to customers (including H. K. Porter Company, Inc.) served by such lateral to less than the total amount of gas deliverable under existing contracts and actually called for by the purchasers, the actual demands of present customers shall be satisfied to the extent required by existing contracts in preference to any requirements of H. K. Porter Co., Inc., during the period the temporary certificate may be in effect.

(2) Except as stated in Finding (1), the application for rehearing, reconsideration and modification filed by Panhandle Eastern Pipe Line Company in this proceeding presents no new facts or principles of law which were not fully considered by the Commission or which upon due consideration warrant any change in or modification of the order of August 10, 1966 in this proceeding.

The Commission orders:

(A) Notwithstanding any provision to the contrary in Ordering Paragraph (B) of our order issued August 10, 1966, in this proceeding, delivery of gas for H. K. Porter Company, Inc. shall be made only to the extent such delivery may be made without curtailing deliveries through the existing Fulton lateral to present customers (other than H. K. Porter Company, Inc.) of amounts of gas actually demanded by them within the limits of their present contracts. Notwithstanding anything to the contrary herein, a reduction in deliveries to existing customers by reason of mainline limitations, and not by reason of limitations in the capacity of the existing Fulton lateral facilities, shall not be such curtailment as to entitle existing customers to preference over H. F. Porter Company, Inc., and H. K. Porter Company, Inc. shall be treated equally with other interruptible customers in the event of any interruption by reason of any limitation of service not arising from the limited capacity of the Fulton lateral facilities.

(B) Said order of August 10, 1966, in this proceeding, except as modified herein, is in all respects confirmed.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-8 AND TRUNKLINE GAS COMPANY, DOCKET NO. CP67-32

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 6, 1966)

Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) filed in Docket No. CP67-8 on July 14, 1966, and Trunkline Gas Company filed in Docket No. CP67-32 on August 12, 1966, their respective applications pursuant to Section 7 of the Natural Gas Act for certificates of public convenience and necessity authorizing the construction and operation of facilities and the transportation of natural gas, all as more fully set forth in the applications.

Tennessee and Trunkline entered into a contract dated June 15, 1966, under the terms of which Tennessee will transport for the account of Trunkline, the volumes of natural gas Trunkline contracted to purchase from Tenneco Oil Company under a contract dated June 10, 1966, covering the sale and purchase of natural gas to be produced initially by Tenneco from the Lake Barre Field, Terrebonne Parish, Louisiana. Tenneco will deliver the gas to Tennessee for transportation and redelivery to Trunkline at a proposed point of interconnection in Jefferson Davis Parish, Louisiana. Tenneco has filed an application for a certificate for the sale to Trunkline in Docket No. CI66-1314. Tennessee proposes a transportation charge of $0.41 per Mcf of demand per month and a volume charge of $0.0128 per Mcf of gas delivered (at 15.025 psia). Tennessee will transport up to 30,000 Mcf per day for Trunkline.

In order to effectuate the proposals set forth in the applications Tennessee will construct and operate 1,188 feet of 6-inch pipeline and metering station at a point where its Sabine-Kinder 30-inch line crosses Trunkline's Longville-Kaplan 30-inch line, in Jefferson Davis Parish, Louisiana. The facilities will cost an estimated $44,000, and will be defrayed from general funds or revolving credit. Trunkline will construct and operate a tap, side valve and connecting facilities at the point of line crossing with Tennessee, as stated. The total estimated cost of Trunkline's facilities is $2,050 and will be paid from company funds.

Tennessee states that upon issuance of the requested certificate authorization it will file the transportation agreement with Trunkline as a part of its FPC Gas Tariff, Fourth Revised Volume No. 2.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, has been filed.

At a hearing held on October 6, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the applications and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Trunkline Gas Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 29, 1949, in Docket No. G-882 (8 FPC 250).

(2) Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 15, 1947, in Docket No. G-910 (6 FPC 777).

(3) The proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the applications and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid proposed construction and operation of facilities and the transportation of natural gas are required by the public convenience and necessity and certificates therefor should be issued as hereinafter ordered and conditioned.

(5) Tennessee and Trunkline are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Tennessee's and Trunkline's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) Certificates of public convenience and necessity are issued to Tennessee and Trunkline in this proceeding authorizing the construction and operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described, all as more fully described in the applications and exhibits filed in these proceedings upon the terms and conditions of this order.

(B) The certificates issued by paragraph (A) above and the rights granted thereunder are conditioned upon Tennessee's and Trunkline's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and ready for operation within six months of the date of this order as required by Section 157.20(b) of the Regulations.

(D) Tennessee and Trunkline shall make appropriate rate filings in accordance with the provisions of the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67-28

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 6, 1966)

On August 8, 1966, United Gas Pipe Line Company (Applicant) filed in Docket No. CP67-28 an application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(c) of the Regulations under the Act.

for a certificate of public convenience and necessity authorizing the construction during the twelve-month period commencing November 1, 1966, and the operation of natural gas facilities for the sale of natural gas to direct consumers and existing distributors for resale, all as more fully set forth in the application in this proceeding.

Applicant proposes to construct an estimated 40 projects for direct sales of natural gas to consumers located in areas outside the franchise area of any local distributor. Such projects will include tap, metering and regulator facilities and short lateral lines as may be necessary. Further, Applicant proposes to construct an estimated 40 projects for the sale of natural gas to existing distributors at rates on file with the Commission for resale in existing market areas. These latter projects will consist of tap and regulating facilities.

The total cost of facilities proposed under this application will not exceed a maximum of $300,000, which cost will be financed out of current working funds. Total deliveries to any one customer will not exceed a maximum of 100,000 Mcf of natural gas per year and none of the gas delivered pursuant to this order will be used by any distributor or consumer for boiler fuel purposes as defined by subparagraph (9) of Section 157.7(c) of the Commission's Regulations.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on September 29, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of January 20, 1942, in Docket No. G-216 (3 FPC 3).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation and/or sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the twelve-month period commencing November 1, 1966, and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $300,000, with the total deliveries to any one customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(8) The certificate issued hereinafter should be conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, United Gas Pipe Line Company, to construct during the twelve-month period commencing November 1, 1966, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities to sell natural gas to distributors for resale and to direct consumers as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is limited to construction during the twelve-month period commencing November 1, 1966, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $300,000, with the total deliveries to any one customer limited to a maximum of 100,000 Mcf of natural gas per year.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued by paragraph (A) above is expressly conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations and, further, the certificate is granted upon the express condition that any interruptible service resulting herefrom shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

(F) This certificate shall not entitle any industrial customers to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

AREA RATE PROCEEDING, ET AL. (PERMIAN BASIN AREA), DOCKET NO. AR61-1, ET AL.

ORDER ACCEPTING QUALITY STATEMENTS

(Issued October 7, 1966)

The producers listed in the Appendix have submitted new quality statements reflecting agreement with the purchaser, Northern Natural Gas Company

(Northern), on the applicable price adjustments for treating, dehydration and compression for sales of less than pipeline quality gas in the Permian Basin area. Northern and these producers were unable previously to reach agreement on such adjustments. The areas of disagreement have been resolved by computing treating, dehydration and compression costs on the basis of a 100 percent capacity factor, in lieu of 90 percent as permitted by order issued June 13, 1966, 35 FPC 960, in the above-entitled proceedings. The methods utilized to compute such costs are the same as those approved in the June 13 order. The quality statements also reflect elimination of proposed upward price adjustments for gas delivered in excess of 500 psig and for Btu content between 1,000 and 1,050.

The quality statements listed in the Appendix conform with the requirements of Opinion Nos. 468 and 468-A, 34 FPC 159, 1068. We shall therefore accept them.

The Commission orders:

The quality statements listed in the Appendix are accepted.

GEORGIA POWER COMPANY, DOCKET NOS. E-7099, E-7193

ORDER ACCEPTING IN PART FOR FILING RATE SCHEDULE SUPPLEMENTS TENDERED IN COMPLIANCE WITH OPINION NO. 487

(Issued October 7, 1966)

By letter dated June 24, 1966, and rate schedule supplements received from June 29, 1966 to July 14, 1966, Georgia Power Company (Georgia Power), Atlanta, Georgia, submitted for filing as rate schedule supplements proposed revisions to its rate schedules for service to 50 Georgia municipalities. Georgia Power states that the tendered supplements are submitted in compliance with the Commission's order of March 30, 1966, Opinion No. 487, *Georgia Power Company*, 35 FPC 436. The litigation that culminated in Commission Opinion No. 487 was limited to two provisions of Georgia Power's present rate schedules for service to 50 municipal customers: a resale load ceiling provision and a resale credit provision.

The Commission in Opinion No. 487 found that these provisions are "unjust, unreasonable and unduly discriminatory within the meaning of Sections 205 and 206 of the Federal Power Act and are therefore unlawful".

Accordingly, the Commission ordered the following remedy:

> (A) Georgia Power shall, within 75 days of the date of issuance of this order, tender for filing with the Commission, in conformity with Section 205 of the Federal Power Act and Part 35 of the Commission's Regulations thereunder, and satisfactory to the Commission, supplements to its rate schedules for wholesale service to each of its 50 municipal customers referred to herein. Such rate schedule supplements shall contain no unlawful resale load ceiling provisions or credit provisions of any kind, but insofar as possible, shall be designed to provide approximately the same revenues to Georgia Power for the first 12 months following the date in which this opinion is issued as would have been received if the rate provisions herein disapproved were in effect for that period, and shall provide, insofar as possible, that each customer during such period shall pay approximately the same as the customer would have paid during such period under the presently existing rate schedule (p. 440).

On May 26, 1966, 35 FPC 818, the Commission in Opinion No. 487-A denied rehearing of its earlier opinion. By order of June 10, 1966, 35 FPC 954, the Commission extended by 15 days its time limit for filing rate schedule supplements. On June 24, 1966, the Court of Appeals, Fifth Circuit, denied Georgia Power's request for a stay of Commission Opinion No. 487 pending judicial review (*Georgia Power Company* v. *F.P.C.*, CA5 #23753, unreported).

The supplements to rate schedules tendered for each of Georgia Power's 50 municipal customers are identical. They include a change in rate form eliminating the resale credit provision but maintaining the same revenue level from these customers as the present rate schedules. The proposed filing also deletes the load ceiling provisions found by the Commission to be unlawful. To this extent, the proffered filing conforms with the Commission's order.

No adverse comment on these portions of Georgia Power's tendered rate schedule supplements has been received from any party to the proceeding. The Commission finds that the above revisions are satisfactory in meeting the full requirements of ordering paragraph (A) of its March 30, 1966 order. These portions of Georgia Power's tendered rate schedule supplements are therefore accepted for filing. Since the accepted portion of Georgia Power's tendered filing is only a part of a larger filing, the Commission includes herein as Appendix A reproduction of the parts of the tendered rate schedule supplements that have been accepted for filing at this time. Pursuant to Section 35.18 of the Regulations under the Federal Power Act, the Commission has prefaced Appendix A with the title: "Filed in Compliance with an Order of the Federal Power Commission, Docket Nos. E-7099 and E-7193 Entered 30th Day of March, 1966".

In addition to the parts of the tendered rate schedule supplements described in Appendix A and accepted for filing by the Commission, Georgia Power included provisions in its tendered supplements that go beyond the scope of the Commission's findings and order in Opinion No. 487. Among these additional provisions are availability and applicability definitions for Georgia Power's rate schedules, a rewording of a presently included "license and/or occupational tax provision," a change in the "Special Notice" provision regarding regulatory powers over the rate schedules, a deletion of a provision providing time limits on municipal water pumping, and finally, the addition of the sentence "neither the Company nor the Customers shall serve or offer to serve any customer at the premises at which such consumer is now or hereafter receiving service from the other unless the Company or the Customer requests the other to do so."

The City of Dalton, Georgia, the Power Section of the Georgia Municipal Association and the American Public Power Association, all interveners in this proceeding, filed comments which, *inter alia*, challenged the attempt of Georgia Power to change contractual provisions unilaterally during the effective terms of existing contracts. These parties also commented substantively on these proposed unilateral changes. We express no opinion on the lawfulness of these provisions under the Federal Power Act nor on the present contractual power of Georgia Power to make the changes at this time, (*Sierra Pacific Power Co.* v. *F.P.C.*, 350 U.S. 348) for it is clear that except for Appendix A the provisions in the supplements are outside the scope of the Commission's findings and order of March 30, 1966. Supplements tendered as a compliance filing cannot be used as a means to insert rate schedule provisions that are neither included in nor contemplated by the findings and order that brought about the compliance filing. Georgia Power may file at any time pursuant to Part 35 of the Commission's Regulations under the Federal Power Act, subject to any contractual limitations, rate schedule changes and additions for the presently filed rate schedules to 50 Georgia municipalities. The Commission will consider Georgia Power's additional provisions of its tendered rate schedule supplements only if filed in accordance with the Commission's Regulations under the Federal Power Act.

One contention remains. By letter of July 9, 1966, the Power Section of Georgia Municipal Association requested that any order accepting for filing the tendered rate schedule supplements be conditioned to include the resale credit provision refund for the last month of billing under the present rate schedules. The Association claims, in effect, that a one month delay exists in the application of the resale credit provision, which entitled the municipalities to an additional credit for the first month under the new rate schedule. To apply the resale credit to the new rate schedule, which has been designed to roll in the rate level effect of the resale credit, would be inappropriate. This request of the municipalities is therefore denied.

The Commission finds:

(1) It is appropriate for purposes of the Federal Power Act and Commission Opinion No. 487, issued March 30, 1966, that the portion of rate schedule supplements tendered by Georgia Power which is reproduced in Appendix A hereof be accepted for filing and that Appendix A be designated in the Commission's files as a supplement to each of Georgia Power's rate schedules for service to its 50 municipal customers, as set forth in Appendix B attached hereto.

(2) It is necessary and appropriate for purposes of the Federal Power Act that the remaining portions of Georgia Power's proffered filings, not included in Appendix A, be rejected.

(3) It is appropriate for purposes of the Federal Power Act that the filing as reflected in Appendix A and listed in Appendix B be given an effective date of July 28, 1966, as requested by Georgia Power.

The Commission orders:

(A) Those portions of Georgia Power's proposed filing reproduced in Appendix A hereof are accepted for filing as supplements to each of Georgia Power's rate schedules on file with this Commission for service to its 50 municipal customers.

(B) A copy of Appendix A shall be attached to each rate schedule listed in Appendix B attached hereto, and shall constitute a supplement to each of those rate schedules in compliance with Opinion No. 487.

(C) The accepted supplements shall be effective on July 28, 1966, with the schedule of charges to apply to all routine August, 1966, billings and thereafter.

(D) The remainder of Georgia Power's proffered filing, not reflected in Appendix A, is hereby rejected.

Commissioner Carver *not participating.*

APPENDIX A

Rate Schedule Supplement

Filed in Compliance with an Order of the Federal Power Commission, Docket Nos. E–7099 and E–7193 Entered 30th Day of March, 1966.

* * * * * * *

The second and third subparagraphs of Section FIRST as it presently exists are deleted in their entirety so that Section FIRST will be constituted as follows:

> FIRST: That for and during the term of five years commencing on the date on which the delivery of electrical energy hereunder is actually begun, which, it is estimated, will be approximately on or about the ___*___ day of _______*_______, 19_*_, and ending on the ___*___ day of _______*_______, 19_*_, the Company agrees to furnish to the Customer, and the Customer agrees to receive from the Company and to use and pay for all electrical energy that shall be required by the Customer for the operation and maintenance of its electrical lighting system and pumping station.
>
> While the Company is ready and willing to deliver electric energy to the Customer as provided in this agreement, the Customer agrees that, without the written consent of the Company, it will not use any other electric service from any other source.

Paragraph FOURTH as it presently exists is deleted in its entirety and the following is substituted in lieu thereof, effective for service furnished after normal July meter readings:

FOURTH: The Customer hereby agrees to pay to the Company, monthly for each month during the term of this contract, and every renewal thereof, in accordance with the following schedule of rates:

$65.00 per delivery point, plus:

First 100 KWH per KW of billing demand	1.50¢ per KWH.
Next 340 KWH per KW of billing demand	.40¢ per KWH.
Over 440 KWH per KW of billing demand	.65¢ per KWH.

Determination of Demand: By measurement of highest 30-minute interval monthly, provided that no demand shall be taken as less than seventy percent (70%) of the highest demand established during any of the immediately preceding twelve months, nor less than the contract minimum, nor less than 75 KW.

Minimum Monthly Charge: The minimum monthly charge shall be $2.00 per KW of billing demand. The terms month and monthly, as herein used, are intended to designate the period between the regular watthour meter readings, which shall be made by the Company approximately monthly.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP66-422

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 7, 1966)

On June 21, 1966, Natural Gas Pipeline Company of America (Applicant) filed in Docket No. CP66-422 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the acquisition and operation of the facilities of Chicago District Pipeline Company (Chicago District), all as more fully set forth in the application.

The facilities of Chicago District proposed to be acquired by Applicant are as follows:

Transmission Lines

(1) A total of 1.28 miles of 24-inch and 36-inch pipelines between Applicant's metering station near Joliet and the "Junction Tee" of the Crawford and Calumet pipelines of Chicago District, in and through Will County, Illinois,

(2) Dual pipelines consisting of 35.24 miles of 24-inch pipeline and 35.44 miles of 30-inch and 36-inch pipeline and 31.28 miles of 24-inch pipeline paralleling and partially looping the above mentioned pipelines, between said "Junction Tee" and the city limits of Chicago, in and through Will, DuPage and Cook Counties, Illinois,

(3) 84.89 miles of dual 24-inch pipelines between said "Junction Tee" and the city limits of Chicago, in and through Will and Cook Counties, Illinois,

(4) 50.70 miles of 36-inch pipeline between Applicant's metering and regulating station near Minooka, Illinois, and the city limits of Chicago, in and through Will and Cook Counties, Illinois,

(5) 12.09 miles of 30-inch and 14.36 miles of 36-inch pipeline between Applicant's metering and regulating station near Streamwood, Illinois, and the city limits of Chicago, in and through Cook County, Illinois,

(6) A total of 8.57 miles of lateral pipelines, varying in sizes from 12-inch to 30-inch pipeline, located in Cook County, Illinois, and

(7) Leasehold interests in certain pipelines and other facilities located within the City of Chicago and operated by Chicago District under lease agreements with The Peoples Gas Light and Coke Company (Peoples Gas).

Metering and Regulating Facilities

A total of 37 metering and/or regulating stations and appurtenant facilities located at various points on Chicago District's pipeline system.

These facilities are used solely for the transportation of natural gas for the account of Chicago District's three customers, Peoples Gas, Northern Illinois Gas Company (Northern Illinois) and Northern Indiana Public Service Company (NIPSCO). Chicago District receives gas for the account of the above customers from Applicant at points near Streamwood, Joliet and Manooka, Illinois, and from Midwestern Gas Transmission Company (Midwestern) near the village of Channahon, Illinois. Such gas is transported and delivered to the three customers at various points in the Chicago metropolitan area.

As of March 31, 1966, the plant in service was recorded on the books of Chicago District at $35,360,716, with accumulated provision for depreciation, depletion and amortization of $13,202,544, or a net book of value of $22,158,172. Against this property, the company had $15,280,000 bonds outstanding in the hands of the public and a net worth of $6,587,649. The plant is presently being depreciated at a rate of 3.1 percent annually for both book and tax purposes.

Peoples Gas owns all outstanding common stock of Chicago District and Applicant. It will authorize the sale and transfer of all assets of Chicago District to Applicant in exchange for common stock of Applicant and the assumption of all debts and liabilities, including bonds, of Chicago District. The aggregate stated value of Applicant's shares will be equal to the net assets, less earned surplus, of Chicago District after due allowance for debts and liabilities assumed.

Chicago District's transportation rate to its three customers for delivery of gas sold to those companies by Applicant and Midwestern is determined monthly in accordance with a cost of service formula which specifies a 6.25 percent annual return on net investment and straight line depreciation rates including 3.1 percent on transmission plant.

After the acquisition, Applicant proposes to continue to charge the three customers for the service provided by the Chicago District facilities by means of a rate schedule setting out a monthly transportation charge based on a cost of service determination for the year 1967. On the first of each calendar year, beginning in 1968, the annual charge to each customer will be reduced by a fixed amount to reflect the decreased return and associated income taxes due to reduction in rate base resulting from annual increase in accumulated provisions for depreciation. Each customer agrees to pay Applicant the following annual tharge for that portion of 1966 and/or 1967 which shall remain after the proposed cariff goes into effect:

	Dollars	Percent
Northern Illinois	966,789	18.76
NIPSCO	1,495,535	29.02
Peoples Gas	2,691,138	52.22
Total	5,153,462	100.00

In succeeding years the above percentages will be applied to the total charge to determine the charge to each customer. These percentages are based upon actual relative billings to each customer for the year ended March 31, 1966.

The proposed annual charge of $5,153,462 is based upon actual costs and billings for 1965, adjusted for known changes through 1967.

The proposed method of billing Chicago District's costs among its customers will result in stabilization of cost to each customer and will encourage fuller use of the presently available capacity of the facilities.

As stated by Applicant, consummation of the acquisition will permit corporate simplification and attainment of economies relating to elimination of one board of directors; elimination of separate reports, audits, payrolls, supply records and reports to regulatory agencies; and combined financial requirements of both companies resulting in lower interests costs than would be available to Chicago District as a separate entity due to the higher rating of debt securities of Applicant.

On July 18, 1966, Chicago District filed a petition for leave to intervene in support of the instant application. On July 25, 1966, Peoples Gas, Midwestern and NIPSCO also filed petitions for leave to intervene in the instant proceeding, Peoples Gas filing in support of the application and both NIPSCO and Midwestern filing in order to protect their respective rights in the event the instant application became the subject of formal hearing procedure. No other petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on October 6, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G–235 (3 FPC 830).

(2) The proposed acquisition and operation of facilities by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid acquisition and operation of facilities by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (d), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Natural Gas Pipeline Company of America, authorizing the acquisition and operation of facilities and transportation and sale of natural gas hereinbefore described, as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (d), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized to be acquired shall be so acquired and operated in a manner consistent with the subject proposal, as provided by paragraph (b) of Section 157.20 of the Regulations under the Natural Gas Act, within 1 year from the date on which this order issues.

(D) The order issued by paragraph (A) above is without prejudice to a review of acquisition cost in any future rate proceeding involving Applicant.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

IDAHO POWER COMPANY, DOCKET NO. E–7307

SUPPLEMENTAL ORDER AUTHORIZING ISSUANCE OF FIRST MORTGAGE BONDS

(Issued October 11, 1966)

By order issued September 30, 1966, 36 FPC 704, in the above-entitled matter, the Commission authorized Idaho Power Company, (Applicant), to issue and sell at competitive bidding $30,000,000, principal amount of First Mortgage Bonds, due 1996, subject among others, to the provisions set forth in paragraph (B) of that order as follows:

(B) The proposed issuance and sale of Bonds at competitive bidding shall not be consummated until:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

Applicant, on October 11, 1966, filed an amendment, pursuant to the requirements of the aforementioned Commission order, setting forth, among other things, that it proposes to accept as providing the lowest annual cost of money to it, the bid of Salomon Brothers & Hutzler; Equitable Securities Corporation; Eastman Dillon, Union Securities & Company, to purchase the proposed issuance of $30,000,000, principal amount of Bonds, for the price of 100.031% of principal amount, with an interest rate of 6⅛%.

The Commission finds:

(1) Applicant has satisfactorily complied with the requirements of paragraph (B) of the Commission's order issued September 30, 1966, in the above docket, and under the bid it proposes to accept for the Bonds, the price to be received by Applicant therefor and the interest rate thereof are reasonable.

(2) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by the Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

The Commission orders:

(A) The price to be received by Applicant for the proposed Bonds and the interest rate thereof under the bid referred to above, are approved as reasonable.

(B) The proposed issuance and sale of Bonds referred to above upon the terms and conditions and for the purposes specified in the application, as supplemented by the amendment referred to above, are authorized, subject only to the provisions of paragraphs (A), (C), (D) and (E) of the Commission's order issued September 30, 1966, in the above docket.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

LAND WITHDRAWN IN PROJECT NO. 233, DOCKET NO. DA-1039-CALIFORNIA, E. J. BROWN

ORDER DENYING APPLICATION UNDER SECTION 24 OF THE FEDERAL POWER ACT

(Issued October 11, 1966)

Application was filed by E. J. Brown (Applicant) of Rodeo, California, seeking a determination under Section 24 of the Federal Power Act for the purpose of restoring the following-described lands of the United States withdrawn for power purposes:

Mount Diablo Meridian, California

T. 37 N., R. 3 E., Sec. 27: lot 2 (34.51 acres)

Applicant seeks restoration of the land for lode and placer mining entry.

The land lies within the boundary of the Shasta National Forest and is withdrawn pursuant to the filing on July 14, 1921 of an application for preliminary permit under the Federal Power Act for Project No. 233, which is currently under license to Pacific Gas and Electric Company. Project No. 233, known as the Pit River Project, consists of four existing units designated as Pit River Nos. 1, 3, 4 and 5, and one proposed unit designated as Pit River No. 2. Lot 2 is located on the right bank of Lake Britton, a reservoir for the Pit River No. 3 Unit of the project, which presently inundates a portion of the land.

The proposed use of the land for mining purposes is incompatible with the use of the land for the Pit River project. The land involved has considerable public recreational potential which could be developed without interfering with its power value. Lands around Lake Britton available for public recreational use are limited and existing recreational areas are over-burdened. To relieve this situation, the U.S. Forest Service has provided temporary toilets and picnic tables on the subject land to handle the overflow use by the public of other lands in the area of the Pit River project, and the Forest Service plans additional non-power conflicting recreational development of the subject land.

The Commission finds:

The subject land is valuable for power purposes.

The Commission orders:

The aforesaid application is hereby denied.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC. AND TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP67-35

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 11, 1966)

On August 17, 1966, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), and Transcontinental Gas Pipe Line Corporation (Transco), (Applicants) filed in Docket No. CP67-35 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas by means of existing interconnections, and deliveries to customers receiving service from both Tennessee and Transco, all as more fully set forth in the application.

Applicants specifically propose to exchange natural gas (1) at the point of interconnection between Transco's 36-inch line and Tennessee's Delta-Portland Line at Transco's Mile Post 746.08 and Tennessee's Mile Post MLV 538 — 1 + 1.50 miles near Heidelberg, Jasper County, Mississippi, (2) at the point of interconnection between Transco's 30-inch line and Tennessee's South Louisiana 20-inch line at Transco's Mile Post 489.73 and Tennessee's Mile Post MLV 506 — 1 + 0.97 miles in Section 28, T6S-R5W, Allen Parish, Louisiana; (3) at the point of interconnection between Transco's 24-inch line and Tennessee's 24-inch line near Riverdale, Bergen County, New Jersey and (4) through dispatching arrangements between Tennessee and Transco to make deliveries to common customers[1] for the account of one for the other in the Pennsylvania-New Jersey-New York area.

Tennessee and Transco proposed by letter agreement dated June 1, 1966, to supersede and cancel their letter agreement dated February 17, 1962[2], which provides for the delivery and exchange of natural gas at points (1) and (2) and to substitute therefor the above-described letter agreement dated June 1, 1966. Points (3) and (4) referred to have been added under the new exchange agreement of June 1, 1966, in order to expand the ability of either pipeline to assist the other in the event of unforeseeable operating problems and/or emergencies on either of the pipeline systems.[3] No additional facilities are required.

---

[1] Brooklyn Union Gas Company, Consolidated Edison Company, Consolidated Gas Supply Corp., Public Service Electric and Gas Co., Long Island Lighting Company, The Manufacturers Light and Heat Company, Pennsylvania Gas and Water Company and United Natural Gas Company.

[2] Presently on file with the Commission as Rate Schedule X-10 of Tennessee's Tariff, Fourth Revised Volume No. 2, and as Rate Schedule X-23 of Transco's Tariff, Original Volume No. 2.

[3] Tennessee and Transco have heretofore been authorized to make emergency deliveries of natural gas at point (1) by Commission order issued in Docket No. G-17037 on April 14, 1959, 21 FPC 507, and at point (2) by Commission order issued in Docket No. CP63-112 on February 15, 1963, 29 FPC 318. Point (3) is the point of delivery established in the transportation agreement between Transco and Tennessee dated November 25, 1955, and authorized by Opinion No. 279 in *Iroquois Gas Corporation, et al.*, Docket No. G-2310, *et al.*, issued December 29, 1954, 13 FPC 492. Said transportation agreement is on file with the Commission as Rate Schedule X-15 of Transco's Tariff, Original Volume No. 2. The names of the joint customers through which the proposed exchange service could be effectuated at the present time are set forth in [1] above.

Transco and Tennessee state that executed copies of the exchange agreement proposed herein will be filed by each company upon issuance of the requested certificate authorization.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 6, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of May 29, 1948, in Docket No. G-704 (7 FPC 24).

(2) Applicant, Tennessee Gas Pipeline Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 12, 1947, in Docket No. G-910 (6 FPC 777).

(3) The proposed exchange and delivery of natural gas between Transco and Tennessee, the operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid proposed exchange and delivery of natural gas, operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Transco and Tennessee are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that Transco and Tennessee shall amend their respective FPC Rate Schedules to include the new delivery points in accordance with the applicable Commission Regulations.

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicants in this proceeding, jointly, authorizing the exchange and delivery of natural gas as hereinbefore described, and the operation of facilities for the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the joint application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

(C) The service authorized shall commence as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 3 months of the date on which this order issues.

(D) Transco and Tennessee shall file amended rate schedules to their respective FPC Gas Tariffs reflecting the service authorized herein, in accordance with the Commission's Regulations, within 30 days of the issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

GULF STATES UTILITIES COMPANY, DOCKET NO. E-7304

ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued October 13, 1966)

Gulf States Utilities Company (Applicant) filed an application with the Federal Power Commission on July 29, 1966, seeking an order pursuant to Section 203 of the Federal Power Act authorizing the acquisition of a 69 kv electric transmission line from the City of Caldwell, Texas (City).

Applicant is incorporated under the laws of the State of Texas and is qualified to do business in the State of Louisiana with its principal place of business at Beaumont, Texas and is engaged principally in the business of generating, transmitting, distributing and selling electric energy in southeastern Texas and south central Louisiana.

The electric transmission facilities to be acquired comprise a 69 kv electric transmission line approximately 22.6 miles in length located in Brazos and Burleson Counties, Texas. The line is being and has been used for the transmission of electric power to the City at a terminal pole within the City and for the sale of electric power and wholesale to the City. Applicant will use the line for the same purpose. The Applicant proposes to pay a cash consideration of $85,000 for the transmission facilities. The original cost depreciated of the facilities is estimated at $101,381.

The total acquisition cost of $85,000 will be $16,381 under the depreciated original cost of $101,381. A credit acquisition adjustment of $16,381 will be created on the books of the Applicant which Applicant proposes to eliminate by a transfer to accumulated provision for depreciation.

Acquisition of the line will enable Applicant to serve the City in accordance with its standard Rate Schedules 423 and 423A which provide for it to own facilities to the point of delivery within the City. The 69 kv line will also be used by Applicant to firm up its distribution system since the line passes through its territory.

Written notice of the application has been given to the Texas Railroad Commission and to the Louisiana Public Service Commission and the Governors of those States. Notice was also published in the Federal Register on August 13, 1966 (31 F.R. 10863), stating that any person desiring to be heard or to make any protest with reference to said application should on or before August 25, 1966, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued December 20, 1962, *Gulf States Utilities Company*, Docket No. E-7074 (28 FPC 1077).

(2) By the proposed transaction, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of the City, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Applicant, as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(4) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) The proposed acquisition of facilities by Applicant all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determination of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ILLINOIS POWER COMPANY, DOCKET NO. E-7302

ORDER AUTHORIZING PURCHASE OF ELECTRIC FACILITIES

(Issued October 13, 1966)

Illinois Power Company (Applicant) filed an application on July 22, 1966, with the Federal Power Commission seeking authority pursuant to Section 203 of the Federal Power Act to acquire certain electric facilities from the Village of Fithian, Illinois (Village).

Applicant is incorporated under the laws of the State of Illinois with its principal place of business at Decatur, Illinois and is engaged in the generation, transmission, distribution, and sale of electric energy in 49 counties in the State of Illinois.

The Village is a municipal corporation under the laws of the State of Illinois and is engaged in the distribution of electric energy to approximately 213 customers in the Village of Fithian, Vermilion County, Illinois. Presently the Village purchases at wholesale its entire electric energy requirements for its system from the Applicant.

The facilities to be acquired consist of all of the electric distribution and street lighting facilities of the Village including all equipment and supplies held or owned by the Village in connection with the operation and maintenance of its system. After the acquisition, Applicant will operate this system in the place of the Village. According to the application the purchase price for the system and property to be acquired is $130,000, of which $5,000 is to be paid at the closing of the purchase and the remainder of the purchase price, with interest at 4½% per annum on the unpaid balance, is to be paid in twenty-five annual installments. Applicant estimates that the aggregate original cost of facilities in service including materials and supplies is $40,168.

The Applicant's standard rates in effect in near-by communities will be put into effect in Fithian. One hundred seventy-nine of the 188 residential customers will receive annual decreases ranging from $0.06 to $87.95, for a total decrease of $3,800. Six of 25 commercial customers will receive annual decreases ranging from $0.44 to $31.41, for a total decrease of $42. Nine residential customers will pay annual increases ranging from $0.27 to $6.55, for a total increase of $14. Nineteen commercial customers will pay annual increases ranging from $0.12 to $75.49, for a total increase of $406. The net annual change in rates for both classes of customers will be a decrease of $3,422. Applicant represents that the transfer is consistent with the public interest because after the transfer of the facilities, service will be improved by correction of low voltage and overload conditions, and Fithian will have a new source of local tax revenue.

Written notice of the application has been given to the Illinois Commerce Commission and to the Governor of that State. Notice was also published in the Federal Register on August 6, 1966 (31 F.R. 10589), stating that any person desiring to be heard or to make any protest with reference to said application should on or before August 25, 1966, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued July 15, 1966, *Illinois Power Company*, Docket No. E-7282, 36 FPC 59).

(2) By the proposed transaction, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of Fithian, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Applicant, as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

The Commission orders:

(A) The proposed acquisition of facilities by Applicant all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees. Any acquisition adjustment created by the transaction shall be eliminated by a debit to Account 435, Miscellaneous Debits to Surplus.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determination of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

THE MONTANA POWER COMPANY, DOCKET NO. E-7301

ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued October 13, 1966)

The Montana Power Company (Applicant), filed an application on July 8, 1966 with the Federal Power Commission seeking an order pursuant to Section 203 of the Federal Power Act authorizing it to acquire from the National Park Service, United States Department of Interior (Park Service) the electric distribution system located in the Mammoth Hot Springs area of Yellowstone National Park in the State of Wyoming.

Applicant is incorporated under the laws of the State of Montana and is qualified to do business in the States of Montana and Wyoming with its principal place of business at Butte, Montana and is engaged in the generation of electric energy in Montana and in the transmission, distribution and sale of electric energy in Montana and Yellowstone National Park in Wyoming.

According to the application the facilities to be sold to the Applicant primarily consist of over-head and underground primary and secondary lines in the Mammoth Hot Springs area between Applicant's substation and the weatherhead, meter, or main breaker at the point of use. These facilities are presently devoted by the Park Service to the sale and distribution of electric energy and will continue to be so utilized by the Applicant with service to approximately 13 accounts of Park Service operations, 107 accounts for National Park Service employee residences, and approximately 19 accounts for the installations of Yellowstone National Park Concessioners operating in the Mammoth Hot Springs area. The purchase price to be paid by Applicant is $175,580.80 which amount is the estimated original cost of the facilities less accumulated provision for depreciation. Applicant represents that this purchase price was derived by negotiations between the representatives of the Park Service and officers of the Applicant.

According to the Applicant the transfer of these facilities will fulfill a policy of the Park Service to obtain commercial utility services which are economically feasible and which will permit the Park Service to discontinue operation of its hydroelectric generating plant at Mammoth. All lands affected by the transfer are National Park lands and the Park Service will grant necessary rights-of-way pursuant to its agreement with the Applicant.

Applicant and Park Service have agreed that Applicant will charge for its electric service in accordance with its rate schedules for similar service in Montana. Park Service charges for electric service to the 107 residential consumers in the Mammoth area is now included in the lump sum "quarters rental" which includes a charge for all utilities as well as housing charges. The "quarters rental" will be adjusted according to a formula based on the electric energy consumption in similar housing in a number of Montana cities. The adjustment is estimated to be about $13 per month per residence.

Written notice of the application has been given to the Montana Board of Railroad Commissioners, the Wyoming Public Service Commission and to the Governor of each of those States. Notice was also published in the Federal Register on July 26, 1966 (31 F.R. 10086), stating that any person desiring to be heard or to make any protest with reference to said application should on or before August 15, 1966, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on July 29, 1966, the Wyoming Public Service Commission advised this Commission that it had no representations to make in this proceeding. No protest or petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, owns and operates facilities for the transmission and sale at wholesale of electric energy which is generated in the States of Montana, Idaho, Washington and Wyoming and consumed outside the State in which it is generated, all of which facilities are in addition to, and do not include, facilities used for the generation of electric energy or facilities used in local distribution or solely for the transmission of electric energy consumed wholly by the transmitter. Applicant, therefore, is a public utility within the meaning of that term as used in Section 203 of the Federal Power Act.

(2) By the proposed transaction, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of the Park Service, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Applicant, as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

The Commission orders:

(A) The proposed acquisition of facilities by Applicant all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determination of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN INDIANA PUBLIC SERVICE COMPANY, DOCKET NO. E-7303

ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued October 13, 1966)

Northern Indiana Public Service Company (Applicant) filed an application on July 29, 1966 with the Federal Power Commission seeking authorization under Section 203 of the Federal Power Act to acquire electric utility facilities located within the Kingsbury Ordnance Plant, La Porte County, Indiana, from the United States Government acting by and through the General Services Administration (GSA).

Applicant is incorporated under the laws of the State of Indiana and authorized to do business in that state with its principal place of business at Hammond, Indiana and is engaged in the generation, transmission, distribution and sale of electric energy in 21 counties in northern Indiana.

The facilities to be acquired comprise the electric distribution system built by the Government during World War II to supply electric energy to the various defense facilities within the Kingsbury Ordnance Plant. Much of the land formerly used and occupied by the Government for its Ordnance plant has been sold to Kingsbury Industrial and Development Corporation (Kingsbury Corporation). At the time of the purchase by Applicant of the distribution system, the Government was not rendering any electric service in this area. However, the Kingsbury Corporation was purchasing electric energy at wholesale from Applicant and, with the consent of the GSA has been using the distribution system to supply energy to industrial customers within the Ordnance Plant area. Applicant proposes to operate such facilities as part of its interconnected system.

As set forth in an Offer to Purchase which has been accepted by GSA, the Applicant will pay $100,000 for the facilities. The facilities have an estimated original cost of $519,872.80, and an estimated accumulated provision for depreciation of $367,848.00, for an estimated depreciated original cost of $152,024.80. The consideration of $100,000 will create a credit acquisition adjustment of $52,024.80, which Applicant proposes to dispose of by a transfer to accumulated provision for depreciation.

The new customers will be charged rates which are the same as those in the Applicant's surrounding service area. The Applicant expects that the acquisition will increase its operating revenues by about $47,000 a year and its net income by about $3,300 a year.

Written notice of the application has been given to the Indiana Public Service Commission and to the Governor of that State. Notice was also published in the Federal Register on August 13, 1966 (31 F.R. 10865), stating that any person desiring to be heard or to make any protest with reference to said application should on or before August 25, 1966, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued July 29, 1966, *Northern Indiana Public Service Company*, Docket No. E-7296 (36 FPC 330).

(2) By the proposed transaction, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of the United States government, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Applicant, as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(4) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) The proposed acquisition of facilities by Applicant all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determination of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., and Carl E. Bagge.

MISCELLANEOUS AMENDMENTS TO F.P.C. FORM NO. 1; REPORT FORM PRESCRIBED FOR CLASS A AND CLASS B ELECTRIC UTILITIES AND OTHERS SUBJECT TO THE FEDERAL POWER ACT, DOCKET NO. R-284

ORDER NO. 311-B

AMENDING ANNUAL REPORT F.P.C. FORM NO. 1

(Issued October 13, 1966)*

The two amendments to Annual Report F.P.C. Form No. 1 here being considered are among those proposed in the notice instituting this proceeding[1], but action thereon was deferred in our Order No. 311, herein, which adopted all of the other amendments that had also been proposed in that notice.[2] Only two comments on those particular proposals, *i.e.*, the one to amend the schedule (page 102) "Control Over Respondent", and the other which proposed to delete the schedule (page 302), "Income From Merchandising, Jobbing, and Contract Work", were received.

The first would require the reporting of the names and businesses of companies associated, through common control, with the respondent. We find, however, that the information is sufficiently available from other sources and that, therefore, the proposed amendment to this schedule (p. 102) is unnecessary.

Although two state commissions[3] objected to the proposed deletion of the schedule on page 302 for reporting "Income From Merchandising, Jobbing and Contract Work", we have now been informed either that the objection has been withdrawn or that the information can be obtained by the states from other sources. The schedule is, therefore, being deleted as proposed.

Since the action taken in Order No. 311, together with the two proposals with which we are here concerned completes our consideration of all the proposals made in this proceeding, it will be concluded upon the issuance of the order herein.

The Commission finds:

(1) Deletion from Annual Report F.P.C. Form No. 1 of the schedule on page 302 thereof is necessary and appropriate for the administration of the Federal Power Act.

(2) It is in the public interest to take no further action on the proposal to amend the schedule "Control Over Respondent."

The Commission, acting pursuant to the authority of the Federal Power Act, as set out in Order No. 311 heretofore issued herein, *orders:*

(A) Effective for the reporting year 1966 and thereafter, Annual Report FPC Form No. 1, prescribed by § 141.1(a), Subchapter D, Chapter I, Title 18 of the Code of Federal Regulations, is revised by deleting therefrom the schedule on page 302 thereof entitled "Income From Merchandising, Jobbing, and Contract Work (Accounts * * *)".

(B) Paragraph (d) of the said § 141.1 is revised by deleting therefrom the schedule title "Income From Merchandising, Jobbing, and Contract Work."

TRANSWESTERN PIPELINE COMPANY, DOCKET NO. RP67–8 AND EL PASO NATURAL GAS COMPANY, DOCKET NO. RP67–9

ORDER CONDITIONALLY GRANTING REQUESTS FOR EXTENSION OF TIME

(Issued October 13, 1966)

El Paso Natural Gas Company (El Paso), on September 29, 1966, and Transwestern Pipeline Company on October 10, 1966, filed requests in their respective dockets for additional time to comply with the filing requirements of our order to show cause and instituting proceedings on flow-through of liberalized depreciation tax deductions, issued on August 30, 1966, 36 FPC 558. El Paso asks that the time in which it is to comply be extended to January 1, 1967, while Transwestern requests an extension to December 1, 1966.

It appears that a nominal extension may be warranted. However, under present circumstances*, an extension beyond that here allowed should be granted only on condition that the companies agree that any rate reductions determined appropriate in these proceedings will be made effective as of January 1, 1967, or as of the date the first phase of service authorized in Opinion No. 500, 36 FPC 176, commences, whichever is earlier.

The Commission orders:

The time in which El Paso and Transwestern shall comply with the requirements of the order issued in these proceedings on August 30, 1966, is hereby extended to November 1, 1966, *Provided, however*, that those companies may request further extension if filed together with a written statement of agreement that any rate reduction found appropriate in these proceedings will become effective as of January 1, 1967, or as of the date of initiation of the first phase of the service authorized in Opinion No. 500, whichever is earlier.

AMERADA PETROLEUM CORPORATION*, DOCKET NO. CI67–66, ET AL.

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING FPC GAS RATE SCHEDULES FOR FILING

(Issued October 14, 1966)

Each Applicant herein has filed an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas in interstate commerce to Panhandle Eastern

---

*Other Applicants listed herein, *infra*, p. 752.

Pipe Line Company from the South Peek Field, Ellis County, Oklahoma, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Concurrently with their certificate applications Applicants have submitted their related contracts as FPC gas rate schedules. All sales certificated herein will be made at rates equal to the ceiling rates established by the Commission's Statement of General Policy No. 61-1, as amended.

Concurrently herewith an order is being issued amending the order issuing a certificate of public convenience and necessity to Panhandle Eastern Pipe Line Company in Docket No. CP66-228 by authorizing the construction and operation of facilities to receive gas from Applicants, *infra*, p. 760.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the applications has been received.

At a hearing held on October 12, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the applications and exhibits thereto, submitted in support of the authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Each Applicant herein is engaged in the sale of natural gas in interstate commerce subject to the jurisdiction of the Commission and is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(2) The sales of natural gas hereinbefore described, as more fully described in the applications in this proceeding, will be made in interstate commerce subject to the jurisdiction of the Commission; and such sales by Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicants are able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The sales of natural gas by Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity, and certificates therefor should be issued as hereinafter ordered and conditioned.

The Commission orders:

(A) Certificates of public convenience and necessity are issued upon the terms and conditions of this order authorizing sales by Applicants of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, all as hereinbefore described and as more fully described in the applications in this proceeding.

(B) The certificates granted in paragraph (A) above are not transferable and shall be effective only so long as Applicants continue the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(C) The grant of the certificates issued in paragraph (A) above shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Regulations thereunder and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against Applicants. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts involved. Nor shall the grant of the certificates aforesaid for service to the particular customer involved imply approval of all of the terms of said contracts, particularly as to the cessation of service upon termination of said contracts as provided by paragraph (b) of Section 7 of the Natural Gas Act. Nor shall the grant of the certificates aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales of natural gas subject to said certificates.

(D) No increase in rate shall be filed prior to July 1, 1967, at any price which would exceed the ceiling prescribed for the given area by paragraph (d) of the Commission's Statement of General Policy No. 61-1, as amended.

(E) The related contracts submitted by Applicants are accepted for filing as FPC gas rate schedules to be effective on the dates of initial delivery and are designated as follows:

Docket No. and filing date	Applicant	Description and date of instrument	FPC gas rate schedule No.
CI67-66, 7-18-66	Amerada Petroleum Corp	Contract, 6-16-66	138
CI67-79, 7-22-66	Tenneco Oil Co	Contract, 6-27-66	207

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ARKANSAS LOUISIANA GAS COMPANY AND NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP67-41

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued October 14, 1966)

On August 22, 1966, Arkansas Louisiana Gas Company (Applicant) filed in Docket No. CP67-41 an application pursuant to Sections 7(a) and 7(c) of the Natural Gas Act for an order of the Commission directing the Natural Gas Pipeline Company of America (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in the Town of Douglassville, Texas, and adjacent areas in Cass County, Texas, and for a certificate of public convenience and necessity, all as more fully set forth in the application.

Applicant proposes to construct and operate a distribution system for the resale of natural gas in the Town of Douglassville, Texas, along with a feeder distribution line extending north approximately 3½-miles from a tap on Respondent's transportation facilities to Applicant's Douglassville system.

Estimated peak day and annual volumes required by Applicant for the Town of Douglassville, Texas, were submitted at 14.9 psia pressure base. These estimates, converted to the 14.65 psia measurement pressure base of Respondent are:

	Peak day demand (Mcf)	Annual requirements (Mcf)
First year	170	10,487
Second year	177	10,903
Third year	183	11,224

Applicant estimates the total cost of construction of the distribution system to be $33,885.

On September 9, 1966, Respondent filed an answer to the application in the proceeding stating it would be able and willing to render the requested service. Applicant was granted a franchise by the City of Douglassville, Texas, on August 9, 1966.

Due notice of the filing of the subject application and opportunity for hearing thereon have been given by publication in the Federal Register on September 2, 1966 (31 F.R. 11627). No protest, petition to intervene, notice of intervention or request for hearing has been filed in this proceeding.

At a hearing held on October 12, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued November 7, 1958, in Docket No. G–9666 (20 FPC 694).

(2) Applicant, Arkansas Louisiana Gas Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver to Applicant under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations up to 183 Mcf per day of natural gas for distribution and resale as hereinbefore described and as more fully described in the application in this proceeding.

(4) Applicant should be prepared to receive natural gas from Respondent for distribution in Douglassville, Texas, and environs, within one year from the date of the issuance of this order.

(5) The requirement that Respondent serve Applicant, as requested, will not place an undue burden upon it nor impair its ability to render adequate service to its existing customers.

(6) The proposed construction and operation of facilities by Applicant as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(7) The aforesaid proposed construction and operation of facilities are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(8) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(9) Public convenience and necessity require that the certificate issued

hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) Natural Gas Pipeline Company of America, Respondent, is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant, as herein described, and to sell and deliver up to 183 Mcf (measured at 14.65 psia) of natural gas daily to Applicant under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations for distribution and resale as hereinbefore described and as more fully described in the application in the proceeding. Such service shall be rendered pursuant to Respondent's presently filed appropriate rate schedule.

(B) Respondent shall report to the Commission in writing the date of commencement of service to Applicant within 10 days thereof.

(C) Applicant shall be prepared to receive service as directed herein within one year from the date of issuance of this order.

(D) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities, as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(E) The certificate issued by paragraph (D) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (e), (f) and (g) of Section 157.20 of such Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

LONE STAR GAS COMPANY, LONE STAR GATHERING COMPANY, AND UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP65-118[1]; LONE STAR GATHERING COMPANY, CP62-179; UNITED GAS PIPE LINE COMPANY, CP62-193

ORDER GRANTING REHEARING, SPECIFYING PROCEDURE, AND FIXING DATE FOR REHEARING

(Issued October 14, 1966)

On September 21, 1966, the Public Service Commission of the State of New York (PSC) filed an application for rehearing of our Opinion No. 505 and accompanying order issued August 22, 1966, 36 FPC 497, in the above-entitled proceeding. PSC's application for rehearing compares facts in the record with data taken from the applicants' Forms No. 2 (and therefore not available at the time of the hearing) and raises several important questions regarding which, under the circumstances, the record cannot afford adequate answers.

---

[1] Pursuant to the notice and consolidation of applications issued March 16, 1965, the parties should henceforth file future pleadings under lead Docket No. CP65-118.

We believe that the application for rehearing should be granted to afford the applicants an opportunity to present additional evidence which will provide a full and complete record on which to base our ultimate conclusions regarding the interrelated proposals in the applications involved in this proceeding.

The incomplete state of the record seems to have resulted in large part from a stipulation agreed to by the parties and staff. Although it was stipulated that the only contested issue involved in the proceeding related to the need of United Gas Pipe Line Company (United) for the gas it seeks authorization to acquire from Lone Star Gathering Company (Gathering), and while this was the only issue to which United addressed its direct testimony at the hearing, the arguments made in PSC's brief on exceptions and application for rehearing have challenged such matters as United's cost of service, as opposed to Gathering's cost of service, for operation of the facilities which United proposes to acquire from Gathering. We would ordinarily require the parties to adhere to the stipulation, but in this instance, at the commencement of the hearing, PSC's counsel indicated that even if United showed a need for gas in the absolute sense, PSC was contesting United's need for the gas at the price it proposed to pay. Thus, from the beginning of this contested proceeding PSC has really been challenging not only the adequacy of United's markets to support the acquisition of Gathering's gas but also the economic feasibility of applicants' proposals, whereas the applicants have relied on their prepared testimony as if it constituted full answers to PSC's contentions even though their testimony was served prior to the commencement of hearing and was written under an apparently erroneous and overly narrow interpretation of the stipulation to the effect that PSC was questioning only United's physical need for Gathering's gas.

Under the circumstances described above, it is not surprising that the record is either silent or affords only partial answers to many of the questions raised by PSC. In the interest of securing a complete record, the stipulation should not govern in any way the presentation of evidence on rehearing and no party or staff should any longer consider itself bound by the stipulation. The applicants are free to augment the record to the extent they believe is essential to support their applications, but we shall hereinafter specify the areas as to which PSC has raised questions and as to which we believe additional evidence should be presented on rehearing.

The first issue raised in PSC's application for rehearing is that United's markets have not been growing as rapidly as we indicated in Opinion No. 505. PSC contends that United's Form No. 2 for 1965 shows that United's sales decreased in 1965, as compared with 1964, by 143 billion cubic feet and that this reveals a negative growth rate for United's markets over the period from 1959 to 1965. On rehearing United should present full market data showing its total sales over a period of time great enough to demonstrate a trend in growth or decline of its markets, together with testimony explaining why its sales declined sharply during 1965 and what it estimates its future market requirements will be.

PSC also contends that United's gas reserves at the end of 1964 were in excess of 23 trillion cubic feet and that only three other pipeline companies in the United States have reserves with as high a deliverability life as United. PSC claims that United should not be allowed to acquire high-priced gas reserves when it already has more than ample reserves to meet its market requirements for at least 17 years. On rehearing United should present evidence showing the number of years it can meet its customers' requirements with the existing reserves available to its system. In presenting its evidence as to deliverability and reserves, United should also explain why its reserves have declined by about 4.1 trillion cubic feet within the last two years even though its total sales have amounted to only 2.7 trillion cubic feet during the same period of time. United should state whether it has ever before paid as much as 21.5 cents per Mcf for gas purchased in South Texas, and if not, whether it could use, at less cost than 21.5 cents per Mcf, alternate supplies from other sources to meet its customers' requirements. United should introduce flow diagrams and maps to demonstrate the flow on its system of gas obtained from Gathering as compared with the flow of any alternate supplies which could be substituted for Gathering's gas.

The next contention PSC makes is that the cost to United of acquiring gas from Gathering cannot be determined from the record. The record shows Gathering's estimated cost of service on the facilities it proposes to sell to United and United's witness stated that United's costs would not "* * * be any higher or any lower than what it is costing" Gathering. However, PSC claims that Gathering's unit cost of service had been computed from the estimates in the record on the assumption that Gathering would deliver annually about 15.2 billion cubic feet to United, whereas Gathering's Form No. 2 for 1965 shows that Gathering delivered only 12.5 billion cubic feet to United. PSC argues that the cost of service will not vary appreciably from one year to another and that the unexplained reduction in the volume of Gathering's deliveries to United shows an alarming increase in the unit cost of service. In fact, PSC points out that United's estimated fixed costs would apparently amount to 4.6 cents per Mcf without any allowance for operating and maintenance expenses. If this unit cost of 4.6 cents per Mcf is added to the unit cost of purchased gas for 1963, amounting to about 17.6 cents per Mcf, the total cost to United would be 22.2 cents per Mcf, or seven tenths of one cent per Mcf more than it is now costing United to purchase the gas directly from Gathering.

While it is obvious that United's estimated fixed costs are greater than Gathering's fixed costs because of United's having used a larger rate of depreciation and a much greater rate of return than Gathering, the record does not contain specific data concerning United's estimated cost of service for operation of the facilities which it proposes to acquire from Gathering. Consequently, on rehearing United should present full and complete data showing its best estimate of all costs it would incur if it were to be permitted to acquire Gathering's facilities. United's costs should be computed utilizing its authorized rate of return of 6½ percent instead of the 6¾ percent rate of return used in the record. United should calculate its income tax allowance on the basis of its up-to-date capitalization ratio and average interest rate on its long-term debt. Additionally, United should support its use of a depreciation rate of about 5.76 percent in lieu of the 4.41 percent depreciation rate employed by Gathering in its Form No. 2 for 1965 if United believes that Gatherings' depreciation rate is lower than it should be.

Up-to-date cost-of-service data are required concerning Gathering's present operations in order to determine whether it is sound for PSC to conclude in its application for rehearing that Gathering's charge to United will necessarily remain at 21.5 cents per Mcf and therefore never be equal to or exceed costs comprised of United's estimated cost of service on the facilities to be acquired from Gathering plus the cost of purchased gas. In this connection we note from Gathering's Form No. 2 for 1965 that Gathering's rate of return on the facilities it seeks to sell to United was less than 4 percent.

PSC also claims that the record should be reopened in order that Gathering can explain why its peak-day delivery in the 1965–66 heating season declined to 49,755 Mcf from the much higher peak-day delivery of 65,224 Mcf for the

1964–65 heating season. While United's witness stated that South Texas reserves have a history of fast depletion, the record does not show that the reserves attached to Gathering's system were expected to become depleted as fast as is implied from a comparison of Gathering's Forms No. 2 for 1964 and 1965. Therefore, on rehearing Gathering should present evidence showing what has caused the rapid decline in peak-day and annual deliveries to United and what effect this sharp reduction in deliveries will have on the unit cost of service.

PSC also objects to our failure "* * * to afford protection to the consumer from the unprecedentedly onerous 1:6200 take-or-pay provisions" in the contract under which Gathering delivers gas to United. Gathering and United should present evidence on rehearing in support of their use of take-or-pay provisions requiring United to take one Mcf of gas for each 6,200 Mcf of reserves dedicated to Gathering's system.

Finally, PSC alleges that the Commission erred in asserting that United's cost of service on the facilities it seeks to acquire from Gathering would be offset by the reduction in United's cost of service on the facilities which United proposes to sell to Gathering's parent, Lone Star Gas Company (Lone Star). This issue makes it necessary for Lone Star, Gathering and United to present evidence on rehearing showing whether United would be willing to sell its facilities to Lone Star if United's application to acquire Gathering's facilities were to be denied. United should also introduce evidence showing its present cost of service for operating the facilities it seeks to sell to Lone Star as compared with its estimated cost of supplying gas to the customers it expects to continue serving from those facilities in the event United is permitted to abandon and sell such facilities to Lone Star. In conjunction with this evidence United should show whether the cost of the gas it expects to purchase from Lone Star for resale to its customers, to be served from the facilities it seeks to abandon, is greater than its existing costs for serving those same customers.

The Commission finds:

The application for rehearing filed on September 21, 1966, by the Public Service Commission of the State of New York for rehearing of Opinion No. 505 and the accompanying order issued August 22, 1966, should be granted as hereinafter ordered for the purpose of supplementing the record in this consolidated proceeding so as to clarify the facts surrounding the questions raised by the application for rehearing.

The Commission orders:

(A) The application for rehearing filed September 21, 1966, by the New York Public Service Commission is granted.

(B) Pursuant to the authority contained in, and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly Sections 7, 15, 16, and 19, and the Commission's Rules and Regulations under that Act, a public hearing shall be held, before a duly designated presiding examiner, commencing December 6, 1966, at 10:00 a.m. (EST), in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C. 20426, concerning the matters raised by the New York Commission's application for rehearing and especially regarding the questions hereinbefore discussed in this order.

(C) The applicants shall serve upon the Examiner, the New York Public Service Commission, and the Commission's staff their supplemental evidence in answer to the questions raised by the New York Commission's application for rehearing on or before November 21, 1966.

(D) Any evidence which the New York Commission or the Commission's staff may wish to file shall be served upon the Examiner and the applicants on or before December 1, 1966.

NIAGARA MOHAWK POWER CORPORATION, DOCKET NO. E-6797

ORDER AUTHORIZING TRANSMISSION OF ELECTRIC ENERGY FROM UNITED STATES TO CANADA AND SUPERSEDING PRIOR AUTHORIZATION

(Issued October 14, 1966)

Niagara Mohawk Power Corporation (Niagara Mohawk) incorporated under the laws of the State of New York, with its principal place of business in Syracuse, New York, filed a supplemental application on October 19, 1965 for authorization, pursuant to Section 202(e) of the Federal Power Act, to increase the amount of electric energy presently authorized to be transmitted and exported to Canada pursuant to Commission's order issued May 15, 1958 (19 FPC 693) by means of electric transmission lines and facilities described and authorized in Permits issued in Docket Nos. E-6798, E-6797, E-6631 and E-6632. Under the present authorization applicant is authorized to export up to 300,000,000 kwh annually at a rate not to exceed 280,000 kw. Applicant now seeks to increase this authorization to 1,000,000,000 kwh at a rate not to exceed 1,000,000 kw. No change in the transmission facilities will be made by reason of the increase requested.

The Applicant points out that in December 1958, when a 230 kv tie was established between the St. Lawrence project of Power Authority of the State of New York and the Hydro-Electric Power Commission of Ontario, considerable energy circulated into Applicant's system through its connections with the St. Lawrence project and out of its system through its connection with the Hydro-Electric Power Commission near Niagara Falls. There have been periods when power circulated in the opposite direction. Circulation of energy, in on one tie and out on the other tie, may occur whenever the two ties between the St. Lawrence project and the Niagara area, one via Canada and the other via United States are closed.

An examination of hourly records shows that during a single day energy flows can vary from a large amount "out" to a large amount "in" and that the net flow over 24 hours will not reflect the relative size of the maximums. Applicant states that the requested increase in the amount of energy authorized to be exported is necessary to give it sufficient flexibility to handle the situation without the danger of exceeding the amount authorized by the Commission.

Applicant states that the major portion of the electric energy it proposes to export is on a non-firm basis and can therefore be curtailed at any time. Applicant's interconnection agreement with the Hydro-Electric Commission of Ontario is on file with the Commission as Applicant's Rate Schedule F.P.C. No. 12. The increased amounts of energy will be sold in accordance with the rates set forth in Applicant's FPC Rate Schedules Nos. 12 and 13, on file with the Commission.

Written notice of the application has been given to the New York Public Service Commission and to the Governor of that State. Notice of the application has also been given by publication in the Federal Register on November 9, 1965 (30 F.R. 14124), stating that any person desiring to be heard or to make any protest with reference to the application should, on or before November 26, 1965, file with the Federal Power Commission, Washington, D.C. 20426, a petition or protest in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

The transmission of electric energy from the United States to Canada, as limited herein and as hereinafter authorized, will not impair the sufficiency of electric supply within the United States and will not impede or tend to impede the coordination in the public interest of facilities subject to the jurisdiction of the Commission.

The Commission orders:

(A) Niagara Mohawk hereby is authorized to transmit electric energy from the United States to Canada, in accordance with the terms and conditions set forth in the supplemental application, and subject to the provisions of this order.

(B) The electric energy which Niagara Mohawk is hereby authorized to transmit from the United States to Canada shall be an amount not in excess of 1,000,000,000 kwh per year at a rate not to exceed 1,000,000 kw over facilities covered by the aforementioned Permits issued in Docket Nos. E-6798, E-6797, E-6631 and E-6632, respectively.

(C) Since there may at times be simultaneous imports at one or more of the several interconnections, the amount of electric energy exported shall be computed as the net sum of the kilowatt-hours exported during the hours when the net energy flow is from the United States to Canada. Similarly, the maximum rate of transmission shall be computed as the maximum net sum of the power flows over the several interconnections.

(D) The authorization herein granted may be modified from time to time or terminated upon further order of the Commission, but in no event shall such authorization extend beyond the date of termination or expiration of the Permits referred to in paragraph (B) above.

(E) Niagara Mohawk shall conduct all operations pursuant to the authorization herein granted in accordance with the provisions of the Federal Power Act and pertinent rules, regulations or orders issued by the Commission, and shall file with the Commission any revisions or changes in the agreements between Niagara Mohawk and the purchasers of the energy to be exported, all as now on file with the Commission.

(F) Niagara Mohawk shall install and maintain adequate metering equipment to measure the flow of all energy transmitted from the United States to Canada pursuant to the authority herein granted; shall make, keep, and preserve full and complete records with respect to the movement of such energy; and shall file a report in triplicate annually on or before February 15 showing for each month of the preceding calendar year the kilowatt-hours of energy delivered over the several interconnections as a group, the maximum rate of transmission, and the consideration received therefor. In addition, it shall show separately for each interconnection (except that the Buffalo-Fort Erie Crossing and Rainbow Bridge Crossing may each be considered a single interconnection) the gross monthly kilowatt-hours transmitted in each direction and the maximum rates of such transmission.

(G) This authorization to transmit electric energy from the United States to Canada shall not be transferable or assignable, but shall continue in effect temporarily for a reasonable time thereafter, in the event of the involuntary transfer of facilities used thereunder by operation of law (including such transfers to receivers, trustees, or purchasers under foreclosure or judicial sale) pending the making of an application for permanent authorization and decision thereon, provided notice is promptly given in writing to the Commission, accompanied by a statement that the physical facts relating to sufficiency of supply, rates, and nature of use remain substantially the same as before the transfer.

(H) This authorization shall be without prejudice to the authority of any State or State regulatory commission for the exercise of the lawful authority vested in the State or State regulatory commission over Applicant.

(I) This authorization is without prejudice to the authority of this Commission, or any other regulatory body, with respect to rates, service, accounts, valuation, estimate or determination of cost, or any other matter whatsoever now pending or which may come before this Commission, or other regulatory body, and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

(J) The authorization heretofore granted by Commission order issued May 15, 1958, in this docket is hereby superseded.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP66–228

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 14, 1966)

On August 9, 1966, Panhandle Eastern Pipe Line Company (Petitioner), filed in Docket No. CP66–228 a petition to amend the order issued in said docket on April 29, 1966, 35 FPC 653, and amended on August 2, 1966, 36 FPC 358, by requesting authorization to construct and operate an extension of its pipeline through Ellis County, Oklahoma, all as more fully set forth in the petition to amend.

By the order issued on April 29, 1966, in the instant docket, Petitioner was granted authorization for the construction and operation of a supply pipeline extending from its existing Elk City line a total of approximately 73.3 miles through Dewey and Ellis Counties, Oklahoma, and terminating in Hemphill County, Texas. By the order issued August 2, 1966, Petitioner was granted further authorization for construction and operation of a pipeline extension of approximately 31.7 miles through Ellis and Woodward Counties, Oklahoma, from the previously certificated Hemphill line.

Petitioner specifically requests in the instant petition authorization to construct and operate an extension southward approximately 13.4 miles of 12-inch and 5.4 miles of 8-inch gas supply lateral in Ellis County, Oklahoma, from a point on the Hemphill line, connecting at approximately the midpoint between its origin and Petitioner's existing Western Oklahoma supply line.[1]

---

[1] The proposed line will attach new gas supplies from several producers: Amerada Petroleum Corporation; Anderson, Bruce; Beard Oil Company; Dalco Oil Company; El Paso Products Company; Livingston Oil Company; Midwest Oil Corporation; Odessa Natural Gasoline Company; Pioneer Products Corporation; Shell Oil Company; Sun Oil Company, Tenneco Oil Company *supra*, p. 750.

The total estimated cost of the proposed extension is $619,000, which cost will be financed from general funds.

Due notice of the filing of the application to amend and opportunity for hearing thereon have been given by publication in the Federal Register on August 23, 1966 (31 F.R. 11159). No protest, petition to intervene, or notice of intervention has been filed in this proceeding concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that the Commission's order issued April 29, 1966, in Docket No. CP66–228 be amended as hereinafter ordered and conditioned.

The Commission orders:

(A) The Commission's order issued April 29, 1966, in Docket No. CP66–228 is amended so as to authorize Petitioner to construct and operate an extension southward approximately 13.4 miles of 12-inch and 5.4 miles of 8-inch gas supply lateral in Ellis County, Oklahoma, from a point on the Hemphill line, connecting at approximately the midpoint between its origin and Petitioner's existing Western Oklahoma supply line.

(B) The amendment authorized by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with applicable Commission Regulations under the Natural Gas Act and particularly the conditions set forth in paragraphs (f) and (g) of Section 157.20 of such Regulations.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PIPELINE PRODUCTION AREA RATE PROCEEDING, DOCKET NO. RP66–24

ORDER REFERRING APPEAL FOR EXTENSION OF TIME TO PRESIDING EXAMINER

(October 14, 1966)

On September 29, 1966, Staff Counsel filed an Appeal from the rulings of the Presiding Examiner prescribing the procedural dates in this proceeding and denying staff's motion for additional time. It appears from Staff Counsel's appeal that the respondents in this proceeding are to submit data in response to a questionnaire which was worked out among the parties to the proceeding after numerous informal and pre-hearing conferences. It further appears that while Staff Counsel did not meet the date set for submitting the questionnaire and instructions to the respondents, that the need for the extension of time requested is not caused by the failure to meet that date. Rather, the appeal sets forth that after intensive research and review with responsible officials of the Office of Administration of this Commission, Staff Counsel was advised that the processing of the responses to the questionnaire by use of automatic data processing equipment and techniques could not physically be accomplished in less than 147 days. Staff Counsel thus contends that the 42 days allowed by the Examiner for processing and compositing the responses to the questionnaire are wholly inadequate. The time schedule requested by Staff Counsel is thus almost entirely based on the time needed for processing of the responses.

We have been advised that the 147 days is a reasonable estimate of the time required.

Opposition to Staff Counsel's request was filed by the Pipeline Division of the Independent Natural Gas Association of America (INGAA), on October 10, 1966. That opposition does not controvert the allegation of time necessary for processing the questionnaire, but appears to suggest that such activity and preparation of any evidence relating thereto that the parties may desire to present could be accomplished at the same time that the parties would be sitting in hearing on some other phases of the proceeding. We do not believe that the suggestion is feasible.

On October 12, 1966, 13 of the respondents in this proceeding, under the name Pipeline Production Group, filed a joint response and petition requesting, among other things, that the Commission prescribe a rule-making procedure for Phase I of this proceeding. It is not our purpose to act on that petition at this time, since it is our view that other parties to this proceeding should be allowed some time to file answers or comments thereon. It is our further view, however, that the time for filing of such responses should be limited as hereinafter provided.

The Presiding Examiner in this proceeding is fully empowered to exercise his discretion in setting the procedural dates he deems appropriate in line with our expressed desire that a complete evidentiary record be established herein. We believe that he should be given an opportunity to exercise that discretion in the light of the subsequently developed facts regarding processing of the questionnaire. It is not appropriate that we attempt to prescribe a specific time schedule and thus second-guess the Presiding Examiner on the time required for each procedural step in the proceeding. Accordingly, we are referring Staff Counsel's appeal to the Presiding Examiner for his consideration and action thereon.

The Commission orders:

(A) The appeal filed by Staff Counsel on September 29, 1966 is referred to the Presiding Examiner for consideration and action thereon.

(B) Any party to this proceeding desiring to submit comments or answer to the document filed on October 12, 1966, by the aforementioned Pipeline Production Group shall do so on or before October 31, 1966.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TURNBULL & ZOCH DRILLING CO. (OPERATOR), ET AL., DOCKET NO. G-17960, ET AL. AND TENNECO OIL COMPANY, DOCKET NOS. G-18223, CI60-325

ORDER DENYING MOTIONS FOR RECONSIDERATION OF APPLICATION FOR REHEARING AND EXTENSION OF TIME FOR FILING

(Issued October 14, 1966)*

On July 25, 1966, 36 FPC 164, the Commission issued Opinion No. 499 and order in this proceeding. Timely applications for rehearing were filed by a number of the parties to the proceeding. On August 25, 1966, the thirty-first day after issuance of Opinion No. 499 and order, Tenneco Oil Company (Tenneco) filed an application for rehearing. By order issued September 2, 1966, the Commission granted all applications for rehearing of Opinion No. 499 and order for the purpose of allowing an opportunity to give the arguments set forth therein joint and adequate consideration. By letter dated September 8, 1966, the Acting Secretary of the Commission rejected Tenneco's application for rehearing on the grounds that it was not filed within the time provided by Section 19(a) of the Natural Gas Act. On September 16, 1966, Tenneco moved for reconsideration of its application for rehearing and for an extension of time for filing such application.

---

*See order issued January 27, 1967, dismissing application for rehearing, 37 FPC 255.

Section 19(a) of the Natural Gas Act provides that "Any person * * * aggrieved by an order issued by the Commission in a proceeding under this act to which such person * * * is a party may apply for a rehearing within thirty days after the issuance of such order. * * * No proceeding to review any order of the Commission shall be brought by any person unless such person shall have made application to the Commission for a rehearing thereon." "Since the thirty day period is the maximum period prescribed for rehearing by the statute, the Commission has no power to grant any extension of time." *Power Authority of the State of New York*, Project No. 2000, 31 FPC 467, 468 (1964). Tenneco's motion for an extension of time to file such application must therefore be denied, and the Acting Secretary's action in rejecting such application must be held to be correct. The fact that Tenneco's late filing resulted from an honest administrative mistake does not confer upon this Commission the power to relieve the party of the consequences of the error. The fact that no other party objected to the filing of Tenneco's application cannot extend the period provided by the statute.

In the present case, however, the Commission has granted rehearing upon applications timely filed by other parties. We think, once a rehearing has been granted upon application by any party, that all parties to the proceeding may be heard upon such rehearing if they so desire. Tenneco's motion papers included, as Appendix A, a copy of its application for rehearing. This sets forth the facts and arguments which Tenneco wishes to present to the Commission.

The Commission orders:

The motions of Tenneco Oil Company for reconsideration of its application for rehearing and for an extension of time within which to file an application for rehearing of Opinion No. 499 and order are denied.

Commissioner Carver *not participating.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ATLANTIC SEABOARD CORPORATION, DOCKET NO. CP66-390

ORDER AMENDING CERTIFICATE TO EXTEND TIME FOR COMPLIANCE WITH CONDITION AND ISSUING TEMPORARY CERTIFICATE

(Issued October 17, 1966)

On September 20, 1966, 36 FPC 653, the Commission issued an order herein granting a certificate to Atlantic Seaboard Corporation for the use of approximately 1,185 feet of 36-inch O.D. by 0.250-inch wall thickness electric weld, grade X-100 steel pipeline for use as a segment of its transmission line system in Grant County, West Virginia. This certificate was conditioned on approval of the use of this pipe by the ASA B31.8 Code Committee. X-100 pipe conforms to no standards published by the American Standards Association or the American Petroleum Institute. It is made of "quenched and tempered" steel. Tests of the pipe's adequacy and safety have, however, been conducted by the United States Steel Corporation, Atlantic Seaboard, and by the Battelle Memorial Institute of Columbus, Ohio.

Our order of September 20, 1966, stated that in the absence of federal standards, compliance with the safety code used by the industry, the ASA B31.8 code, should be a prerequisite to certification by the Commission under Section 7(c) of the Natural Gas Act.

The Commission interpreted the ASA code to provide a procedure by which such new types of pipe could be qualified for use and the Commission conditioned the certificate on qualification by such procedure. Without such a procedure, new types of pipe could not be used by a pipeline company under operational conditions and still allow the company to comply with the ASA B31.8 code. To permit new developments in pipeline technology (which the Commission encourages), it is essential that there be an appropriate procedure to review safety and adequacy for such new developments and to qualify the products for use.

Sections 811.22 and 811.221 of the ASA B31.8 code provide [emphasis supplied]:

> 811.22 *Important items of a type for which standards or specifications are listed in this Code, such as pipe*, valves and flanges, but which do not conform to standards or specifications listed in this Code (811.1 [b]), *shall be qualified* as described in 811.221 or 811.222.[1]
>
> 811.221 By petitioning the Code Committee for approval. If possible, the material shall be identified with a comparable material, and it should be stated that the material will comply with that specification except as noted. Complete information as to chemical composition and physical properties shall be supplied to the Code Committee, and their approval shall be obtained before this material may be used.

On October 11, 1966, Atlantic Seaboard Corporation filed an application for an extension of time to May 1, 1967, to comply with the Commission's condition that the pipe be, in fact, qualified by the ASA Code Committee prior to its use, and for permission to operate the facilities for the interim six months from November 1, 1966, to May 1, 1967. Atlantic Seaboard cited the pipe's prior safe use; the above-mentioned tests of its safety and reliability; and an affidavit of F. W. Batten, Senior Vice President of Columbia Gas System, that X-100 is at least as reliable and safe as X-60 pipe. The application alleges further that if permission is not given by October 15, 1966, it will be necessary to employ a contractor to install X-60 pipe in place of the X-100 pipe; an accompanying affidavit alleges (1) the 10-mile loop of which the X-100 pipe is a part must be in operation by November 1, 1966, to meet winter requirements; (2) the pipe has been hydrostatically tested to 1,225 psig and will not be operated above 750 psig; and (3) that it is located in a remote, mountainous region where even the closest inhabitants would not be in danger in the event of a failure.

The application states that Atlantic Seaboard has petitioned the ASA B31.8 Code Committee for approval under Section 811.221 and that two members of the ASA B31.8 Code Committee have advised Atlantic Seaboard that the ASA B31.8 Code Committee would conclude that the approval required by the Commission is not possible under the ASA Code Committee's present procedures. Atlantic Seaboard states also, on information and belief, that the ASA Code Committee is reconsidering its procedures to provide Code provisions for the qualification of materials and procedures for operational experience. Atlantic Seaboard states its belief that, when such code provisions are enacted, Atlantic Seaboard will receive the approval required by the Commission's order of September 20, 1966, within the six months here sought.

---

[1] Section 811.222 is not here relevant as it deals with materials which do not vary materially from a listed specification. "Quenched and tempered" steel does vary materially from any listed specification.

The Commission's Deputy Chief of the Bureau of Natural Gas, a member of the ASA Section 8 of the B31 Code Committee, advises us that he attended the September 23, 1966, meeting of the sectional committee which considered Atlantic Seaboard's petition for qualification and approval of the limited installed section of X–100 pipe. He confirms that the sectional committee concluded that present procedures of the ASA code are inadequate to qualify X–100 pipe for a particular use, such as Atlantic Seaboard's, as contrasted with general usage; that the committee is not yet ready to qualify X–100 pipe for general usage; and that the sectional committee is proceeding with dispatch to recommend a procedure for qualifying new kinds of pipe for particular usage to the parent B31 committee which, it appears, must approve the procedure before it may be invoked.

The vital consideration is that the ASA Code group is moving to initiate procedures for qualifying for use new types of pipe such as X–100 pipe in circumstances such as Atlantic Seaboard's. It is therefore reasonable to extend the time for Atlantic Seaboard to obtain approval from the ASA Code Committee. In light of the belief of Atlantic Seaboard that it will be able to obtain such a determination before May 1, 1967, and their inability under existing code procedure to secure an early determination, the supporting information it offers, including the studies of the Battelle Memorial Institute, and the allegations of the safety and reliability of X–100 pipe, the Commission will grant Atlantic Seaboard's application for an extension of time to comply with this condition of the Commission's order and will authorize use of this X–100 for the 6-month period. Atlantic Seaboard's application requests authorization to operate the segment of X–100 pipe at a pressure of no more than 750 psig and we are so ordering. Of course, as in all temporary certificates, we reserve the right to rescind or modify the temporary certificate as circumstances may require.

The Commission finds:

(1) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate of public convenience and necessity issued to Atlantic Seaboard Corporation on September 20, 1966, in Docket No. CP66–390 be amended by extending the time for compliance with condition (B)(1) of such certificate as hereinafter ordered.

(2) Issuance of a temporary certificate, as hereinafter ordered, is necessary to assure maintenance of adequate services.

The Commission orders:

(A) The order of September 20, 1966, is amended to extend to May 1, 1967, time for compliance with condition (B)(1) of said order.

(B) A temporary certificate of public convenience and necessity is issued to Atlantic Seaboard Corporation, to operate approximately 1,185 feet of 36-inch O.D. by 0.250-inch wall thickness electric weld, grade X–100 steel pipeline as a segment of its pipeline system in Grant County, West Virginia until May 1, 1967, subject to the following conditions.

(1) The X–100 pipe shall not be operated at a pressure in excess of 750 psig.

(2) In any rate proceeding, all costs associated with the construction, installation and operation of the X-100 pipe shall not be included in Atlantic Seaboard's rate base until condition (B)(1) of the order of September 20, 1966, is complied with.

(3) Seaboard shall: (a) report immediately, any abnormality the behavior of the grade X-100 line segment; (b) file at monthly intervals from November 1, 1966, progress reports to include, but not be restricted to, operating pressure history, leak survey data, and cathodic protection pipe-to-soil potential survey data on the grade X-100 pipeline. Such reports shall also include a status report on the hydrogen-stress field tests on grade X-100 steel concurrently being carried on by the Battelle Memorial Institute.

(C) In all other respects the Commission's order of September 20, 1966, shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

COLORADO INTERSTATE GAS COMPANY, DOCKET NO. G-9666

ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 17, 1966)

On August 29, 1966, Colorado Interstate Gas Company (Petitioner) filed in Docket No. G-9666 a petition to amend the order issued in said docket on March 15, 1956, 15 FPC 1228 and amended on February 4, 1965, 33 FPC 173, requesting authorization to increase its firm daily deliveries to Northern Gas Company (Northern) from 200 Mcf to 300 Mcf of natural gas for resale in the Laramie, Wyoming area, all as more fully set forth in the petition to amend.

By the order issued in the instant docket on March 15, 1956, Petitioner was authorized to provide emergency service to Northern for resale in the Laramie area. The order issued on February 4, 1965, authorized Petitioner to change such emergency deliveries to firm and interruptible service. Petitioner has concurrently filed a related service agreement with Northern reflecting the proposed increased obligations. The present service agreement with Northern, under Petitioner's Rate Schedule G-1, provides for firm deliveries of 200 Mcf of natural gas per day with an effective term extending to October 1, 1982. The tendered rate filing under Rate Schedule PR-1[1], increases deliveries to 300 Mcf per day with an effective term extending to September 1, 1986.

The proposed sale will be made using currently authorized delivery points, and no new or expanded facilities will be required.

A comparison of the sales and revenues under the G-1 and PR-1 Rate Schedules indicates a cost reduction to Northern of approximately $800 per year.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate of public convenience and necessity heretofore issued in Docket No. G-9666 be amended as hereinafter ordered.

---

[1] This schedule is for partial requirements service to pipeline customers having other sources of supply, and was authorized by the Commission subsequent to authorization herein.

The Commission orders:

(A) The certificate of public convenience and necessity issued to Colorado Interstate Gas Company by the Commission on March 15, 1956, and amended February 4, 1965, is further amended by authorizing an increase in firm daily deliveries to Northern Gas Company from 200 Mcf to 300 Mcf of natural gas, under Rate Schedule PR-1, as hereinbefore described and as more fully described in the petition to amend.

(B) Applicant's concurrently filed revised service agreement reflecting the increased volumes authorized herein is hereby accepted for filing effective as of the date of issuance of this amending order.

(C) In all other respects said certificate shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CONSOLIDATED GAS SUPPLY CORPORATION, DOCKET NO. CP67-40

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 17, 1966)

On August 19, 1966, Consolidated Gas Supply Corporation (Applicant), filed in Docket No. CP67-40 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas at a new delivery point[1] to Iroquois Gas Corporation (Iroquois), an existing customer of Applicant, and the construction and operation of a measuring and regulating station needed therefor, all as more fully set forth in the application.

Applicant states that Iroquois plans to resell and distribute such gas in the Towns of Sheldon and Orangeville, Wyoming County, New York, in an area which does not presently have natural gas service. Applicant further states that the expected market requirements to be served by the proposed delivery point are:

	First year	Second year	Third year
Annual (Mcf)	14,000	21,000	28,000
Peak day (Mcf)	180	270	360

Applicant proposes to tap its 20-inch transmission pipeline in the town of Sheldon, Wyoming County, New York, and to construct and operate a measuring and regulating station for the sale and delivery of gas to Iroquois under Applicant's Rate Schedule ACR-5, in order to supply gas for Iroquois' proposed new market area.

The total estimated cost of Applicant's proposed facilities is $10,866, which cost will be financed from funds on hand.

On August 26, 1966, Consolidated filed an amended service agreement with Iroquois. The new agreement provides for deliveries of gas at the new Johnsonburg Meter Station in addition to existing delivery points, and increases the annual contract volumes from 16,900,000 Mcf to 17,000,000 Mcf or by 100,000 Mcf. The increase in volume is to care for increasing requirements of areas presently served by Iroquois with gas purchased from Consolidated and also includes the requirements of the Johnsonburg Market Area.

---

[1] To be known as the Johnsonburg Connection.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 12, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Consolidated Gas Supply Corporation, a West Virginia corporation with its principal place of business in Clarksburg, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued May 24, 1965, in Docket No. CP65-262 (33 FPC 1047).

(2) The facilities hereinbefore described and as more fully described in the application and exhibits in this proceeding, will be used in the transportation and sale of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sale of natural gas are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, and transportation and sale of natural gas is required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Consolidated Gas Supply Corporation, authorizing the construction and operation of facilities and transportation and sale of natural gas, as hereinbefore described and as more fully described in the application in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and ready as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 3 months from the date on which this order issues.

(D) Consolidated's amended service agreement with Iroquois is accepted for filing to become effective on the date service to the Johnsonburg Market area commences.

(E) Consolidated shall inform the Commission of the commencement of deliveries from the facilities authorized herein within 10 days of such date.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

EASTERN SHORE NATURAL GAS COMPANY, DOCKET NO. CP67-48

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 17, 1966)

On August 30, 1966, Eastern Shore Natural Gas Company (Applicant), filed in Docket No. CP67-48 an application pursuant to Section 7(c) of the Natural Gas Act for authority to increase the level of firm deliveries to certain of its resale customers and to deliver volumes of firm natural gas to a direct industrial customer, all as more fully set forth in the application.

Applicant specifically requests authority to increase the levels of firm deliveries to the following resale customers:

Customer	Currently authorized (Mcf)	Proposed deliveries (Mcf)
Dover Gas Light Co	2,830	3,100
Citizens Gas Co	1,450	1,550
Cambridge Gas Co	550	700
Elkton Gas Service, Division of Pennsylvania and Southern Gas Company	950	1,000
Total	5,780	6,350
Net increase	580Mcf	

In addition, Applicant also seeks authority to deliver 90 Mcf per day of firm gas to International Latex Corporation, a direct industrial customer to which Applicant is currently authorized to sell interruptible gas.

Applicant states that the proposed delivery increases can be made effective without the construction of any new transmission facilities.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 12, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Eastern Shore Natural Gas Company, a Delaware corporation having its principal place of business in Salisbury, Maryland, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 29, 1957, in Docket No. G-12050, *et al.*, (18 FPC 710).

(2) The proposed operation of facilities, transportation and delivery of natural gas to International Latex Corporation, an industrial customer on a firm basis, and sale and delivery of natural gas by Applicant for resale as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid operation of facilities, transportation and sale and delivery of natural gas is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform

the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with Section 155.1 and all other applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the transportation and delivery of natural gas to International Latex Corporation, an industrial customer on a firm basis, and the sale and delivery of natural gas for resale as hereinbefore described and more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with Section 155.1 and all other Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The services authorized shall be commenced, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 6 months of the date on which this order issues.

(D) The certificate issued shall not entitle the industrial customer to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

(E) Eastern Shore Natural Gas Company shall file within 30 days after the issuance of this order appropriate service agreements with the named resale customers executed in accordance with the Commission's Regulations reflecting the increased deliveries authorized herein, and shall notify the Commission of the date of initiation of firm service to International Latex Corporation within 10 days thereof.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP67-50

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 17, 1966)

On September 1, 1966, Michigan Wisconsin Pipe Line Company (Applicant), filed in Docket No. CP67-50 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities, all as more fully set forth in the application.

Applicant seeks authorization for the construction and operation of a sales measuring station to provide a new delivery point for North Central Public Service Company (North Central) on Applicant's Iowa lateral south of Fort

Madison, Iowa. North Central, an existing resale customer of Applicant, has requested Applicant to provide the new delivery point to enable North Central to deliver and sell natural gas to a new plant which Fruehauf Corporation has under construction. Peak day and annual natural gas requirements are estimated at 500 Mcf and 80,000 Mcf, respectively, which North Central proposes to serve initially within the limits of its presently effective service agreement.

The total estimated cost of the proposed facilities is $24,296, which amount will be financed with funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 12, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Michigan Wisconsin Pipe Line Company, a Delaware corporation having its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G-669 (5 FPC 953).

(2) The proposed construction and operation of facilities and sale and delivery of natural gas, as hereinbefore described and as more fully described in the application in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and sale and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of facilities and sale and delivery of natural gas as hereinbefore described and as more fully described in the application in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 3 months of the date on which this order issues.

(D) Applicant shall file with the Commission a revised service agreement with North Central covering the new delivery point authorized herein.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TRANSWESTERN PIPELINE COMPANY, DOCKET NO. CP67-39

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 17, 1966)

On August 19, 1966, Transwestern Pipeline Company (Applicant) filed in Docket No. CP67-39 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the installation and operation of certain measuring facilities for the transportation and delivery of natural gas to Duval Corporation (Duval), all as more fully set forth in the application.

Applicant seeks authorization for the installation and operation, for the period ending July 31, 1967, of minor tap, valve and measuring facilities in order to sell and deliver, if available, up to 5,000 Mcf of natural gas per day on an interruptible basis to Duval. Applicant states that the average daily quantity estimated to be required by Duval is 1,500 Mcf of gas, which will be delivered to Duval in Section 589 GC & SF Survey, Pecos County, Texas, as provided in their gas sales agreement.

The total estimated cost of Applicant's proposed facilities is $850, which cost will be borne by Duval and not by Applicant.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 12, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, Transwestern Pipeline Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued October 10, 1963, in Docket No. CP63-290 (30 FPC 997).

(2) The proposed installation and operation of facilities and transportation and delivery of natural gas by Applicant, as hereinbefore described and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed installation and operation of facilities and transportation and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the installation and operation of facilities and the transportation and delivery of up to 5,000 Mcf per day of natural gas by Applicant to Duval as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and the transportation of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 30 days from the date on which this order issues.

(D) The certificate issued is granted upon the express condition that the interruptible service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

AREA RATE PROCEEDING, ET AL. (PERMIAN BASIN AREA), DOCKET NO. AR61-1, ET AL.

ORDER ACCEPTING QUALITY STATEMENTS

(Issued October 19, 1966)

The producers listed in the Appendix have submitted revised quality statements pertaining to sales of natural gas to El Paso Natural Gas Company (El Paso) and Hunt Oil Company (Hunt) which is processed in the Wilshire Plant in Upton County, Texas. Also listed in the Appendix is the quality statement covering the sale by Hunt under its FPC Gas Rate Schedule No. 31 to El Paso at the Wilshire Plant.

The Wilshire Plant was owned 50 percent by El Paso and 50 percent by Hunt, which was the operator of the plant, until Pecos Company (Pecos), a wholly owned subsidiary of El Paso, purchased effective as of August 1, 1966, Hunt's 50 percent interest in the facilities and properties of the plant and gathering system as well as Hunt's interests in the purchase agreements for gas supplying the plant. Pecos also purchased Hunt's interest in the sales contract with El Paso (on file as Hunt's FPC Gas Rate Schedule No. 31), which relates to Hunt's sale of residue gas at the Wilshire Plant.[1]

As a result of the purchase of Hunt's interest by Pecos, Hunt, El Paso and the producers have now submitted agreed upon quality statements based upon El Paso's average treating, compression and dehydration costs in the Permian Area.[2] The methods utilized to compute such costs are the same as those approved in the order issued June 13, 1966, 35 FPC 960, in the above-entitled proceeding. The quality statements conform with the requirements of Opinion Nos. 468 and 468–A, 34 FPC 159, 1068, and we shall therefore accept them.

---

[1] Pecos has filed a certificate application in Docket No. G-11260 to succed to Hunt's interests and has also filed to be made a corespondent in Docket No. RI65-74 which involves sales under Hunt's FPC Gas Rate Schedule No. 31. No action has yet been taken on these matters by the Commission.

[2] After Pecos is certificated to succeed to Hunt's interests, it will adopt Hunt's agreement to the submitted quality statements.

The Commission orders:

The quality statements listed in the Appendix are accepted.

STATEMENT OF LATERAL LINE POLICY IN RATE SCHEDULES FILED BY NATURAL GAS PIPELINE COMPANIES, DOCKET NO. R–301

ORDER NO. 328

AMENDING § 154.39 OF THE COMMISSION'S REGULATIONS

(Issued October 19, 1966)*

On April 12, 1966, the Commission issued in the above-entitled docket a notice of proposed rulemaking (31 F.R. 5972, April 19, 1966) in which it proposed to amend its regulations under the Natural Gas Act to require each natural gas pipeline company to include in its tariff a statement of its practices and policies in regard to the construction of sales lateral lines to present or prospective customers, both resale and direct. "Such a statement," the notice said, "would specify whether such laterals are to be constructed by the selling pipeline company and, if so, the specific rules or formulas under which the cost of construction will be borne or shared by the customer."

---

* Published in the Federal Register on October 25, 1966 (31 F.R. 13720).

Comments were invited from interested persons, to be submitted by May 12, 1966. Responses were submitted by or on behalf of 32 companies.[1]

A substantial number of respondents supported the amendment except to the extent that it would apply to sales laterals to direct customers. They argued that the tariffs filed with the Commission by pipeline companies relate only to sales for resale, and that it would therefore be improper, under the terms of the Natural Gas Act, for the Commission to require the inclusion in such tariffs of statements regarding sales to direct customers. We proposed the amendment in the hope of eliminating, to the extent practicable, any opportunity for unjust discrimination and undue preference among customers where a pipeline company does not follow a consistent policy. We believe, insofar as data relating to a pipeline company's sales lateral arrangements with direct customers may be material in ascertaining the propriety of that company's sales lateral arrangements with resale customers, that it would not be inappropriate to require inclusion in the tariff of a pipeline company's lateral line provision, if any, pertaining to direct customers. On the other hand, because such information is normally available in pipeline certification proceedings, during which sales lateral provisions for both direct and resale customers may be compared, the direct customer provision of the proposed amendment is probably unnecessary. Accordingly, and without expressing any opinion as to its validity, we are striking from the proposed amendment the reference to sales lateral lines to direct customers.

Several respondents argued that the amendment is generally undesirable. One source of objection was the fear that the amendment would render each pipeline company's lateral line arrangements so hopelessly rigid that inherent competitive advantages would be impaired. The Commission neither seeks nor contemplates such a result. The proposed amendment would, by design, require a greater consistency in sales lateral policy than many pipeline companies have heretofore demonstrated. We believe, however, that a clear and accessible declaration of the criteria by which a pipeline company determines to what extent, if at all, it will contribute to lateral line construction is an effective means of assuring the company's customers of equitable treatment. At the same time, we do not expect the proposed requirement to produce the sort of paralysis anticipated by many respondents. A uniform lateral line policy would not require a pipeline company to enter into identical construction agreements with all of its customers. It would require only that each customer receive equitable treatment in the context of its own particular circumstances as compared with those of other customers of the same pipeline company. We are bulwarked in this view by the long-standing success of some of the pipeline companies in adopting and publicizing lateral line construction formulas. See, *e.g.*, *Michigan Wisconsin Pipe Line Co.*, *sub nom. Midwestern Gas Transmission Co., et al.*, 22 FPC 775 (1959), *Kansas-Nebraska Natural Gas Co., Inc.*, 29 FPC 1058 (1963), *Northern Natural Gas Co.*, 22 FPC 164 (1959).

---

[1] Algonquin Gas Transmission Company; Central Hudson Gas & Electric Corporation; Cities Service Gas Company; Consolidated Gas Supply Corporation; Columbia Gas System Service Corporation (on behalf of Atlantic Seaboard Corporation, Home Gas Company, Kentucky Gas Transmission Corporation, The Manufacturers Light and Heat Company, The Ohio Fuel Gas Company, and United Fuel Gas Company); East Tennessee Natural Gas Company; Florida Gas Transmission Company; Iowa Public Service Company; Kansas-Nebraska Natural Gas Company, Inc.; Lake Shore Pipe Line Company; Lone Star Gas Company; Midwestern Gas Transmission Company; Minneapolis Gas Company; Mississippi River Transmission Corporation; Mountain Fuel Supply Company; Natural Gas Pipeline Company of America; Northern Illinois Gas Company; Northern Natural Gas Company; Panhandle Eastern Pipe Line Company; Public Service Electric and Gas Company; Southern Natural Gas Company; Tennessee Gas Pipeline Company; Texas Eastern Transmission Corporation; Texas Gas Transmission Corporation; Transcontinental Gas Pipe Line Corporation; Union Gas System, Inc.; and United Gas Pipe Line Company.

Similarly, although the declaration by a pipeline company of a particular lateral line policy will be an element in certification proceedings brought by prospective customers under section 7(a) of the Natural Gas Act, as well as in those brought by pipeline companies themselves under section 7(c), the pipeline company will not be deprived, in 7(a) proceedings, of opportunities heretofore available to show that the certification in question is not in the public interest. The rule does not require a statement of the considerations which might lead a pipeline company voluntarily to provide new or increased service to a customer. Instead, they would be required solely to set forth the basis for the financial obligations they would assume in the event they were authorized or directed to provide such service after proceedings brought under sections 7(c) or 7(a) of the Act respectively. It is not the purpose of the proposed regulation to impose undue burdens upon jurisdictional pipeline companies; it seeks only to reduce the possibility of preferential treatment for certain customers.

We see no merit in the argument that the Natural Gas Act does not empower the Commission to promulgate the regulation in question here, even as it pertains to resale customers. Section 4(b) of the Act proscribes the discrimination between customers with respect to "rates, charges, service, facilities, or in any other respect," and section 4(c) authorizes the Commission to require public disclosure of "the classifications, practices, and regulations affecting * * * rates and charges * * * ." We think this is ample authority for the regulation we propose to adopt in this proceeding.

Finally, the complaint that "sales lateral" is not readily amenable to a precise definition only suggests more strongly the need for the proposed amendment. Whether all pipeline companies adhere to the same definition of sales lateral is not here in issue. We seek only to assure that each company employs the same policy for all of its customers. The definitions adopted, respectively, by the different pipeline companies subject to our regulation may therefore be expected to form an important element in their lateral line policy statements.

Of the respondents who favored the proposed amendment, some urged us to broaden the scope of the instant proceeding to encompass an investigation into the propriety of particular lateral line policies. We do not believe, however, that an inquiry into the merits of the tariff provisions to be filed would be appropriate in this proceeding.

The Commission further finds:

In view of the foregoing, and upon consideration of all relevant matters presented, including the arguments, contentions, suggestions and other views expressed in the comments received, it is necessary and appropriate for the administration of the Natural Gas Act, that the Regulations under the Natural Gas Act be amended as herein provided.

The Commission, acting pursuant to the authority granted by the Natural Gas Act, as amended, particularly sections 4, 5, 7, and 16, thereof (52 Stat. 822, 823, 824, and 830, as amended, 15 U.S.C. §§ 717c, 717d, 717f, and 717o), *orders:*

(A) Section 154.39, Part 154, Subchapter E, Regulations Under the Natural Gas Act, Chapter I of Title 18 of the Code of Federal Regulations, is amended by designating the existing text as paragraph "(a)" and adding a new paragraph. As so amended, the section will read as follows:

§ 154.39 General terms and conditions.

(a) This section shall contain provisions which apply to all or any of the rate schedules and which may more conveniently be arranged in a separate section of the tariff. Subsections and paragraphs shall be numbered for convenient reference.

(b) The general terms and conditions of the tariff shall contain a clear statement of the company's policy with respect to the financing and building of sales lateral pipelines to its resale customers, together with a list of the rate schedules to which the policy is applicable. If it is the company's policy to build or contribute to the financing of such sales laterals, the tariff shall clearly set forth the criteria or formula under which it determines the extent to which it will contribute to the construction. If it is the company's policy not to build or contribute to any sales lateral pipelines, that policy should be clearly set forth.

[Secs. 4, 5, 7, 16, 52 Stat. 822, 823, 824, 830, as amended, 15 U.S.C. 717c, 717d, 717f, 717o]

(B) This amendment herein prescribed shall become effective upon the issuance of this order.

(C) Each natural gas pipeline company having a tariff on file with the Federal Power Commission on the effective date of this order shall file, no later than December 5, 1966 such supplements to the tariff as may be necessary to comply with the provisions of the regulation herein prescribed.

(D) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Before Commissioners: Carl E. Bagge, Acting Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

EL PASO NATURAL GAS COMPANY, DOCKET NO. RP67-9

ORDER DENYING RECONSIDERATION

(Issued October 24, 1966)

El Paso Natural Gas Company (El Paso), on September 29, 1966, filed a Petition for Rehearing[1] requesting the Commission to terminate the proceedings instituted by our show cause order on flow-through of liberalized depreciation tax deductions, issued August 30, 1966, 36 FPC 558. In support of its petition, El Paso recites a portion of the background of the Commission's determination with respect to its rate of return as determined in Opinion No. 366, 28 FPC 688. It refers to the fact that in computing that rate of return, the Commission included a return of 1.5% on its deferred tax reserve. It also notes that in the order issued December 4, 1963, 30 FPC 1400, approving a settlement agreement in the dockets to which that rate of return determination was applicable[3], the Commission did not condition that rate settlement on the final outcome of *Alabama-Tennessee Natural Gas Company*, Opinion No. 417, 31 FPC 208. El Paso then contends that in the light of the recited facts a "mere" allegation that it has a growing plant "even if true" does not constitute a prima facie case that the principles of the *Alabama-Tennessee* case should be applied to it.

---

[1] An application for rehearing of a interlocutory order such as here involved may not properly be filed [Sec. 1.30(e) of the Rules of Practice and Procedure (18 CFR 1.30(e),]. The subject tender has been considered as a motion for reconsideration pursuant to Section 1.12 of the Commission's Rules of Practice and Procedure.

We believe El Paso's contentions insofar as they are directed to the termination of the proceeding to be without merit. While the absence of a condition regarding flow-through in El Paso's outstanding rate settlement agreement might carry weight were we now seeking to give effect to those principles in El Paso's rates on a retroactive basis, it cannot, of course, preclude application of governing regulatory principles on a prospective basis if the facts so warrant. The petition does not set forth any facts or law to support El Paso's request for termination of the proceedings.

El Paso asks in the alternative that the order issued August 30, 1966 "be implemented to make clear that said order does not shift the duty of going forward to Respondent nor place the burden of proof on El Paso to establish the fairness and reasonableness of its return on its jurisdictional operations."

This request by El Paso appears to be based on a misconception of the nature of the order issued August 30, 1966. The order seeks a determination under Section 5 of the Natural Gas Act with respect to the just and reasonable rates to be charged by El Paso. But it has nothing to do with the burden of going forward with the evidence in such a proceeding or the burden of proof therein. Sections 10, 14 and 16 of the Act, specifically cited in the order, make it perfectly clear that the Commission is free in anticipation of such a proceeding to secure relevant information from a natural gas company. Moreover, it is appropriate to do so through the show cause procedure which, *inter alia*, has the benefits of advising the natural gas company of the tentative views of the Commission of the factual and legal issues, thus requiring the pipeline to affirm or deny specific assertions and to supply other relevant data. See *e.g., Texas Eastern Transmission Corporation*, 34 FPC 1090, appeal dismissed *sub nom. Texas Eastern Transmission Corporation* v. *F.P.C.*, 357 F. 2d 232 (CA5–1966). The extent to which factual issues may continue to exist which would necessitate an evidentiary hearing will of course depend on the nature of El Paso's response to the show cause order. This is particularly true in a situation where any rate reduction which may prove to be appropriate is only prospective and the underlying Commission authority over the subject matter of the inquiry has been judicially affirmed (See *Alabama-Tennessee Natural Gas Company* v. *F.P.C.*, 359 F. 2d 318 (CA5) certiorari denied, October 10, 1966). El Paso has no right or equity upon which it can rely in seeking a prompt resolution of the issue. If there are factual issues which require an evidentiary hearing, El Paso will have full opportunity to rebut or answer such evidence as will be presented by the staff or any other party.

In view of the foregoing, we find that El Paso's petition for rehearing sets forth no reasons which warrant termination of this proceeding and that the petition should be denied.

The Commission orders:

The motion filed by El Paso on September 29, 1966 is denied.

Commissioner Carver *not participating.*

---

[3] Docket Nos. G–4769, G–12948, G–17929 and RP60–3.

Before Commissioners: Carl E. Bagge, Acting Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP65-196

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 24, 1966)

On September 9, 1966, Northern Natural Gas Company (Petitioner), filed in Docket No. CP65-196 a petition to amend the order issued in said docket on May 25, 1966, 35 FPC 790, so as to authorize an increase in pipe size on a portion of the branchline to Arlington, Wisconsin, and an increase in the volume sold and delivered to Wisconsin Power and Light Company (Wisconsin Power) for resale, all as more fully set forth in the petition to amend.

The Commission's order issued May 25, 1966, in the instant proceeding authorized the construction and operation of main and branchline facilities to provide initial natural gas service to 131 communities including Arlington, Wisconsin. Wisconsin Power the distributor in Arlington recently reached an agreement with California Packing Corporation for the sale of gas on an interruptible basis to be used for food packing. Wisconsin Power has requested Petitioner to install facilities to provide this service.

Petitioner requests authority to construct and operate 3.9 miles of 4-inch pipeline to Arlington in lieu of 3.9 miles of 2-inch line and two meter runs in lieu of one 500 B metric meter authorized in the aforementioned order.

The estimated third year maximum day and annual requirements of California Packing are 2300 and 157,300 Mcf, respectively.

Petitioner estimates the cost to construct the revised facilities is $104,922.

Due notice of the subject application to amend and opportunity for hearing has been given by publication in the Federal Register on September 22, 1966 (31 F.R. 12539). No protest or petition to intervene has been filed concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued May 25, 1966, in Docket No. CP65-196 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued May 25, 1966, in Docket No. CP65-196 is amended by authorizing Northern to construct and operate 3.9 miles of 4-inch pipeline to Arlington in lieu of 3.9 miles of 2-inch pipeline, and two meter runs in lieu of 500 B metric meter, as previously authorized, all as hereinbefore described and as set forth in the subject application to amend.

(B) The amendment authorized by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with applicable Commission Regulations under the Natural Gas Act and particularly the conditions set forth in paragraphs (f) and (g) of Section 157.20 of such Regulations.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Carl E. Bagge, Acting Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-46

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 24, 1966)

On August 25, 1966, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant) filed in Docket No. CP67-46 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery, on a firm basis, of additional quantities of natural gas to certain existing customers, all as more fully set forth in the application in this proceeding.

Specifically, Applicant proposes to sell, commencing with the 1966-67 winter heating season, additional quantities of natural gas to twenty existing General Service customers and to one existing Contract Demand customer as set forth in the appendix attached to this order. The proposed additional service totals approximately 22,815 Mcf of gas per day.

Applicant states that the proposed increased service will be rendered through the utilization of unallocated pipeline capacity authorized by the Commission's orders issued May 10, 1966, and May 24, 1966, 35 FPC 715, 784, in Docket Nos. CP66-180 and CP66-303, respectively. Accordingly, no new facilities are proposed in the subject application.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 20, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 12, 1947, in Docket No. G-910 (6 FPC 777).

(2) The proposed sales and transportation of natural gas hereinbefore described, as more fully described in the application in this proceeding, will be in interstate commerce, subject to the jurisdiction of the Commission, and such proposed sales and transportation by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed sales and transportation of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas

Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., to sell and deliver natural gas as hereinbefore described and as set forth in the appendix to this order, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3) and (e) of Section 157.20 of such Regulations.

(C) The proposed sales and delivery of natural gas, authorized in paragraph (A) above, shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 3 months from the date on which this order issues.

APPENDIX

DOCKET No. CP67-46

Tennessee Gas Pipeline Company tabulation of presently authorized and proposed contracted demand and maximum contract quantities (Mcf at 14.73 psia)

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP66-363

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 24, 1966)

On September 1, 1966, United Gas Pipe Line Company (Petitioner) filed in Docket No. CP66-363 a petition to amend the order of August 15, 1966, 36 FPC 449, issuing a certificate of public convenience and necessity in the instant docket so as to delete therefrom authorization to construct and operate facilities for the metering of up to 1,000 Mcf of natural gas per day to Beacon Oil and Refining Company (Beacon), Rusk County, Texas, all as more fully set forth in the petition to amend.

Petitioner states that a subsequent redetermination of the capacity of the facilities installed for service to Beacon under Docket No. CP66–52 has revealed that the facilities installed will be ample to measure the volumes contemplated to be sold to Beacon and that it will not be necessary to construct and operate the metering facilities authorized by the order of August 15, 1966. Based on such redetermination, Petitioner now requests that said order be amended to delete authorization for the construction and operation of such metering facilities.

Due notice of the subject application to amend and opportunity for hearing has been given by publication in the Federal Register on September 14, 1966 (31 F.R. 12029). No protest or petition to intervene has been filed concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued August 15, 1966, in Docket No. CP66–363 be amended as hereinafter ordered.

The Commission orders:

(A) Commission's order issued August 15, 1966, in Docket No. CP66–363 is amended so as to delete therefrom authorization to Petitioner to construct and operate metering facilities to measure up to 1000 Mcf daily to Beacon, as requested by Applicant in the subject application to amend.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Carl E. Bagge, Acting Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

ASHLAND OIL & REFINING COMPANY, DOCKET NO. CI63–489

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 25, 1966)

On July 22, 1966, Ashland Oil & Refining Company (Petitioner) filed in Docket No. CI63–489 a petition to amend the order issued January 11, 1965, in Docket No. G–5216, *et al.*, by authorizing Petitioner *nunc pro tunc* in Docket No. CI63–489 to sell natural gas from additional acreage in Woodward County, Oklahoma, at an initial rate of 17.0 cents per Mcf plus Btu adjustment, all as more fully set forth in the petition to amend.

The order of January 11, 1965, authorized Petitioner in Docket No. CI63–489 to sell natural gas to Michigan Wisconsin Pipe Line Company from additional acreage in Dewey County, Oklahoma, pursuant to a Supplemental Agreement dated August 18, 1964, on file with the Commission and designated as Supplement No. 5 to Petitioner's FPC Gas Rate Schedule No. 81. Said authorization was issued pursuant to a request by Petitioner in a petition to amend filed November 12, 1964, in the subject docket. Applicant agreed to accept said authorization conditioned as was its temporary certificate issued January 14, 1963, in the subject docket; *i.e.*, the initial rate would not exceed 15.0 cents per Mcf at 14.65 psia, including tax reimbursement, plus upward or downward

Btu adjustment. Applicant now seeks to amend its petition of November 12, 1964, by requesting authorization *nunc pro tunc* to sell natural gas from Woodward County at a 17.0-cent rate.

In the instant petition Petitioner states that the permanent certificate issued December 18, 1963, superseded the temporary certificate issued January 14, 1963, and that the conditions of the temporary certificate were thereafter no longer in effect but were replaced by the conditions of the permanent certificate. The foregoing is a correct statement of the effect of the temporary certificate and its conditions after the issuance of the permanent certificate; however, Applicant, in its petition of November 12, 1964, did not request and the Commission, in the order of January 11, 1965, did not order that the sales from the additional acreage be made pursuant to the conditioned temporary certificate, but rather the conditions of the temporary certificate were incorporated by reference in the authorization which amended the permanent certificate by allowing sales from additional acreage. Although the temporary certificate itself was no longer effective at the time that Applicant requested and the Commission issued the amending order, the conditions of the temporary certificate were in writing and in existence in the official records of the Commission and could validly be and were incorporated by reference in the amending order. The amending order was issued as Petitioner requested and it would not be appropriate at this time to authorize *nunc pro tunc* sales from Woodward County at the 17.0-cent rate.

If Petitioner has been selling gas from the Woodward County acreage, such sales have been without authorization from the Commission and contrary to the provisions of the Natural Gas Act.[1] Although Supplement No. 5 to Petitioner's FPC Gas Rate Schedule No. 81 does include both Dewey and Woodward County acreage, the petition to amend of November 12, 1964, specifically requests authorization to sell natural gas only from the Dewey County portion of that added acreage. Inasmuch as Petitioner has now made it clear that it desires to sell gas from the Woodward County acreage at 17.0-cent rate, such sales will be authorized effective as of the date of this order and will be subject to the same conditions as the permanent certificate in this docket, *i.e.*, the conditions set forth in Opinion No. 353, 27 FPC 449.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the order issuing a certificate to Petitioner in Docket No. CI63-489 should be amended as hereinafter ordered.

The Commission orders:

The order issuing a certificate to Petitioner in Docket No. CI63-489 is amended by authorizing sales of natural gas from acreage in Woodward County, Oklahoma, effective on the date of this order, pursuant to Supplement No. 5 to Petitioner's FPC Gas Rate Schedule No. 81, at an initial rate of 17.0 cents per Mcf at 14.65 psia, including tax reimbursement, plus upward or downward Btu adjustment; and in all other respects said order shall remain in full force and effect.

---

[1] Petitioner does not indicate in the instant petition that it has, in fact, been selling gas from the Woodward County acreage.

Before Commissioners: Carl E. Bagge, Acting Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP63-296

FINDINGS AND ORDER FURTHER AMENDING ORDERS ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING RATE FILING

(Issued October 25, 1966)

On August 19, 1966, El Paso Natural Gas Company (Petitioner) filed in Docket No. CP63-296 a petition to amend further the Commission's orders issued December 16, 1963, 30 FPC 1520, and July 29, 1964, 32 FPC 423, in the subject docket, as amended on March 23, 1965, 33 FPC 592, by authorizing Petitioner to continue the sale and delivery of 70,000 Mcf of natural gas per day to Southern California Gas Company and Southern Counties Gas Company of California (hereinafter referred to jointly as Southern) until January 1, 1967, or until the commencement of any new service authorized in Docket No. CP63-204, *et al.*, whichever is earlier, all as more fully set forth in the petition to amend further in this proceeding.

By the orders of December 16, 1963, and July 29, 1964, in Phases I and II, respectively, in the subject docket, Petitioner was authorized, among other things, to sell and deliver up to 100,000 Mcf of natural gas per day to Southern for a limited term ending November 1, 1965, or until commencement of any new service which resulted from an order issued by the Commission in Docket No. CP63-204, *et al.*, whichever was earlier. The order of March 23, 1965, extended the limited period until November 1, 1966, or until commencement of any new service which resulted from an order issued in said Docket No. CP63-204, *et al.*, whichever is earlier, and limited volumes to 70,000 Mcf per day as requested.

Petitioner and Southern have entered into an agreement, dated August 1, 1966, extending the term of the sale of 70,000 Mcf per day as hereinabove stated. On September 8, 1966, Petitioner tendered for filing the subject service agreement and its proposed Fourth Revised Sheet No. 27-K to its FPC Gas Tariff, Original Volume No. 1.

Due notice of the filing of the application to amend further and opportunity for hearing thereon has been given by publication in the Federal Register on September 2, 1966 (31 F.R. 11627). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

(1) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's orders issued December 16, 1963, and July 29, 1964, as amended on March 23, 1965, in Docket No. CP63-296 be further amended as hereinafter ordered.

(2) Petitioner's service agreement, dated August 1, 1966, and its proposed Fourth Revised Sheet No. 27-K to its FPC Gas Tariff, Original Volume No. 1, tendered for filing on September 8, 1966, should be accepted for filing to become effective on the date this order issues.

The Commission orders:

(A) The Commission's orders issued December 16, 1963, and July 29, 1964, as amended on March 23, 1965, in Docket No. CP63-296 are further amended by authorizing Petitioner to continue the sale and delivery of 70,000 Mcf of natural gas per day to Southern commencing November 1, 1966, and continuing until January 1, 1967, or until the commencement of any new service authorized in Docket No. CP63-204, *et al.*, whichever is earlier, as hereinbefore described and as set forth in the petition to amend further.

(B) Petitioner's service agreement, dated August 1, 1966, and its proposed Fourth Revised Sheet No. 27-K to its FPC Gas Tariff, Original Volume No. 1, tendered for filing on September 8, 1966, is accepted for filing to become effective on the date this order issues.

(C) In all other respects said orders, as amended, shall remain in full force and effect.

Before Commissioners: Carl E. Bagge, Acting Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

NATURAL GAS PIPELINE COMPANY OF AMERICA,
DOCKET NO. CP67-53

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 25, 1966)

On September 7, 1966, Natural Gas Pipeline Company of America (Applicant) filed in Docket No. CP67-53 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of an additional Maximum Daily Quantity (MDQ) of 410 Mcf of natural gas to the City of Perryville, Missouri, (Perryville) an existing customer of Applicant, all as more fully set forth in the application.

Perryville presently purchases its total gas requirements from Applicant and its presently effective MDQ is 2,340 Mcf under Applicant's Rate Schedule G-1.

Specifically, Applicant seeks authorization to increase its presently effective MDQ of 2,340 Mcf of natural gas to Perryville by 410 Mcf, to be effective as of December 1, 1966, thereby enabling Perryville to meet larger than previously anticipated increases in firm service demands for the 1966-67 winter heating season.

No additional facilities will be required to make the proposed delivery.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed herein.

At a hearing held on October 20, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G-235 (3 FPC 830).

(2) The proposed sale of increased volumes of natural gas hereinbefore described, as more fully described in the application in this proceeding, will be a sale of natural gas in interstate commerce subject to the jurisdiction of the

Commission and is subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The sale of increased volumes of natural gas, as proposed in the application, is required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b) and (e) of Section 157.20 of said Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Natural Gas Pipeline Company of America, authorizing the sale of increased volumes of natural gas, as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are further conditioned upon Applicant's filing a revised service agreement to reflect the additional service proposed herein.

(D) The sale of increased volumes of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 6 months from the date of this order.

Before Commissioners: Carl E. Bagge, Acting Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

TOWN OF SABULA, IOWA AND NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP66-397

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued October 25, 1966)

On June 3, 1966, the Town of Sabula, Iowa (Applicant) filed in Docket No. CP66-397 an application, as supplemented on August 2, 1966, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Northern Natural Gas Company (Respondent) to establish physical connection of its transmission facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in the Town of Sabula, Jackson County, Iowa, all as more fully set forth in the application.

Applicant is located on the eastern border of Iowa, approximately one mile south of the terminus of Respondent's existing Savanna branchline in Jackson County, Iowa.

Applicant proposes that Respondent construct approximately one mile of 2-inch lateral pipeline in accordance with the branchline extension policy fixed for Respondent in Opinion No. 324 issued on July 31, 1959 (22 FPC 164). Applicant further proposes to construct a distribution system of intermediate pressure design to provide natural gas service to residential and commercial establishments, to schools, and to an interruptible industrial customer, for cooking, water heating, spaceheating, and other associated uses.

Respondent's lateral facilities to serve Applicant were proposed by Respondent in its application filed in Docket No. CP65-196, and were authorized by the order of the Commission issued in said docket on May 25, 1966 (Opinion No. 491, 35 FPC 790).

Applicant's estimated third year annual and peak day requirements are 39,300 Mcf and 313 Mcf of natural gas, respectively.

The total estimated cost of Applicant's proposed facilities is $117,640, which cost will be financed through the issuance of $118,000 of 25-year gas revenue bonds at 4.5 percent interest rate.

Respondent's responses to the instant application filed on July 11, 1966 and August 29, 1966, did not indicate objection to the issuance of the order as requested.

The Commission finds:

(1) Respondent, Northern Natural Gas Company, a Delaware corporation with its principal place of business in Kansas City, Missouri, is a "natural-gas company" within the meaning of the Natural Gas Act as found by the Commission in its order issued on April 6, 1943, in Docket No. G-280 (3 FPC 967).

(2) Applicant, the Town of Sabula, Iowa, is a municipal corporation incorporated under the laws of the State of Iowa and is legally empowered to construct and operate natural gas facilities and to sell and distribute natural gas in said town.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transmission system with the proposed facilities of Applicant and to sell and deliver up to 313 Mcf of natural gas per day to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 313 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within ten days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

Before Commissioners: Carl E. Bagge, Acting Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

TENNESSEE VALLEY MUNICIPAL GAS ASSOCIATION, ET AL. v. ALABAMA-TENNESSEE NATURAL GAS COMPANY, DOCKET NO. RP66-25

ORDER PROVIDING FOR INVESTIGATION AND HEARING AND DENYING MOTIONS FOR IMMEDIATE RATE REDUCTION PENDING HEARING AND TO DISMISS THE COMPLAINT

(Issued October 25, 1966)

Tennessee Valley Municipal Gas Association (Municipal Association) and its ten individual members* (Municipalities), on June 7, 1966, filed a formal complaint against Alabama-Tennessee Natural Gas Company (Alabama-Tennessee). Alabama-Tennessee filed an answer and a motion to dismiss on July 15, 1966. An Answer in Opposition to Defendant's Motion to Dismiss and Motion of Complainants for Prompt Hearing on Complaint was filed by the Municipal Association and Municipalities on July 25, 1966.

The complaint alleges that the municipalities purchase all their gas requirements for resale from Alabama-Tennessee at the rates at issue, the Alabama-Tennessee's rates for the sale in interstate commerce of natural gas for resale are excessive, unjust, unreasonable, and otherwise unlawful, and that the jurisdictional revenues exceed the jurisdictional cost of service by $285,072 or 2.36 cents per Mcf, out of which .48 cents per Mcf or $58,500 is applicable to the excess of liberalized tax depreciation over straight-line tax depreciation. In support of the allegations, included with the complaint are various computations and schedules, all based on the 1965 Annual Report of Alabama-Tennessee on file with the Commission. The prayer for relief consists of a motion for immediate rate reduction pending hearing, in the amount of $226,000 a year or 1.88 cents per Mcf, and a request that the matter be set for hearing.

Alabama-Tennessee denies the allegation that its rates are unjust or unreasonable or otherwise unlawful. It contends: (1) "It is entitled to a respite from further rate proceedings * * *"; (2) a hearing "would necessarily entail very substantial but needless expenditures of time and money"; (3) "there is no mention in the complaint to the effect that any future rate reductions would be passed on to the ultimate consumers for whose benefit the Natural Gas Act was enacted." A further basis of the motion to dismiss is the statement that rates cannot be fixed upon the basis of unadjusted book figures without giving effect to the normalization of costs.

Upon analysis of the documents filed, it is our view that an investigation should be instituted into the reasonableness of Defendant's rates, and that a public hearing should be held, in order to afford all parties an opportunity to present evidence on the issues presented; and that all matters which can be resolved without a formal hearing should be settled by stipulation, to expedite the hearing. However, there is no basis in the complaint for an immediate reduction pending hearing and decision on complaint.

The Commission finds:

It is necessary and appropriate for purposes of carrying out the provisions of Section 5(a) of the Natural Gas Act that an investigation and hearing be instituted to determine the lawfulness of Alabama-Tennessee's jurisdictional rate.

---

*Athens, Decatur, Florence, Huntsville, Russellville, Sheffield, and Tuscumbia, Alabama; Corinth and Iuka, Mississippi; and Selmer, Tennessee.

The Commission orders:

(A) An investigation hereby is instituted to determine whether the Alabama-Tennessee jurisdictional rates are unjust and unreasonable and a hearing shall be held thereon. If, after hearing, the Commission finds that any rates, charges, classifications, rules, regulations, practices, or contracts are unjust unreasonable, and unduly discriminatory or preferential, the Commission shall thereupon determine, fix and prescribe by appropriate order or orders, just, reasonable, nondiscriminatory, and nonpreferential rates, charges, classifications, rules, regulations, practices or contracts.

(B) Pursuant to the authority contained in, and subject to the jurisdiction conferred upon the Federal Power Commission by the Natural Gas Act, particularly Sections 5, 14, 15 and 16 thereof, and to the Commission's Rules of Practice and Procedure, a public hearing shall be held in a hearing room of the Commission at 441 G Street, N.W., Washington, D.C., concerning the matters specified in Paragraph (A) above.

(C) Pursuant to the Commission's Rules of Practice and Procedure, particularly Sections 1.27, 1.30(j), and 3.4(e)(6) thereof, the Chief Examiner shall designate a hearing officer to preside at the pre-hearing conference hereinafter provided for, and any subsequent pre-hearing conferences and hearings which he may deem appropriate in these proceedings and to render an Initial Decision on the issues.

(D) The following schedule for the service of testimony is hereby prescribed:

November 22, 1966, service of direct testimony by the Complainants.

December 22, 1966, service of direct testimony by Alabama-Tennessee.

March 22, 1967, service of direct testimony by the Commission Staff and all Interveners.

(E) Pursuant to Section 1.18 of the Commission's Rules of Practice and Procedure, a pre-hearing conference before the Presiding Examiner shall commence at 10:00 a.m. (EST) on March 27, 1967, in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., for the purpose of defining the issues, reaching an agreement and stipulation thereon and on any facts relevant to this matter, and, if necessary, to prescribe procedure for hearing herein giving effect to the Commission's intent that this matter be expedited.

(F) Notices of intervention and petitions to intervene may be filed with the Federal Power Commission, Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure, Sections 1.8 and 1.37(f) (18 CFR 1.8 and 1.37(f)), on or before November 15, 1966.

Before Commissioners: Carl E. Bagge, Acting Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

TURLOCK IRRIGATION DISTRICT AND MODESTO IRRIGATION DISTRICT, PROJECT NO. 2299

ORDER APPROVING AGREEMENT

(Issued October 25, 1966)

On May 31, 1966, Turlock Irrigation District and Modesto Irrigation District (Joint Licensees) submitted for Commission approval the "FOURTH AGREEMENT Between THE CITY AND COUNTY OF SAN FRANCISCO and THE

TURLOCK IRRIGATION DISTRICT AND THE MODESTO IRRIGATION DISTRICT" (Fourth Agreement) pursuant to Article 48 of the license for Project No. 2299 (New Don Pedro). The Fourth Agreement allocates the costs to be borne by the Joint Licensees and The City and County of San Francisco (San Francisco); and reiterates the division of storage space in New Don Pedro reservoir previously noted in our Opinion and Order Issuing License, 31 FPC 510, 523.

The proposed New Don Pedro dam and reservoir is a multi-purpose project designed to provide municipal water supply storage for San Francisco, flood control storage, irrigation water supply storage, and power generation. It is anticipated that the completed project will also offer substantial recreation benefits, and that its operation will permit the release of sufficient water into the streambed of the Tuolumne River so as to sustain the river's anadromous fish population during spawning season.

The Fourth Agreement takes cognizance of flood control contributions by the United States and of monies to be granted by the State of California for recreational functions and enhancement of fish and wildlife under the Davis-Grunsky Act (California Statutes of 1965, Chapter 282).

The Fourth Agreement provides that "* * * the Districts shall call for bids for the construction under a single construction contract with unit prices and separate supply contracts * * *". Article 15.

The approval of the Fourth Agreement by the Commission in this order will not make the construction of New Don Pedro dam and reservoir a certainty. Each of the Joint Licensees and San Francisco have provided themselves with an "escape" provision contained in Article 19 of the Fourth Agreement which reads as follows:

> In the event that (a) the estimated costs of the New Don Pedro Project to the Turlock Irrigation District, based on all factors known at that time, exceeds $28,216,904.00, the Turlock Irrigation District, at its option, may declare that the cost of the project exceeds the benefits; (b) the estimated costs of the New Don Pedro Project to the Modesto Irrigation District, based on all factors known at that time, exceeds $15,881,658.00, the Modesto Irrigation District, at its option, may declare that the cost of the project exceeds the benefits; (c) the estimated costs of the New Don Pedro Project to the City, based on all factors known at that time, exceeds $48,423,538.00, the City, at its option, may declare that the cost of the project exceeds the benefits; upon any such declaration the parties hereto agree that no party shall be bound by this agreement.

The Commission finds:

(1) The Fourth Agreement allocates storage space in the New Don Pedro reservoir to San Francisco in accordance with the Commission's finding in its order issuing license [finding (14), 31 FPC 510, 523] that the: "* * * agreement should entitle San Francisco to a maximum of 740,000 acre feet of storage in the New Don Pedro reservoir consisting of 570,000 acre feet of municipal exchange storage and 50 percent of the 340,000 acre feet off-season flood control space * * *".

(2) The allocation of costs by the Fourth Agreement between the Joint Licensees and San Francisco appears to be reasonable.

(3) The Fourth Agreement should be approved insofar as it allocates storage space in, and the construction costs of the New Don Pedro reservoir between San Francisco and the Joint Licensees.

(4) The Fourth Agreement satisfies Article 48 of the license.

The Commission orders:

(A) The Fourth Agreement is approved for the purposes specified in the above findings.

(B) This approval of the Fourth Agreement shall not operate to alter or amend the license in any respect, and shall not in any way constitute a waiver of any part, provision or condition of the license.

(C) Should the Fourth Agreement be subsequently altered or amended, insofar as it relates to the allocation of storage or the allocation of costs, such further agreement shall be filed with the Commission for its approval.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

THE MANUFACTURERS LIGHT AND HEAT COMPANY, DOCKET NO. CP66–347; TEXAS EASTERN TRANSMISSION CORPORATION, CP64–5; TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., CP67–115; TRANSCONTINENTAL GAS PIPE LINE CORPORATION, CP67–116

ORDER TO SHOW CAUSE AND GRANTING MOTION TO CONSOLIDATE

(Issued October 28, 1966)

Subsequent to the issuance of our notice of the application of The Manufacturers Light and Heat Company (Manufacturers) in Docket No. CP66–347, we issued an order granting the petitions to intervene filed by Pennsylvania Gas and Water Company (Penn Gas) and by The United Gas Improvement Company (UGI). In said application Manufacturers proposes to construct facilities estimated to cost approximately $8,735,000 so as to take into its system additional volumes of gas, primarily from Texas Eastern Transmission Corporation (Texas Eastern), and transport and sell additional volumes of gas to existing customers. Included therein are additional volumes for Home Gas Company (Home). Texas Eastern, in its motion filed August 17, 1966, to amend the certificate heretofore issued by the Commission in Docket No. CP64–5, now seeks authorization to increase its deliveries to existing customers including its authorized sales to Manufacturers.

On September 20, 1966, Penn Gas filed a motion seeking to consolidate the application of Texas Eastern in CP64–5 with that of Manufacturers in CP66–347. Texas Eastern in response argues that any consolidation should be limited to its specific proposal of additional sales to Manufacturers. There can be no question that the proposal of Manufacturers is interrelated and dependent upon the application of Texas Eastern. However, we do not think that the other sales proposed by Texas Eastern should become involved in the contested Manufacturers application. We shall therefore sever that portion of Texas Eastern's filing in Docket No. CP64–5 relating to the proposed sale to Manufacturers and consolidate it into the formal proceeding ordered in Docket No. CP66–347.

In its petition to consolidate Penn Gas points out that deliveries by Texas Eastern to Manufacturers will be in the latter's Western Market area and will thence be transported through the proposed new facilities of Manufacturers to its Eastern Market area. Since Texas Eastern is presently making deliveries to Manufacturers in the latter's Eastern Market area and since existing facilities of Tennessee Gas Pipeline Company (Tennessee) and Transcontinental Gas Pipe Line Corporation (Transco) traverse Manufacturers' Eastern Market area and intersect its line at a point in close proximity to Manufacturers delivery point to Home additional deliveries there by Texas Eastern might eliminate the need for the facilities proposed to be constructed by Manufacturers in Docket No. CP66–347.

If reasonable alternatives are or may be available which would eliminate the need for the construction proposed by Manufacturers and at the same time provide the services proposed, it is in the public interest to issue an order consolidating herewith, and directing Tennessee and Transco to show cause why they should not be required to make the requisite sales to Manufacturers and/or Home.

The Commission orders:

(A) The motion filed by Penn Gas is hereby granted in part, to wit: That portion of Texas Eastern's application in Docket No. CP64–5, filed August 17, 1966, dealing with the proposed increased sales to Manufacturers is hereby severed and consolidated with the instant proceeding.

(B) Tennessee Gas Pipeline Company and Transcontinental Gas Pipe Line Corporation are ordered to show cause, pursuant to Section 16 of the Natural Gas Act and as provided by Section 1.6 of the Commission's Rules, why either of the above-named pipelines should not be required to make the sales to Manufacturers and/or Home in the amounts proposed by Texas Eastern and Manufacturers. Hearing on said order is consolidated with the instant proceeding.

(C) Texas Eastern is hereby required to include as part of its presentation evidence as to its ability, among other things, to deliver the proposed volumes to Manufacturers in the latter's Eastern Market area.

(D) Since we have provided for procedures and a hearing date in our order of August 23, 1966, in Docket No. CP66–347, further procedures herein are left to the discretion of the appointed Hearing Examiner.

(E) Additional petitions or notices of intervention must be filed on or before November 14, 1966.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TOWN OF PRESTON, IOWA AND NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP66–396

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued October 28, 1966)

On June 3, 1966, the Town of Preston, Iowa (Applicant), filed in Docket No. CP66–396 an application, as supplemented on August 3, 1966, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Northern Natural Gas Company (Respondent) to establish physical connection of its natural gas transmission facilities with facilities proposed to be constructed by Applicant and to sell and deliver natural gas to Applicant for resale and distribution in the Town of Preston, all as more fully set forth in the application.

Applicant proposes to construct and operate 4.3 miles of 3-inch lateral pipeline between its proposed distribution system and Respondent's Savanna branchline in Jackson County, Iowa. Estimated cost of Applicant's facilities is $136,030, to be financed through the issuance of long term revenue bonds.

Applicant's estimated peak day and annual natural gas requirements in Mcf at 14.73 psia for the first three years of operations are as follows:

	1st year	2d year	3d year
Annual	29,970	89,440	96,950
Peak day	224	293	358

Applicant will purchase the gas under Respondent's Rate Schedule CD-3 from an allocation made by the Commission in the proceeding in Docket No. CP65-196.

On July 11, 1966, Respondent filed an answer, as supplemented on August 29, 1966, and October 24, 1966, in which it urges the granting of the application.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been received.

The Commission finds:

(1) Applicant, the Town of Preston, Iowa, is a municipal corporation organized and existing under the laws of the State of Iowa, and is legally empowered to construct and operate natural gas facilities and to sell and distribute natural gas in the Town of Preston.

(2) Respondent, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G-280 (3 FPC 967).

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant and to sell and deliver to Applicant natural gas for resale and distribution in the Town of Preston.

(4) The requirement that Respondent serve Applicant will not place an undue burden upon Respondent or impair Respondent's ability to render adequate service to its existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant and to sell and deliver to Applicant up to 358 Mcf at 14.73 psia of natural gas per day for resale and distribution in the Town of Preston, Iowa, all as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) Applicant shall be prepared to receive service from Respondent within one year from the date of this order.

(C) Respondent shall report to the Commission in writing the date of commencement of service to Applicant within ten days thereof.

(D) Respondent shall file pursuant to Part 154 of the Regulations under the Natural Gas Act an executed service agreement with Applicant.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

UNITED STATES DEPARTMENT OF THE INTERIOR, BONNEVILLE POWER ADMINISTRATION, DOCKET NO. E-7312

ORDER CONFIRMING AND APPROVING RATE SCHEDULE

(Issued October 28, 1966)

On September 15, 1966, the Assistant Secretary of the Interior, acting on behalf of the Bonneville Power Administration (Bonneville) pursuant to the provisions of the Bonneville Act (50 Stat. 731), as amended, filed a request for Commission approval of the rates contained in Power Sales Contract No. 14-03-64453 for the sale of power by Bonneville to Washington Public Power Supply System (WPPSS) for use at the Hanford Atomic Power Plant. The power will be used for start-up of the steam turbine generators, maintenance during shut-down periods, and other incidental power plant uses.

The contract provides that such service will be at a rate of 2.5 mills per kilowatt-hour subject to approval of the Federal Power Commission. The Assistant Secretary, states that Wholesale Energy Rate Schedule H-4, under which energy is sold at 2.5 mills per kilowatt-hour, which is available for emergency, experimental, research, and testing uses is not specifically applicable to this type of load. However, Bonneville maintains that the intermittent uses of power supplied under contract No. 14-03-64453 are similar to those which can be served under the H-4 rate schedule and therefore it is appropriate that the rate of 2.5 mills per kilowatt-hour be applied.

Bonneville's General Wholesale Power Rate Schedules, which included Rate Schedule H-4, were approved by the Federal Power Commission in its Opinion No. 482 and order issued December 14, 1965, 34 FPC 1462 (Docket No. E-6611, *et al.*), for a period ending December 20, 1969.

The Commission finds:

It is appropriate for the purposes of the Bonneville Act that the rates and charges for the sale of power by Bonneville to Washington Public Power Supply System as referred to above be confirmed and approved.

The Commission orders:

The rate of 2.5 mills per kilowatt-hour for the sale of energy under Contract No. 14-03-64453 by Bonneville to Washington Public Power Supply System, such energy to be used only at the Hanford Atomic Power Plant, is confirmed and approved for a period ending December 20, 1969.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

VOLUNTEER NATURAL GAS COMPANY AND EAST TENNESSEE NATURAL GAS COMPANY, DOCKET NO. CP67-77

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued October 28, 1966)

On September 22, 1966, Volunteer Natural Gas Company (Applicant), filed in Docket No. CP67-77 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing East Tennessee Natural Gas

Company (Respondent) to establish physical connection with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale in Gray, Tennessee, all as more fully set forth in the application.

Applicant seeks a physical connection of its proposed facilities near Gray, Tennessee, with the existing 8⅝-inch lateral of Respondent in Washington County, Tennessee. It is contemplated that Respondent would tap its line and provide a regulating and metering station, as provided by its existing tariff.

The estimated third year annual and peak day requirements of Applicant for Gray, Tennessee are 43,622 Mcf and 506 Mcf respectively, at 14.73 psia.

Applicant estimates that the total cost of the proposed construction is $10,525, which will be financed from cash on hand.

Applicant is legally authorized to construct and operate gas distribution facilities.

Respondent, by letter dated October 17, 1966, indicated that it does not oppose the granting of the application.

Due notice of the filing of the subject application and opportunity for hearing thereon have been given by publication in the Federal Register on October 8, 1966 (31 F.R. 13100). No protest, petition to intervene, notice of intervention or request for hearing has been filed in this proceeding.

The Commission finds:

(1) East Tennessee Natural Gas Company, a Tennessee corporation having its principal place of business in Knoxville, Tennessee, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued August 27, 1963, in Docket No. CP63-313 (30 FPC 607).

(2) Applicant, is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver to Applicant under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations, up to 506 Mcf per day of natural gas for distribution and resale as hereinbefore described and as more fully described in the application in this proceeding.

(4) Applicant should be prepared to receive natural gas from Respondent for distribution in Gray, Tennessee and environs, within one year from the date of the issuance of this order.

(5) The requirement that Respondent serve Applicant, as requested, will not place an undue burden upon it nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) East Tennessee Natural Gas Company, Respondent, is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant, as herein described, and to sell and deliver up to 506 Mcf of natural gas daily to Applicant, under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations, for resale as hereinbefore described and as more fully described in the application in this proceeding. Such service shall be rendered pursuant to Respondent's presently filed appropriate rate schedule.

(B) Respondent shall report to the Commission in writing the date of commencement of service to Applicant within 10 days thereof.

(C) Applicant shall be prepared to receive service as directed herein within one year from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

WOODS OIL AND GAS CO. (OPERATOR), ET AL., DOCKET NO. CI67-261

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING FPC GAS RATE SCHEDULE AND SUPPLEMENT FOR FILING

(Issued October 28, 1966)

On September 2, 1966, Woods Oil and Gas Co. (Operator), *et al.* (Applicant), filed in Docket No. CI67-261 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Plaquemines Oil and Gas Company, Inc., from the Potash Field, Plaquemines Parish, Louisiana, at an initial rate of 15.5 cents per Mcf at 15.025 psia, inclusive of 1.5 cents per Mcf tax reimbursement, all as more fully set forth in the application.

Concurrently with the subject application Applicant submitted a copy of the related gas sales contract which will hereinafter be accepted for filing as Applicant's FPC gas rate schedule.

Applicant has commenced the subject sale without authorization from the Commission. The instant application has been filed pursuant to a request by the Commission based upon *California* v. *Lo-Vaca Gathering Co.*, 379 U.S. 366, in which case the Supreme Court held that the sale of natural gas to an interstate pipeline company, although such gas would contractually be restricted to consumption by the purchaser in its interstate operations, would be a sale of natural gas in interstate commerce for resale when commingled with gas from other sources which would, in fact, be sold outside of the state.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been received.

At a hearing held on October 27, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Woods Oil and Gas Co., is engaged in the sale for resale of natural gas in interstate commerce subject to the jurisdiction of the Commission and is, therefore, a "natural-gas company" within the meaning of the Natural Gas Act.

(2) The sale of natural gas hereinbefore described, as more fully described in the application herein, is made in interstate commerce, subject to the jurisdiction of the Commission, and such sale by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, is subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The sale of natural gas by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, is required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the related contract submitted by Applicant should be accepted for filing and designated as Applicant's FPC gas rate schedule.

The Commission orders:

(A) A certificate of public convenience and necessity is issued upon the terms and conditions of this order authorizing the sale by Applicant of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, all as hereinbefore described and as more fully described in the application in this proceeding.

(B) The certificate granted in paragraph (A) above is not transferable and shall be effective only so long as Applicant continues the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(C) The grant of the certificate issued in paragraph (A) above shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's Regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against Applicant. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contract herein involved. Nor shall the grant of the certificate aforesaid for service to the particular customer involved imply approval of all of the terms of the contract, particularly as to the cessation of service upon termination of said contract, as provided by Section 7(b) of the Natural Gas Act. Nor shall the grant of the certificate aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of the sale of natural gas subject to said certificate.

(D) The grant of the certificate issued herein is upon the condition that no increase in rate shall be filed prior to July 1, 1967, at any price which would exceed the ceiling prescribed for the given area by paragraph (d) of the Commission's Statement of General Policy No. 61-1, as amended.

(E) The contract of September 7, 1956, is accepted for filing and is designated as Woods Oil and Gas Co. (Operator), *et al.*, FPC Gas Rate Schedule No. 1, and the assignment of December 31, 1955, from James C. Woods to Woods Oil and Gas Co. is accepted for filing as Supplement No. 1 to said rate schedule.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

H. M. GILLESPIE, ET AL., DOCKET NOS. RI63-63, RI67-95; H. M. GILLESPIE, DOCKET NOS. RI64-159, RI67-94; EDWIN L. COX, DOCKET NO. RI67-96; SALMON CORPORATION, DOCKET NO. RI64-308

ORDER ACCEPTING NOTICES OF CHANGE IN RATE, AND TERMINATING PROCEEDINGS

(Issued October 31, 1966)

The above-named parties have filed notices of change in rate for a sale of natural gas to Cities Service Gas Company (Cities) in the Kansas Hugoton

Field.[1] The sale is made pursuant to the terms and conditions of Pan American Petroleum Corporation's FPC Gas Rate Schedule No. 84 because each of the parties have executed contracts adopting such terms and conditions.

On April 13, 1966, we issued an order in *Pan American Petroleum Corporation*, Docket No. G–9279, *et al.*, 35 FPC 502, approving a company-wide settlement proposal filed by Pan American, which, *inter alia*, included a settlement rate of 12.5¢ per Mcf of natural gas at 14.65 psia for the sale by Pan American under its FPC Gas Rate Schedule No. 84. Pan American also proposed to amend its contract with Cities to eliminate the price redetermination provision therefrom for twenty-five years and to provide for a definite price escalation of 1.0¢ per Mcf every five years commencing June 23, 1971.

Each of the parties here seeks the same settlement terms as we approved for Pan American's sale to Cities. Each has filed for a 12.5¢ rate and has tendered an executed amendatory agreement which conforms its contract to the provisions of the Pan American settlement.

H. M. Gillespie previously filed for increased rates of 14.5¢ per Mcf of natural gas which were suspended by orders of the Commission in Docket Nos. RI63–63 and RI64–159. Gillespie did not file a motion in accordance with Section 4 of the Natural Gas Act to place the suspended increased rates in effect. Salmon also filed for an increased rate of 14.5¢ per Mcf, which was suspended in Docket No. RI64–308, but has never been made effective. Consequently, acceptance of the subject filings makes termination of those proceedings proper.

For the reasons set forth in an order issued October 31, 1966, in *Northern Pump Company (Operator)*, *et al.*, Docket No. RI63–9, *et al.*, *infra*, p. 800, we think it appropriate to accept the notices of change filed herein. Our action should not be construed as constituting approval of any future rate increases, if any, that may be filed under the subject rate schedules in accordance with and reservation contained therein of the right to file increases under the subject rate schedules, and is without prejudice to any findings or orders of the Commission in any future rate proceedings, including area rate proceedings, or similar proceedings, involving each of the parties' rates and rate schedules.

The Commission orders:

(A) The notices of change in rate and contract amendments filed by the above-named parties to 12.5¢ per Mcf of natural gas at 14.65 psia for the subject sale to Cities are accepted and made effective as of the date of issuance of this order.

(B) The proceedings in Docket Nos. RI63–63, RI64–159 and RI64–308 are severed from the Area Rate Proceeding, Docket No. AR64–1, and terminated, and the proceedings in Docket Nos. RI67–94, RI67–95 and RI67–96 are terminated.

Commissioner Ross *dissenting* for the reasons set forth in his statement accompanying the order in Docket No. RI63–9, *et al.*, Northern Pump Company (Operator), *et al.*, issued October 31, 1966, *infra*, at p. 803.

[1] H. M. Gillespie, FPC Gas Rate Schedule No. 9, Supplement Nos. 2 and 3. H. M. Gillespie, *et al.*, FPC Gas Rate Schedule No. 2, Supplement Nos. 4 and 5. Edwin L. Cox, FPC Gas Rate Schedule No. 2, Supplement Nos. 3 and 4. Salmon Corporation, FPC Gas Rate Schedule No. 1, Supplement Nos. 7, and 8. The filings by Gillespie and Cox were suspended by order issued October 14, 1966, in Docket Nos. RI67–94, RI67–95 and RI67–96 pending action herein.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN PUMP COMPANY (OPERATOR), ET AL.,[1]
DOCKET NO. RI63-9, ET AL.

ORDER CONDITIONALLY ACCEPTING OFFERS OF SETTLEMENT, ACCEPTING NOTICES OF CHANGE IN RATE, REQUIRING REFUNDS, SEVERING AND TERMINATING PROCEEDINGS

(Issued October 31, 1966)

On July 18, 1966, W. E. Bakke Oil Co. (Operator), *et al.*, (Bakke) filed an offer of settlement in Docket No. RI64-574 pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure, and on August 9, 1966, each of the other Respondents to these proceedings filed identical offers of settlement of a sale of natural gas made by them to Cities Service Gas Company (Cities) in the Kansas-Hugoton Field under each of their FPC Gas Rate Schedules.

Respondents in some cases here are assignees under farmout agreements with Pan American Petroleum Corporation (Pan Am), which specifically provide that the assignments are subject to the provisions of the Pan Am-Cities contract (Pan Am's FPC Gas Rate Schedule No. 84). In the other cases respondents have interests covered by separate contracts adopting the terms and conditions of the Pan Am-Cities contract. All of the Respondents and Pan Am thus were selling gas to Cities under the same contract prior to the Pan Am settlement.

On April 13, 1966, 35 FPC 502, we issued an order approving a rate settlement proposal filed by Pan Am which, *inter alia*, included a proposed increased rate reduction from the then presently effective rate, being collected subject to refund, of 14.5¢ per Mcf of natural gas at 14.65 psia to 12.5¢ per Mcf for sales by Pan Am under its FPC Gas Rate Schedule No. 84. Additionally, Pan Am proposed to renegotiate its contract with Cities eliminating the price redetermination clause therefrom for 25 years and providing instead for a definite price escalation of 1.0¢ per Mcf every five years commencing June 23, 1971. Each of the Respondents herein propose the same terms for its interest in the subject sale, and each has filed an executed contract amendment containing the same pricing provisions contained in the Pan Am-Cities renegotiation.

Since the farmouts and additional dedications of Respondents cover only shallow depths, they do not propose to dedicate deeper horizons as Pan Am did in its settlement. Pan Am's company-wide moratorium also would not be applicable, but the contract amendments proposed by Respondent would, in effect, constitute a moratorium for the subject sales.

Each of the Respondents proposes to refund all monies collected subject to refund above the settlement rates. The amount of monies to be refunded is approximately $161,000.00, plus applicable interest.

The Respondents, other than Bakke, propose that the settlement rate of 12.5¢ per Mcf be made effective as of June 23, 1966, and that the refunds be computed accordingly. However, we find no good cause to grant their request, and shall condition our approval of the settlement proposals to require refunds to be computed to the date of issuance of this order.

---

[1] Respondents are Northern Pump Company (Operator), *et al.*, Docket No. RI63-9; John B. Hawley, Jr., Docket No. RI66-10; John B. Hawley, Jr., Trustee, Docket No. RI63-11; Northern Pump Company, Docket No. RI63-12; G. S. and Norma D. Davidson, Docket No. RI63-13; and W. E. Bakke Oil Co. (Operator), *et al.*, Docket No. RI64-574.

We do not generally permit a producer to settle only one of its rate proceedings.[2] However, as indicated above, all of the Respondents here sell gas to Cities under the same terms and conditions. All of them are small producers.[3] For the three Respondents which have only one rate schedule on file, their offers also constitute a company-wide settlement. It is also clear that at least for the future Respondents could obtain the advantages of the Pan American settlement by having their interests covered under Pan Am's rate schedule. In view of these special circumstances, we think it appropriate to accord Respondents the same settlement terms approved for Pan Am's sale to Cities.

We believe that the settlement proposals are in the public interest and shall approve the same. However, we desire to make it clear that acceptance of Respondents' offers of settlement shall not be construed as approval of any future increased rate that may be filed by Respondents under the subject rate schedules and is without prejudice to any findings or order of the Commission in any future proceeding involving Respondents' rates and rate schedules. Additionally, for all of the reasons set forth in *Humble Oil & Refining Company*, Docket No. G–9287, *et al.*, 32 FPC 49, we shall require Respondents to deposit the refund monies in a special escrow account or to commingle the retained refunds with each of its general assets pending future action of the Commission.

The Commission finds:

The proposed settlement of the above-designated proceedings, on the basis described herein, as more fully set forth in the offers of settlement, filed with the Commission by Respondents on July 18 and August 9, 1966, are consistent with the public interest, and approval thereof as made effective and hereinafter ordered is appropriate to carry out the provisions of the Natural Gas Act.

The Commission orders:

(A) The offers of settlement, filed with the Commission by Respondents on July 18 and August 9, 1966, are approved in accordance with the provisions of this order.

(B) The notices of change in rate, reducing the presently effective rate, being collected subject to refund, from 14.5¢ to 12.5¢ per Mcf of natural gas at 14.65 psia as designated in the Appendix are accepted for filing and made effective as of the date of issuance of this order.

(C) Respondents shall compute the difference between the rates collected subject to refund and the settlement rate of 12.5¢ per Mcf of natural gas at 14.65 psia with applicable interest to the date of this order, and shall within 45 days from the date of issuance of this order submit a report to the Commission, with a copy to Cities, setting out the amount of refunds (showing separately the principal and applicable interest) the bases used for such determination, the period covered, and ten days thereafter each shall submit to the Commission a copy of a letter from Cities agreeing to the correctness of such amounts.

---

[2] *Skelly Oil Company*, Docket No. RI60–253, order issued April 4, 1966, 35 FPC 463, and *Union Oil Company of California*, Docket Nos. G–3711 and RI60–450, order issued April 8, 1966, 35 FPC 484.

[3] There are some large producers which sell gas subject to the Pan Am contract, but they have not filed an offer of settlement here.

(D) Respondents shall retain the amounts shown in the report required under paragraph (C) above, subject to further action of the Commission directing the disposition of those amounts.

(E) Each Respondent may deposit the retained refunds in a special escrow account, and shall tender for filing within 60 days of the date of issuance of this order an executed Escrow Agreement, conditioned as set out below, accompanied by a certificate showing service of a copy thereof upon Cities.

Unless notified to the contrary by the Secretary within 30 days from the date of filing thereof, each escrow agreement shall be deemed to be satisfactory and to have been accepted for filing. The escrow agreement shall be entered into between each Respondent and any bank or trust company used as a depository of funds of the United States Government and the agreement shall be conditioned as follows:

(1) Each Respondent, the bank or trust company, and the successors and assigns of each, shall be held and formally bound unto the Federal Power Commission for the use and benefit of those entitled thereto, with respect to all amounts and the interest thereon deposited in the special escrow account, subject to such agreement, and such bank or trust company shall be bound to pay over to such person or persons as may be identified and designated by final action of the Commission and in such manner as may be therein specified, all or any portion of such deposits and the interest thereon.

(2) The bank or trust company may invest and reinvest such deposits in any short-term indebtedness of the United States or any agency thereof, or in any form of obligation guaranteed by the United States which is, respectively, payable within 120 days as the said bank or trust company in the exercise of its sound discretion may select.

(3) Such bank or trust company shall be liable only for such interest as the invested funds described in Paragraph (2) above will earn and no other interest may be collected from it.

(4) Such bank or trust company shall be entitled to such compensation as is fair, reasonable and customary for its services as such, which compensation shall be paid out of the escrow account to such bank or trust company. Said bank or trust company shall likewise be entitled to reimbursement for its reasonable expenses necessarily incurred in the administration of this escrow account, which reimbursement shall be paid out of the escrow account.

(5) Such bank or trust company shall report to the Secretary quarterly, certifying the amount deposited in the bank or trust company for the quarterly period.

(F) If any Respondent elects to commingle the retained refunds with its general assets and use them for business purposes, it shall notify the Secretary of the Commission of its intention so to do within sixty days of the issuance of this order, and shall pay interest on such monies at the rate of 6% per annum from the date of issuance of this order to the date on which they are paid over to the person or persons ultimately determined to be entitled thereto by final action of the Commission.

(G) Upon notification by the Secretary of the Commission that a Respondent has complied with the terms and conditions of this order, the proceedings in its proceedings involved herein shall terminate and shall be severed from the Area Rate Proceeding, Docket No. AR64–1, all without further order of the Commission.

(H) The acceptance by the Commission of Respondents' offers of settlement, is without prejudice to any findings or determinations that may be made in any proceeding now pending, or hereafter instituted by or against each Respondent and is without prejudice to claims or contentions which may be made by each Respondent, the Commission staff, or any affected party hereto, in any proceedings.

Commissioner Ross *dissenting.*

G. S. and Norma G. Davidson	1	7
W. E. Bakke Oil Co. (Operator) *et al*	1	7

Ross, *Commissioner, dissenting:*

Before the Commission is an offer to settle individual sales from the Kansas-Hugoton field at a level which exceeds the established ceiling price applicable to sales from this area. Since this offer does not conform to the Commission's well defined policies for granting exceptions to the ceiling prices, I dissent.

As a general rule, the Commission does not accept prices above the established ceiling. This policy was announced in the Statement of General Policy No. 61–1, issued September 28, 1960, 24 FPC 818. As time passed, carefully circumscribed exceptions of general applicability were announced. These exceptions include the Second, Seventh and Ninth Amendments to the Statement of General Policy, and a very few exceptions in the context of company-wide settlements in which: (1) there were unique circumstances relative to the excepted sale, the most common of which was a distress sale; and (2) there were additional benefits, such as dedication of additional acreage. In no case, however, has the Commission accepted settlements of individual sales in excess of the ceiling. In fact, only seven months ago, the Commission explicitly rejected two such offers, stating: "* * * we believe that an above-ceiling settlement rate should only be considered in the light of a company-wide settlement proposal."[1]

I don't mean to suggest that the Commission's settlement policy should remain inflexible. But I do believe that exceptions should be carefully considered in the light of their precedential impact, and should be given general applicability. However, the order approving this settlement fails to provide an adequate explanation. The order does indicate that those filing the settlement are small producers. Until now, however, the interim ceilings, as well as the just and reasonable ceilings, have been made applicable to small producers. If small producers are to be exempted from producer price regulation by this Commission, it should be announced more clearly and made generally applicable. A piece-meal approach is hardly equitable to all in the class.

---

[1] *Skelly Oil Co.*, Docket No. RI60–250, order issued April 4, 1966; see also *Union Oil of California*, Docket No. G–3711, *et al.*, order issued April 8, 1966.

The order also recites that this is a company-wide settlement for three of the producers because this is their only (jurisdictional) sale. As to those three producers, this could be a rational justification, but what about the other producers who make additional jurisdictional sales whose above-ceiling rates in this field will be approved under the instant settlement?

Finally, the order indicates that these producers could obtain, for the future, the benefits they seek here by having their interests covered by Pan American's applicable rate schedule. This factor serves more to confuse than to illuminate, for if indeed the producers can get what they want without necessitating a precedential break in the Commission's pricing policies, it is difficult to determine why the settlement is being approved. In this connection, it is interesting to note that these producers could have been covered by Pan American's filings from the very beginning. They chose, however, to make separate filings and defended their right to so file through all the stages of a litigated proceeding before this agency.[3] In that proceeding, these producers argued that they could be prejudiced by having their interests covered by Pan American. For example, they contended that Pan American might enter into an overall rate settlement that could be to their disadvantage. (29 FPC 1219) I mention this only to point out that the situation of these producers is not the product of an unfortunate turn of events, but rather the result of a careful, deliberate and hard-fought attempt to disassociate themselves from Pan American's rate filings covering this acreage.

In essence, the majority is giving all the benefits of a prior Pan American company-wide settlement to other producers without insisting on the *quid pro quo* required of Pan American. As additional settlement proposals follow, one could expect further concessions. This approach has the additional infirmity of inhibiting a producer from proposing an initial settlement because he may be required to make concessions not expected of those who settle after him.

To summarize, I dissent to the order accepting the instant settlement because it breaches the established ceiling price for the area involved, and no adequate reasons have been set forth for this policy deviation.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

SINCLAIR OIL & GAS COMPANY, DOCKET NO. CI62-1070

ORDER DENYING MOTION FOR RECONSIDERATION

(Issued October 31, 1966)

On March 29, 1966, Sinclair Oil & Gas Company (Sinclair) filed a motion requesting that the Commission reconsider the propriety of a 15 cents per Mcf price condition imposed in a temporary certificate relating to the sale of certain volumes of natural gas being produced from acreage located in Beaver County, Oklahoma. Sinclair had initially owned the lease to the aforementioned acreage in common with Earl F. Wakefield but had subsequently succeeded to his interest therein. Sinclair is requesting authorization to increase retroactively from 15 to 17 cents per Mcf the price of certain volumes of natural gas produced from this acreage that is already subject to an outstanding permanent certificate issued by this Commission.

---

[3] *Pan American Petroleum Corp.*, Opinion No. 391, 29 FPC 1216 (1963).

Earl F. Wakefield and Sinclair jointly owned the aforementioned acreage in January 1952. On March 16, 1956, Wakefield and Colorado Interstate Gas Company (C.I.G.) entered into a contract with respect to the sale of gas by Wakefield to C.I.G. from several large tracts of land in this area that Wakefield had under lease. Wakefield dedicated to the aforementioned contract with C.I.G. his interest to the gas produced from the acreage in which he and Sinclair shared a common lease. A certificate authorizing Wakefield to sell the gas produced from the interests that he had dedicated under this contract was issued by the Commission on December 27, 1956, in the proceeding entitled Earl F. Wakefield in Docket No. G–10328 (16 FPC 1475). In May of 1957, Wakefield commenced to make deliveries to C.I.G. pursuant to the aforementioned certificate. The acreage that Wakefield owned jointly with Sinclair remained undeveloped at this time; hence, the deliveries made to C.I.G. pursuant to this certificate were not from production attributable to this acreage. In 1961, Sinclair succeeded to Wakefield's interest in the above-noted common acreage. Sinclair maintains that at that time it was not aware that Wakefield had committed interests in the production from this acreage to C.I.G. It was able, however, to secure releases from C.I.G. of the interests to the production underlying this acreage that had been committed to that company by Wakefield. This acreage was recommitted by Sinclair to C.I.G. under a contract fixing a base price of 17 cents per Mcf. The initial contract between Wakefield and C.I.G. established a base price of 15 cents per Mcf.

It is clear that Sinclair's succession to the Wakefield interest in the acreage that they jointly held was subject to the permanent certificate that was outstanding at the time they acquired the Wakefield interest. The releases secured by Sinclair from C.I.G. cannot terminate or alter the terms of the permanent certificate issued by the Commission to Wakefield in Docket No. G–10328. Accordingly the Motion for Reconsideration filed by Sinclair must be denied.

The Commission finds:

(1) All of the leasehold interests committed to the contract dated March 15, 1956, between Colorado Interstate Gas Company and Earl F. Wakefield, were dedicated to the public as a result of the issuance of a permanent certificate by the Commission to Earl F. Wakefield in Docket No. G–10328 authorizing the sale of natural gas produced under these interests and the subsequent commencement of deliveries in 1957 by Wakefield to Colorado Interstate Gas Company of natural gas produced from said acreage.

(2) The succession by Sinclair Oil & Gas Company to Wakefield's interests in their joint leasehold was subject to Earl F. Wakefield's outstanding certificate issued in Docket No. G–10328 on December 27, 1956.

The Commission orders:

The motion for reconsideration filed by Sinclair Oil & Gas Company in Docket No. CI62–1070 on March 29, 1966 is denied in all respects.

Commissioner Carver *not participating.*

ALABAMA-TENNESSEE NATURAL GAS COMPANY, DOCKET NOS. CP65-197 AND CP66-211

ORDER ADOPTING INITIAL DECISION OF THE PRESIDING EXAMINER

(Issued November 1, 1966)

Syllabus

In a proceeding arising under Section 7 of the Natural Gas Act, Commission *amends* prior order to provide increased deliveries of gas to Ford Motor Company and *issues* certificate of public convenience and necessity authorizing construction and operation of facilities to increase applicant's daily system delivery capacity.

Albert J. Feigen for Alabama-Tennessee Natural Gas Company.

Reuben Goldberg and *Allan Friedson* for City of Florence, Alabama.

Agnes Mae Wilson for the Staff of the Federal Power Commission.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

On September 29, 1966, the Presiding Examiner, Alvin A. Kurtz, issued an initial decision herein under Section 7 of the Natural Gas Act granting certificates of public convenience and necessity to the Alabama-Tennessee Natural Gas Company for the sale and delivery of additional gas to the Ford Motor Company and for the construction and operation of facilities to increase its daily system delivery capacity to meet present and future demand. No exceptions have been filed to the examiner's decision within the 30-day time period provided in our regulations.

The Commission further finds:

Upon consideration of the entire record in these proceedings, including the evidence adduced, the briefs filed, and the presiding examiner's initial decision, said decision should be adopted as the decision of the Commission in this case.

The Commission orders:

The initial decision of the presiding examiner issued herein on September 29, 1966, is hereby adopted and such decision shall become effective as the decision of the Commission as of the date of issuance of this order.

INITIAL DECISION

OF THE PRESIDING EXAMINER UPON APPLICATIONS FOR CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY UNDER THE NATURAL GAS ACT

(Issued September 29, 1966)

KURTZ, *Presiding Examiner:* Alabama-Tennessee Natural Gas Company (Applicant) seeks by petition to amend the Commission's order issued April 30, 1965, in Docket No. CP65-197 (33 FPC 905) to authorize the sale of an additional 700 Mcf of gas per day to the Ford Motor Company,[1] and for a certificate of public convenience and necessity in Docket No. CP66-211 to construct and operate additional facilities to increase its daily system delivery capacity by 6,230 Mcf[2] of natural gas to meet its present and future demand.

---

[1] No additional facilities are required to enable Applicant to deliver this additional volume of gas.

The petition and application were consolidated for hearing which was held and final briefs were filed August 29, 1966. The City of Florence, Alabama, an intervener, opposes the issuance of a certificate in Docket No. CP66–211 for the construction of facilities on the grounds that the additional facilities are not needed at this time to meet Applicant's requirements. The Staff of the Commission supports Applicant's claimed need for such additional facilities.

Applicant's system extends for a distance of approximately 134 miles from the southern part of the State of Tennessee, across the northeast corner of Mississippi to Huntsville, Alabama. The main line facilities consist of pipe sizes from 12¾ inches to 6⅝ inches and the service laterals ranging in sizes from 8⅝ inches to 2⅜ inches. On this system are two compressor stations, one at Sheffield and another at Decatur, Alabama, with a rated horsepower of 14,000 and 700, respectively. Applicant proposes to install an additional 6⅝ inch lateral of 8.3 miles from its main line to Athens, Alabama, which will parallel the existing 3½ inch line of 8.2 miles now serving Athens, and an additional 350 horsepower compressor unit at its Decatur compressor station and a metering station for delivering gas to Amoco Chemicals Corporation, a new customer. It is estimated that the cost of the additional facilities including $30,000 for intangibles will be $418,000. This cost will be financed from internal sources and bank loans, pending the sale of additional bonds. No change in rates is proposed as a result of this expansion.

The optimum 24 hourly delivery capacity of Applicant's system is 142,070 Mcf, which is sought to be increased to 148,365 Mcf. Applicant states that these rates of flow are required during peak hours to meet a daily demand of 112,340 Mcf and 118,570 Mcf, respectively. Included in the daily demand volumes is 650 Mcf for company use. The proposed increase includes 3,000 Mcf of unallocated capacity available for unanticipated demands and future market requirements. At the time of the hearing, inquiry had been made by two potential industrial customers for 2,000 Mcf of gas per day.

The demands for gas off Applicant's system has steadily increased since its first year of operation in 1950 and it is anticipated the demand for gas in the area served will continue to increase.[3]

The total peak day requirements for 1965, and as projected through 1969, for the present customers plus the Amoco Chemical Corporation are uncontradicted and as follows:

	1965 (Mcf)	1966 (Mcf)	1967 (Mcf)	1968 (Mcf)	1969 (Mcf)
Sales for resale	74, 367	89, 710	92, 120	94, 415	96, 920
Direct sales	18, 800	20, 500	22, 800	22, 800	22, 800
Company use	524	650	650	650	650
Total	93, 691	110, 860	115, 570	117, 865	120, 370

---

[2] The Mcf volumes referred to herein are measured at 14.73 psia at 60° Fahrenheit.

[3] The Commission in its Opinion No. 417, 31 FPC 208, relating to the treatment of liberalized depreciation for Federal income taxes, issued February 3, 1964, pointed out that Applicant's Form 2 Annual Reports, on file show that its sales have increased from 9,504,752 Mcf in 1954 to 20,807,306 Mcf in 1962, a substantial growth in demand for its service, and concluded that it was reasonable to assume that the pattern of growth in demand and plant capacity with respect to Applicant will continue for the reasonably foreseeable future.

The annual requirements for 1965 and as projected through 1969 [4] including sales of interruptible gas which are not included in the above peak day requirements are as follows:

	1965 (Mcf)	1966 (Mcf)	1967 (Mcf)	1968 (Mcf)	1969 (Mcf)
Sales for resale	12, 101, 270	12, 914, 200	13, 587, 300	14, 113, 000	14, 581, 200

The City of Florence, Alabama, a resale customer of Applicant, claims the additional facilities are not required for the 1966–1967 winter season. Florence is concerned about the adverse impact on its cost of gas purchased especially as Applicant competes with Florence for markets through Central Gas Company, a wholly-owned subsidiary. This subsidiary received on April 1, 1965, a certificate of public convenience and necessity from the Alabama Public Service Commission authorizing a connection in Alabama, with Tennessee Gas Pipeline Company for service in Lauderdale County, Alabama, and service commenced in 1966.[5] No service connection exists between Applicant and Central Gas Company.

The basis of Florence's claim is the past three years experience of Applicant in meeting its peak requirements. Florence points out that during the peak day of January 29, 1966, the maximum hourly sendout exceeds by 5.8 percent the average sendout and for the peak day of January 16, 1965, 8.9 percent, and for the peak day of January 13, 1964, 11 percent. On the basis of noncoincidental peak day demands, the composite maximum hourly sendout exceeds the hypothetical average sendout by 7.9 percent for the 1965-1966 winter, 11.4 percent for 1964-1965 winter and 14.7 percent for the 1963-1964 winter. The City also maintains that Applicant has available and uses a flexibility due to line pack in its system to meet hourly variations in sendouts. This flexibility was arrived at by considering Applicant's hourly purchases as compared with the hourly sendouts on the peak day.

According to the engineering witness for Florence, for the coming winter, the highest hourly sales would be 5,486 Mcf against a present 5,920 Mcf per hour capability. Thus he concluded that to meet a daily demand of 118,570 Mcf, Applicant needs a pipeline capacity of 131,664 Mcf. This capacity figure was not reduced by possible use of line pack in meeting the hourly variations as he had not made the required study. Further he made no adjustments to reflect the design mean temperature of 10° Fahrenheit.

Applicant designs its system to meet requirements at a mean temperature 10° Fahrenheit and a maximum hourly flowing capability of 5.3 percent of maximum daily delivery obligations as to resale customers and 5 percent of maximum day delivery obligation as to direct industrial customers. The 5.3 percent of maximum daily delivery obligation for resale customers is a judgment factor and the 5 percent for direct industrial customers is the contract obligation. The resale customers are permitted to purchase 6 percent of their maximum daily contract volume during any hour. The use of the 5.3 percent factor results in a pipeline capacity of 27.2 percent over Applicant's daily maximum obligations, which is the above referred to 148,365 Mcf capacity.

---

[4] The estimates of the volumes for future years are based on a degree day deficiency of 3,277. The degree day deficiency for 1965 was 3,147 and in 1963 it was 3,546.

[5] Pursuant to Section 1(c) of the Natural Gas Act, the Commission issued on October 21, 1965, 34 FPC 1183, an order declaring Central Gas Company exempt from the provisions of the Natural Gas Act.

Applicant points out that the peak days of January 29, 1966 and January 16, 1965 occurred on a Saturday and if the same temperature conditions had occurred during a work week, the hourly demands for gas would have required the additional volumes of gas determined by the 5.3 percent factor. During the peak periods that did occur several of the customers' hourly takes did exceed the volumes represented by the 5.3 percent factor. Athens, on January 16, 1965, reached an hourly take of 7.25 percent above the volume 2,014 Mcf taken on that day. In the operation of the system, in addition to the variations in hourly temperatures in the territory served, Applicant has experienced decreased pressures relating to the gas purchased from Tennessee Gas Pipeline Company and an erratic use by Athens of its peak shaving facilities.

At the present time Athens is served by means of a 8.2 mile 3½ inch lateral to meet a daily authorized volume of 2,000 Mcf which volume is proposed to be increased to 2,100 Mcf for this coming winter. It is apparent that the immediate winter demand of Athens could be met by the construction of a smaller lateral than the 6⅝ inch proposed. The demands for gas in Athens are expected to materially increase as a result of the announced plan of the Tennessee Valley Authority to build an Atomic Plant in the area. This will have an effect on industry coming into the area and considering the proposed growth, the 6⅝ inch lateral is justified.

It may be possible for Applicant to meet its demands for this coming winter of the firm customers from existing facilities. However, it does not appear advisable to chance such a close margin. Should the customers call on Applicant to meet the full contract commitments, Applicant would not be in a position to meet their demands. Applicant is faced with the continuing growth in the demand for gas off its system and further increase in capacity will be required in the immediate future to meet its firm demands for gas. Applicant is not faced with the question of idle capacity as approximately 20 percent of its annual sales are made subject to interruption and a market exists for any excess gas that might be available on Applicant's system. Considering the conditions of service that Applicant has experienced and as anticipated, the additional facilities are necessary.

ADDITIONAL FINDINGS AND CONCLUSIONS

Upon consideration of the record and the briefs filed in this proceeding, it is found and concluded in addition to the findings and conclusions heretofore stated that:

(1) Applicant, Alabama-Tennessee Natural Gas Company, a Delaware Corporation having its principal place of business in Florence, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 2, 1948, in Docket No. G–585 (7 FPC 257).

(2) The facilities described in Applicant's amendment to its application in Docket No. CP66–211 are to be used in the transportation and sale of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and delivery of natural gas, as more fully described in the applications in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed in its applications in Docket Nos. CP65–197 and CP66–211 and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The sale and delivery of natural gas as proposed by Applicant in its petition to amend the Commission's order issued on April 30, 1965, in Docket No. CP65-197, and the construction and operation of the facilities proposed by Applicant in its amendment to the application filed in Docket No. CP66-211 on June 14, 1966, are required by the public convenience and necessity and certificates therefor should be issued.

(5) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c) (3), (c) (4), and (e) of Section 157.20 of said Regulations.

ORDER

WHEREFORE, *It is ordered*, subject to review by the Commission:

(A) Certificates of public convenience and necessity hereby are issued to Alabama-Tennessee Natural Gas Company for the sale and delivery of natural gas to the Ford Motor Company as requested in the petition to amend the order issued in Docket No. CP65-197, and for the construction and operation of the facilities and delivery of gas referred to above and as more fully described in the amended application in Docket No. CP66-211, subject to the terms and conditions of this order.

(B) The general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), and (e) of Section 157.20 of the Commission's Regulations under the Natural Gas Act shall attach to this issuance of the certificates to Alabama-Tennessee Natural Gas Company.

(C) The construction authorized in Docket No. CP66-211 shall be completed within six months from the date of the issuance of this certificate.

ALVIN A. KURTZ,
Presiding Examiner.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP67-45

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 1, 1966)

On August 25, 1966, El Paso Natural Gas Company (Applicant) filed in Docket No. CP67-45 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued operation of certain existing facilities which are presently being used in the sale and delivery of natural gas to Citizens Utilities Company (Citizens) in the Nogales, Arizona area, all as more fully set forth in the application.

Pursuant to the authority granted by the Commission in Docket Nos. G-1051 and G-1079 on September 10, 1948, 7 FPC 908, and in Docket No. G-11560 on May 14, 1957, 17 FPC 681, Applicant sells and delivers natural gas to Citizens for resale and distribution in the Nogales, Arizona area. Such sales and deliveries are made at the outlet of Applicant's Nogales meter station, situated at the terminus of Applicant's Nogales lateral, and were first initiated on December 21, 1948. Thereafter, by terms of a Gas Sales Agreement dated March 22, 1949, Applicant agreed to sell and deliver natural gas to Citizens for use in the operation of its electric generating plant situated near Nogales, Arizona. In order to effectuate such sale and delivery, Applicant constructed, and on May 23, 1949, placed in operation, a meter station at a point approximately 3,200 feet upstream of the terminus of the Nogales lateral. To receive the volumes of gas to be delivered under said agreement, Citizens constructed and placed in operation approximately 1.3 miles of 4-inch O.D. feeder line extending from Applicant's power plant meter station to the site of Citizens' said power plant.

Applicant has been made aware of the fact that construction and operation of the meter station serving Citizens' power plant were undertaken without certificate authorization. Moreover, Applicant has recently been informed that, subsequent to initiation of the power plant deliveries, Citizens installed a distribution lateral extending from its power plant feeder line and commenced the sale of gas to consumers in the Nogales area. In consequence of these matters, Applicant seeks certificate authorization for the continued operation of the plant meter station.

Applicant proposes to continue the sale of gas for use in Citizens' power plant and the sale of gas for resale by Citizens from its power plant feeder line. Applicant's present service agreement limits resale volumes to Citizens to 2,760 Mcf of gas per day. The related industrial contract presently on file specifies power plant deliveries of 700 Mcf of gas per day. Applicant estimates future peak day requirements of the power plant to be 814 Mcf.

Applicant proposes no change in rates. It will continue to sell gas to Citizens, under its Rate Schedules A-1 and B-1 for resale.

The total original cost of the subject power plant meter station was $3,701.20 and the corresponding accumulated reserve for depreciation was $1,929.07 as of December 31, 1965.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed herein.

At a hearing held on October 27, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation with its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 29, 1942, in Docket Nos. G-242 and G-257 (3 FPC 851).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (e), and (f) of Section 157.20 of such Regulations.

(6) The certificate hereinafter issued should be conditioned upon the filing by Applicant of a revised service agreement with Citizens reflecting the subject delivery point.

(7) Deliveries of natural gas to Citizens for electric power generation should be limited to 814 Mcf per day.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, El Paso Natural Gas Company, authorizing the continued operation of the existing facilities hereinbefore described, as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), and (f) of Section 157.20 of such Regulations.

(C) The certificate issued by paragraph (A) above is conditioned upon the filing by Applicant of a revised service agreement with Citizens reflecting the subject delivery point.

(D) The certificate issued by paragraph (A) above is further conditioned upon the limitation of deliveries of natural gas to Citizens for electric power generation to 814 Mcf per day.

(E) This certificate shall not entitle the industrial customer to whom firm deliveries are authorized herein, to any priorities to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring additional gas to meet any future increase in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

LONE STAR GAS COMPANY, DOCKET NO. CP67-56

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 1, 1966)

On September 7, 1966, Lone Star Gas Company (Applicant), filed in Docket No. CP67-56 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities, extending its existing system for the transportation of natural gas, to the city gates of the City of Avery and the Town of Annona in Red River County, Texas, all as more fully set forth in the application.

Applicant proposes the construction and operation of (1) approximately 16.2 miles of 3-inch transmission line E-30 extending from Line E in a southeasterly direction to a city gate measuring station to be installed near the City of Avery; and (2) approximately 50 feet of 3-inch Line E-30-1 extending from a point on proposed Line E-30 in a southeasterly direction to a city gate measuring station to be installed near the Town of Annona.

Applicant proposes to construct and operate natural gas distribution systems in both Annona and Avery for which franchises have been obtained. The estimated third year peak day and annual requirements for Annona are 193 Mcf and 10,585 Mcf, respectively, and for Avery are 305 Mcf and 16,483 Mcf, respectively.

Applicant estimates the approximate cost of natural gas pipeline transmission facilities at $134,213, the city gate measuring stations at $4,704, and the two local distribution systems at $79,000, all of which will be financed from working capital.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 27, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorizations sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Lone Star Gas Company, a Texas corporation having its principal place of business in Dallas, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 11, 1944, in Docket No. G-442 (4 FPC 565).

(2) The proposed construction and operation of facilities by Applicant as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid construction and operation of facilities are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders.

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding authorizing the construction and operation of facilities as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

MISSISSIPPI RIVER TRANSMISSION CORPORATION, DOCKET NO. G-18686

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 1, 1966)

On August 31, 1966, Mississippi River Transmission Corporation (Petitioner), filed in Docket No. G-18686 a petition to amend the order issued in the instant docket on June 30, 1959, 21 FPC 917, by authorizing Petitioner to deliver for sale natural gas on both firm and interruptible basis to Armour Agricultural Chemical Company (Armour), an existing direct sale customer of Petitioner now only receiving interruptible service, all as more fully set forth in the petition to amend.

Pursuant to the Commission's order issued June 30, 1959, in the instant proceeding to Petitioner's predecessor in interest, Mississippi River Fuel Corporation, Petitioner is presently authorized to transport for sale to Armour, for use in its commercial plant near Crystal City, Missouri, a daily average of up to 13,000 Mcf of natural gas on an interruptible basis. Armour has requested the delivery henceforth of 8,400 Mcf per day of its supply on a firm basis, this quantity representing the approximate portion of its total natural gas requirements utilized as raw material. Armour and Petitioner have entered into a letter agreement dated August 17, 1966, providing for new firm and interruptible gas contracts, with the firm contract calling for a contract demand of 8,400 Mcf per day and the interruptible contract for an estimated daily maximum of 6,600. The 15,000 Mcf aggregate quantity in the proposed contracts reflects that on individual days total plant requirements may exceed 13,000 Mcf, but that as in the past, average daily deliveries over a contract year will not exceed 13,000 Mcf.

Petitioner states that no additional facilities are required by Applicant in order to effectuate the instant proposal.

Due notice of the filing of the application to amend and exhibits thereto and opportunity for hearing thereon has been given by publication in the Federal Register on September 14, 1966 (31 F.R. 12029). No protest or petition to intervene has been filed in this proceeding concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued June 30, 1959, in Docket No. G-18686 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued June 30, 1959, in Docket No. G-18686 is amended so as to authorize Petitioner to transport and deliver to Armour and Company up to 8,400 Mcf daily on a firm basis and up to 6,600 Mcf daily on an interruptible basis with total deliveries over the contract year limited to a daily average of 13,000 Mcf.

(B) The amended authorization issued by paragraph (A) above shall not entitle the industrial customer to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in its requirements.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NATURAL GAS PIPELINE COMPANY OF AMERICA,
DOCKET NO. CP67-42

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 1, 1966)

On August 24, 1966, Natural Gas Pipeline Company of America (Applicant), filed in Docket No. CP67-42 an application pursuant to Sections 7(c) and 7(b) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of new sales facilities on Applicant's existing Sycamore branch lines for the continuation of deliveries of gas to Northern Illinois Gas Company's (Northern Illinois) DeKalb-Sycamore, Illinois market area, and authorization for the abandonment of the existing facilities now used for deliveries to said market area, all as more fully set forth in the application.

Applicant proposes to abandon existing metering facilities, and to abandon by sale to Northern Illinois 1.10 miles of the Sycamore Branch 6-inch and 10-inch pipelines and to construct and operate a new measuring and regulating station 1.10 miles upstream from the existing station, all in the DeKalb-Sycamore, Illinois market area.

The application states that the metering facilities must be replaced in order to measure the increasing volumes required by the DeKalb-Sycamore area and residential growth enveloping the area traversed by the pipelines. Northern Illinois will operate the pipelines as part of its distribution system.

The estimated cost of Applicant's proposed construction of delivery facilities is $35,000, which cost will be met from funds on hand. The pipelines will be sold to Northern Illinois at the depreciated book cost at the time of sale.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on October 27, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G-235 (3 FPC 830).

(2) The proposed construction and operation of facilities by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of facilities by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) The facilities to be abandoned, as hereinbefore described, and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(6) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered.

(7) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Natural Gas Pipeline Company of America, authorizing the construction and operation of facilities as hereinbefore described, and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f), and (g) of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations, by January 1, 1967.

(D) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted.

(E) Applicant shall advise the Commission of the date of abandonment of said facilities within 10 days thereof.

(F) The subject sale of facilities to Northern Illinois shall be recorded in accordance with the provisions of Gas Plant Instruction 5, and the text of Account 102, Gas Plant Purchased or Sold, of the Uniform System of Accounts prescribed for Natural Gas Companies.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP67-66

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 1, 1966)

On September 19, 1966, Natural Gas Pipeline Company of America (Applicant) filed in Docket No. CP67-66 an application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and the operation of miscellaneous gas purchase facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new supplies of natural gas in various producing areas located in the vicinity of said system.

The total cost of facilities covered by this application will not exceed a maximum of $2,000,000, with no single project to exceed a cost of $500,000, which costs are proposed to be financed out of funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 27, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G-235 (3 FPC 830).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Natural Gas Pipeline Company of America, to construct during the calendar year 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-65

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 1, 1966)

On September 16, 1966, Northern Natural Gas Company (Applicant) filed in Docket No. CP67-65 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing the construction and operation of other natural gas facilities in order to establish a new delivery point for the delivery of natural gas by Applicant to Central Natural Gas Company (Central) for resale and distribution in Vermillion, South Dakota (Vermillion), all as more fully set forth in the application.

Specifically, Applicant proposes to abandon and remove approximately 0.42 mile of 4-inch branchline and to relocate the town border station presently serving Vermillion. Applicant further proposes to construct a new town border station for Vermillion on Applicant's 6-inch and 8-inch Yankton, South Dakota branchline, approximately 0.42 mile north and 0.25 mile east of the existing town border station.

There will be no change in the presently authorized contract demand of 2,100 Mcf of gas per day for service to Vermillion.

Construction of the proposed new town border station is required by commercial and residential development in the area of the present station and will also enable Central to readily interconnect its pipeline supply with its new peak shaving plant.

The total estimated cost of Applicant's proposed project is $22,290, of which Central will finance $7,000, and Applicant the remainder.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on October 27, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation with its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) The proposed abandonment of facilities by Applicant is subject to the provisions of Subsection (b) of Section 7 of the Natural Gas Act.

(6) The proposed abandonment of facilities by Applicant is permitted by the public convenience and necessity, and approval therefor should be granted as hereinafter ordered and conditioned.

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Northern Natural Gas Company, authorizing construction and operation of the facilities hereinbefore described, as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Regulations under the Natural Gas Act, by January 1, 1967.

(D) Permission for and approval of the proposed abandonment of facilities by Applicant are granted.

(E) Applicant shall advise the Commission of the date of the abandonment of said facilities within 10 days thereof.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CUMBERLAND AND ALLEGHENY GAS COMPANY, DOCKET NO. CP67-63

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 4, 1966)

On September 13, 1966, Cumberland and Allegheny Gas Company (Applicant), filed in Docket No. CP67-63 an application pursuant to Section 7(c) of the Natural Gas Act for an order of the Commission authorizing the construction and operation of facilities to transport volumes of natural gas in interstate commerce, all as more fully set forth in the application.

Applicant requests authority to construct and operate a main line tap on Transmission Line No. 8000 in McCoole District No. 31, Allegany County, Maryland. Applicant also seeks authority to construct and operate approximately 2.3 miles of 6-inch gas pipeline which will extend from the above-mentioned tap to a point near Keyser in New Creek District, Mineral County, West Virginia, for the purpose of serving the retail natural gas requirements of Keyser Industrial Park and to provide reliable service to meet existing and anticipated expanding future requirements of Applicant's distribution system in the area of Keyser, West Virginia.

Keyser Industrial Park, near Keyser, West Virginia, is being promoted by State and County Agencies as an attractive site for industrial development. Flex-O-Lite Manufacturing Corporation, a subsidiary of General Steel Industries, is building a plant in Keyser Industrial Park. The estimated peak day and annual requirements for the first three years of operation of this plant are:

	1st year	2d year	3d year
Peak day (Mcf)	600	800	1,000
Annual (Mcf)	172,000	223,000	273,000

The total estimated cost of the proposed facilities is $98,000 which cost will be financed by the sale of bonds and/or common stock to Applicant's parent company, The Columbia Gas System, Inc.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application and amendment has been filed.

At a hearing held on November 3, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Cumberland and Allegheny Gas Company, a West Virginia corporation having its principal place of business in Pittsburgh, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued January 5, 1966, in Docket No. G-387 (4 FPC 472).

(2) The proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application and exhibits filed in this proceeding, are sub-

ject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and the transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 and Section 155.1 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of facilities and the transportation of natural gas in interstate commerce, as hereinbefore described, all as more fully described in the application and exhibits filed in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 and Section 155.1 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be completed and placed in operation by January 1, 1967.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP67-74

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 4, 1966)

On September 21, 1966, El Paso Natural Gas Company (Applicant), filed in Docket No. CP67-74 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities necessary to augment the capacity of existing facilities utilized for the receipt and transportation of gas in the Wassom area Yoakum County, Texas, all as more fully set forth in the application.

Applicant proposes to construct and operate (1) 1.1 miles of 20-inch O.D. pipeline, (2) 0.6 mile of 10¾-inch O.D. discharge pipeline extending to a point on Applicant's Permian-San Juan Crossover Line about 3.5 miles downstream from Plains Compressor Station, (3) one additional 3,400 horsepower reciprocating compressor unit in Applicant's Wassom Compressor Station, (4) a new 33,000 Mcf per day dehydration plant, metering, purification and appurtenant facilities.

The total estimated cost of Applicant's proposed construction is $3,010,559, and will be financed out of working funds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 3, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 29, 1942, in Docket Nos. G-242 and G-257 (3 FPC 851).

(2) The proposed construction and operation of facilities, as hereinbefore described, and as more fully described in the application and exhibits in this proceeding are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon El Paso's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (3)(4), (e), (f), and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant, El Paso Natural Gas Company, in this proceeding authorizing the construction and operation of facilities, as hereinbefore described and as more fully described in the application and exhibits herein, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized to be constructed and operated by Applicant shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 6 months of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

IDAHO POWER COMPANY, DOCKET NO. E-7309

ORDER AUTHORIZING ISSUANCE OF PROMISSORY NOTES

(Issued November 4, 1966)

Idaho Power Company (Applicant), an electric utility incorporated under the laws of the State of Maine and qualified to do business in the States of Idaho, Oregon and Nevada, filed an application on September 8, 1966, with the Federal Power Commission seeking an order pursuant to Section 204 of the Federal Power Act authorizing it to make short-term borrowings of up to an aggregate of $40,000,000.

Applicant proposes to issue new and/or renewal notes from time to time before or on December 31, 1967. The notes are expected to have maturities of six months from dates of issuance, with no maturities of over one year. These notes will evidence bank loans which Applicant represents will be at the current rate of interest applicable in New York, New York, at the time of borrowings for commercial bank loans of said form and character. No finder's fee or other fee, commission or remuneration is to be paid in connection therewith to any third person for negotiating the transactions.

The new notes are to be issued to furnish temporary, interim capital for the Applicant's construction program for the last half of 1966 and for 1967. This program has an estimated cost of $58,683,000, of which $34,506,000 will be for continuation of work on the Hells Canyon Development, $7 million for transmission lines, and $2.4 million for transmission substations. Although the Applicant has requested authorization to issue up to $40,000,000 notes outstanding at any one time, it has estimated that the maximum amount of notes to be outstanding at any one time will not exceed $32,000,000, assuming the issuance of additional fixed capital securities. However, should market or other conditions cause a delay in or postponement in long-term or permanent financing, the Applicant has stated that it may find it necessary to issue short-term notes up to the full amount of $40,000,000, in order to avoid delay and additional cost in the construction of new service facilities.

Written notice of the application has been given to the Idaho Public Utilities Commission, the Nevada Public Service Commission and the Oregon Public Utility Commissioner and to the Governor of each of those States. Notice has also been given by publication in the Federal Register on September 24, 1966 (31 F.R. 12618), stating that any person desiring to be heard or to make any protest with reference to the application, shall file petitions or protests on or before October 5, 1966, with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received. The Idaho Public Utilities Commission has issued an order authorizing this proposed issuance of short-term notes.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued November 7, 1957, *Idaho Power Company*, Docket No. E-6781 (18 FPC 603).

(2) The proposed issuance of Promissory Notes in the aggregate principal amount of $40,000,000, all as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) The proposed issuance of Promissory Notes in the aggregate principal amount of $40,000,000, all as described above, will be in excess of 5% of the par value of the other securities of Applicant, and, therefore, will not be exempt by virtue of Section 204(e) from the requirements of Section 204(a) of the Act.

(4) Applicant is not organized and operating in a State, under the laws of which the issue here involved is regulated by a State Commission within the meaning of Section 204(f) of the Act, and the proposed issuance is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(5) The proposed issuance of Promissory Notes will be exempt from the competitive bidding requirements of Section 34.1a of the Commission's Regulations under the Federal Power Act by reason of paragraph 34.1a(a)(2).

(6) The proposed issuance of securities, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance of service by Applicant as a public utility, and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

(7) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) The proposed issuance of Promissory Notes in the aggregate principal amount of $40,000,000 outstanding at any one time, whether an original issue or a renewal note, upon the terms and conditions and confined to the purposes set forth in the application, all as described above, is hereby authorized, subject to the provisions of this order.

(B) This authorization is expressly conditioned upon the issuance of all notes to be issued being not later than December 31, 1967, and the final maturity of said notes being not later than December 31, 1968.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost or any other matter whatsoever now pending or which may come before this Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

KENTUCKY GAS TRANSMISSION CORPORATION, DOCKET NO. CP67-82

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 4, 1966)

On September 26, 1966, Kentucky Gas Transmission Corporation (Applicant) filed in Docket No. CP67-82 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities for the sale and delivery of natural gas to Columbia Gas of Kentucky, Inc. (Columbia of Kentucky), for resale and distribution in the Town of Cannonsburg and environs, Boyd County, Kentucky, all as more fully set forth in the application.

Specifically, Applicant seeks authority to construct and operate a tap, measuring, and regulating facilities on its 20-inch gas transmission line in Boyd County, Kentucky, for the wholesale sale of natural gas to Columbia of Kentucky.

The estimated third year annual and peak day deliveries of natural gas to Columbia of Kentucky through the proposed facilities are 26,000 Mcf and 270 Mcf, respectively. Said natural gas service will be rendered under Applicant's FPC Rate Schedule CDS–1.

The total estimated cost of Applicant's proposed facilities is $8,400, which cost will be financed from cash on hand.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on November 3, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Kentucky Gas Transmission Corporation, a Delaware corporation having its principal place of business in Charleston, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of August 10, 1956, in Docket No. G–9689 (16 FPC 437).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the transportation and sale of natural gas by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 of said Regulations.

(6) The certificate hereinafter issued should be conditioned upon Applicant's filing with the Commission an appropriate revised service agreement with Columbia of Kentucky in accordance with the Commission's Regulations under the Natural Gas Act.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Kentucky Gas Transmission Corporation authorizing the construction and operation of the facilities and the transportation and sale of natural gas as hereinbefore described and as more fully set forth in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c) (3), (c) (4), (e), (f), and (g) of Section 157.20 of said Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and the transportation and sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act by January 1, 1967.

(D) The certificate issued by paragraph (A) above is conditioned upon Applicant's filing with the Commission an appropriate revised service agreement with Columbia of Kentucky in accordance with the Commission's Regulations under the Natural Gas Act.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. CP64-5 (PHASE I)* AND ALGONQUIN GAS TRANSMISSION COMPANY, DOCKET NO. CP67-36

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING SERVICE AGREEMENTS FOR FILING

(Issued November 4, 1966)

On August 17, 1966, Texas Eastern Transmission Corporation (Texas Eastern) filed in Docket No. CP64-5 (Phase I) a motion to amend further the Commission's order issued December 19, 1963, 30 FPC 1559, in said docket, as amended, by authorizing Texas Eastern to sell, on a firm basis and by means of existing authorized facilities, additional quantities of natural gas to existing customers, all as more fully set forth in the subject motion to amend further.

Specifically, Texas Eastern proposes to sell and deliver the following additional quantities of natural gas:

Customer	Daily volumes in Mcf—14.73 psia	
	Annual service	Winter service
Algonquin Gas Transmission Company	7,344	1,025
Central Illinois Public Service Company	320	
Indiana Gas and Water Company, Inc	253	441
New Jersey Natural Gas Company	3,060	6,120
Subsidiaries of Penn Fuel Gas, Inc.:		
Huntingdon Gas Company		561
Lewistown Gas Company		1,071
Pottsville Gas Company		2,805
Shippensburg Gas Company		357
Twin Gas Company		274
Total	10,977	12,654

---

*By order issued October 28, 1966, in Docket No. CP66-347, *et al.*, 36 FPC 792, the Commission severed that portion of the subject motion to amend in Docket No. CP64-5 requesting authorization to sell an additional 30,601 Mcf of natural gas per day to The Manufacturers Light and Heat Company and consolidated the same with the proceedings in Docket No. CP66-347, *et al.* Accordingly, the instant order pertains solely to the remaining proposals not severed by the order of October 28, 1966.

Texas Eastern filed, on September 29, 1966 and October 11, 1966, superseding service agreements covering the proposed sales as described and set forth above.

On September 20, 1966, Pennsylvania Gas and Water Company filed a petition to intervene in this proceeding and a motion to consolidate the instant motion to amend with the proceedings in Docket No. CP66-347. In view of the action taken by the Commission in its order of October 28, 1966, in Docket No. CP66-347, *et al.*, no further action on said petition appears necessary in the instant order.

Due notice of the filing of the motion to amend further and opportunity for hearing thereon has been given by publication in the Federal Register on August 31, 1966 (31 F.R. 11506. No protest or other petition to intervene has been filed in this proceeding.

On August 17, 1966, Algonquin Gas Transmission Company (Algonquin) filed in Docket No. CP67-36 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery, on a firm basis and by means of existing authorized facilities, additional quantities of natural gas to certain existing customers, all as more fully set forth in the application in this proceeding.

Specifically, Algonquin proposes to sell and deliver the following quantities of natural gas:

Customer	Daily volumes—Mcf @ 14.73 psia	
	Rate schedule F-1	Rate schedule WS-1
The Connecticut Gas Company	4,900	
North Attleboro Gas Company	40	140
Providence Gas Company	2,500	
New Bedford Gas and Edison Light Company		750
Newport Gas Light Company		210
Norwood Gas Company		(124)
Total	7,440	976

On October 26, 1966, Algonquin filed superseding service agreements reflecting the above volumes.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application in Docket No. CP67-36 has been filed.

At a hearing held on November 3, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought in Docket No. CP67-36, and upon consideration of the record,

The Commission finds:

(1) Applicant, Algonquin Gas Transmission Company, a Delaware corporation having its principal place of business in Boston, Massachusetts, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of February 26, 1951, in Docket No. G-1319 (10 FPC 35).

(2) The proposed sales and transportation of natural gas hereinbefore described, as more fully described in the application in Docket No. CP67-36, will be in interstate commerce, subject to the jurisdiction of the Commission, and such proposed sales and transportation by Algonquin are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Algonquin is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed sales and transportation of natural gas by Algonquin are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Algonquin's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), and (e) of Section 157.20 of such Regulations.

(6) The superseding service agreements tendered for filing by Algonquin on October 26, 1966 should be accepted for filing to become effective on the date this order issues.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued December 19, 1963, in Docket No. CP64–5, as amended, be further amended as hereinafter ordered.

(8) The superseding service agreements tendered for filing by Texas Eastern on September 29, 1966 and October 11, 1966, should be accepted for filing to become effective on the date this order issues.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Algonquin Gas Transmission Company, to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in Docket No. CP67–36, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Algonquin's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), and (e) of Section 157.20 of such Regulations.

(C) The proposed sales and delivery of natural gas, authorized in paragraph (A) above, shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within 6 months from the date on which this order issues.

(D) The superseding service agreements tendered for filing by Algonquin on October 26, 1966, are accepted for filing to become effective on the date this order issues.

(E) The Commission's order issued December 19, 1963, in Docket No. CP64–5, as amended, is further amended by authorizing Texas Eastern to sell and deliver additional quantities of natural gas to existing customers, all as hereinbefore described and as set forth in the motion to amend further.

(F) In all other respects the order of December 19, 1963, as amended, shall remain in full force and effect.

(G) The superseding service agreements tendered for filing by Texas Eastern on September 29, 1966 and October 11, 1966, are accepted for filing to become effective on the date this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP67-71

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 4, 1966)

On September 19, 1966, Texas Gas Transmission Corporation (Applicant), filed an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction of facilities in Haywood County, Tennessee, for the transportation and sale of natural gas in interstate commerce for resale, all as more fully set forth in the application.

Applicant proposes to construct and operate one side valve and a positive meter in Haywood County, Tennessee, which will establish a new delivery point for an existing customer, the City of Brownsville, Tennessee (Brownsville), for resale in the community of Providence, Haywood County, Tennessee (Providence).

The estimated annual and peak day requirements for Providence in the third year are 1,800 Mcf and 20 Mcf, respectively. The application states that no increase in the Contract Demand of Brownsville is proposed for this service.

The total estimated cost of the proposed facilities is $2,470, which cost will be financed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, has been filed.

At a hearing held on November 3, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Texas Gas Transmission Corporation, a Delaware corporation having its principal place of business in Owensboro, Kentucky, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1948, in Docket No. G-855 (7 FPC 213).

(2) The proposed construction and operation of facilities, and the sale of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application, filed in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, and the sale of natural gas in interstate commerce are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a),

(b), (c)(1), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Texas Gas Transmission Corporation, authorizing the construction and operation of facilities, and the sale of natural gas as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, and the sale of natural gas authorized in paragraph (A) above shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 3 months of the date on which this order issues.

(D) Applicant shall file pursuant to Part 154 of the Commission's Regulations an acceptable revised service agreement reflecting the terms and conditions of sale and delivery at the new delivery point to the City of Brownsville, Tennessee.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

UNITED STATES DEPARTMENT OF THE INTERIOR, BONNEVILLE POWER ADMINISTRATION, DOCKET NO. E-7313

ORDER CONFIRMING AND APPROVING RATE SCHEDULE

(Issued November 4, 1966)

On September 15, 1966, the Assistant Secretary of the Interior acting on behalf of the Bonneville Power Administration (Bonneville) pursuant to the Bonneville Act (50 Stat. 731), as amended, filed with the Commission a request for approval of the rate to be charged the Kaiser Aluminum and Chemical Corporation and 13 other industries for the sale of power generated at Federal plants by the use of additional water which has been stored in Kootenay Lake in Canada. The release of this additional stored water and the sale to the 14 industries of power generated therewith at Federal plants in the United States are to be made during the period from September 1, 1966, through March 31, 1967.

Kootenay Lake is a natural lake with storage control facilities on the Kootenay River in British Columbia, Canada, just north of the border with Idaho. The West Kootenay Power and Light Company operates a hydroelectric plant at the Corra Linn dam and regulates the outflow from Kootenay Lake. The regulated outflow joins the Columbia River a short distance below Lower Arrow Lake and is used to generate power at the several Federal and non-Federal downstream hydroelectric plants along the Columbia River.

The Kaiser Aluminum and Chemical Company, together with the 13 other industries, has made arrangements with the West Kootenay Power and Light Company and its parent company, Cominco, Ltd., for raising the elevation of Kootenay Lake about two feet so as to store 445,500 acre-feet of water additional to the amount of storage that is normally permitted (607,400 acre-feet). This arrangement was made because of an anticipated water shortage in the Columbia

River basin during the fall and winter of 1966–67, and thereby to avoid an interruption in the power supply of the 14 parties.

The additional storage was approved by the International Joint Commission in its order signed August 12, 1966. The Assistant Secretary reports that these arrangements will cost the industries in excess of $150,000. Under the terms of the Power Sales Contract between Bonneville and the 14 industries, Bonneville will sell to the industries the energy generated at the downstream Federal plants with water released from the additional storage. The amount of this energy for the two feet of storage amounts to 296,445,000 kilowatt-hours. Deliveries will be made during the period of September 1, 1966, through March 31, 1967.

Although the energy to be generated with the additional stored water will be supplied on a firm basis during the specified period, Bonneville's contract with the 14 industries provides that the rates to be charged be the same as that specified for interruptible power in each purchasers' existing primary power sales contract with Bonneville. These rates are $1.45 per kilowatt-month for transmission system deliveries and $1.20 per kilowatt-month for at-site deliveries.

The Assistant Secretary states that while these arrangements do not conform to any of Bonneville's schedules, he believes that a charge for this power equivalent to the interruptible power rates mentioned above will be equitable. As he points out the power will be generated with water provided by the industries without cost to the Government and at a substantial expense to themselves. Under these circumstances we feel the application of the rates are justified. Our approval is based on the circumstances presented here and is not to be construed as a precedent in other situations.

The Commission finds:

It is appropriate for the purposes of the Bonneville Act that the rates and charges for the sale of power by Bonneville to the 14 industries as referred to above be confirmed and approved.

The Commission orders:

The rates of $1.45 per kilowatt-month for transmission system deliveries and $1.20 per kilowatt-month for at-site deliveries for the sale by Bonneville of power generated at Federal plants with additional water available from Kootenay Lake over and above its normal storage of 607,400 acre-feet, with such power to be delivered during the period from September 1, 1966, to March 31, 1967, inclusive, are confirmed and approved.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC. AND UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP66–277

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued November 7, 1966)

On February 23, 1966, Tennessee Gas Pipeline Company (Tennessee), and United Gas Pipe Line Company (United), filed in Docket No. CP66–277 a joint application as supplemented May 24 and May 26, 1966, pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and exchange of natural gas and the construction and operation of the facilities necessary therefor in accordance with an agreement between said parties dated December 29, 1965, and for permission and approval to abandon, upon the issuance of the requested certificate authorization, certain existing transportation service, all as more fully set forth in the application and supplements thereto.

United proposes to construct two new delivery points in the Lapeyrouse and Four Isle Dome Fields in Terrebonne Parish, Louisiana, and to modify existing meter and regulating stations in the Weeks Island Field area, Iberia Parish, Louisiana.

Applicants propose to exchange up to 10,000,000 Mcf of gas annually, which gas is to be delivered by United to Tennessee at daily rates up to 65,000 Mcf during May through October of each year until the termination date of April 30, 1971, at an existing point of interconnection in Ouachita Parish, Louisiana; and to replace, with an expanded service, a transportation service presently rendered United by Tennessee.[1] Applicants further propose that Tennessee return such exchange gas to United during November through April at existing points of interconnection of their facilities near the Weeks Island Field and in Calcasieu Parish, Louisiana.

There is no charge involved in the proposed exchange service, which is on a direct gas-for-gas basis, unless United delivers less than the full 10,000,000 Mcf of exchange gas. In that event, United will make a supplemental annual payment based on the difference between United's actual exchange deliveries and 10,000,000 Mcf. For the transportation service, Tennessee will receive a base rate of 0.84¢ per Mcf transported, with a minimum bill based upon a 75% load factor.

Applicants also propose that Tennessee will transport ultimately up to 176,000 Mcf per day of gas for United from existing points of interconnection in Vermilion, Iberia and Plaquemines Parishes, Louisiana, and Hancock County, Mississippi, and from the two proposed delivery points. Applicants state that all such transportation gas is to be redelivered by Tennessee to United at the existing point of interconnection in Calcasieu Parish, Louisiana.

Applicants request that upon certification of their joint proposal the Commission issue an order granting them permission and approval to abandon the transportation service heretofore authorized by Commission order issued in Docket No. CP64-92 on December 19, 1963, 30 FPC 1557, and amended on October 1, 1965, 34 FPC 1057, since such service would no longer be required.

The total estimated cost of United's proposed construction is $67,082, which cost will be financed from funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 3, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplements and exhibits submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G-232 (3 FPC 863).

---

[1] Pursuant to authorization issued in Docket No. CP64-92, Tennessee transports up to 123,000 Mcf per day for United.

(2) Applicant, Tennessee Gas Pipeline Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 12, 1947, in Docket No. G–910 (6 FPC 777).

(3) The proposed exchange and delivery of natural gas between United and Tennessee, the construction and operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application, supplements and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid proposed exchange and delivery of natural gas, construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) United and Tennessee are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that United and Tennessee shall file superseding FPC Rate Schedules to reflect the new delivery points in accordance with the applicable Commission Regulations.

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), and (f) of Section 157.20 of such Regulations.

(8) The service to be abandoned, as heretofore described, is subject to the jurisdiction of the Commission, and abandonment of such service is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(9) Such abandonment by Applicant, as heretofore described, is permitted by the public convenience and necessity and an order authorizing and approving same should be issued as hereinafter ordered.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicants in this proceeding, jointly, authorizing the exchange and delivery of natural gas as hereinbefore described, the construction and operation of new facilities for the transportation of natural gas in interstate commerce, and continued operation of existing facilities therefore, as hereinbefore described and as more fully described in the joint application, supplements thereto and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), and (f) of Section 157.20 of such Regulations.

(C) The service authorized shall commence as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 3 months of the date on which this order issues.

(D) United and Tennessee shall file superseding rate schedules to their respective FPC Gas Tariffs reflecting service authorized herein, in accordance with the Commission's Regulations, within 30 days of the issuance of this order.

(E) Permission for and approval of the abandonment by Applicant of the service hereinbefore described, all as more fully described in the application, as supplemented, is hereby granted, effective as of the date of commencement of the service authorized in (A) above.

(F) Applicant shall advise the Commission of the date of the abandonment within 10 days of the date thereof.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CENTRAL POWER AND LIGHT COMPANY, PROJECT NOS. 2414 AND 2415

ORDER PERMITTING WITHDRAWAL OF APPLICATIONS FOR LICENSES

(Issued November 8, 1966)

On March 21, 1966, Central Power and Light Company (Applicant), of Corpus Christi, Texas, filed a notice of withdrawal under § 1.11(d) of the Commission's Rules of Practice and Procedure of applications for licenses for minor constructed Project Nos. 2414 and 2415 located on the Guadalupe River, Texas. Supplemental information was furnished by Applicant's letters dated September 28 and October 7, 1966. No lands of the United States are affected by the projects.

The application for license for Project No. 2414, known as the Gonzales Project, near Gonzales, Texas, described the project as having a total capacity of approximately 1,600 horsepower, while the application for license for Project No. 2415, known as the Cuero Project, near Cuero, Texas, described that project as having a total capacity of 1,500 horsepower.

Applicant states that the projects have become an uneconomical source of power and energy, that operation was discontinued permanently at Gonzales on November 24, 1965, and at Cuero on October 19, 1965, and that it has taken steps to have the electric generating facilities for both projects dismantled and removed, and unless the project dams are acquired by municipal or other parties it contemplates their remaining in the river subject to demolition upon notice or request by any agency of the United States having supervision. Pending resolution of the question and disposition of these facilities, Applicant advises it will maintain the safety of the dams and other facilities. The U.S. Corps of Engineers by letter dated August 10, 1966, advised that while neither dam is presently considered to be an unreasonable obstruction to navigation, the dams would be subject to appropriate statutory authorities administered by the Corps, including possible alterations to or removal of the structures, should the Corps determine that the dams constitute an unreasonable obstruction.

The Texas Water Rights Commission by letters dated September 28 and October 4, 1966, advised that the City of Gonzales, Texas, uses the impoundment of the Gonzales dam for municipal purposes and that it has set for hearing on January 31, 1967, the matter of cancellation of State hydro power water rights of applicant in connection with both the Gonzales and Cuero dams.

The Commission finds:

It is not inconsistent with the public interest to permit withdrawal of the applications for licenses for the above named projects.

The Commission orders:

Permission to withdraw the applications for licenses for Project Nos. 2414 and 2415 is hereby granted.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. RP67-10

ORDER ACCEPTING REVISED TARIFF SHEETS FOR FILING

(Issued November 8, 1966)

Texas Gas Transmission Corporation (Texas Gas) on September 23, 1966, filed Stipulation as to Rates and tendered for filing certain revised tariff sheets to its FPC Gas Tariff.[1] The filing is a result of conferences with the Commission Staff concerning levels of its jurisdictional rates and flow-through of liberalized depreciation, in accordance with the principle established in *Alabama-Tennessee Natural Gas Co.*, 31 FPC 208, aff'd *sub nom. Alabama-Tennessee Natural Gas Co.* v. *F.P.C.*, 359 F. 2d 318 (CA5–1966), cert. den., 385 U.S. 847 (1966).

The proposed filing reflects, primarily, a flow-through of the reduction in federal income taxes resulting from the utilization of the liberalized depreciation provisions of Section 167 of the Internal Revenue Code. It would make effective as of October 1, 1966, a decrease in Texas Gas' jurisdictional rates for both sales and transportation of gas for others aggregating approximately $4,238,000, based on sales and transportation for the twelve months ended September 30, 1966.

The tendered tariff sheets provide for a reduction of $0.18 per Mcf in the demand charges of two-part rates and a corresponding reduction in straight-line rates.

The Stipulation also provides for filing of net rate reductions by Texas Gas to give effect to future reductions in the rates of its gas suppliers, below the rates that were in effect on October 1, 1966, and for flow-through of refunds received from its suppliers. Texas Gas has further stipulated that it will not effectuate an increase in any of the jurisdictional rates being reduced prior to July 1, 1968, after statutory suspension, if any. Also, Texas Gas expressly stated in the Stipulation that it is not intended to diminish any of its refund obligations under any prior settlement agreement.

Notice of proposed changes in rates and charges was issued on September 27, 1966. Copies of the proposed rate changes and stipulation were served by Texas Gas upon its customers and State commissions. No protests or objections to Texas Gas' proposed reduced rates have been received.

---

[1] Second Revised Volume No. 1: Nineteenth Revised Sheet No. 5, Eleventh Revised Sheets Nos. 7 & 9, Nineteenth Revised Sheet No. 11, Tenth Revised Sheets Nos. 13 & 15, Twentieth Revised Sheet No. 17, Eleventh Revised Sheets Nos. 19 & 21, Nineteenth Revised Sheet No. 23, Eleventh Revised Sheets Nos. 25 & 27, Nineteenth Revised Sheet No. 29, Twentieth Revised Sheet No. 31, Nineteenth Revised Sheet No. 33, Twentieth Revised Sheets Nos. 35 & 37, Twenty-first Revised Sheet No. 39, Nineteenth Revised Sheet No. 41, Twentieth Revised Sheet No. 43, Eighteenth Revised Sheets Nos. 45 & 47, Nineteenth Revised Sheet No. 49, Eighteenth Revised Sheet No. 51, Nineteenth Revised Sheets Nos. 53 & 55, Twentieth Revised Sheet No. 57, Nineteenth Revised Sheet No. 59, Ninth Revised Sheet No. 60–A, Nineteenth Revised Sheets Nos. 61 & 63, Twentieth Revised Sheet No. 65, Nineteenth Revised Sheet No. 67, Seventeenth Revised Sheets Nos. 68–A & 68–B, Ninth Revised Sheet No. 68–BB, Tenth Revised Sheet No. 68–C, Seventeenth Revised Sheets Nos. 68–E & 68–F, Fourteenth Revised Sheets Nos. 68–G & 68–H, Eighth Revised Sheet No. 68–I, Fourteenth Revised Sheets Nos. 68–K & 68–L, Nineteenth Revised Sheets Nos. 69 & 70, Ninth Revised Sheet No. 70–A, Eleventh Revised Sheet No. 71, Nineteenth Revised Sheets Nos. 73 & 74, Eighteenth Revised Sheets Nos. 79–I & 79–J.

Original Volume No. 2: Fifth Revised Sheet No. 254, Second Revised Sheets Nos. 332, 362, 363 and 365; First Revised Sheet No. 391.

The Commission finds:

(1) Good cause exists for permitting the revised tariff sheets to become effective as hereinafter ordered, pursuant to the provisions of Section 154.51 of Commission's Regulations under the Natural Gas Act (18 CFR § 154.51).

(2) It is in the public interest and appropriate for the purpose of carrying out the provisions of the Natural Gas Act to accept for filing the proposed revised tariff sheets and the rate reductions therein contained to be made effective as hereinafter provided and ordered.

The Commission orders:

(A) The revised tariff sheets specifically described hereinabove are accepted for filing to become effective as of October 1, 1966.

(B) Texas Gas' Stipulation filed on September 23, 1966, is hereby approved and made effective as proposed therein. Texas Gas shall comply with each of the provisions of its Stipulation.

(C) Prior to distribution of any refunds required by the provisions of the Stipulation or any prior settlement agreements, Texas Gas shall file a report with the Commission setting forth the amount to be refunded to each customer and the billing determinants used in computing such refunds. A copy of that report shall be served on each customer and interested State commissions. Texas Gas shall retain the amounts to be refunded pending further action by the Commission, prescribing the disposition of such refunds.

(D) Texas Gas may discontinue the deferred tax accounting provided for in Paragraph A of Account 282 and adopt flow-through accounting with regard to the reduction in income taxes resulting from use of liberalized depreciation.

(E) Texas Gas shall continue to comply with the other provisions of Account 282, and account for the facilities constructed prior to January 1, 1967, on a vintage-year, pay-back basis, in respect to the amount accumulated in Account 282. Any amounts remaining in Account 282 after the properties which generated such amounts have been fully depreciated for tax purposes shall be shown as a reduction of income taxes.

(F) In the event that the liberalized depreciation provisions of the Internal Revenue Code are either eliminated or modified, any increase in income taxes occasioned thereby, with regard to properties on which liberalized depreciation had previously been allowed by the Internal Revenue Service, may be charged by Texas Gas against the amount accumulated in Account 282 until that amount is exhausted.

(G) This order is without prejudice to any findings or orders which have been made or may hereafter be made by the Commission and is without prejudice to any claims or contentions which may be made by the Commission, Texas Gas, the Commission Staff, or any other party affected by this order, in any proceedings now pending or hereafter instituted by or against Texas Gas or any other persons or parties affected by this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67-9

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 8, 1966)

On July 15, 1966, United Gas Pipe Line Company (Applicant) filed in Docket No. CP67-9 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction, in two phases, and operation of certain natural gas facilities and an increase in sales of natural gas to Southern Natural Gas Company (Southern) from 100,000 to 150,000 Mcf per day effective November 1, 1967, in order to alleviate Southern's depleting availability of gas from fields west of Perryville, Louisiana, all as more fully set forth in the application.

Applicant proposes to deliver the additional gas needed for the proposed sale from its South Louisiana reserves. Applicant estimates that as of January 1, 1966, its South Louisiana reserves were in excess of 14,084 million Mcf. In order to implement the delivery of gas from said reserves it will be necessary for Applicant to utilize its South-North Louisiana 30-inch pipeline, including the use of additional compression as planned in Phase II of its proposal.

Specifically, Applicant proposes to construct the following facilities:

Phase I—1967 Construction

1. Construct approximately 5.29 miles of 20-inch pipeline loop on Applicant's existing Sterlington to Perryville 16-inch pipeline, beginning at an orifice meter station located on Applicant's Sterlington Compressor Station yard in Section 32, and extending in a northeasterly direction paralleling Applicant's existing pipeline to a tie-in point at Applicant's existing sales meter station in Section 53, all in Township 20 North, Range 4 East, Ouachita Parish, Louisiana;

2. Enlarge metering facilities at Applicant's existing sales meter station near Perryville, Louisiana, located in Section 53, Township 20 North, Range 4 East, Ouachita Parish, Louisiana;

3. Add and rearrange metering and regulating facilities located on Applicant's Sterlington Compressor Station yard in Section 32, Township 20 North, Range 4 East, Ouachita Parish, Louisiana.

Phase II—1969 Construction

Add one 6,700 horsepower natural gas turbine driven centrifugal compressor, with appurtenant facilities, at Applicant's existing Olla Compressor Station.

By order issued on April 29, 1966, in Docket No. CP66-136, 35 FPC 658, Applicant was authorized to operate its new Bistineau Gas Storage Field. Based on its presentation in that application, Applicant contemplates a withdrawal rate from Bistineau of approximately 500,000 Mcf of gas per day. Applicant states that Bistineau may have greater capability than that originally expected. If it does, then Applicant contemplates meeting Southern's increased requirements from storage rather than from main line capacity. In that event it would ask for authority to omit construction of the Phase II facilities sought herein.

Accordingly, the Commission has determined to authorize only the Phase I facilities proposed herein pending Applicant's re-evaluation of its Bistineau Storage Project and require Applicant to seek additional authorization to construct the Phase II facilities if the need should arise. If not, Applicant would, nevertheless, require additional authorization to operate the Bistineau Field at withdrawal rates greater than that presently authorized.

The total estimated cost of Applicant's Phase I facilities is $555,182, which cost will be financed from funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed herein.

At a hearing held on November 3, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of January 20, 1942, in Docket No. G-216 (3 FPC 3).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and delivery of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and delivery of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, United Gas Pipe Line Company, to construct and operate the proposed Phase I facilities and to transport and deliver up to 150,000 Mcf of natural gas per day to Southern Natural Gas Company as hereinbefore described, all as more fully set forth in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f), and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the transportation and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

INTERSTATE POWER COMPANY, PROJECT NO. 2339

ORDER ISSUING LICENSE (MINOR)

(Issued November 9, 1966)

Application was filed on February 11, 1963, by Interstate Power Company (Applicant) of Dubuque, Iowa, for a minor license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2339, known as the Greene Hydroelectric Generating Station, located on the Shell Rock River, a tributary of the Cedar River in Butler County, Iowa, near the town of Greene. No lands of the United States are affected by the project.

The project has been in operation since 1925, and it does not appear that any substantial alteration has been made to the project since that date.

The Secretary of the Army and the Chief of Engineers have reported that the plans of the project structures affecting navigation are satisfactory insofar as the interest of navigation is concerned.

The Department of the Interior, in reporting on the application, recommended for inclusion in any license for the project, terms and conditions in the interests of free public access to project lands and waters, fish and wildlife, and recreation, as are found in attached Form L-12 and Article 13.

The Department of Health, Education, and Welfare has advised that it does not forsee any adverse effects from the project on matters within the Department's responsibilities.

The State Conservation Commission of Iowa states that operation of the project cuts off the flow of the river at times. The State Commission feels that maintaining a reasonable minimum flowage through the project would benefit aquatic life downstream from the project, but suggested no specific quantity of flow. Article 14 provides that the licensee shall consult with the State Commission in contemplation of reaching an agreement respecting minimum flows.

Applicant's Greene Generating Plant furnishes power to its interstate transmission system operating in Iowa, Minnesota, and Illinois, and its system is interconnected with other interstate systems.

The license herein granted shall have an effective date of May 1, 1965, the first day of the month in which the Supreme Court of the United States affirmed the Commission's findings and order asserting licensing authority over Taum Sauk Project No. 2277 by virtue of the effect of the project on the interests of interstate commerce by its utilization of headwaters of a navigable stream to generate electric energy for an interstate power system (381 U.S. 90) and a termination date of December 31, 1993.

In our order on rehearing issued February 17, 1965, in *Wisconsin Power & Light Company*, Project No. 2347, *et al.* (33 FPC 275), we stated that we would have no objection to the issuance of licenses for minor projects without waiving Sections 14 and 15 of the Federal Power Act and the other provisions of the Act necessary to the effectuation of those sections, provided the minor project applications are timely supplemented pursuant to Section 4.50 of our Regulations under the Act (18 CFR § 4.50), which relates to applications for major projects. In the event the Applicant herein wishes a license in which those provisions of the Act are not waived it should so advise us within 30 days from the date of issuance of this order and file its supplemental application within 30 additional days thereafter.

The Commission finds:

(1) The project affects the interests of interstate commerce.

(2) Applicant is a corporation organized under the laws of the State of Delaware, and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(3) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(4) The project does not affect a Government dam nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(5) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

(6) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 260 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable as hereinafter fixed and specified.

(7) It will be in the public interest to waive pursuant to Section 10(i) of the Act, the terms and conditions contained in the following sections of Part I of the Federal Power Act:

> Sections 4(b), except the second sentence thereof; 4(e), insofar as it relates to approval of plans by the Chief of Engineers and the Secretary of the Army and to public notice; 6, insofar as it relates to public notice and to the acceptance and expression in the license of terms and conditions of the Act which are hereinafter waived; 10(c), insofar as it relates to depreciation reserves: 10(d), 10(f), 11, 12, 14, except insofar as the power of condemnation is reserved: 15, 19, 20, 22, and 23(a), insofar as it relates to the determination of fair value.

The Commission orders:

(A) This license is hereby issued to Interstate Power Company (Licensee) of Dubuque, Iowa, under Sections 4(e) and 10(i) of the Federal Power Act for a period effective as of May 1, 1965, and terminating December 31, 1993, for the continued operation and maintenance of Greene Hydroelectric Generating Station, Project No. 2339, located on the Shell Rock River, a tributary of the Cedar River in Butler County, Iowa, and affecting the interests of interstate commerce, subject to the terms and conditions of the Act insofar as not expressly waived herein, which is incorporated herein by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) Greene Hydroelectric Generating Station consists of:

(i) all lands constituting the project area and enclosed by the project boundary or limits of which are otherwise defined, and

(ii) a reinforced concrete dam made up of a 235 foot spillway section, a 43 foot intake section, and wing walls at each end; a 171 acre reservoir; and a one-story powerhouse on the intake section of the dam containing one 200 kw generating unit.

(C) This license is also subject to the terms and conditions set forth in Form L-12 (May 1, 1966) entitled "Terms and Conditions of License for Constructed Minor Project Affecting the Interests of Interstate or Foreign Commerce" (35 FPC 875), which terms and conditions, designated as Articles 1 through 11, are attached hereto and made a part hereof, and subject to the following special conditions set forth herein as additional articles:

Article 12. The Licensee shall pay to the United States the following annual charge, effective May 1, 1965; for the purpose of reimbursing the United States for the costs of administration of Part I of the Act, $13.00 per annum.

Article 13. The Licensee shall, for the conservation and development of fish, wildlife and recreation resources, construct, maintain, and operate, or arrange for the construction, maintenance, and operation of such facilities and comply with such reasonable modifications of the project structures and operation as may be prescribed by the Commission upon its own motion or upon the recommendation of the Secretary of the Interior or the Iowa State Conservation Commission, after notice and opportunity for hearing and upon a finding based on substantial evidence that such facilities and modifications are necessary and desirable, reasonably consistent with the primary purpose of the project, and consistent with the provisions of the Act.

Article 14. The Licensee shall, in the interest of fishery conservation, consult with the Iowa State Conservation Commission to determine the minimum flows to be released from the dam. In the event an agreement as contemplated herein cannot be reached, the Commission reserves the right, after notice and opportunity for hearing, to prescribe the minimum flow releases.

(D) The terms and conditions of the Act, which it has been found above to be in the public interest to waive, are hereby excluded from this license.

(E) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgment of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

CHATTANOOGA GAS COMPANY v. EAST TENNESSEE NATURAL GAS COMPANY, DOCKET NO. RP65-3; KNOXVILLE UTILITIES BOARD, ET AL. v. EAST TENNESSEE NATURAL GAS COMPANY, RP67-1; KNOXVILLE UTILITIES BOARD, ET AL. v. EAST TENNESSEE NATURAL GAS COMPANY AND TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., CP67-38; EAST TENNESSEE NATURAL GAS COMPANY, CP64-21, CP65-66, CP66-375; TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., CP64-165, CP67-64

ORDER MODIFYING OPINION NO. 485, GRANTING MOTION FOR APPROVAL OF SETTLEMENT, ACCEPTING STIPULATION AND NEW AND REVISED TARIFF SHEETS, WAIVING 30-DAY NOTICE AND MAKING TARIFF SHEETS EFFECTIVE NOVEMBER 1, 1966, AND DISMISSING COMPLAINT FILINGS

(Issued November 14, 1966)

On October 24, 1966, East Tennessee Natural Gas Company (East Tennessee) and Tennessee Gas Pipeline Company (Tennessee) filed a joint motion seeking the Commission's acceptance and approval of (1) a formal settlement agreement titled *Stipulation* and (2) related new and revised tariff sheets to East Tennessee's FPC Gas Tariff, Fourth Revised Volume No. 1, all of which were filed concurrently with the motion. Although the *Stipulation*, to be discussed in detail later, is limited primarily to resolving existing disputes between East Tennessee and its jurisdictional customers, it also bears on Tennessee as a gas supplier and parent company of East Tennessee. The settlement and tariff filings are the result of negotiations between East Tennessee, its jurisdictional customers, the Commission's staff and, to a limited extent, Tennessee. Since the settlement touches upon issues raised by the pleadings in each of the above-captioned applications, all parties to those proceedings, or where formal hearings had not commenced all parties who filed petitions to intervene therein, were served with the above-referred-to documents. Tennessee, East Tennessee, and all of the latter's jurisdictional customers are signatories to the settlement. The statutory ten (10) day period has expired and no answers in opposition to the motion have been received. Now for the particulars of the settlement.

By our Opinion Nos. 494 and 494–A, issued June 8, 1966, 35 FPC 902, and July 29, 1966, 36 FPC 325, respectively, we disposed of the issues presented by the complaint filed by Chattanooga Gas Company (Chattanooga) in Docket No. RP65–3 against East Tennessee. There we required that, among other things, East Tennessee file within a given period a new service agreement with Chattanooga consistent with the Commission's views expressed in the above Opinions. The services to be rendered under the new agreement would be either under East Tennessee's existing G–1 rate schedule or under a new partial-requirements rate schedule to be filed by the latter. The instant settlement includes a copy of a new precedent agreement executed between East Tennessee and Chattanooga along with a copy of the service agreement to be executed within 30 days of the Commission's approval of the settlement (Appendix B to the *Stipulation*). Service is to be provided under a new rate schedule designated CD–1, a copy of which is included in East Tennessee's filing (Original Sheets Nos. 11A, 11B, and 11C). East Tennessee has agreed that within 5 days after the proposed *Stipulation* becomes effective it will withdraw or dismiss its petitions for review of Opinion Nos. 494 and 494–A filed September 26, 1966, in the United States Court of Appeals for the Sixth Circuit, No. 17465.

The Knoxville Utilities Board, *et al.* (Knoxville), which collectively represents the bulk of East Tennessee's jurisdictional customers, filed a complaint in Docket No. RP67–1 contesting the reasonableness and propriety of certain costs, for rate making purposes, incurred by East Tennessee in its construction of what has been referred to as the Virginia Extension. Authorization to construct those facilities was granted in Opinion No. 435 conditioned upon filing of separate accounting data.[1] As part of the settlement, Knoxville has agreed to a dismissal of its complaint with prejudice. In turn, East Tennessee has agreed to a voluntary reduction in its jurisdictional rates which reduces its jurisdictional revenues, as calculated in our Opinion No. 488, 35 FPC 534, by approximately $89,860 annually in addition to that ordered in said Opinion.[2] This rate reduction to all jurisdictional customers is reflected, where appropriate, in the new and revised sheets to East Tennessee's tariff which are presently before us and which consist of the following:

---

[1] Issued July 17, 1964, 32 FPC 158.

[2] All parties agreed that as a result of the rate reduction the accounting condition set forth in Opinion No. 435 is no longer necessary.

First Revised Sheet No. 67

In Docket No. CP67–38, Knoxville filed a complaint against Tennessee claiming economic detriment due to Tennessee's reduction of delivery pressures, below alleged historical pressures, to East Tennessee at Greenbrier station. Those pressures are reflected in East Tennessee's expansion application in Docket No. CP66–375. Consistent with its complaint, Knoxville filed a petition to intervene in opposition to East Tennessee's expansion application alleging, among other things, that if Tennessee provided historical pressures at Greenbrier all of the facilities sought by East Tennessee would not be required in the immediate future. As part of the settlement East Tennessee has agreed to exclude the cost of Compressor Station 3101 (which is the subject of the application in Docket No. CP66–375) from its rate base in any Commission adjudication of East Tennessee's jurisdictional rates based on a cost of service, actual or adjusted, covering any test period for a 12-month period ending on any day prior to March 1, 1967. Additionally, Tennessee has given written assurance (Appendix C to the *Stipulation*) that the pressures to East Tennessee at Greenbrier cannot, as an operating matter, be reduced below 550 psig due to Tennessee's contractual obligation to Midwestern Gas Transmission Company at a point on the line a short distance upstream of the Greenbrier station. Conditioned upon the acceptance by the Commission of this *Stipulation*, Knoxville, on October 24, 1966, filed a petition seeking withdrawal of its complaint in Docket No. CP67–38 along with an amendment to its petition to intervene in Docket No. CP66–375 withdrawing its opposition therein. Consequently, simultaneously with the issuance of the instant order, we are issuing orders granting the application of East Tennessee in Docket No. CP66–375 along with the companion application of Tennessee in Docket No. CP67–64. In the light of all of the foregoing, and again conditioned on the Commission's acceptance of the *Stipulation*, East Tennessee has further agreed to withdraw or dismiss its petitions to review Opinion Nos. 493 and 493–A filed September 26, 1966, and September 27, 1966, in the United States Court of Appeals for the Sixth and Fifth Circuits respectively.

The foregoing discussion encompasses the primary issues resolved by the proposed settlement but does not include other significant but rather numerous related conditions and reservations. Hence any reading of the instant order must of necessity be in conjunction with a review of the filed *Stipulation* and Appendices A through C attached thereto.

Insofar as the Chattanooga market is concerned the *Stipulation* is consistent with our views expressed in Opinion Nos. 493, 35 FPC 917, and 493–A, 36 FPC 335, and in compliance with our directions in Opinion Nos. 494 and 494–A. Chattanooga will now have under contract firm volumes of gas from two suppliers. It will have the ability to elect which of its dual sources shall meet future requirements as they develop. The pending litigation for appellate review of the Commission's Opinions involving the competitive supply situation in Chattanooga will be closed. Additionally, the *Stipulation* brings other benefits to the Knoxville Interveners not the least of which is the previously referred-to reduction in rates. It also has the beneficent effect of eliminating the need for litigating sundry other contested matters.[3] We therefore conclude that the public convenience and necessity require our approval of the settlement agreement and acceptance of the filed *Stipulation* and related tariff changes.

The Commission orders:

(A) The joint motion filed by East Tennessee and Tennessee for approval of the settlement agreement is granted. The filed *Stipulation* with its Appendices is accepted.

(B) The original and revised tariff sheets filed by East Tennessee and enumerated in this order are hereby accepted and, as permitted under Section 154.98 of the Commission's Regulations, made effective as of November 1, 1966, as provided in the *Stipulation*.

(C) Opinion No. 435 is hereby modified to delete the accounting condition set forth in ordering paragraph B(ii) effective as of the date of the instant order.

(D) The complaint filed by Knoxville in Docket No. RP67–1 is dismissed with prejudice.

(E) Knoxville's petition for withdrawal of its complaint in Docket No. CP67–38 is granted and the proceedings therein terminated.

(F) As provided in the *Stipulation*, East Tennessee will, within 90 days of the issuance of this order, file CD rate schedules for Zones 2 and 3 acceptable to the Commission which shall be similar to Rate Schedule CD–1 contained in the formal tariff filing referred to in (B) above and as also appended to the *Stipulation*.

(G) Within 30 days of the issuance of this order, East Tennessee will file a service agreement executed with Chattanooga in the manner and form provided in the *Stipulation*.

(H) As provided in the *Stipulation*, East Tennessee and Tennessee will, within five (5) days of the date this order becomes final and non-appealable, withdraw or dismiss their petitions to review Opinion Nos. 493, 493–A, 494, and 494–A filed in the United States Court of Appeals for the Fifth Circuit and for the Sixth Circuit.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

EAST TENNESSEE NATURAL GAS COMPANY, DOCKET NO. CP66–375

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 14, 1966)

On May 17, 1966, East Tennessee Natural Gas Company (Applicant) filed in Docket No. CP66–375 an application pursuant to Section 7(c) of the Natural Gas

---

[3] The *Stipulation* is without any consideration of the Commission's determinations in Opinion Nos. 497 and 497–A or the matters pending therein, 36 FPC 61, 599.

Act for a temporary and permanent certificate of public convenience and necessity authorizing the construction and operation of additional facilities and the transportation and sale for resale of natural gas in interstate commerce, all as more fully set forth in the application in this proceeding.

Specifically, Applicant seeks authorization for the construction and operation of two new 2,000 horsepower natural gas compressor stations on East Tennessee's North Line, one to be located near Greenbrier, Tennessee, and the other near Monterey, Tennessee. Applicant alleges that the proposed construction is required to meet the requirement of its customers during the 1966–1967 winter heating season and that the proposed construction would increase East Tennessee's daily design capacity to 235,338 Mcf per day at 14.73 psia, and increase its sales capacity by 47,224 Mcf per day. The estimated cost of facilities to be constructed is $1,713,000, which is to be financed through the issuance of a promissory note. East Tennessee's application, as amended, shows a market requirement on its estimated 1966–1967 peak day of 223,527 Mcf, including 10,802 Mcf per day committed for its Zone 3, Virginia Service Area, certificated in Docket No. CP64–21, 32 FPC 158 (1964). East Tennessee supplied as part of its original application the contracts and executed service agreements with its customers and estimates of the peak and annual volume requirements of all of its customers. Notice of the application was issued on May 25, 1966, and published June 3, 1966 (31 F.R. 7925).

On June 14, 1966, East Tennessee filed its First Supplement to its application setting forth Applicant's need for the facilities requested in this docket and explaining in detail the market requirements and demands anticipated by virtue of various circumstances.

Petitions to intervene were filed as follows:

	Date
Chattanooga Gas Company	June 3, 1966
Knoxville Utilities Board, *et al.* (Knoxville)	June 13, 1966
Southern Natural Gas Company	June 20, 1966

East Tennessee filed an answer to the intervention petition of Knoxville on June 20, 1966, and on June 28, 1966, filed an answer in opposition to Southern's petition to intervene.

On July 5, 1966, Knoxville filed a letter with the Commission requesting deferral of action on East Tennessee's request for a temporary certificate. East Tennessee on July 8, 1966, filed an answer in response to Knoxville's letter, and reiterated its request for a temporary certificate.

On July 11, 1966, East Tennessee filed its Second Supplement to its application stating its need for certification of the facilities to be authorized and filed therewith correspondence with the East Tennessee Customer Group. Knoxville on July 11, 1966, again requested deferral of Commission action on the request for a temporary certificate. On July 21, 1966, Knoxville, in response to the Applicant's Second Supplement filed an answer again opposing the issuance of a temporary certificate. On July 27, 1966, Knoxville filed a supplement to its petition to intervene withdrawing opposition to the issuance of a temporary certificate but requested a formal hearing.

On July 29, 1966, the Commission authorized East Tennessee to construct the facilities for which permanent authority was requested in Docket No. CP66–375, subject to the condition that the cost of such facilities would not be includable in the Applicant's rate base until final determination of the proceeding in this docket. East Tennessee notified the Commission on September 12, 1966, that construction of the facilities authorized under the temporary certificate had commenced on August 29, 1966.

On October 14, 1966, East Tennessee filed its Third Supplement to its application submitting revised customer requirements.

On October 24, 1966, East Tennessee filed its Fourth Supplement to its application setting forth increased requirements of one of its customers and the proposed stipulation by parties to the settlement concurrently filed in its Docket No. RP65-3, *et al.*

On September 14, 1966, East Tennessee filed an application for a temporary certificate authorizing the operation of two compressor stations constructed pursuant to a temporary construction certificate issued July 29, 1966.

On October 28, 1966, Southern Natural Gas Company filed a notice of withdrawal of its petition to intervene. On October 24, 1966, Knoxville amended its petition to intervene by withdrawing its opposition to the Applicant's request for a permanent certificate by use of the shortened procedure. Both withdrawals were conditioned on approval of the Motion for Approval of Stipulation submitted by East Tennessee on behalf of all parties thereto. The Stipulation is described in an order being issued concurrently in Docket No. RP65-3, *et al.*, *supra*, p. 841.

No other petition to intervene, notice of intervention, or protest was received.

At a hearing held on November 9, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, exhibits, and amendments thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, East Tennessee Natural Gas Company, a Tennessee corporation having its principal place of business in Knoxville, Tennessee, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of May 3, 1949, in Docket No. G-1065 (8 FPC 836).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposd facilities and the transportation and sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, East Tennessee Natural Gas Company, to construct and operate the proposed facilities and to transport and sell natural gas in interstate commerce as hereinbefore described, all as more fully described in the application, as amended and supplemented, in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The proposed construction and operation of facilities and transportation and sales of natural gas authorized in paragraph (A) above shall commence, as provided in paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 6 months from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

THE OHIO FUEL GAS COMPANY, DOCKET NO. CP66-311

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING FOR FILING REVISED SERVICE AGREEMENTS

(Issued November 14, 1966)

On September 12, 1966 and September 29, 1966, The Ohio Fuel Gas Company (Petitioner) filed in Docket No. CP66-311 petitions to amend the order issued in the instant docket on August 30, 1966, 36 FPC 554, by requesting authorization for the construction and operation of facilities and replacement of facilities on its existing transmission system in the State of Ohio to enable Petitioner to provide increased capacity to serve the growing requirements of an existing market, and to assure adequate market service, all as more fully set forth in the petition to amend.

Specifically, Petitioner proposes to construct and operate 1.51 miles of 8⅝-inch O.D., 0.172-inch wall pipeline in Mahoning County, Ohio, replacing a section of 4½-inch O.D. and 6⅝-inch O.D., Line V-50 serving the Canfield market area, together with valves, fittings, and incidental facilities necessary for practical operation. Petitioner also requests that present limitations on maximum daily deliveries under firm rate schedules to four of its customers be increased as follows:

	Rate Schedule	Maximum daily delivery—Mcf @ 14.73 psia		
		Present	Proposed	Increase
The Racine Gas & Service Co	CDS-1	270	280	10
The Vanlue Gas Company	SGS-1	370	400	30
The Waterville Gas & Oil Co., Inc	CDS-1	3,290	3,400	100
The Delaware Gas Company	WS	11,576	[1] 11,800	224
Totals		15,506	15,880	374

[1] Comprised of 2,240 Mcf/d under WS, and 9,560 Mcf/d under CD.

The volumes shown in the new Service Agreements are the quantities requested by the aforementioned customers for the 1966-67 heating season. Existing delivery limitations affecting Racine, Vanlue, and Waterville should be increased by October 20, 1966, and for Delaware Gas by November 1, 1966, the effective contract dates of the renegotiated Service Agreements.

Ohio Fuel Gas has concurrently filed revised Service Agreements to reflect the change in sales volumes.

The total estimated cost of the proposed facilities is $52,000 which cost will be financed from cash on hand.

Due notice of the filing of the petitions to amend were published in the Federal Register on September 23, 1966 (31 F.R. 12580), and on October 13, 1966 (31 F.R. 13257). No protest, petition to intervene, or notice of intervention has been filed in this proceeding.

The Commission finds:

(1) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate of public convenience and necessity issued in Docket No. CP66-311 on August 30, 1966, be amended as hereinafter ordered.

(2) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the revised service agreements between Petitioner and the aforenamed customers, be accepted for filing and made effective as of the date of this order.

The Commission orders:

(A) The certificate of public convenience and necessity issued to Petitioner in Docket No. CP66-311 on August 20, 1966, is amended by authorizing the construction, operation and replacement of facilities, and the sale and delivery by Petitioner to the aforenamed customers of additional volumes of natural gas, as hereinbefore described and as more fully described in the petitions to amend.

(B) The revised service agreements between Petitioner and the aforenamed customers are accepted for filing and made effective as of the date of this order.

(C) In all other respects the certificate of public convenience and necessity shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor. Jr. and Charles R. Ross.

TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-64

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 14, 1966)

On September 14, 1966, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant) filed in Docket No. CP67-64 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and sale for resale in interstate commerce of volumes of natural gas to East Tennessee Natural Gas Company (East Tennessee), all as more fully set forth in the application in this proceeding.

Specifically, Applicant proposes to sell and deliver to East Tennessee, one of its general service customers, an additional maximum daily quantity of 26,163 Mcf at 14.73 psia (25,650 Mcf at 15.025 psia), increasing the maximum daily quantity authorized to a total 239,508 Mcf per day at 14.73 psia (234,812 Mcf at 15.025 psia), commencing with the 1966–1967 heating season.

The additional service is to be rendered through utilization of Applicant's unallocated pipeline capacity which is available from its facilities constructed

South of Station 87 (in the State of Tennessee) as previously authorized by the Commission in Docket Nos. CP66-180 and CP66-303. Applicant states that no new or additional facilities are required to enable it to sell and deliver the increased volumes of gas to East Tennessee.

Notice of application was issued on September 21, 1966. After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 9, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record.

The Commission finds:

(1) Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 12, 1947, in Docket No. G-910 (6 FPC 777).

(2) The proposed sales and transportation of natural gas hereinbefore described, as more fully described in the application in this proceeding, will be in interstate commerce, subject to the jurisdiction of the Commission, and such proposed sales and transportation by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed sales and transportation of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., to sell and deliver an additional maximum daily quantity of 26,163 Mcf of natural gas at 14.73 psia (25,650 Mcf at 15.025 psia), increasing Applicant's total authorized maximum daily quantity deliveries of natural gas of 239,508 Mcf per day at 14.73 psia (234,812 Mcf at 15.025 psia) to East Tennessee Natural Gas Company, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3) and (e) of Section 157.20 of such Regulations.

(C) The proposed sales and delivery of natural gas, authorized in paragraph (A) above, shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 6 months from the date on which this order issues.

Before Commissioners: Lee C. White, L. J. O'Connor, Jr. and Charles R. Ross.

TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP64–107

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 14, 1966)

On September 6, 1966, Texas Gas Transmission Corporation (Petitioner), filed in Docket No. CP64–107, a petition to further amend an order of the Commission issued May 26, 1964, 31 FPC 1292, in Docket No. CP64–107, granting a certificate of public convenience and necessity to Petitioner.

In its order issuing a certificate in Docket No. CP64–107, the Commission directed Petitioner to continue to file semiannual reports for both existing and two new storage projects authorized in such order. Petitioner now states the capabilities of the various reservoirs involved in the application have been established and it would appear that further reports would serve no useful purpose and therefore requests that the Commission delete the requirement of ordering paragraph (G), relating to the filing of semiannual reports on its storage reservoirs.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued May 26, 1964, in Docket No. CP64–107 be further amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued May 26, 1964, in Docket No. CP64–107 is further amended to delete from Ordering Paragraph (G) the requirement that Petitioner shall file, for both the existing and the new storage projects authorized by said order, semiannual reports on its storage reservoirs and storage operations as requested by Petitioner herein.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

TRENTON ROCK OIL AND GAS CORPORATION, DOCKET NO. CP67–75

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued November 14, 1966)

On September 21, 1966, Trenton Rock Oil and Gas Corporation (Applicant) filed in Docket No. CP67–75 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities located in Indiana and Ohio, all as more fully set forth in the application.

Specifically, Applicant proposes to abandon in place facilities consisting of a 4-inch natural gas transmission pipeline approximately 8,800 feet in length extending easterly from a gas field in Jay County, Indiana, across the Indiana-Ohio State boundary line, to a point near the Village of Fort Recovery, Mercer, County, Ohio, together with a regulating and metering station at the corporate limits of Fort Recovery. Said facilities comprise Applicant's entire interstate transmission system.

The aforementioned facilities have not been in use since April, 1956, because of total depletion of the Jay County Field.

On October 4, 1966, Applicant filed a notice of cancellation of its tariff with the request that the Commission waive the requirements of Section 154.64 of its Regulations relating to the submission of data on sales or customers affected by cancellation of natural gas service.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on November 9, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Trenton Rock Oil and Gas Corporation, an Indiana corporation having its principal place of business in Marion, Indiana, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 25, 1946, issued in Docket No. G-749 (5 FPC 871).

(2) The facilities to be abandoned, as hereinbefore described, and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered.

(4) The Commission should waive the requirements of Section 154.64 of its Regulations under the Natural Gas Act and accept the notice of tariff cancellation filed by Applicant on October 4, 1966, to become effective as of the date on which this order issues.

The Commission orders:

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, all as more fully described in the application in this proceeding, are granted.

(B) The time within which the abandonment of the facilities hereinbefore described, as authorized in paragraph (A) above, shall be accomplished is fixed at three months from the date of this order.

(C) Applicant shall advise the Commission of the date of said abandonment within 10 days thereof.

(D) The Commission waives the requirements of Section 154.64 of its Regulations under the Natural Gas Act and accepts the notice of tariff cancellation filed by Applicant on October 4, 1966, to become effective as of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PERRY R. BASS (OPERATOR), ET AL., DOCKET NO. RI66-188

ORDER TERMINATING PROCEEDING

(Issued November 15, 1966)*

Perry R. Bass (Operator), *et al.* (Bass) on September 6, 1966, filed a motion requesting the Commission to terminate the rate proceeding in Docket No. RI66-188 and to discharge him from any refund obligation therein. That proceeding relates to a proposed increased rate of 13.19¢ per Mcf,[1] designated as Supplement No. 2 to Bass' FPC Gas Rate Schedule No. 1, for sales of gas to El Paso Natural Gas Company (El Paso) from the Brown-Bassett Field, Terrell County, Texas.

By order issued December 3, 1965, in Docket No. RI66-188 Bass' proposed increase was suspended for one day and thereafter allowed to become effective subject to refund on December 6, 1965. Such increase was suspended, even though the proposed increased rate did not exceed the applicable area base rate ceiling prescribed in Opinion Nos. 468 and 468-A, 34 FPC 159, 1068, because Bass had not yet filed a quality statement showing the quality of the gas, the applicable adjustments, if any, to the base rate ceiling, and the resulting applicable area rate ceiling. Since then, however, Bass has filed a quality statement which shows the applicable area rate to be 14.25¢ per Mcf. That quality statement was accepted by order issued August 26, 1966, in Docket No. AR61-1, *et al.*, 36 FPC 535.

Since the proposed increased rate of 13.19¢ per Mcf is below the just and reasonable ceiling for such sale, it is appropriate to terminate Docket No. RI66-188 and to relieve Bass of any refund obligation therein. Bass, of course, must file an appropriate notice of change in rate if he seeks at some time in the future to charge and collect a rate in excess of 13.19¢ per Mcf for the sales involved here.

The Commission orders:

The proceeding in Docket No. RI66-188 is terminated, and Bass is relieved of any refund obligation in such proceeding.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

THE MANUFACTURERS LIGHT AND HEAT COMPANY, DOCKET NO. CP66-347

ORDER PERMITTING INTERVENTION

(Issued November 15, 1966)

A petition to intervene in the above-entitled proceeding was filed with this Commission on September 12, 1966, jointly by the County of Chester, Pennsylvania, the Township of Honey Brook, Chester County, Pennsylvania, The Lan-Chester Land Owners Association, Florence M. Keay, Noah S. Myers, Sr., and his wife Barbara H. Myers.

The Commission received a letter dated May 10, 1966, from the Board of Supervisors of West Nantmeal Township, RD 1, Elverson, Pennsylvania and a letter dated May 16, 1966, from the West Nantmeal Planning Commission, Rural Delivery No. 2, Elverson, Pennsylvania 19520, both letters protesting against Manufacturers' application because of the proposed route of Manufacturers' proposed pipeline. We shall treat these letters as petitions to intervene in the proceeding on Manufacturers' application.

---

*Rehearing denied by order issued December 23, 1966, 36 FPC 1104.

[1] Base rate less contractual deduction by El Paso for removal of carbon dioxide.

The petition filed by Chester County, *et al.*, alleged:

(1) That the County of Chester is a political entity and a subdivision of the Commonwealth of Pennsylvania with a population of approximately 210,000 persons, and that it has a pecuniary and governmental interest in the health, welfare, safety and convenience of its residents;

(2) That the township of Honey Brook is a political subdivision of the Commonwealth of Pennsylvania within the County of Chester, that it has a population of approximately 1500 persons, and that it has an interest in the health, safety, welfare, and convenience of its residents;

(3) That the Lan-Chester Land Owners Association is an unincorporated association with a membership of approximately 60 persons who own land in Chester and Lancaster Counties which lies in the path of the route over which Manufacturers proposes to construct a gas transmission pipeline;

(4) That petitioners Florence M. Keay, Noah S. Myers, Sr., and Barbara H. Myers also own land within the route of Manufacturers' proposed pipeline.

The petition alleged further that the individuals aforementioned and members of the Lan-Chester Land Owners Association, all of them owners of real property lying within Manufacturers' proposed pipeline route, are respondents in court proceedings initiated or about to be initiated by Manufacturers; and that the petitioners have had insufficient opportunity to be heard by this Commission with respect to Manufacturers' application, and particularly in respect of certain matters including *inter alia:*

> (1) Whether necessity and/or emergency exists for any additional route in light of Applicant's present possession and operation of existing lines and routes on previously taken rights of way, which rights of way appear ample to accommodate any new facilities which may be needed. Said existing routes and facilities and rights-of-way originate and terminate at the same points as do the proposed routes, facilities and rights-of-way. The existing routes, facilities and rights-of-way are approximately parallel with the proposed and run parallel with the proposed within a few miles of each other.
>
> (2) Whether Applicant's selection of its route adequately and properly allows for considerations of the public safety and convenience.
>
> (3) Whether, even if necessary, the proposed routes are over-sized in respect to their width.

Manufacturers filed an answer to the petition of Chester County, *et al.*, in which it alleged:

(a) That the petition was not filed until a long time after the final date for filing petitions to intervene in this case as stated in the notice of application;

(b) That the petition recites no legitimate interest and no appropriate grounds for the granting of intervention.

Manufacturers alleged further that Section 7(h) of the Natural Gas Act provides that a holder of a certificate of public convenience and necessity may exercise the right of eminent domain if necessary to acquire right-of-way to construct and maintain a pipeline and that the law is clear that management's judgment in respect to location of pipeline facilities will not be disturbed except under extraordinary circumstances.

The final date for filing petitions to intervene in this proceeding was June 6, 1966, as stated in the notice of application which was issued May 9, 1966 (31 F.R. 7158). Although Chester County, *et al.*, did not file their petition to intervene within the time prescribed in the notice of application, their petition and also the petitions of the Supervisors of West Nantmeal Township and West Nantmeal Planning Commission state matters showing that the petitioners have direct and substantial interest in this proceeding which may be adversely affected by the Commission's action therein. The interests of the petitioners are not adequately represented by any other party.

The Commission finds further:

Good cause has been shown to allow the petitioners named above to intervene in this proceeding in order that they may establish the facts and law from which the nature and validity of their alleged rights and interests may be determined and show what further action may be appropriate under the circumstances in the administration of the Natural Gas Act.

The Commission orders:

The County of Chester, Pennsylvania, The Township of Honey Brook, Chester County, Pennsylvania, the Lan-Chester Land Owners Association, Florence M. Keay, Noah S. Myers, Sr., Barbara H. Myers, the Board of Supervisors of West Nantmeal Township, Pennsylvania and the West Nantmeal Planning Commission are permitted to intervene in this proceeding subject to the rules and regulations of the Commission; *provided*, however, that their participation shall be limited to matters affecting rights and interests expressly asserted in their petitions to intervene; and *provided* further that permission to intervene shall not be construed as recognition by the Commission that any intervener might be aggrieved by any order entered in this proceeding.

OPINION NO. 506

KERR-MCGEE CORPORATION (FORMERLY KERR-MCGEE OIL INDUSTRIES, INC.), DOCKET NO. RI66-81

OPINION AND ORDER REVERSING INITIAL DECISION OF PRESIDING EXAMINER, DETERMINING CONTRACTUALLY AUTHORIZED RATES, PROVIDING FOR REFUNDS, AND TERMINATING PROCEEDING IN PART

(Issued November 16, 1966)*

Syllabus

1. Subject contract is not ambiguous regarding Phillips' base price; actual base price provided therein should be utilized in determining price between Kerr-McGee and Phillips. P. 858.
2. There being no evidentiary dispute, the ambiguity of the contract and relevancy of outside evidence of intent are questions of law. P. 858.
3. There is no evidence that matter of interpretation of contract ever came to parties' attention; once brought to Phillips' attention by Kerr-McGee's proposed increased rate filing, it was promptly protested. P. 858.
4. Phillips' filing of 15.22¢ rate provides from both contractual and filing viewpoint a ceiling on what it may collect on and after December 10, 1965, and during time such rate is in effect, regardless of what just and reasonable rate

---

*Initial decision appears on p. 860.

may be determined in another docket—correspondingly, 15.22¢ is only figure available to use in the numerator of the fraction in determining Kerr-McGee's increased rate, since it is Phillips' effective resale rate. PP. 858, 859.

5. In a proceeding arising under Section 4 of the Natural Gas Act, Commission *determines* contractually authorized rates; *provides* for refunds and *terminates* proceeding in part.

Commissioner O'Connor *concurs* in the result.

Francis S. Irvine, Lynn Adams and *C. H. Mullendore, Jr.* for Kerr-McGee Corporation.

John R. Rebman, Kenneth Heady and *Stanley L. Cunningham* for Phillips Petroleum Company.

Francis J. Gilmore for the Staff of the Federal Power Commission.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CARVER, *Commissioner:*

The principal question involved in this case is whether a rate increase proposed by Kerr-McGee Corporation (Kerr-McGee) for a sale to Phillips Petroleum Company (Phillips) is authorized by the parties' contract, which contract also constitutes Kerr-McGee's FPC Gas Rate Schedule No. 12. By his decision issued June 28, 1966, the examiner upheld Kerr-McGee in its contention that its proposed rate increase is contractually authorized. Phillips in its exceptions filed on August 11, 1966, admits that some increase is contractually authorized, but contends that the authorized increase is smaller than that proposed by Kerr-McGee, and the Commission's staff in its exceptions filed on August 12, 1966, agrees with Phillips. Kerr-McGee's reply exceptions filed on September 19, 1966, support the examiner. For the reasons stated hereinbelow, we conclude that the position of Phillips and staff is correct, and that the examiner's decision should be reversed.

The facts of the case are fully described in the examiner's decision and need only be summarized here. Kerr-McGee filed on August 30, 1965, under Section 4(d) of the Natural Gas Act, a proposed increase in its rate to Phillips for a certain sale of natural gas produced in Texas Railroad Commission District No. 10. Kerr-McGee proposed to increase the said rate from 10.45130¢ per Mcf to 11.84285¢ per Mcf (exclusive of tax reimbursement),[1] which increase it contended was permitted by the Kerr-McGee–Phillips contract.[2] Such proposed increase is set forth in Supplement No. 20 to Kerr-McGee's FPC Gas Rate Schedule No. 12. Phillips on September 13, 1965, filed a protest to this increase, on the ground that it lacked contractual assent. By Commission order issued September 29, 1965, the said increase was permitted to become effective on October 1, 1965, subject to refund.

Thereafter, by order dated November 2, 1965, 34 FPC 1223, the Commission provided for a hearing respecting Kerr-McGee's rate increase filing, limited to the issue of whether the contract between Kerr-McGee and Phillips provided for and permitted the proposed increase. The issue of whether the increased rate was just and reasonable was to be decided later, in the appropriate area rate proceeding. At the one-day hearing convened on January 17, 1966, the facts pertinent to resolving this case, as stipulated by the parties and incorporated by reference to the pertinent rate schedules, were admitted in evidence, and no further evidence was offered.

---

[1] All prices are stated exclusive of tax reimbursement, as to which there is no dispute.

[2] The acreage from which Kerr-McGee obtains the gas for the sale in issue constitutes a portion of the acreage originally dedicated under a contract dated 1945 between Stanolind Oil & Gas Company (now Pan American Petroleum Corporation) and Phillips. Pan American assigned the subject acreage to Kerr-McGee under a farmout agreement and an assignment in 1952. For this reason, Kerr-McGee filed the Pan American-Phillips contract as part of Kerr-McGee's FPC Gas Rate Schedule No. 12, and the contract is referred to herein as the Kerr-McGee–Phillips contract.

The provisions of Article VII of the Kerr-McGee–Phillips contract (as amended), under which Kerr-McGee proposes its increase at issue in this case, provided in pertinent part as follows (italics and brackets provided):

> Section 1. Buyer [Phillips] agrees to pay to Seller, subject to the further provisions of this article: (a) The sum of 6.0744¢ per thousand cubic feet [base price] for all gas * * *, delivered hereunder during the first five (5) years following the date of first delivery of gas under this contract; the sum of 5.9940¢ per thousand cubic feet [base price] for all such gas delivered during the second five-year period following the date of the first delivery of gas under this contract; the sum of 6.3066¢ per thousand cubic feet [base price] for all such gas delivered hereunder during the third five-year period following the date of first delivery of gas under this contract; the sum of 7.1463¢ per thousand cubic feet [base price] for all such gas delivered hereunder during the fourth five-year period following the date of first delivery of gas under this contract; * * *
>
> Section 3. Pursuant to the provisions of the said pipe line contract with Michigan-Wisconsin Pipe Line Company as modified by amendments thereto executed prior to January 1, 1950, Michigan-Wisconsin has agreed to pay to Phillips base prices for gas delivered thereunder of 7.5930¢ per thousand cubic feet for all gas delivered during the first ten (10) years after the time of first delivery of gas thereunder and at the end of said 10-year period and at the end of each succeeding 5-year period thereafter the price for all gas delivered thereunder will be increased .8933¢ per thousand cubic feet. Whenever the price received by Buyer [Phillips] for gas delivered by it at any time under said pipe line contract from reserves covered by said contract as amended by "Amendatory Agreement" dated August 9, 1948, and "Amendatory Agreement" dated December 1, 1949, shall as a result of any past or future amendments of the price provisions of said contract, the operation of the escalation provisions thereof or by virtue of an order of the Federal Power Commission or by operation of law or order of any other governmental agency having jurisdiction in the premises or *for any* other *reason become higher than the applicable base price as hereinabove specified in this Section 3, or while so higher be raised or lowered, the applicable price as stipulated in Sections 1 and 2 of this Article VII shall be adjusted upward* or downward as the case may be *to an amount which bears the same relationship to the applicable price stipulated in said Sections 1 and 2 of this Article which the price received by Buyer bears to the applicable base price as set forth in this Section 3;* provided, however, that the adjusted applicable price which may be effective hereunder shall never be less than the applicable price as specified in Sections 1 and 2 of this Article VII.

As appears from the above contract provisions, Phillips resells the gas it purchases from Kerr-McGee, with other gas, to Michigan Wisconsin Pipe Line Company (Michigan Wisconsin), such sale being made under Phillips' FPC Gas Rate Schedule No. 4.

Based upon the foregoing contractual provisions, the computation for determining how much, if at all, Kerr-McGee is entitled to increase its rate to Phillips, is best expressed by the following formula:

$$\text{Kerr-McGee's base price} \times \frac{\text{Phillips' effective resale rate}}{\text{Phillips' base price}} = \text{Kerr-McGee's increased rate.}$$

Applying the formula, there is no dispute as to Kerr-McGee's base price, which is 7.1463¢ per Mcf, as provided in Section 1 of the contract, quoted above. As to Phillips' effective resale rate, the numerator in the fraction, the facts are clear and undisputed that at the time of Kerr-McGee's filing for an increased rate on August 30, 1965, Phillips' effective resale rate to Michigan Wisconsin was 14.0635¢ per Mcf.

The major controversy between the parties involves the question of what should be the denominator of the fraction in the formula. Under Section 3 of the Kerr-McGee–Phillips contract, the denominator in the formula became 9.3796¢ per Mcf as of August 1, 1964. This consists of the initial base price of 7.5930¢ per Mcf plus escalations of .8933¢ per Mcf on August 1, 1959 and on August 1, 1964. Phillips never made any filing with the Commission to increase its rate to Michigan Wisconsin to reflect the increase in base price from 8.4863¢ to 9.3796¢ per Mcf, permitted on August 1, 1964.

Phillips argues that the base price, the denominator in the fraction, should be 9.3796¢, since this is the increased base price provided in the Kerr-McGee–Phillips contract. Phillips argues that the fact that it never made any filing to increase its rate to Michigan Wisconsin to reflect such higher base price does not change the express terms of the contract providing for the use of such higher base price in computing what Kerr-McGee's increased rate should be. The Commission's staff agrees with this position.

Kerr-McGee contends that Phillips' base price in the formula should be 8.4863¢ per Mcf, even though the contract provides for 9.3796¢, since Phillips never filed to increase its rate to Michigan Wisconsin to reflect this higher base price.

The examiner conceded that the language of the Kerr-McGee–Phillips contract quoted above may support Phillips' position in this case and the use of its base price figure in the denominator of the fraction. However, he held that it was appropriate to consider the intent of the parties as to the particular provisions of the Kerr-McGee–Phillips contract not merely from the Kerr-McGee–Phillips contract, but also from the terms of the Phillips-Michigan Wisconsin contract, various circumstances relating to the negotiation of both contracts, and other matters he believed relevant. He thought that these considerations revealed that the purpose of the Kerr-McGee–Phillips contract was to enable price increases to keep up with rising price levels, and that the parties were to increase their rates from time to time in order to achieve this purpose. On this basis, he concluded that Phillips had an obligation to give effect to the increase in the base price from 8.4863¢ to 9.3796¢, by a filing with the Commission reflecting the same. He concluded that because Phillips had failed to perform this obligation, it cannot object to Kerr-McGee's filing for an increased rate in this proceeding in reliance on this intent.

We disagree with the examiner. The dispute under consideration centers not on what Phillips' present base price is but rather what it should be in applying the price formula. The contract is explicit on this point. It specifically states the base price and the time for and amount of the periodic increases. Kerr-McGee and the examiner do not accept this explicit definition. Instead they would impose an unexpressed definition of base price for use in the formula and limit the base price to that reflected in the effective resale rate. Such interpretation of this contract is not only unnecessary, but to indulge in it is contrary to the long-settled rule that the intent of the parties to a clear and unambiguous contract must be gleaned from the contract language itself. *Calderon* v. *Atlas S.S. Co.*, 170 U.S. 272; *Greer* v. *Stanolind Oil & Gas Co.*, 200 F. 2d 920 (CA10–1952); *United States Pipe and Foundry Co.* v. *American Arbitration Association*, 67 N.J. Super. 384, 170 A. 2d 505 (1961). The contract under consideration is not ambiguous regarding Phillips' base price. The actual base price is provided for in the contract and it should be utilized in determining the price between Kerr-McGee and Phillips.

There being no evidentiary dispute, the ambiguity or clearness of the contract and the relevancy of outside evidence of intent are questions of law. *Universal Sales Corp.* v. *California Press Mfg. Co.*, 118 P. 2d 291 (1941), reversed on other grounds, 128 P. 2d 665 (1942); *Antero & Lost Park Reservoir Co.* v. *Lowe*, 194 P. 945 (1921).

What we have said applies also to the contention that Phillips acquiesced in Kerr-McGee's interpretation of the contract by accepting Kerr-McGee's billing. There is no evidence that the matter of interpretation ever came to the parties' attention. Once the matter was brought to Phillips' attention by the Kerr-McGee filing, Phillips promptly protested.

Applying the formula using the correct figures—namely, Kerr-McGee's base price of 7.1463¢ per Mcf, Phillips' effective resale rate of 14.0635¢ per Mcf, and the base price provided in the Kerr-McGee–Phillips contract of 9.3796¢ per Mcf produces an increased rate for Kerr-McGee as of October 1, 1965, when its proposed increase was placed in effect, of 10.71495¢ per Mcf, as contended by Phillips and staff.

The question that remains is what effect should we give in this case to an amendment dated January 18, 1965, of the contract between Phillips and Michigan Wisconsin deleting the existing pricing provision and substituting therefor a new pricing provision which provides a stated price of 15.22¢ per Mcf for this sale to Michigan Wisconsin, as set forth in Supplement No. 25 to Phillips' FPC Gas Rate Schedule No. 4. By Commission order issued in Docket No. RI65–526, this 15.22¢ rate was made effective on December 10, 1965, subject to refund.

Staff contends that since Phillips' resale rate to Michigan Wisconsin has now been increased to 15.22¢, this figure should be used in the numerator in Computing Kerr-McGee's increased rate on and after December 10, 1965, which would result in an increased rate of 11.5961¢ per Mcf. On this basis, staff requests that since Kerr-McGee has collected subject to refund as of October 1, 1965, an increased rate of 11.84285¢ per Mcf, plus applicable tax reimbursement, it should be required to refund, with applicable interest to the date of payment, any amounts collected in excess of a rate of 10.71495¢ per Mcf, plus applicable tax reimbursement, for the period from October 1, 1965, through December 9, 1965; and any amounts collected in excess of 11.5961¢ per Mcf, plus applicable tax reimbursement, for the period thereafter.

The examiner denied staff's request on the ground that the 15.22¢ rate is the subject of proceedings in Docket No. RI65–526 and that the relief staff requests is not appropriate in this case. Kerr-McGee contends that it has not filed any application for a rate based upon such 15.22¢ rate to Michigan Wisconsin and therefore the examiner had no basis for determining any contract rate insofar as Kerr-McGee is concerned in connection with such 15.22¢ rate.

We disagree with the examiner on this issue also. As staff points out, Phillips' filing of the 15.22¢ rate provides from both a contractual and filing viewpoint a ceiling on what it may collect on and after December 20, 1965, and during the time such rate is in effect, regardless of what just and reasonable rate may be determined in Docket No. RI65–526. Correspondingly, during such time, in applying the above-stated formula for determining Kerr-McGee's increased rate, 15.22¢ is the only figure available to use in the numerator of the fraction in determining Kerr-McGee's increased rate, since it is Phillips' effective resale rate. The fact that such increased rate was made effective in another docket obviously is completely immaterial for purposes of applying the formula. Likewise immaterial is the fact that Kerr-McGee has not filed for a rate increase reflecting such increased 15.22¢ rate, for we are not deciding what is Kerr-McGee's just and reasonable rate, but only what figure is properly to be used in applying the formula for determining the rate increase contractually authorized for Kerr-McGee on and after December 10, 1965, and the amount of refunds to be required accordingly.

In accordance with the foregoing, this proceeding should be terminated as to the contractual issues prescribed by our order issued November 2, 1965, setting such issues for hearing. The issue of the justness and reasonableness of Kerr-McGee's increased rate remains to be determined under such order. Likewise subject to future determination, in the event Phillips' 15.22¢ rate to Michigan Wisconsin is determined not to be just and reasonable, is whether the contractually authorized rate of Kerr-McGee to Phillips on and after December 10, 1965, should be lower than the 11.5961¢ per Mcf we herein determine to be contractually authorized for such period, and additional refunds required accordingly.

The Commission orders:

(A) The initial decision of the presiding examiner issued herein on June 28, 1966, is hereby reversed.

(B) As of October 1, 1965, Kerr-McGee's contractually authorized rate to Phillips under their contract the subject of this proceeding (Kerr-McGee's FPC Gas Rate Schedule No. 12) is 10.71495¢ per Mcf, plus applicable tax reimbursement; and as of December 10, 1965, is 11.5961¢ per Mcf, plus applicable tax reimbursement.

(C) Within 60 days of the date this opinion is issued, Kerr-McGee shall file a supplement to its FPC Gas Rate Schedule No. 12, superseding its Supplement No. 20 and setting forth its contractually authorized rates as determined in paragraph (B) above, for the periods of time stated in said paragraph (B), which rates shall be Kerr-McGee's lawfully effective rates under the Natural Gas Act and the Commission's Regulations.

(D) Within 70 days of the date this opinion is issued, Kerr-McGee shall compute the differences between the rate collected subject to refund in Docket No. RI66–81 to the date of this order and the contract rates as determined in paragraph (B) above for the respective periods involved, with interest at 7 percent per annum to the date of payment, and shall submit a report to the Commission, and serve a copy on Phillips, setting out the amount of refunds, plus applicable interest, it has computed showing separately the principal and interest, the bases used for such determination and the period covered. Within 20 days after such submittal, Kerr-McGee shall refund to Phillips with applicable interest to the date of such refund the monies it has collected in Docket No. RI66–81 in excess of the contract rates determined herein and within 10 days thereafter Kerr-McGee shall file with the Commission a release from Phillips showing receipt of the refunds in accordance with the provisions of this order.

(E) Except as to the matters reserved in the opinion accompanying this order, this proceeding is hereby terminated.

Commissioner O'Connor *concurs* in the result.

INITIAL DECISION

OF THE PRESIDING EXAMINER PURSUANT TO AN ORDER OF THE COMMISSION SETTING CONTRACTUAL MATTERS FOR HEARING IN RELATION TO RATE FILING UNDER SECTION 4 OF THE NATURAL GAS ACT

(Issued June 28, 1966)

SIMPSON, *Presiding Examiner.* The proceeding concerns a filing by Kerr-McGee Corporation (Kerr-McGee) pursuant to Section 4 of the Natural Gas Act (Act) of a proposed rate increase; the filing by Phillips Petroleum Company (Phillips) of an objection thereto; the filing of a further petition by Phillips, including a plea to the issue of contract entitlement; and the Commission order of November 2, 1965, 34 FPC 1223, which, reserving the question of justness and reasonableness of the rate, provided that a public hearing be held limited to the contractual issues involved.

For the reasons hereinafter stated, it is herein found and concluded that the proposed rate has adequate contractual support.

On August 30, 1965, Kerr-McGee filed Supplement No. 20 of its FPC Gas Rate Schedule No. 12, in which it proposed, effective September 13, 1965, to adjust the rate for gas sold to Phillips in the Texas-Hugoton Field, Sherman County, Texas (Texas Railroad Commission's District No. 10), from 10.45130 cents per Mcf to 11.84285 cents per Mcf, exclusive of the applicable tax reimbursements.[1] The filing described the rate as representing the effect of a periodic increase in the base rate under amended Article VII, Section 1, of a contract originally executed December 5, 1945, by and between Stanolind Oil and Gas Company (Stanolind) and Phillips (Stanolind contract), filed as Kerr-McGee's FPC Gas Rate Schedule No. 12, as amended by Article III, Section 2, of a written agreement between the same parties, dated March 10, 1950 (amendment), and previously filed as Supplement No. 1 to Kerr-McGee's FPC Gas Rate Schedule No. 12.[2]

On September 13, 1965, Phillips filed protest asserting the proposed increase to lack contractual consent and the filing by Kerr-McGee to be unlawful.[3]

By order issued September 29, 1965, in Docket No. RI66–81, the Commission suspended the proposed rate for one day, until October 1, 1965, whereupon on an undertaking duly filed and subject to refund, the proposed increase became effective.

On October 8, 1965, Phillips filed petition for reconsideration and vacation of the Commission's order of September 29, 1965, or in the alternative for an immediate hearing on the limited issue of Kerr-McGee's contractual entitlement to the increased rate, and on November 2, 1965, the Commission issued its order herein aforesaid, entitled "Order Consolidating Proceedings, Permitting Intervention, and Setting Contractual Matters for Hearing", directing a public hearing with respect to the contractual issues involved, and a prehearing conference to commence November 16, 1965, following which the Presiding Examiner would give notice of the date of hearing and prescribe procedures deemed appropriate in the disposition of the matters involved.

---

[1] Unless otherwise indicated, all prices are stated on a per Mcf basis, at 14.65 psia, before reimbursement for production taxes.

[2] The contract dated December 5, 1945, as well as the amendment dated March 10, 1950, was executed by and between Stanolind (now Pan American Petroleum Corporation), as Seller, and Phillips as Buyer, for the sale and purchase of natural gas from leases located in Sherman and Hansford Counties, Texas, and Texas County, Oklahoma. Subsequently, pursuant to a farm-out contract dated September 10, 1952, (Supp. No. 10), and an assignment of September 15, 1952, (Supp. No. 11), made subject to the terms of the contract and amendment, Stanolind assigned to Kerr-McGee the oil and gas leases covering the tract within the field known as the Prymek Unit, including underlying dry gas rights down to a depth of 3300 feet.

[3] Citing, *United Gas Pipe Line Co.* v. *Mobile Gas Service Corp.*, 350 U.S. 332 (1956).

During the duly convened prehearing conference the participants stipulated to the amount and effective date of the adjusted rate received by Phillips from Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) for natural gas sold under a contract dated December 11, 1945 (pipeline contract); the amount of Phillips' unadjusted base rate to Michigan Wisconsin; and to the step-up base rate to which Phillips was contractually entitled but for which it had not filed. The participants further stipulated that there be received in evidence, by reference to the Commission's formal files, Phillips' FPC Gas Rate Schedule No. 4, including amendments and supplements (Item B), and Kerr-McGee's FPC Gas Rate Schedule No. 12, likewise with amendments and supplements (Item C).[4]

The hearing convened January 17, 1966, when the foregoing items were duly received, but, no further evidence being offered, with the setting of dates for the submission of briefs, was thereupon concluded.

THE ISSUES

The primary issue of these proceedings involves the following premises and question.

The Stanolind contract providing for an adjustment of its specified period step-up base rate for gas sold Phillips in the ratio of the price received by Phillips from Michigan Wisconsin to the applicable base rate provided in the pipeline contract; and the pipeline contract providing for a period increase in the base rate for gas sold by Phillips to Michigan Wisconsin; and, Phillips neither filing for the increased base rate under Section 4 of the Act nor using it to redetermine the price to be received from Michigan Wisconsin; then, is Kerr-McGee's 5-year base rate for the period commencing September 13, 1965, to be adjusted on the basis of the rate provided in the pipeline contract effective for the period prior to that of the new base rate increase of the pipeline contract (August 1, 1959–August 1, 1964), or, is it to be adjusted on the basis of the new rate provided for the period commencing August 1, 1964, but for which Phillips has not filed?

The secondary issues raised in the briefs of participants are considered in following portions of this decision.

CONTENTIONS OF PARTICIPANTS

Kerr-McGee arrives at its proposed rate (Supp. No. 20) by multiplying its base price to Phillips (7.1463 cents) by a fraction having as its numerator Phillips' price to Michigan Wisconsin in effect at the time of its filing (14.0635 cents) and as its denominator the base price actually used at the time by Phillips for purposes of billing for gas sold to Michigan Wisconsin (8.4863 cents).[5]

---

[4] The participants stipulated to the admissibility of the Pan American Petroleum Corporation (Operator), *et al.*, FPC Gas Rate Schedule No. 57 with amendments and supplements (Item A) relating also to sales of natural gas, by Pan Am to Phillips for resale to Michigan Wisconsin, under the same contract as Kerr-McGee's FPC Gas Rate Schedule No. 12, but the proceedings involving Pan Am, then a party by virtue of the consolidation of proceedings effected by Commission's order aforesaid, issued November 2, 1965, in Docket Nos. RI66–61 and RI66–81, were subsequently severed and terminated. The briefs of participants indicate no substantial reliance upon this item.

Kerr-McGee contends that the currently appropriate base rate applicable to Phillips' sales to Michigan Wisconsin is that received on July 31, 1965 (8.4863 cents), and not the 9.3796 cents periodic step-up provided in the pipeline contract, which Phillips never put into effect.[6]

Phillips contends that the language of Article VII, Section 3, of the Stanolind contract, requires that the period base price of 7.1463 cents be adjusted in the ratio of the price then received by Phillips (14.0635 cents) to the period base price provided in the pipeline contract commencing August 1, 1964, of 9.3796 cents; the Stanolind contract does not impose an obligation upon it to file for the step-up rate; it has not received payments from Michigan Wisconsin based upon the new base rate (9.3796 cents), and since January 18, 1965, has not been entitled thereto; and, accordingly, until December 10, 1965, the date when Phillips made effective its proposed renegotiated rate of 15.22 cents, Kerr-McGee was only entitled to file for an increased price to Phillips of 10.71495 cents.[7]

Kerr-McGee rejoins that adopting Phillips' proposal would mean that Phillips would obtain, in effect, an unapplied for and improper base rate increase[8]; and further asserts that the contract has received a practical construction by its action and that of Phillips', in that from August 1, 1964 until October 1, 1965, a period of some 13 months, it continued to bill for gas, and Phillips to pay, on the basis of use in the rate formula of a Phillips' base rate of 8.4863 cents.

Staff contends that by terms of the pipeline contract the base rate of 9.3796 cents became effective August 1, 1964, and is the "applicable base price"; the language of the contract distinguishes "applicable base price" and "price received" and does not require that Phillips charge and collect the base rate as a "received" rate before it becomes an operative part of the formula for the adjustment of Kerr-McGee's rate; Phillips' putting into effect the 15.22 cents renegotiated rate on December 10, 1965, limits Kerr-McGee's claim to the interval between October 1, 1965 and December 10, 1965, and terminates the base rate controversy; and since Kerr-McGee has collected, subject to refund, on and after October 1, 1965, on the basis of an adjusted base rate of 11.84285 cents, as compared with the appropriate contractual adjusted base rate of 10.71495 cents, it should be required to refund, with interest, all amounts in excess of 10.71495 cents through December 9, 1965, and likewise as to amounts collected since, in excess of an appropriately adjusted base rate of 11.5961 cents.

---

[5] The contractual formula is: Kerr-McGee's adjusted rate=(Kerr-McGee's base rate) × (the price received by Phillips from Michigan Wisconsin divided by Phillips' base rate to Michigan Wisconsin). The participants agree that Kerr-McGee's base rate is 7.1463 cents and that the price then received by Phillips from Michigan Wisconsin was 14.0635 cents, but dispute as to the base rate to be taken from the pipeline contract, Kerr-McGee contending that use of the next period base rate would in fact reduce the ratio between Phillips' current price to Michigan Wisconsin and its applicable base price to the latter, and so the price to Kerr-McGee (from 11.84285 cents to 10.71495 cents).

[6] Increasing the base price to 9.3796 cents would have increased Phillips' price for gas to Michigan Wisconsin from the then effective 14.0635 cents to 15.5439 cents, which, in turn, would have led to a further adjustment by Kerr-McGee of its price to Phillips, *i.e.*, 7.1463 cents × 15.5439 cents/9.3796 cents=11.84285 cents. However, during this period Phillips was attempting to renegotiate the price provisions of the pipeline contract, which it eventually succeeded in doing, as evidenced by the filing of Supp. No. 25, to its FPC Gas Rate Schedule No. 4.

[7] Continuing, when Phillips' renegotiated rate became effective, Kerr-McGee was entitled to file for a rate of 11.5961 cents, derived by adjusting Kerr-McGee's base price (7.1463 cents) in the ratio of Phillips' renegotiated rate of 15.22 cents to the base rate of 9.3796 cents.

[8] It appears that Kerr-McGee's ratio of 14.0685 cents to 8.4863 cents or 165.72 percent produces the same percentage adjustments to its base rate as would the applicable ratio which would have resulted had Phillips filed for and placed into effect the step-up base rate to Michigan Wisconsin, *i.e.*, 15.5439 cents to 9.3796 cents, or 165.72 percent; whereas, Phillips' ratio of 14.0635 cents to 9.3796 cents produces a lower 149.937 percent.

Kerr-McGee rejoins that the amendment of the pipeline contract negotiated between Phillips and Michigan Wisconsin as of January 18, 1965, which substitutes a price of 15.22 cents for that of the previous pricing provision, does not affect the formula and has no practical effect as the numerator, the price received by Phillips, is not in issue.

FINDINGS AND CONCLUSIONS

The construction to be given the Stanolind contract involves a determination as to the intent of the original parties thereto which will thereupon govern throughout its life, and be binding upon Kerr-McGee as a successor-in-interest (*Doll* v. *Maravilas*, 187 P. 2d 885, 888 (Cal. D.Ct. App. 1947)).

A literal reading of the "applicable price" clauses of Sec. 3 of Art. VII of the contract may support Phillips' construction that Sec. 3 provides a self-enforcing "applicable base price", whether a filing therefor under the provisions of the pipeline contract is made or not, but inquiry as to intent does not end with a literal reading of the terms of a contract.

The Stanolind contract was in process of negotiation and consummation contemporaneously with the pipeline contract. It was entered into to enable Phillips to obtain a substantial part of the additional reserves and supplies needed to meet the expected requirements of the pipeline (Recitals, Kerr-McGee Gas Rate Schedule No. 12).

The pipeline contract commits to Michigan Wisconsin Stanolind's reserves including those of the Prymek Unit, and effectually dedicates the gas produced and saved therefrom (Art. II, Secs. 2 and 6). It binds Phillips to enforce provisions of its supply contracts requiring the producer to proceed with diligence in the development of leases and the drilling of wells, as necessary to enable the producer to meet its contract commitment (Art. I, Sec. 4), and to assert, for Michigan Wisconsin's benefit, all rights possessed by Phillips thereunder.

It appears appropriate that provisions of the pipeline contract be considered in determining the intent of the parties as to corresponding provisions of the Stanolind contract (*Humble Oil & Refining Co.* v. *Mullican*, 190 S.W. 2d 392, 395 (Tex. Civ. App. 1945); *Banks* v. *City of Ardmore*, 112 P. 2d 372, 376 (Okla. 1941)).

When the parties reduce their agreement to writing, the written instrument should be presumed to embody the entire contract (*Danciger Oil & Refining Co. of Texas* v. *Powell*, 154 S.W. 2d 632, 635 (Texas 1941)); but in construing the contract, it is necessary to determine the intention of the parties as expressed in the language which they have used (*Weaver* v. *Weaver*, 171 S.W. 2d 898, 900 (Tex. Civ. App. 1943); *Withington* v. *Gypsy Oil Co.*, 172 P. 634, 635 (Okla. 1918); *Virginia Ry. Co.* v. *Avis*, 98 S.E. 638, 639 (Va. 1919)), without importing duties and obligations by implication merely because otherwise it may seem that the agreement is unwise or unjust. (*Danciger Oil & Refining Co.* v. *Powell*, *supra;* see, *Federal Land Bank of Wichita* v. *Nicholson*, 251 P. 2d 490, 494 (Okla. 1952)).

Therefore, in the matter of construction of contracts it is proper to take the place of the parties at the time the contract was made, consider their situation with respect to the subject matter (*Weaver* v. *Weaver*, *supra*, 900; *Liberty National Bank & Trust Co.* v. *Bank of America*, 218 F. 2d 831, 840 (10th Cir. 1955); *Empire Properties Corp.* v. *Manufacturers Trust Co.*, 43 N.E. 2d 25, 28 (N.Y. 1942); *Virginia Ry. Co.* v. *Avis*, *supra*, 640) as well as the language thereof in the light of facts and circumstances surrounding the parties when the contract was made, and the purpose sought to be accomplished (*Lone Star Gas Co.* v. *X-Ray Gas Co.*, 164 S.W. 2d 504, 508 (Texas 1942); *Gulf Oil Corp.* v. *Spence & Howe Constr. Co.*, 356 S.W. 2d 382, 388 (Texas Civ. App. 1962); *United States, ex rel. Moseley* v. *Mann*, 197 F. 2d 39, 41 (10th Cir. 1952); *Hoffer Oil Corp.* v. *Hughes*, 16 S.W. 2d 901, 904 (Texas Civ. App. 1929)) in order to obtain preliminary comprehension of the meaning of a contract, the effect to be given to the words of which it is composed, and the standpoint of the parties with repect to the subject matter, (*Reed* v. *Insurance Co.*, 95 U.S. 23, 30–31 (1877); *Newark Publishers' Ass'n* v. *Newark Typo. Union*, 126 A. 2d 348, 353 (N.J. 1956)).

The recitals of the Stanolind contract and of the amendment of March 10, 1950, indicate that each was executed by the parties through Oklahoma offices, and it is inferred that the contract and amendment were executed in Oklahoma. Performance under the Stanolind contract by Stanolind requires the development of leases by drilling, and the production and delivery of natural gas from wells located in Sherman and Hansford Counties, Texas, and Texas County, Oklahoma, and, thus, to a substantial extent involves deliveries from wells located in Texas.

Performance, as concerned with the issues of this proceeding, requires of Kerr-McGee the development of leases and the production and delivery of natural gas to Phillips at the wellhead on the Prymek Unit, Sherman County, Texas (Art. III), acceptance of such deliveries by Phillips, and payment therefor, ostensibly, at offices in Oklahoma.[9]

It would appear that, while a determination of the meaning of words would not require reliance upon precedents obtained exclusively from Texas or Oklahoma law (Restatement, Conflict of Laws, Sec. 332, comment, a), a construction determining the legal effect of the language would (Restatement, Conflict of Laws, Sec. 332 comment, c). However, the law and decisions of the courts of these two states, applicable in determining the intent of the parties to a written instrument, appear to disclose no variation or departure one from the other, or modification of the rules generally applied as stated in this decision, which would be of apparent significance as to the matters involved in this proceeding.[10]

Prior to amendment (Kerr-McGee Gas Rate Schedule No. 12, Supp. No. 1) the Stanolind contract related the price of gas to an inflation-deflation formula based upon upward and downward changes of stated magnitude in a general commodity price index, and changes in the general price level of Michigan Wisconsin's and distributors' rates (Art. VII, Sec. 2). Similarly, the pipeline contract made provision, initially, for adjustment in Phillips' rate on the basis of inflation or deflation as determined by reference to the general price index (Art. VIII, Sec. 2) and on the basis of Michigan Wisconsin's general rate level. In this respect the pricing provisions of the original two contracts, as filed, were practically the same (pipeline contract, Art. VIII, Sec. 2; Stanolind contract, Art. VII, Sec. 2). The Stanolind contract also provided that Phillips would use its best efforts to induce Michigan Wisconsin to diligently pursue all of its rights and remedies in a good faith endeavor to increase its rates from time to time to the end that these may be brought up to inflated price levels (Art. VII, Sec. 2), while in the pipeline contract Michigan Wisconsin agreed that it would diligently pursue such rights and remedies in a good faith endeavor to effect such increases. The Stanolind amendment of March 10, 1950 (Kerr-McGee Gas Rate Schedule No. 12, Supp. No. 1) omits the reference to price indices and inflation, but the price amendments of the pipeline contract of August 9, 1948, and December 1, 1949 (Phillips' Rate Schedule No. 4, Supps. Nos. 3 and 6), retain the reference to the price index, provides an adjustment substantially equivalent to that of the original contract, and specifically saves the obligation that Michigan Wisconsin diligently endeavor to effect the changes required. The Stanolind amendment (Supp. No. 1, *supra*) omits the duty imposed upon Phillips to use best efforts to induce Michigan Wisconsin to increase prices to inflated price levels, but takes specific cognizance, as previously stated, of the provisions of the pipeline contract which established Phillips' periodic base prices for gas sold Michigan Wisconsin.

---

[9] Phillips' deliveries to Michigan Wisconsin are effected at Phillips' Sherman plant meter station, Hansford County, Texas (Phillips Rate Schedule No. 4, Art. IV).

[10] The statutes of Oklahoma provide to the effect that a contract shall be interpreted according to the law of the place of performance (Okla. Stat. (1961), Title 15, Sec. 162), the sale of gas by Kerr-McGee to Phillips occurs in Texas, and several Texas decisions express the view that the contract is to be interpreted according to the law and usage of the place where it is to be performed, emphasizing that the attention of the parties is drawn to the law of the state in which the contract can be broken and liability incurred, and that it is to be presumed that they intended that their rights and obligations be determined by the laws prescribed by that state upon the subject, *Cockburn* v. *O'Meara*, 141 F. 2d 779, 782 (CA5–1944). However, as stated, no reason appears for not applying the generally accepted rules of interpretation stated in the text of this decision.

The intention of the parties should not be determined by mere reference to the specific provisions of the contract (*Myers* v. *Gulf Coast Minerals Management Corp.*, 361 S.W. 2d 193, 195 (Texas 1962); *Cities Service Oil Co.* v. *Geolograph Co.*, 254 P. 2d 775, 780 (Okla. 1953); *Lion Oil Co.* v. *Gulf Oil Corp.*, 181 F. 2d 731, 733 (CA5–1950)). Single portions, sentences, or clauses should not be considered as standing alone, nor should words and phrases of the contract be isolated and given a literal meaning inconsistent with the whole contractual scheme. (*Newark Publishers' Ass'n.* v. *Newark Typo. Union, supra.*) Rather, the contract is to be looked at within all four corners, (*Gresham* v. *Turner*, 382 S.W. 2d 791, 793 (Texas Civ. App. 1963); *United States ex rel. Moseley* v. *Mann, supra*) and be given such effect as is necessary to enable it to achieve its general purpose (*Hoffer Oil Corp.* v. *Hughes, supra; Cities Service Gas Co.* v. *Kelly-Dempsey & Co.*, 111 F. 2d 247, 250 (CA10–1940)). Greater regard is to be given to the clear intent of the parties than to the particular words used in the expression thereof (*Rabon* v. *Berry*, 245 P. 2d 440, 444 (Okla. 1952)), which words may be narrowed, broadened, or qualified, as the case may be, by the purpose made evident by the whole writing. (*Cities Service Oil Co.* v. *Geolograph Co., supra; Newark Publishers' Ass'n* v. *Newark Typo. Union, supra; Empire Properties Corp.* v. *Manufacturers Trust Co., supra; Sparks Milling Co.* v. *Powell*, 143 S.W. 2d 75, 77 (Ky. 1940)).

The evident purpose of the provision in the original Stanolind contract, was to provide Stanolind, its successors and assigns,[11] as producers, the protection price-wise which Phillips, a like producer, had obtained under its original contract (Supps. Nos. 3 and 6, *supra*). Upon consideration of the foregoing circumstances and looked at in its entirety, the evident purpose of the pricing provisions of the amended contract was still to assure that the contract should not be burdensome to either party in the event of rising prices, no less than in the original pricing provisions. The language of the amendment does not indicate an intent to surrender any part of such purpose, but rather supports an inference that Stanolind was satisfied to rely upon an assumption that Phillips' position as a co-supplying producer was sufficient to afford it assurance that the reference to the base price of the pipeline contract would yield a result fully compatible with that of the original purpose. The main purpose controls over dry words (*Withington* v. *Gypsy Oil Co., supra*, at 635), and a construction which provides a basis for justice to both parties should prevail. (*Marathon Oil Co.* v. *Edwards*, 96 S.W. 2d 551, 553 (Texas Civ. App. 1936); *Withington* v. *Gypsy Oil Co.*, *supra*, at 637.) Therefore, it must be implied that Sec. 3 of Art. VII was intended by both Stanolind and Phillips to provide Stanolind no less certainty as to its price than the stipulation of good faith efforts by Michigan Wisconsin would provide to Phillips.

---

[11] The intent of the original parties governs throughout the life of the contract and unless modified binds successors in interest (*Doll* v. *Maravilas, supra*).

Kerr-McGee's assertion that it has billed, and Phillips has paid over a period of time, on the basis of a computation consistent with its construction of Art. VII and inconsistent with that advocated by Phillips, is uncontradicted. Generally, a practical construction or interpretation by the parties of a doubtful contract should be followed. (*Lone Star Gas Co.* v. *X-Ray Gas Co.*, *supra*, at 508; *Liberty National Bank & Trust Co.* v. *Bank of America*, *supra*, at 836.)

Moreover, several acts of the parties, separate in nature but similar in effect, make it clear that the base price and escalation provisions are designed to compensate the producer for developing, equipping, drilling, producing, and operating the lease or unit, to make available additional gas and to provide a price which, over the life of a long term contract, would enable it to meet varying increases in capital investment and operating costs, particularly with respect to the development of reserves (Kerr-McGee, Supps. Nos. 17, 18, and 19, filed February 24, 1958, August 8, 1960, and January 30, 1961, respectively.)

In support of an escalated period price increase effective at the end of the five-year period following the date of first delivery, Phillips urged that, due to a decline of some 95 psia from original reservoir pressures, it was being put to added expense in maintaining deliveries by means of its gathering system and it had become necessary to develop marginal areas and drill additional wells on closer spacing and, in effect, that as it was necessary for the producer to know in advance the price he is to receive, these matters had been anticipated and considered when the specific prices were provided in the pipeline and gas purchase contracts (Supp. No. 13, filed January 3, 1955; *cf.*, Supp. No. 23, filed June 29, 1959). Likewise, when Phillips attempted to adjust its base rate for an increase in Michigan Wisconsin's resale rates for which a filing had been made on May 11, 1956, Phillips repeated certain of such grounds, asserting that to maintain deliveries with reservoir pressures dropping another 5 psia, and continuing at the rate of 10 psia per year, it was having to incur additional investment costs and operating expenses; and that its proposed price did not permit it to maintain a price relationship equal to price levels which existed at the time the contract base price was specified (Supp. No. 19, filed June 25, 1956; *cf.* Supps. No. 21, filed March 15, 1957, and No. 24, filed April 21, 1960).

The insertion in Art. VII, Sec. 3, of the reference to the provisions of the pipeline contract with Michigan Wisconsin whereby Michigan Wisconsin had agreed to pay Phillips certain base prices, clearly was not meant to provide to Stanolind and its successors, during any or all of the five-year periods of the indefinite term of the contract, a price which might be either greater or less, dependent upon Phillips' uncontrolled discretion in the matter. If the contrary be held, then it follows that the contract imposes a duty in this respect of uncertain nature, and determinable only at the will of Phillips or its successors. Phillips offers no justification for not putting the contractual step-up rate into effect and the rule that in every contract there exists an implied covenant of good faith (*Kirke La Shelle Co.* v. *Paul Armstrong Co.*, 188 N.E. 163, 167 (N.Y. 1933)) leads only to the result contended for by Kerr-McGee.

While it is generally true that an implied covenant must rest upon the presumed intention of the parties as gathered from the terms actually expressed in the written instrument, and must appear to have been so clearly within the contemplation of the parties that they deemed it unnecessary to express it (*Danciger Oil & Refining Co. of Texas* v. *Powell*, *supra*, at 635), it is also generally held that where a contract creating mutual rights and obligations fails to specify the duties and obligations intended to be assumed, an agreement will be implied to do those things that, according to reason and justice, should be done to effect the purpose for which the contract was made (*Humphreys* v. *Central Kentucky Natural Gas Co.*, 229 S.W. 117, 119–120 (Ky. 1920)). That which is unmistakably implied is as much a constituent element of the intent as that which is expressed in terms (*Newark Publishers' Ass'n.* v. *Newark Typo. Union*, *supra*, at 352–353).

It has been held that when a lessee subleases, and the sub-lessee has knowledge of the basic lease and knows that the shorter term thereof can be extended to validate the term of the sub-lease, the sub-lessor's act of leasing is to be regarded as reasonably calculated to lead to the belief that he will secure the extension of his lease, and the sub-lease implies an intent and agreement so to do (*Texas Co.* v. *Adelman*, 99 P. 2d 874, 876 (Okla. 1940)). The amendment of the Stanolind contract conveys no indication that Phillips did not intend to exercise its rights to give effect to base rate increases at the times provided in the pipeline contract, and because want of such exercise would result in a loss to Stanolind and its assigns, the principle stated in the cited case fully applies.

The similarity of language contained in the pricing provisions of the several producer contracts committing reserves required by Phillips in support of its original contract with Michigan Wisconsin indicates that the language of Art. VII, Sec. 2, of the Stanolind contract is that of Phillips, and the circumstances giving rise to the amendment of March 10, 1950, as stated in the recitals thereof, raises an inference that the language of the amendment is also that of Phillips. In these circumstances, the rule of strong construction against the author, though secondary in nature and not favored, is nevertheless applicable, and accordingly, the language of the Article's Sec. 3 is to be interpreted most strongly against Phillips, (*Cities Service Gas Co.* v. *Kelly-Dempsey & Co.*, *supra* at 249. *Cf.*, *Universal C. I. T. Credit Corp.* v. *Daniel*, 243 S.W. 2d 154, 157 (Texas 1951); *United States* v. *Jackson*, 158 F. 2d 700, 702 (CA5–1946)), with the result that of two possible constructions that one proposed by Kerr-McGee, as the least favorable to Phillips, should be adopted (*Stowers* v. *Harper*, 376 S.W. 2d 34, 41 (Texas Civ. App. 1964)).

Staff's contention that Art. VII of the Stanolind contract, expressly distinguishing "the price received" by Phillips and the "applicable base price" of the pipeline contract, requires a finding that use of the new period price in the rate formula does not depend upon any act of Phillips, cannot be accepted. As Sec. 3 of this Article expressly premises the fact that Michigan Wisconsin has "agreed to pay" the period's base price, the intent of the parties to the Stanolind contract again involves a selection between either of two possible constructions, and the surrounding facts and circumstances and main purpose matters, and the rule of strong construction, as hereinabove stated and considered, lead to the conclusion that the contention should be rejected.

In conclusion, therefore, Phillips, having failed to perform an obligation assumed by it under the pricing provisions of the amended Stanolind contract, may not be heard to object to the filing in this proceeding which, in reliance upon a proper construction as to the intention of the parties as expressed in the written terms of the amended contract, set forth a result that is consistent therewith.

FURTHER FINDINGS AND CONCLUSIONS

Upon the findings and conclusions and for the reasons hereinabove stated Phillips' request that the Commission reject Kerr-McGee's increased rate filing as unlawful because made without Phillips' contractual consent should be denied as hereinafter provided in the order included as a part of this decision; and upon the same bases and premises Staff's request that Kerr-McGee be required to refund, with applicable interest to the date of payment, amounts collected in excess of a base rate of 10.71495 cents per Mcf, plus applicable tax reimbursement, for the period from October 1, 1965, through December 9, 1965, should also be denied likewise as provided in the order which follows.

Action which Staff seeks in relation to its request that for the period following December 9, 1965, Kerr-McGee be required to refund, with applicable interest, amounts collected in excess of a base rate of 11.5961 cents[12] per Mcf, depends upon Commission action with respect to Phillips' renegotiated rate in Docket No. RI65-526. The request does not in fact concern the propriety of the filing of Kerr-McGee's Supp. No. 20, and does not relate to a relief now appropriate, but rather to matters which are under consideration in current area rate proceedings involving sales of natural gas produced from the Hugoton field area. In view of the foregoing and the suspension and refund obligations effected both in this Docket (No. RI66-81) and Docket No. RI65-526, *supra*, Staff's immediate request is denied, as provided in the order included as part of this decision.

Phillips' contention that its amendatory agreement with Michigan Wisconsin of January 18, 1965, though suspended upon filing, nullified its right to make further rate filings under provisions of the pipeline contract in effect prior thereto has no bearing upon its implied duty to have previously filed for the base rate increase and adjustment available to it August 1, 1964.

Proposed findings and conclusions inconsistent with those of this decision are herewith denied.

ORDER

Upon consideration of the record herein, the matters set forth in the briefs and contentions of respective counsel, and for the reasons and upon the findings and conclusions set forth in the foregoing portions of this decision, of which this order is a part,

IT IS BY THESE PRESENTS ORDERED, subject to review by the Commission on appeal, or on its own motion, as provided by its Rules of Practice and Procedure, that:

(A) Phillips' request that the filing by Kerr-McGee of its Supp. No. 20, to its FPC Gas Rate Schedule No. 12, be rejected for want of contractual consent be and the same is hereby denied;

(B) Staff's request that Kerr-McGee be now required to make certain refunds for the period October 1, 1965 through December 9, 1965, and for the period following the latter date, be and the same is hereby denied;

(C) Proceedings related to the issue of contractual authorization as stated in Commission's order issued herein November 2, 1965, be and the same are hereby terminated and dismissed.

EWING G. SIMPSON,
Presiding Examiner.

---

[12] To reflect an adjustment of Kerr-McGee's base rate (7.1463¢), in the ratio of Phillips' filed renegotiated rate (15.22¢) placed in effect in Docket No. RI65-526 as of December 10, 1965, to Phillips' period base rate (9.3796¢).

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

WISCONSIN MICHIGAN POWER COMPANY, PROJECT NO. 2471

ORDER ISSUING LICENSE (MINOR)

(Issued November 16, 1966)

Application was filed on May 4, 1964, and amended on September 16, 1965, by Wisconsin Michigan Power Company (Applicant) of Appleton, Wisconsin, for a license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2471, known as the Sturgeon Plant, located on the Sturgeon River, a tributary of the Menominee River, in Dickinson County, Michigan. No lands of the United States are affected by the project.

The project has been constructed and in operation since 1924, and it does not appear that there has been any substantial alteration to the project since 1924.

The Secretary of the Army and the Chief of Engineers have reported that the plans of the project structures affecting navigation are satisfactory insofar as the interest of navigation is concerned.

The Department of the Interior, in reporting on the application, recommended for inclusion in any license for the project, terms and conditions in the interests of fish and wildlife and recreational resources as set forth in attached Form L-9, and a special condition in the interest of fish resources set forth herein as Article 14.

The Department of Health, Education, and Welfare has advised that the project is not presently causing any water supply, pollution control, or vector control problems, and none is anticipated.

The Michigan Department of Conservation has advised that it has received a statement of Applicant's willingness to cooperate with the Department in providing for both public access and a canoe portage at the project, with the Department assuming the cost of any facilities at the access points, and that the Department plans to work out lease arrangements with Applicant or acquire needed lands for such purposes.

There is ample historical evidence of the use of the Sturgeon River and other tributaries of the Menominee River, such as the Pine, Paint and Brule, for the floating of great quantities of pine logs before the turn of the last century. Millions of feet of timber were driven down the East Branch of the Sturgeon River and down the latter river into the Menominee. Sturgeon Plant Project No. 2471 is situated on the Sturgeon River at river mile 7.8, approximately 22 miles below the confluence of the East and West Branches with the Sturgeon River.

For reasons set for in our Opinion No. 357 (27 FPC 830), the license herein granted shall have an effective date of April 1, 1962 and a termination date of December 31, 1993.

In our order on rehearing issued February 17, 1965, in *Wisconsin Power & Light Company, Project No. 2347, et al.* (33 FPC 275) we stated that we would have no objection to the issuance of licenses for minor projects without waiving Sections 14 and 15 of the Federal Power Act and the other provisions of the Act necessary to the effectuation of those sections, provided the minor project applications are timely supplemented pursuant to Section 4.50 of our Regulations under the Act (18 CFR § 4.50), which relates to applications for major projects.

In the event the applicant herein wishes a license in which those provisions of the Act are not waived it should so advise us within 30 days from the date of issuance of this order and file its supplemental application within 30 additional days thereafter.

The Commission finds:

(1) The Sturgeon River from its mouth in the Menominee River to points on the river upstream from Project No. 2471 is a navigable water of the United States.

(2) Sturgeon Plant Project No. 2471 is located on navigable waters of the United States.

(3) Applicant is a corporation organized under the laws of the State of Wisconsin, and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(4) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(5) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(6) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

(7) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 1,070 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable as hereinafter fixed and specified.

(8) It will be in the public interest to waive pursuant to Section 10(i) of the Act, the terms and conditions contained in the following sections of Part I of the Act:

> Sections 4(b), except the second sentence thereof; 4(e), insofar as it relates to approval of plans by the Chief of Engineers and the Secretary of the Army and to public notice; 6, insofar as it relates to public notice and to the acceptance and expression in the license of terms and conditions of the Act which are hereinafter waived; 10(c), insofar as it relates to depreciation reserves; 10(d); 10(f); 11; 12; 14, except insofar as the power of condemnation is reserved; 15; 19; 20; 22; and 23(a), insofar as it relates to the determination of fair value.

The Commission orders:

(A) This license is hereby issued to Wisconsin Michigan Power Company (Licensee) of Appleton, Wisconsin, under Sections 4(e) and 10(i) of the Act, for a period effective as of April 1, 1962 and terminating December 31, 1993, for the continued operation and maintenance of Sturgeon Plant Project No. 2471, located on the Sturgeon River, a tributary of the Menominee River, and a navigable water of the United States, in Dickinson County, Michigan, subject to the terms and conditions of the Federal Power Act insofar as not expressly waived herein, which Act is incorporated by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) Sturgeon Plant Project No. 2471 consists of:

(i) all lands constituting the project area and enclosed by the project boundary or limits which are otherwise defined;

(ii) (a) A reinforced concrete dam—310 feet long and 53 feet high; (b) a 248 acre reservoir (normal surface elevation 928.6 feet); (c) an intake structure, a rock tunnel (240 feet long and 7 feet in diameter), and a steel penstock (48 feet long and 7 feet in diameter); and (d) a 21 foot by 34 foot reinforced concrete and brick powerhouse which contains one Westinghouse generator rated at 1,000 kva, one Francis type vertical turbine rated at 1,170 hp (66 foot head), and one 2.3/13.8 kv substation; and;

(iii) all other structures, fixtures, equipment, or facilities which are located in the project area and are useful in the maintenance and operation of the project; and all rights and interests the possession of which is necessary or appropriate in the maintenance and operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L-9 (July 1, 1964) entitled, "Terms and Conditions of License for Constructed Minor Project Affecting Navigable Waters of the United States" (32 FPC 577), which terms and conditions, designated as Articles 1 through 11, are attached hereto and made a part hereof, and subject to the following special conditions which are set forth herein as additional articles:

Article 12. The Licensee shall pay to the United States the following annual charge, effective April 1, 1962:

> For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, $53.50 per annum.

Article 13. The Licensee shall, within one year from the date of issuance of this license, submit for Commission approval an Exhibit R for this project which conforms to § 4.41 Exhibit R of the Commission's Regulations under the Federal Power Act.

Article 14. The Licensee shall, for the conservation and development of fish resources, construct, maintain, and operate or arrange for the construction, maintenance, and operation of such fish passage facilities as may be ordered by the Commission upon its own motion or upon the recommendation of the Secretary of the Interior after notice and opportunity for hearing and upon findings based on substantial evidence that such facilities are necessary and desirable, reasonably consistent with the primary purpose of the project, and consistent with the provisions of the Act.

(D) The terms and conditions of the Act which it has been found above to be in the public interest to waive, are hereby excluded from this license.

(E) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgement of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

LAB OIL COMPANY (OPERATOR), ET AL., DOCKET NO. RI66–39

ORDER ACCEPTING OFFER OF SETTLEMENT, REQUIRING FILING OF CONTRACT AMENDMENT, AND TERMINATING PROCEEDING

(Issued November 17, 1966)

On September 15, 1966, Lab Oil Company (Operator), *et al.*, (Lab) submitted an offer of settlement in this proceeding pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure. The offer involves a proposed increased rate of 15¢ per Mcf for natural gas sold by Lab to Valley Gas Transmission, Inc. from the Rios Field, Duval County, Texas (Texas Railroad Commission District No. 4) under its FPC Gas Rate Schedule No. 10. Lab proposes to eliminate the periodic price provision from the subject rate schedule, and to charge a settlement rate of 15¢ per Mcf of natural gas at 14.65 psia for the remaining life of the contract. The proposed 15¢ per Mcf rate was suspended in Docket No. RI66–39, and thereafter allowed to become effective subject to refund as of February 1, 1966.

The proposed settlement is consistent with the provisions of the Second Amendment to the Commission's Statement of General Policy No. 61–1 (18 CFR 2.56) and its acceptance would serve the public interest.

However, we desire to make it clear that acceptance of Lab's offer of settlement shall not be construed as constituting approval of any future rate increases that may be filed under the subject rate schedule resulting from any possible future tax increase, and is without prejudice to any findings or orders of the Commission in any proceeding, including area rate or other similar proceeding, involving Lab's rate and rate schedule.

The Commission finds:

The proposed settlement of the above-designated proceeding, on the basis described herein, as more fully set forth in the offer of settlement filed with the Commission by Lab on September 15, 1966, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act and should be approved and made effective as hereinafter ordered.

The Commission orders:

(A) The offer of settlement filed with the Commission by Lab on September 15, 1966, is approved in accordance with the provisions of this order.

(B) Lab shall file within 30 days from the date of issuance of this order an executed contract amendment to its FPC Gas Rate Schedule No. 10 eliminating the periodic price provision therefrom. The contractual amendment shall be submitted in accordance with Part 154 of the Commission's Regulations under the Natural Gas Act.

(C) Upon compliance by Lab, with the provisions of paragraph (B) above, the proceedings in Docket No. RI66–39 shall terminate.

(D) The acceptance by the Commission of Lab's offer of settlement is without prejudice to any findings now pending, or hereafter instituted by or against Lab including area rate or other similar proceedings.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

VILLAGE OF CIRCLE PINES, MINNESOTA v. NORTHERN NATURAL GAS COMPANY AND NORTH CENTRAL PUBLIC SERVICE COMPANY, DOCKET NO. CP67-17

ORDER DENYING APPLICATION FOR REHEARING

(Issued November 18, 1966)

On October 21, 1966, the village of Circle Pines, Minnesota (Circle Pines) filed an application for reconsideration or, alternatively, for rehearing[1] of our order issued September 23, 1966, 36 FPC 663 dismissing Circle Pines' complaint filed in the above-entitled proceeding. All of Circle Pines' arguments and assertions of error are unsupported by the facts and law on which Circle Pines seeks to rely and we are convinced that our original action dismissing Circle Pines' complaint was entirely correct.

Circle Pines first asserts that we erroneously assumed, contrary to the allegations in its complaint, that it does not have an allocation of gas from Northern Natural Gas Company (Northern) under Section 7 of the Natural Gas Act (Act) for use in Lino Lakes, Minnesota, a community adjacent to Circle Pines. Circle Pines contends that if it had been granted a hearing it would have shown that its original presentation in the proceeding in Docket No. G–17485, *et al.*, demonstrated by a map of its proposed distribution system that it intended to serve the community of Lino Lakes and that the Commission, in approving its request for an allocation of gas, necessarily authorized Northern to deliver a specific volume of gas to it for serving Lino Lakes. Circle Pines' contentions that we allocated to it a gas supply to serve Lino Lakes is neither supported by the record in Docket No. G–17485, *et al.*, nor by the exhibits attached to Circle Pines' application. At no place on any exhibit in Docket No. G–17485, *et al.*, or in any of the testimony by the five witnesses who appeared on behalf of Circle Pines in that proceeding is there any mention whatsoever of the village of Lino Lakes. Consequently, on July 31, 1959, when the Commission issued its order accompanying Opinion No. 324, 22 FPC 164, authorizing Northern to deliver a third-year volume of 1,352 Mcf of gas to Circle Pines, the Commission did not know, and could not have known on the basis of the facts in the record, that Circle Pines planned to use a portion of such allocation of gas for initiation of natural-gas service in the village of Lino Lakes.[2] Therefore, Circle Pines cannot use the proceeding in Docket No. G–17485, *et al.*, on a retroactive basis to predicate an argument that the original certificate issued to Northern authorizing it to deliver gas to Circle Pines included a specific allocation of gas for initiation of natural-gas service in Lino Lakes.

Circle Pines also argues that it would be contrary to Opinion No. 479,[3] for the Commission to permit North Central to use any excess gas, which may have resulted from our refusal to grant North Central's request for a reduction in its third-year contract demand certificated in Opinion No. 324, for the purpose of providing natural-gas service in Lino Lakes. The basis for our refusal to grant the reduction in contract demand requested by North Central was that it had not shown, as had the other petitioners in that proceeding, that it would suffer economic hardship from being required to purchase its third-year volumes because the reduction had been requested primarily to permit North Central to operate its propane peak-shaving plant with maximum efficiency. We do not see how the public interest would be served by imposition of restrictions on the manner in which North Central tries to sell any excess contract demand volumes which may have been caused by our denial of its request to reduce its contract demand purchases from Northern, especially since neither North Central nor Circle Pines has ever demonstrated in any proceeding or in any application filed with the Commission any specific need for gas to be used in Lino Lakes.

---

[1] Hereinafter referred to as "application."

[2] The short answer to the contention that we allocated a volume of gas to Circle Pines for use in Lino Lakes is that the appendices to Opinion No. 324 list every community proposed for service in that proceeding. If Circle Pines had intimated that it planned to construct a distribution system in the village of Lino Lakes, the name of that village would have appeared in Appendix A in the group of communities which were proposed to be served by means of the Anoka branch line (22 FPC 180).

[3] *Northern Natural Gas Co., et al.*, Docket No. G–17485, *et al.*, issued October 14, 1965, 34 FPC 1139.

Circle Pines' argument that the pioneer doctrine applies in its case because it has already been providing service in Lino Lakes must be rejected because this is not a matter for our consideration since this contention again relates to the question of which of the contestants has a *bona fide* franchise.

Circle Pines' remaining arguments are procedural in nature and all relate to its contentions that we improperly denied it a hearing, after notice, prior to issuing our order dismissing its complaint. It argues that it is entitled to a hearing under Sections 5 and 7 of the Act and that since it showed that Northern had unduly discriminated against it by failing to honor its exclusive allocation of gas for providing natural-gas service in Lino Lakes, it was entitled to a hearing under Sections 5 and 7 to show that Northern has violated both of those sections.

As hereinbefore explained, Circle Pines has made no statements which show that Northern has failed to comply with the Act or with the Commission's rules and regulations promulgated thereunder. There are no material factual matters in dispute as Circle Pines admits that North Central's franchise authorizing construction of a distribution system in Lino Lakes is competitive with its franchise to serve the same community. Every contention made in support of the relief requested is legal in nature and relates to Circle Pines' erroneous argument that it received an exclusive allocation of gas to provide natural-gas service in Lino Lakes by the order accompanying Opinion No. 324. Since Circle Pines seeks to establish its receipt of an allocation of gas for Lino Lakes by references to the evidence it presented in a proceeding held over seven years ago in Docket No. G–17485, *et al.*, it must rely on that record as constituting factual support for its arguments about its having an exclusive allocation of gas for providing service in Lino Lakes. No hearing is required to entertain arguments based on a record which cannot be supplemented in 1966 to support a deficiency in evidence presented in 1959. It is well established that we need not hold a hearing to decide questions of law, as is indicated in *Sun Oil Co.* v. *F.P.C.*, 256 F. 2d 233 (CA5), certiorari denied, 358 U.S. 872, where the court stated (256 F. 2d 240–41):[4]

> * * * The only benefit that would have inured to Sun by notice and hearing would have been the privilege of making a legal argument before the Commission. We find no requirement in the Natural Gas Act for notice and hearing in such a situation. The opportunity to be heard on questions of law is not an inherent element of procedural due process in the determination of a procedural question. * * * .

---

[4] *Cf. Virginia Electric and Power Co.* v. *F.P.C.*, 351 F. 2d 408, 410 (CA4).

The Commission finds:

The specifications of error advanced as grounds for rehearing or reconsideration in Circle Pines' application present no facts or legal principles which would warrant any change or modification in the Commission's order dismissing Circle Pines' complaint issued September 23, 1966, in Docket No. CP67-17.

The Commission orders:

The "Application of Village of Circle Pines for Reconsideration or Alternatively for Rehearing" filed October 21, 1966, in Docket No. CP67-17 is denied.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CUMBERLAND AND ALLEGHENY GAS COMPANY, DOCKET NO. CP65-372

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 21, 1966)

On May 24, 1965, Cumberland and Allegheny Gas Company (Applicant) filed in Docket No. CP65-372 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities for the interruptible sale and delivery of natural gas to West Virginia Pulp and Paper Company (West Virginia Pulp) near Beryl, Piedmont District, Mineral County, West Virginia, all as more fully set forth in the application in this proceeding.

The facilities necessary for the sale to West Virginia Pulp are 0.98 mile of 8-inch (lateral) line and a regulating measuring station. Applicant states that West Virginia Pulp's maximum daily and annual requirements during 1966 are estimated to be 2,500 Mcf and 870,000 Mcf, respectively, and that by 1969 such requirements are estimated to increase to 3,500 Mcf per day and 1,353,000 Mcf annually.

The estimated cost of the subject facilities is $69,000, which cost will be financed from funds on hand.

West Virginia Pulp will utilize natural gas as fuel in a new lime reburning kiln.

By letter dated September 17, 1965, Applicant was issued a temporary certificate authorizing the subject proposals.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 18, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Cumberland and Allegheny Gas Company, a West Virginia corporation having its principal place of business in Pittsburgh, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G-387 (4 FPC 472).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the subject transportation and delivery of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the subject facilities and the subject transportation and delivery of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c) (4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Cumberland and Allegheny Gas Company, to construct and operate the subject facilities and to transport and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c) (4) and (e) of Section 157.20 of such Regulations.

(C) The interruptible service authorized herein shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Applicant for firm resale service to its customers.

(D) This order shall not be construed as having authorized or approved the allocation of service volumes among various rate schedules in Applicant's FPC Gas Tariff.

(E) Firm sale of natural gas by Applicant to Columbia Gas of Maryland, Inc. shall be limited to 40,000 Mcf per day.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

EL PASO NATURAL GAS COMPANY, DOCKET NO. G–1208

ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 21, 1966)

On September 7, 1966, El Paso Natural Gas Company (Petitioner) filed in Docket No. G–1208 a petition to amend the order issued in said docket on August 29, 1948 (8 FPC 1074), requesting the authorization for the continued operation of its Ajo Heights, Arizona, meter station for purposes of direct sale and delivery of natural gas to Arizona Public Service Company (Public Service), all as more fully set forth in the application.

The order issued in the instant proceeding authorized Petitioner, *inter alia*, to construct and operate a meter station at Ajo Heights, Arizona, and by means of such facility to sell and deliver natural gas to Arizona Edison Company, predecessor to Public Service, for resale and distribution in the community of Ajo Heights, Arizona. On July 28, 1951, by means of its Ajo Heights meter station Petitioner commenced the uncertificated direct sale and delivery of natural gas to Arizona Edison Company for use in its power plant situated near Ajo Heights. Apparently due to the Commission's requirement that natural gas pipeline companies furnish not only copies of direct sales contracts, but also evidence of authority to make the sale, Petitioner has learned that it does not have the necessary authority to make the direct sale. Accordingly, Petitioner hereby seeks authorization for the continued operation of the Ajo Heights meter station for the direct sale and delivery made to Public Service.

A new sales agreement was entered into between Petitioner and Public Service on July 15, 1965, providing for the delivery of up to 160 Mcf per day of natural gas in the summer months and 100 Mcf per day during winter months. In addition, Petitioner obligates itself to deliver, if possible, such additional volumes as may be required. The rate is that provided by Petitioner's Rate Schedule B–1. The agreement also covers sales and deliveries to three other plants of Public Service. Annual obligations to deliver and receive are for all four plants. Domestic consumers have priority to service, but if curtailment is made for other than *force majeure*, Petitioner must bear the cost of the substitute fuel. Deliveries to the Public Service plants other than the Ajo Heights plant have been previously authorized by the Commission.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued in the instant docket on August 29, 1948, be amended as hereinafter ordered and conditioned.

The Commission orders:

(A) The Commission's order issued on August 29, 1948, in Docket No. G–1208 is amended so as to authorize the continued operation of Petitioner's Ajo Heights, Arizona, meter station for the direct sale and delivery of natural gas to the Arizona Public Service Company for use in its power plant situated near Ajo Heights, Arizona, as hereinbefore set forth and as more fully set forth in the petition to amend filed in this proceeding.

(B) The authorization granted by paragraph (A) above shall not entitle the industrial customer to which firm deliveries are authorized herein to any priorities to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their demands.

(C) In all other respects the original order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

HUMBLE GAS TRANSMISSION COMPANY, DOCKET NO. CP67-68

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 21, 1966)

On September 19, 1966, Humble Gas Transmission Company (Applicant) filed an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction of certain natural gas facilities in order to connect additional gas supplies to its system for resale in existing markets, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate two measuring stations in Richland Parish, Louisiana, for the receipt and transportation of natural gas to be purchased from Petroleum Management, Inc., produced from the Buckner Field, Richland Parish, Louisiana, and Joe G. Strahan, produced from the Richland Field Area, Richland, Caldwell, Ouachita, and Franklin Parishes, Louisiana.

The two purchases will add approximately 14,600,000 Mcf of natural gas to Applicant's available reserves. No change in Applicant's rates or sales is proposed.

The total estimated cost of the proposed facilities is $3,547, which cost will be financed from funds on hand.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on November 18, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Humble Gas Transmission Company, a Delaware corporation having its principal place of business in New Orleans, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued on January 29, 1963, in Docket No. CP63-56 (29 FPC 162).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a),

(b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of said Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Humble Gas Transmission Company authorizing the construction and operation of the facilities hereinbefore described and as more fully set forth in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) The facilities authorized shall be completed and placed in actual operation within 3 months of the date of this order as provided by paragraph (c) of Section 157.20 of the Commission's Regulations under the Natural Gas Act.

Before Commissioners: L. J. O'Connor, Jr., Acting Chairman; Charles R. Ross and John A. Carver, Jr.

PAN AMERICAN PETROLEUM CORPORATION, DOCKET NO. G-9279, ET AL.

ORDER ACCEPTING DECREASED RATE FILINGS, SEVERING AND TERMINATING PROCEEDINGS, AND REQUIRING REFUNDS

(Issued November 21, 1966)

Pan American Petroleum Corporation (Pan American) on January 24, 1966, filed a company-wide settlement proposal which was approved by the Commission's order issued on April 13, 1966, 35 FPC 502. Concurrently with its company-wide proposal, Pan American also filed unilateral rate decreases for four sales of natural gas made by it in South Louisiana which were not covered in its company-wide proposal.[1] Two of such sales were to Michigan Wisconsin Pipe Line Company[2] under Pan American's FPC Gas Rate Schedule Nos. 154 and 159 at a rate of 21.5¢ per Mcf of natural gas at 15.025 psia. The other two were made under Pan American's FPC Gas Rate Schedule Nos. 259 and 260 to Trunkline Gas Company at a rate of 23.8¢ per Mcf of natural gas at 15.025 psia. Pan American's decreased rate filings under these rate schedules are for 20¢ per Mcf of natural gas at 15.025 psia, to be effective January 1, 1966, which is the effective date of the settlement rates approved in our order of April 13, 1966.

Additionally, Pan American filed a concurrent proposal of withdrawal of a proposed rate increase under its FPC Gas Rate Schedule No. 297, for a sale of natural gas to United Gas Pipe Line Company (United) in South Louisiana which had been suspended by order of the Commission, and made effective subject to refund in Docket No. RI62-220. The proposed rate increase was from 20.25¢ to 23.30¢ per Mcf of natural gas at 15.025 psia. Withdrawal of its increase reduces the rate to the initial rate of 20.25¢ per Mcf as of January 1, 1966.

---

[1] The filings were made contingent upon approval of Pan American's company-wide settlement proposal.

[2] Formerly American Louisiana Pipe Line Company.

Pan American also proposes to refund all monies charged and collected under this rate schedule above the 20.25¢ per Mcf of natural gas.

For all of the reasons stated in *Humble Oil & Refining Company*, Docket No. G-9287, *et al.*, 32 FPC 49, we shall order Pan American to retain the amount of refunds ordered herein until further action by the Commission directing their disposition.

Also Pan American proposes that the moratorium provision approved by us in our order of April 13, 1966, approving its company-wide settlement apply to these five rate schedules.

We find that acceptance of the decreased rate filings by Pan American, and withdrawal of its proposed increased rate in Docket No. RI62-220, to be in the public interest.

The Commission orders:

(A) The notices of change in rates filed by Pan American, January 24, 1966, designated as Supplement Nos. 9, 10, 3, and 3 to its FPC Gas Rate Schedule Nos. 154, 159, 259 and 260, respectively, reducing the rates from 21.5¢ and 23.8¢ to 20¢ per Mcf of natural gas at 15.025 psia are accepted for filing and made effective as of January 1, 1966, and its withdrawal of the proposed rate increase in Docket No. RI62-220 is approved.

(B) Pan American shall compute the difference between the rate collected subject to refund in Docket No. RI62-220 and 20.25¢ per Mcf for the period from May 18, 1962, to the date of this order, together with interest as specified in such docket to January 1, 1966. Pan American shall within 45 days from the date of this order submit a report to the Commission, and serve a copy on United Gas Pipe Line Company, setting out the amount of refund (showing separately the principal and applicable interest), the basis used for such determination and the period covered and a letter from United Gas Pipe Line Company agreeing to the correctness of such report.

(C) Pan American shall retain the amount shown in the report required under Paragraph (B) above, subject to further action of the Commission directing the disposition of such amount.

(D) If Pan American elects to commingle these retained refunds with its general assets and use them for its corporate purposes, it shall pay interest thereon at the rate of 5½% per annum on all funds thus available from the date of issuance of this order, to the date on which they are paid over to the person ultimately determined to be entitled thereto by final action of the Commission.

(E) If Pan American elects to deposit the retained refunds in a special escrow account, Pan American shall tender for filing 30 days from the date of issuance of this order, an executed Escrow Agreement, conditioned as set out below accompanied by certificate showing service of a copy thereof upon United Gas Pipe Line Company. Unless notified to the contrary by the Secretary within 30 days from the date of filing thereof, the Escrow Agreement shall be deemed to be satisfactory and to have been accepted for filing. The Escrow Agreement shall be entered into between Pan American and any bank or trust company used as a depository for funds of the United States Government and the Agreement shall be conditioned as follows:

(1) Pan American, the bank or trust company, and the successors and assigns of each, shall be held and formally bound unto the Federal Power Commission for the use and benefit of those entitled thereto, with respect to all amounts and the interest thereon, deposited in a special escrow account, subject to such Agreement, and such bank or trust company shall be bound to pay over to such

person or persons as may be identified and designated by final order of the Commission and in such manner as may be therein specified, all or any portion of such deposits and the interest thereon.

(2) The bank or trust company may invest and reinvest such deposits in any short-term indebtedness of the United States or any agency thereof, or in any form of obligation guaranteed by the United States which is, respectively, payable within 120 days as the said bank or trust company in the exercise of its sound discretion may select.

(3) Such bank or trust company shall be liable only for such interest as the invested funds described in Paragraph (2) above will earn and no other interest may be collected from it.

(4) Such bank or trust company shall be entitled to such compensation as is fair, reasonable and customary for its services as such, which compensation shall be paid out of the escrow account to such bank or trust company. Said bank or trust company shall likewise be entitled to reimbursement for its reasonable expenses necessarily incurred in the administration of this escrow account, which reimbursement shall be made out of the escrow account.

(5) Such bank or trust company shall report to the Secretary quarterly, certifying the amount deposited in the trust account for the quarterly period.

(F) Upon full compliance by Pan American with all the terms and provisions of this order, Docket No. RI62-220 shall terminate.

(G) Upon termination of Docket No. RI62-220, in accordance with Paragraph (F) above, said proceeding shall be severed from the consolidated proceedings in Docket No. AR61-2.

(H) This order is without prejudice to any findings or orders which have been or may be made hereafter by the Commission, and is without prejudice to claims or contentions which may be made by Pan American, the Commission staff, or any affected party hereto, in any proceedings now pending, including area rate or similar proceedings, or hereafter instituted by or against Pan American or any other companies, person or parties affected by this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. CP67-84

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 21, 1966)

On September 27, 1966, Texas Eastern Transmission Corporation (Applicant) filed in Docket No. CP67-84 an application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and the operation of certain facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new supplies of natural gas in various producing areas adjacent to said system.

The total cost of the proposed facilities will not exceed a maximum of $2,000,000, with no single project to exceed a cost of $500,000, which costs will be financed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 18, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Texas Eastern Transmission Corporation, a Delaware Corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued on March 30, 1949, in Docket No. G–1089 (8 FPC 228).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Texas Eastern Transmission Corporation, to construct during the calendar year 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ALABAMA POWER COMPANY, DOCKET NO. E-6893

ORDER GRANTING REHEARING FOR PURPOSES OF FURTHER CONSIDERATION AND FIXING HEARING

(Issued November 23, 1966)

The Alabama Power Company on October 28, 1966, filed an application for rehearing of the Commission's order of September 28, 1966, 36 FPC 701, fixing payments of $296,003 to the United States for benefits provided in the Coosa River basin by the Federal Allatoona headwater improvement to the Company's downstream Weiss and Lay hydroelectric developments, Project No. 2146, and Mitchell and Jordan developments Project Nos. 82 and 618, respectively, during the period of January 1, 1961, through December 31, 1963. The order also provided that the Company pay $18,724 to reimburse the United States for the cost of the determination. Since the Company had previously made an interim or partial payment of $235,261, it was ordered to pay the balance of $79,466.

The Company contends that the Commission erred in the following respects. (1) Priority was not given to storage available in the Company's downstream projects. (2) The incremental unit cost of producing energy at alternative steam-generating facilities was improperly computed. (3) Account was not taken of the effect of evaporation on the quantities of water stored in and withdrawn from Allatoona reservoir. Additionally, the Company complains of the inclusion of general overhead charges in the cost of the determination.

The Commission finds:

It is appropriate and in the public interest in administering Part I of the Federal Power Act, particularly Section 10(f) thereof, that the Alabama Power Company's application for rehearing filed on October 28, 1966, of the Commission's aforesaid order of September 28, 1966, be granted and that a public hearing be held at a time and place to be fixed by subsequent notice of the Secretary of the Commission respecting the matters involved and issues presented in this proceeding.

The Commission orders:

(A) The Alabama Power Company's application for rehearing filed on October 28, 1966, of the Commission's aforesaid order of September 28, 1966, is hereby granted.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act, particularly Sections 10(f) and 308 thereof, and the Commission's Rules of Practice and Procedure, a public hearing shall be held, at a time and place to be fixed by subsequent notice of the Secretary of the Commission, respecting the matters involved and questions presented in this proceeding.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

KENTUCKY GAS TRANSMISSION CORPORATION AND UNITED FUEL GAS COMPANY, DOCKET NO. CP65-324

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENT

(Issued November 23, 1966)

On April 9, 1965, Kentucky Gas Transmission Corporation (Kentucky Gas) and United Fuel Gas Company (United Fuel), both wholly-owned subsidiary companies of The Columbia Gas System, Inc., filed in Docket No. CP65-324 a joint application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain facilities within the Commonwealth of Kentucky and for a certificate of public convenience and necessity authorizing the construction, acquisition and operation of certain other facilities within said Commonwealth, all as more fully set forth in the joint application in this proceeding.

Applicants request authorization for the following projects:

(1) Kentucky Gas to abandon by retirement 3.2 miles of 12-inch pipeline in Martin County resulting in a net debit to retirement estimated at $51,951.

(2)(a) Kentucky Gas to abandon by sale to United Fuel 6.7 miles of 10-inch pipeline in Martin and Johnson Counties.

(b) United Fuel to acquire and operate said 6.7 miles of 10-inch line. United Fuel will pay the net book cost as of the date of transfer. United will use the subject line to tie together the two main parts of its transmission system leading north toward Kenova, Wayne County, West Virginia.

(3) Kentucky Gas to abandon by sale to Midcontinent Gas Production Corporation (Midcontinent), a non-affiliated company, 35.1 miles of 10-inch and 34.8 miles of 12-inch pipeline, together with appurtenant facilities, in Johnson and Morgan Counties. Midcontinent will pay $53,800 for said pipeline. Midcontinent will utilize the pipeline in a proposed utility service area in this general part of Eastern Kentucky.

(4) Kentucky Gas to construct at an estimated cost of $6,500 and operate measuring and regulating facilities in Morgan County in order to sell natural gas to Midcontinent for resale in peak day volumes as set forth in the attached appendix.

(5) Kentucky Gas to abandon by retirement 50.9 miles of 10-inch pipeline in Morgan, Menifee, Montgomery and Clark Counties resulting in a net debit to retirement estimated at $383,131. Kentucky Gas states that all markets depend upon this 10-inch line, with the exception of 5 of 23 domestic mainline tap customers of Columbia Gas of Kentucky, Inc. (Columbia-Kentucky), can be satisfied from the existing parallel 12-inch line. Further, Kentucky Gas states that Columbia-Kentucky has applied to the Public Service Commission of Kentucky for authority to abandon gas service to these five customers. Accordingly,

the abandonment authorization hereinafter granted is without prejudice to the parties in the proceeding before the Public Service Commission of Kentucky.

(6) Kentucky Gas to abandon by sale 16.4 miles of 10-inch pipeline, together with appurtenant facilities, in Clark and Fayette Counties to Columbia-Kentucky, an affiliated company of Applicants. Columbia-Kentucky will utilize the pipeline as a distribution main between the towns of Lexington and Winchester. Columbia-Kentucky will pay the net book cost as of the date of transfer.

(7) Kentucky Gas to abandon by retirement its Winchester Compressor Station resulting in a net debit to retirement estimated at $334,534. Kentucky Gas states that it does not require the subject compressor station for the operation of the 12-inch dual system line.

(8) Kentucky Gas to construct at an estimated cost of $595,000 and operate 11.1 miles of 12-inch pipeline in Fayette County to replace a segment of an existing 8-inch transmission line between Lexington and a point in Estill County. Because of the physical condition of this segment in an area of increasingly dense population and because of the anticipated growth in the Lexington market area, Kentucky Gas desires to replace the subject segment. By letter, dated May 11, 1965, Kentucky Gas was granted a temporary certificate authorizing project 8.

Applicants state that the purpose of the requested authorizations is to eliminate duplication in the transmission system of Kentucky Gas lying in Eastern Kentucky, generally between the Town of Inez, Martin County, on the east, and the City of Lexington, Fayette County, on the west. Pursuant to the authorization granted by the Commission in its order issued October 10, 1962, in Docket Nos. CP62–238 and CP62–239, Kentucky Gas acquired a 12-inch pipeline substantially parallel to an existing 10-inch line and Kentucky Gas then advised the Commission that it would make complete operational and engineering studies of the two pipelines and the areas served thereby, and thereafter make an appropriate request to the Commission for approval to abandon duplicate facilities. The subject joint application is the result of those operational and engineering studies.

Cost of the proposed construction will be financed from current income and by certain financial arrangements with Applicants' parent, The Columbia Gas System, Inc.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 18, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the joint application and exhibits, submitted in support of the authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Kentucky Gas Transmission Corporation, a Delaware corporation having its principal place of business in Charleston, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of August 10, 1956, in Docket No. G–9689 (16 FPC 437).

(2) Applicant, United Fuel Gas Company, a West Virginia corporation having its principal place of business in Charleston, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 1, 1944, in Docket No. G–341 (4 FPC 534).

(3) The facilities hereinbefore described, as more fully described in the joint application in this proceeding, are to be used in the transportation and/or sale of natural gas in interstate commerce, subject to the jurisdiction of the Commis-

sion, and the construction and operation thereof and the proposed transportation and sale of natural gas by Kentucky Gas and the acquisition and operation by United Fuel are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) Applicants are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) The proposed construction, acquisition and operation of the subject facilities by Applicants and the proposed transportation and sale of natural gas by Kentucky Gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(6) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (d) and (e) of Section 157.20 of such Regulations.

(7) The facilities to be abandoned, as hereinbefore described, are subject to the jurisdiction of the Commission and the abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(8) Such abandonment by Kentucky Gas, as hereinbefore described, is permitted by the public convenience and necessity, and an order authorizing and approving same should be issued as hereinafter ordered.

(9) The abandonment authorization hereinafter granted with respect to the above-described project 5 should be without prejudice to the parties in the proceeding before the Public Service Commission of Kentucky.

The Commission orders:

(A) Certificates of public convenience and necessity are issued authorizing Applicants, Kentucky Gas Transmission Corporation and United Fuel Gas Company, to construct, acquire and operate the proposed facilities and authorizing Kentucky Gas to sell and deliver natural gas, as hereinbefore described, all as more fully described in the joint application herein, upon the terms and conditions of this order.

(B) The certificates issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (d) and (e) of Section 157.20 of such Regulations.

(C) The construction, other than that already completed pursuant to the temporary certificate, and acquisition authorized by paragraph (A) above shall be completed and the subject facilities placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

(D) This order shall not be construed as having authorized or approved the allocation of service volumes among various rate schedules in Applicants' respective FPC Gas Tariffs.

(E) Firm sales of natural gas by Kentucky Gas to its respective customers shall be limited to the maximum daily volumes as set forth in the appendix attached to this order.

(F) Permission for and approval of the abandonment by Kentucky Gas of facilities hereinbefore described, all as more fully described in the joint application in this proceeding, are granted.

(G) Kentucky Gas shall advise the Commission of the date of said abandonments within 10 days of the date thereof.

(H) The abandonment authorization granted in paragraph (F) above with respect to the above-described project 5 is without prejudice to the parties in the proceeding before the Public Service Commission of Kentucky.

PUBLIC UTILITY DISTRICT NO. 1 OF CHELAN COUNTY, WASHINGTON, PROJECT NO. 2624

ORDER PERMITTING WITHDRAWAL OF APPLICATION FOR LICENSE FOR UNCONSTRUCTED MINOR PROJECT

(Issued November 23, 1966)

On October 10, 1966, Public Utility District No. 1 of Chelan County, Washington (Applicant) filed application for Commission permission to withdraw its application filed on September 19, 1966, for license for unconstructed minor Project No. 2624 proposed to be located on Company Creek, a tributary of the Stehekin River, in Chelan County, Washington, and to be situated entirely within the Wenatchee National Forest.

The proposed project is to consist of a 6-foot high rock-filled timber-crib diversion dam across Company Creek, with an intake to a 24-inch steel pipeline about 3,000 feet long leading to a frame powerhouse containing a 200 kw (267 horsepower) hydroelectric turbine-generator unit, and a 150 kw diesel standby installation. The project would supply power to the community of Stehekin, Washington.

According to the application to withdraw, Applicant has applied to the U.S. Forest Service for a Special Use Permit to construct the project. Pursuant to an agreement between the Commission and the Forest Service, such projects (not more than 2,000 horsepower installed capacity located within National Forests) may be authorized by the Forest Service by Special Use Permits, subject to Federal Power Commission authority to license the project if and when invoked.

The Commission finds:

In the circumstances, it is appropriate to permit withdrawal of the application for license for the proposed project as hereinafter provided.

The Commission orders:

(A) Permission to withdraw the application for license for proposed minor Project No. 2624 is hereby granted, and this proceeding is hereby terminated.

(B) Public Utility District No. 1 of Chelan County, Washington shall file with the Commission's Secretary a copy of the Forest Service Special Use Permit for the project within 30 days of the date of its issuance.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ALABAMA POWER COMPANY, PROJECT NO. 2146

ORDER APPROVING RECREATIONAL USE PLAN SUBJECT TO SUBSEQUENT REVISED FILING

(Issued November 25, 1966)

On February 23, 1965, the Alabama Power Company, Licensee for Project No. 2146, filed a Recreational Use Plan pursuant to Article 51 of its license. Licensee states that the plan is submitted in general terms with many details to be arranged upon receipt of general approval of the Commission. Licensee indicates that the proposed boat launching and other recreational areas will be cooperative developments; the Licensee to provide the land, the Alabama State Conservation Department to develop the boat launching and parking facilities and the county or other local interests to provide roads, rest rooms, picnic areas, camp sites and other needed facilities.

The Department of the Interior in reporting on the proposed plan indicates that the access areas at the Logan Martin, Lay and Lock Three impoundments are adequate and recommends additional access areas at the Weiss Development. It also recommends that provisions be made for accommodating picnicking, camping and swimming activities at the development. It also recommended that further development of Licensee's plan be coordinated with the statewide comprehensive outdoor recreation plan now under preparation by the State of Alabama. The Department of Health, Education, and Welfare's report on the plan contained a recommendation of the Alabama Department of Public Health that the Alabama Power Company assume a more direct responsibility in regard to water supply, sewage disposal, solid waste disposal and food service facilities. Licensee has advised that it will cooperate with these agencies in implementing their recommendations.

The State of Alabama Department of Conservation has approved the plan from a recreation standpoint.

The Commission finds:

The Recreational Use Plan as filed by the Licensee should be approved subject to a subsequent filing, as hereinafter provided, of a revised plan setting forth details of all present and proposed project recreational lands and facilities.

The Commission orders:

The Recreational Use Plan as filed by the Licensee is approved subject to the filing of a revised plan on or before September 30, 1968, for Commission approval, setting forth details of all present and proposed project recreational lands and facilities for the project.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ALABAMA POWER COMPANY, PROJECT NO. 2146

ORDER AUTHORIZING APPROVAL OF REVISIONS IN BRIDGE DESIGN

(Issued November 25, 1966)

On September 6, 1966, the Alabama Power Company, licensee for Project No. 2146, advised the Harbert Construction Corporation, acting on behalf of the Waters Development Corporation, the owner of Island No. 6 in the Logan Martin Reservoir, had requested approval of revisions in the design and specifications for a bridge to be installed in Causeway No. 6. The company forwarded the revised plans for the bridge and stated that the plans had been approved by the County Engineer for St. Clair County, Alabama. The company requested permission to grant approval of the plans.

The Commission finds:

It is appropriate and in the public interest in administering Part I of the Federal Power Act that the Alabama Power Company be authorized to approve the revised plans filed on September 6, 1966, for a bridge in Causeway No. 6 in the Logan Martin Reservoir. Project No. 2146.

The Commission orders:

The Alabama Power Company is hereby authorized to approve the revised plans filed on September 6, 1966, for a bridge in Causeway No. 6 in the Logan Martin Reservoir of Project No. 2146.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ARKANSAS LOUISIANA GAS COMPANY, DOCKET NO. CP67-83

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 28, 1966)

On September 26, 1966, Arkansas Louisiana Gas Company (Applicant) filed in Docket No. CP67-83 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(c) of the Regulations under the Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and the operation of transportation facilities for the purposes of making direct sales of natural gas, all as more fully set forth in the application.

Applicant proposes to utilize the facilities for direct sales to diverse customers within its distribution area. The application states further that the maximum delivery to any one customer will not exceed 100,000 Mcf annually and will not be used for boiler fuel purposes, as defined by Section 157.7(c)(9) of the Commission's Regulations under the Natural Gas Act.

The total estimated cost of the proposed construction will not exceed $300,000.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 23, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, Arkansas Louisiana Gas Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of January 26, 1943, in Docket No. G-252 (3 FPC 910).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation and delivery of natural gas in interstate commerce and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the 12 month period following the issuance of this order. The total expenditures for facilities to be constructed thereunder should be limited to a maximum of $300,000, with the total deliveries to any one customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(8) The certificate issued hereinafter should be conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, to construct during the year 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities to sell natural gas to direct customers as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is limited to construction during the year 1967. The total expenditures for facilities to be constructed thereunder are limited to a maximum of $300,000, with the total deliveries to any one customer limited to a maximum of 100,000 Mcf of natural gas per year.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued by paragraph (A) above is expressly conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations and, further, shall not entitle any industrial customer to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CITIES SERVICE GAS COMPANY, DOCKET NO. CP67-92

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 28, 1966)

On October 11, 1966, Cities Service Gas Company (Applicant) filed in Docket No. CP67-92 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(c) of the Regulations under the Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and operation of certain transportation and metering facilities, all as more fully set forth in the application.

Applicant seeks authorization to construct and operate such gathering and appurtenant facilities to enable it to take into its certificated main pipeline system natural gas which will be purchased from producers in an area coextensive with its system.

The total cost of the proposed facilities will not exceed a maximum of $2,000,000, and no single project will exceed a cost of $500,000, which cost will be financed from treasury cash.

After due notice of the filing of the application no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 23, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G-298 (4 FPC 471).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant to construct during the calendar year 1967 the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above statements under oath in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000, and shall not be interpreted as authorization to attach new customers or to increase the volume of sales to existing customers.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

GENERAL AMERICAN OIL COMPANY OF TEXAS, DOCKET NO. RI66–274 AND A. H. MEADOWS, DOCKET NO. RI66–275

ORDER TERMINATING PROCEEDINGS

(Issued November 28, 1966)

By order issued March 28, 1966, 35 FPC 423, the Commission granted an application for rehearing, filed by General American Oil Company of Texas (General American) and A. H. Meadows (Meadows), of the Commission's order issued February 2, 1966, 35 FPC 177, in these proceedings suspending for the statutory period the proposed increased rates of 14.8479¢ per Mcf[1] for respondents' jurisdictional sales of casinghead gas to El Paso Natural Gas Company (El Paso) in the Permian Basin Area of Texas. The proposed increased rates are designated as Supplement Nos. 6 and 3 to General American's FPC Gas Rate Schedule No. 32 and Meadows' FPC Gas Rate Schedule No. 1, respectively. The proposed effective date for each of the filings was February 3, 1966.

---

[1] Base rate less contractual deduction for gathering, treating and compression, plus tax reimbursement.

The proposed rates were suspended because the quality statements tendered concurrently with the increased rate filings were based on the quality of the gas at the wellhead rather than on the quality of the residue gas. It appeared at the time that respondents were paid on the basis of residue volumes, and thus the quality of the gas should be determined at that point in accordance with Opinion Nos. 468 and 468–A, 34 FPC 159, 1068. The quality statements submitted with the proposed rates were therefore rejected in the February 2 order.

The Commission has since been advised by respondents as well as the purchaser, El Paso, that the gas delivered under the aforementioned rate schedules has always been delivered and metered at the lease and that payment for the gas is made on the basis of wellhead volumes. Accordingly, the proper point for determining the quality of the subject gas under Opinion Nos. 468 and 468–A is at the wellhead. The revised quality statements filed by General American and Meadows on July 11 and 15, 1966, respectively, which reflect a 15.32¢ per Mcf price ceiling for the subject sales were therefore accepted for filing by order issued August 26, 1966, 36 FPC 535, in Docket No. AR61–1. This is the same price ceiling reflected in the quality statements rejected by the February 2 order. The previously rejected quality statements have thus proven to be acceptable. For this reason, it is appropriate to vacate the subject suspension proceedings and to permit the proposed rates to become effective as of February 3, 1966.

The Commission finds:

For the foregoing reasons, good cause exists for vacating the proceedings herein and for permitting said Supplement Nos. 6 and 3 to be effective as of February 3, 1966.

The Commission orders:

(A) The proceedings in Docket Nos. RI66–274 and RI66–275 are vacated.

(B) Supplement No. 6 to General American's FPC Gas Rate Schedule No. 32 and Supplement No. 3 to Meadows' FPC Gas Rate Schedule No. 1 are accepted effective as of February 3, 1966.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

HOME GAS COMPANY, DOCKET NO. CP67–76

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 28, 1966)

On September 22, 1966, Home Gas Company (Applicant) filed in Docket No. CP67–76 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in Cattaraugus County, New York, in order to increase deliveries of off-peak gas to Columbia Gas of New York, Inc. (Columbia Gas), an affiliate of Applicant, for ultimate industrial use by Felmont Oil Corporation (Felmont) in the Olean, New York area, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate 4 miles of 12-inch pipeline extending northeastward from a point near the Pennsylvania-New York State Line to a point of tie-in with Applicant's existing system near the City of Olean, New York.

The construction of the proposed 12-inch diameter pipeline will enable applicant to meet the immediate and long range volumetric and pressure requirements in the Olean, New York area and will advance Applicant's present long range plans to replace the western part of its system with 1,000 psig, 12-inch diameter pipeline.

No change in Applicant's existing rate is proposed. Applicant has filed its new service agreement with Columbia Gas covering the new delivery point.

The estimated total cost of the proposed facilities is $260,000 which Applicant proposes to finance through the issuance and sale of promissory notes and/or common stock to its parent company, The Columbia Gas System, Inc.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on November 23, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Home Gas Company, a New York corporation having its principal place of business in Pittsburgh, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of January 5, 1943, in Docket No. G–345 (3 FPC 895).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Home Gas Company, to construct and operate the proposed facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within six months from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CITY OF LAWRENCEVILLE, GEORGIA AND TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP65-136

FINDINGS AND ORDER DIRECTING A RELOCATION OF A PHYSICAL CONNECTION OF FACILITIES

(Issued November 28, 1966)

On November 12, 1964, the City of Lawrenceville, Georgia (Applicant), filed in Docket No. CP65-136 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Transcontinental Gas Pipe Line Corporation (Respondent) to abandon the present physical connection of its natural gas transmission facilities and to establish physical connection with the facilities of Applicant at a new location, all as more fully set forth in the application.

Applicant, an existing customer of Respondent, requested, in the above-referenced application an order directing Respondent to abandon its present point of delivery, over 17 miles from the town of Lawrenceville, and provide a new point of delivery only 3.8 miles from Lawrenceville on the new lateral pipeline from Monroe, Georgia, to Ball Ground, Georgia, proposed by Respondent in its second amendment to its application filed in Docket No. CP64-270, *et al.*

Action by the Commission was deferred pending final disposition of Respondent's application in Docket No. CP64-270. By order issued on September 9, 1966, 36 FPC 610, Respondent was authorized to construct and operate, *inter alia*, the Monroe-Ball Ground lateral pipeline.

Applicant presently receives gas from Respondent at Walnut Grove, Georgia. The gas is transported some 17 to 20 miles through a transmission pipeline constructed of salvaged thin-wall tubing, installed in 1951. This pipeline, presently corroded in many places, is being operated at 280 psi, the maximum pressure for safe service in the area. The major portion of gas transported through this line is consumed in Lawrenceville.

The proposed delivery point will enable Applicant to receive natural gas from Respondent at a location close to its main market area. Utilization of the new delivery point will reverse the flow of gas and reduce the pressure in, and the volumes transported by the old thin-wall line and contribute to the safety of operation.

Applicant proposes to construct approximately 3.8 miles of 6-inch pipeline from the proposed relocation delivery point, replacing existing pipeline.

The total estimated cost of Applicant's proposed facilities is $69,500, which cost will be financed by means of funds on hand.

On December 11, 1965, Respondent filed an answer to the application herein, offering no objection to the issuance by the Commission of an order as requested by Applicant. On September 19, 1966, Respondent filed with the Commission an amended answer in which it again stated that it had no objection to providing the requested new delivery point and abandonment of the existing one.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

The Commission finds:

(1) Respondent, Transcontinental Gas Pipe Line Corporation, a Delaware corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 28, 1950, in Docket No. G-1277 (9 FPC 32).

(2) Applicant, City of Lawrenceville, Georgia, a corporation organized and existing under the laws of the State of Georgia, is authorized to construct and operate natural gas facilities and distribute and sell natural gas as proposed.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transmission facilities with the proposed facilities of Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant, all as hereinbefore described and as more fully described in the application.

(B) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

(C) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations, reflecting the subject change in delivery point.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN INDIANA FUEL AND LIGHT COMPANY, INC. AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP67-59

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued November 28, 1966)

On September 8, 1966, Northern Indiana Fuel and Light Company, Inc. (Applicant), filed in Docket No. CP67-59 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Michigan Wisconsin Pipe Line Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale in the Cities of Ashley, Hudson, Hamilton, Fremont, and Clear Lake, and their environs, in Steuben County, Indiana, all as more fully set forth in the application.

Applicant proposes to construct and operate distribution systems in the Cities of Ashley, Hudson, Hamilton, Fremont, and Clear Lake, Steuben County, Indiana, and environs, which systems will be connected to Respondent's 15.7 mile lateral extension line, to be constructed in accordance with Respondent's present lateral extension policy, by means of a feeder line system consisting of 1.7 miles of 6-inch line and .8 mile lateral extension from Respondent's existing transmission line near Hudson, Indiana to serve the communities of Ashley and Hudson.[1]

Applicant estimates the total estimated cost of construction of its proposed feeder and distribution systems to be $605,950, which cost will be financed through a sinking fund and sale of common stock.

The total estimated volumes of natural gas involved to meet Applicant's annual and peak day requirements for the initial three year period of proposed operations are stated to be:

	1st year	2d year	3d year
Annual (Mcf)	284,250	424,722	498,945
Peak day (Mcf)	2,025	2,999	3,730

On October 12, 1966, Respondent filed an answer to the application and stated therein it had no objection to the entry of an order requiring it to provide the requested service and to construct under its 10¢ formula two service laterals, one approximately 15.7 miles in length to provide service to Hamilton, Fremont, and Clear Lake, and the other approximately .8 mile in length to provide service to Ashley and Hudson.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on September 21, 1966 (31 F.R. 12491). No protest, petition to intervene or request for hearing has been filed in this proceeding.

The Commission finds:

(1) Respondent, Michigan Wisconsin Pipe Line Company, a Delaware corporation having its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G–669 (5 FPC 953).

(2) Applicant is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver to Applicant under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations, up to 3,730 Mcf per day of natural gas for distribution and resale as hereinbefore described and as more fully described in the application in this proceeding.

(4) The requirement that Respondent serve Applicant as hereinafter ordered, will not impair Respondent's ability to render adequate service to its existing customers.

(5) Applicant should be prepared to receive natural gas from Respondent for distribution in Ashley, Hudson, Hamilton, Fremont, and Clear Lake and environs in Steuben County, Indiana, within one year from the date of issuance of this order.

---

[1] Applicant has acquired a franchise from each of the five communities and has applied for a certificate from the Public Service Commission of Indiana.

The Commission orders:

(A) Respondent is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant, as herein described, and to sell and deliver up to 3,730 Mcf of natural gas daily to Applicant under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations. Such service shall be rendered pursuant to Respondent's currently filed SGS–1 Rate Schedule.

(B) Respondent shall report to the Commission in writing the date of commencement of service to Applicant within 15 days after such service begins.

(C) Applicant shall be prepared to receive service as directed herein within one year from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67–47 (PHASE I)

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 28, 1966)

On August 26, 1966, Northern Natural Gas Company (Applicant) filed in Docket No. CP67–47 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction, in two phases, and the operation of certain natural gas facilities in order to facilitate the delivery of increased volumes of natural gas to two existing distribution customers for resale to five industrial customers, all as more fully set forth in the application.

The aforementioned industrial customers and the increased contract demand requested are as follows:

Distributor *Industrial Customer:*	*Increase in contract demand (Mcf per day)*
Iowa Public Service Company:	
Deere and Company	1,200
Oliver Corporation	1,800
Peoples Division of Applicant:	
Central Dairy Cooperative	215
Minnesota Malting Company	950
Cleveland-Cliffs Iron Company	2,120
	6,285

All of the above industrial customers are presently receiving gas service. Cleveland-Cliffs is receiving firm service and the others are receiving interruptible service.

Specifically, Applicant proposes to construct and operate the following facilities:

Phase I—A 6,000 horsepower addition at the Beaver, Oklahoma, Compressor Station,

Phase II—11 miles of 30-inch loop pipeline north of the Ogden, Iowa, Compressor Station.

Applicant has pending in Docket No. CP66–212 (Great Lakes Proceedings) an application, which if granted would obviate the need for the Phase II facilities. Applicant presently has allocated but unused natural gas capacity resulting from the certificated third year capacity of communities now in their first or second year of service and by utilizing this capacity, and installing the Phase I facilities, will be able to meet the requested increases. Accordingly, Applicant, at this time, requests that a certificate be issued authorizing the Phase I facilities only. If a final decision is not issued in Docket No. CP66–212 in time for Applicant to assure its customers adequate service during the 1967–68 heating season, it will file to amend any certificate issued in the subject docket to include authorization to construct the Phase II facilities.

The proposed delivery of an additional 2,120 Mcf per day of natural gas to Cleveland-Cliffs will increase Cleveland-Cliffs present contract demand from 28,160 to 30,280 Mcf per day. However, Cleveland-Cliffs has until April 1, 1967, to notify Applicant of the precise contract demand it will require and this may range from 28,160 to 30,280 Mcf of gas per day. In the event Cleveland-Cliffs exercises its right to reduce the proposed daily volume of 2,120 Mcf, Applicant shall be required to file a petition to amend the certificate granted herein so as to authorize such lower contract demand.

The total estimated cost of Applicant's Phase I facilities is $1,424,335, which cost will be financed from cash on hand.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on November 23, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and delivery of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities in Phase I and the proposed transportation and delivery of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Northern Natural Gas Company, to construct and operate the proposed Phase I facilities and to transport and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the transportation and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within one year from the date on which this order issues.

(D) The authorization granted herein is without prejudice to any determination which the public convenience and necessity may require with regard to Phase II of this proceeding.

(E) This certificate shall not entitle the industrial customer to whom firm gas is authorized herein to any rights or priorities to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

(F) Applicant shall notify the Commission of the precise contract demand Cleveland-Cliffs will require and the effect of such contract demand on the Phase II facilities. Should the precise contract demand for Cleveland-Cliffs subsequently be determined to be lower than the maximum 30,280 Mcf of gas per day authorized in paragraph (A) above, Applicant shall file a petition to amend the subject order so as to authorize such lower contract demand.

(G) Applicant shall file a service agreement with Iowa Public Service Company reflecting the additional contract demand volumes authorized herein.

(H) Applicant shall file an amendment to its October 20, 1964, contract with Cleveland-Cliffs reflecting the additional volumes authorized herein.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67–87

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 28, 1966)

On September 30, 1966, Northern Natural Gas Company (Applicant), filed in Docket No. CP67–87 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities and the transportation and sale of natural gas in interstate commerce, all as more fully set forth in the application.

Applicant proposes to construct and operate 4.4 miles of 30-inch loop line north of Clifton, Kansas Compressor Station. By means of this new facility Applicant proposes to increase its system capacity by 3,000 Mcf per day to supply contract requirements of its Peoples Division for the heating season beginning October 27, 1966. The additional contract demand is required by Peoples Division to meet for the first time the firm requirements of four existing industrial customers.

These customers have signed precedent service agreements for the volumes shown below:

Company	Contract demand Mcf	Uses
Decorah Creamery Company	250	Heating and Processing.
Waukon Farmer Co-op Creamery	250	Heating and Processing.
International Business Machines	1,000	Heating and Air Conditioning.
The Franklin Station	1,500	Heating and Air Conditioning and Power Generation.

The total estimated cost of the proposed facilities is $480,390 which cost will be financed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 23, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorizations sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G-280 (3 FPC 967).

(2) The proposed construction and operation of facilities, and the sale of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application, and exhibits, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and sale of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of facilities, and the sale of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application, and exhibits filed in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 6 months from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-107

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENT

(Issued November 28, 1966)

On October 20, 1966, Northern Natural Gas Company (Applicant), filed in Docket No. CP67-107 an application pursuant to Section 7(b) and Section 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing the construction and operation of other facilities, all as more fully set forth in the application.

Applicant proposes to abandon and remove approximately 1,635 feet of 4-inch line in its Ralston, Nebraska, branchline and to install along a different route as a replacement approximately 2,260 feet of 4-inch line. Such action has been made necessary by the development of a residential subdivision over the present location of the pipeline by the Ponderosa Development Company (Ponderosa).

The total estimated cost of the relocation is $11,017, which cost to Applicant will be reimbursed by Ponderosa.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, has been filed.

At a hearing held on November 23, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, and exhibits submitted in support of the authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G-280 (3 FPC 967).

(2) The facilities proposed to be abandoned by Applicant, as hereinbefore described and as more fully described in the application, filed in the proceeding are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and permission and approval therefor should be granted as hereinafter ordered.

(4) The proposed construction and operation of facilities, as hereinbefore described and as more fully described in the application, filed in this proceed-

ing are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) The aforesaid proposed construction and operation of facilities, is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(6) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application in this proceeding, is granted.

(B) A certificate of public convenience and necessity is issued to Applicant in this proceeding, authorizing the construction and operation of facilities, as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(C) The certificate issued by paragraph (B) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(D) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

(E) The facilities authorized in paragraph (B) above shall be constructed and placed in actual operation within six months of the date on which this order issues, as provided in paragraph (b) of Section 157.20 of the Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PACIFIC GAS AND ELECTRIC COMPANY, PROJECT NO. 233

ORDER APPROVING REVISED PROJECT EXHIBIT K AND ADJUSTING ANNUAL CHARGES

(Issued November 28, 1966)

On March 17, 1965, Pacific Gas and Electric Company, licensee for major Project No. 233, filed an application for Commission approval of a revised Exhibit K map to show the present project boundary associated mainly with the Pit 4 development of the project. Project No. 233 is located on the Pit River in Shasta County, California and affects lands of the United States within the Shasta National Forest.

The application describes the following changes in the project boundary area, as reflected on the revised Exhibit K map: (a) 6.26 acres of licensee-owned land have been added for a section of the road between Pit 5 diversion dam and the

Pit 4 powerhouse; (b) 80.01 acres of lands of the United States have been included in a road between the Pit 4 powerhouse and the Pit 4 tunnel outlet portal, and for a portion of the Pit 4 dam to Pit 4 powerhouse road; (c) 165.04 acres of lands of the United States have been added for the balance of the road between Pit 4 diversion dam and Pit 4 powerhouse; and (d) 1.17 acres of lands of the United States have been deducted from the Pit 4 tunnel area by reason of overlap of the enlarged Pit 4 powerhouse site and because of a slight change made during construction in the alignment of the Pit 4 tunnel.

By letter dated May 11, 1966, from the licensee, and by letter dated September 19, 1966, from the U.S. Forest Service, we are advised that the licensee was permitted to occupy the National Forest lands herein involved under a Forest Service Special Use Permit issued without charge on July 29, 1952 and terminated by the Forest Service on July 12, 1965, in anticipation that the Forest lands would be brought under the license for the project by an appropriate filing by the licensee. Our records show that the permit (a copy of which is on file with the Commission) was issued following the Commission's June 13, 1952 letter advising the licensee that it would interpose no objection to the licensee proceeding with certain preliminary construction work, at the licensee's risk, subject to the requirements of the Government agency having supervision over the Government lands involved.

The principal effect of our approval of the revised Exhibit K map will be to show in the license for the project an increase in National Forest lands occupied by the project of approximately 243.88 acres, with a resultant increase ($585.31) in the amount of annual charges for such occupancy.

The Chief, Forest Service has reported that the Service has reached a mutual agreement with the licensee for the adequate protection and utilization of the Shasta National Forest, and recommended that license Article 19 be revised substantially as hereinafter provided.

The Commission finds:

(1) The revised exhibit, described as Exhibit K, Sheet 2 A: (FPC No. 233-78), conforms to the Commission's rules and regulations and should be approved as part of the license for the project, and license Exhibit K, Sheet 2 A: (FPC No. 233-74), which has been superseded, should be eliminated from the license for the project.

(2) The increased amount of annual charges for recompensing the United States for the occupancy of its lands by the project is reasonable as hereinafter fixed and specified.

The Commission orders:

(A) The revised Exhibit K described in finding (1) above is hereby approved as part of the license for Project No. 233, effective as of July 12, 1965, and the superseded license Exhibit K described in the same finding is hereby eliminated from the license for the project.

(B) Article 19 of the license is hereby revised to read as follows:

> *Article 19.* The Licensee shall, with Commission approval after notice and opportunity for hearing, allow any agency of the United States, without charge, to construct or permit to be constructed on, through, and across the project lands, conduits, chutes, ditches, railroads, roads, trails, telephone and power lines, and other means of transportation and communication not inconsistent with the enjoyment of said lands by the Licensee for the purposes stated in the license. This article shall not be construed

> as conferring upon the Licensee any right of use, occupancy, or enjoyment of the lands of the United States other than for the operation and maintenance of the project as stated in the license. There is reserved to the appropriate department or agency of the United States, or of the State or county involved, the right to take over, maintain, and supervise the use of any project road as a public road.

(C) Subparagraph B of Article 26 of the license is hereby amended, effective as of July 12, 1965, to read as follows:

> B. For the purpose of recompensing the United States for the use, occupancy and enjoyment of its lands, $1,564.99.

(D) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this order. In acknowledgment of the acceptance of this order, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PACIFIC POWER & LIGHT COMPANY, PROJECT NO. 1927

ORDER APPROVING REVISED PROJECT EXHIBIT L DRAWING

(Issued November 28, 1966)

On May 19, 1966, Pacific Power & Light Company, licensee for Project No. 1927, filed for Commission approval a revised Exhibit L drawing for a new diversion dam at the Fish Creek development of Project No. 1927, located on the North Umpqua River and its tributary Fish Creek, in Douglas County, Oregon, and affecting lands of the United States within Umpqua National Forest.

The original diversion dam on Fish Creek was washed out during the December, 1964 flood and a new dam was constructed at a preferable site about 100 yards upstream from the site of the original dam.

The new dam, which was completed in July of 1965, is about 4 feet high, comprised of a concrete slab spillway section about 150 feet long surmounted by flashboards 2½ feet high across the full width of the stream, a fish ladder located at the right end of the spillway and earth fill abutment sections, creating a pond with an area of approximately 4 acres. The cost of the new construction was $34,000. The design of the structure and the spillway capacity are considered satisfactory. The change of the dam site location does not affect the occupancy by the project of lands of the United States insofar as the annual charges for such occupancy are concerned.

The Department of the Interior has advised that fish and wildlife resources and other interests of the Department are not affected adversely by the changes covered in the revised Exhibit L drawing.

The Chief, Forest Service, has recommended Commission approval of the changes shown on the revised Exhibit L drawing.

In view of the changes with respect to the Fish Creek diversion dam, we are by this order modifying subparagraph (a) of Article 2 of the license insofar as it describes the *Fish Creek Development* to reflect the changes.

The Commission finds:

The following described revised Exhibit L drawing conforms to the Commission's rules and regulations and should be approved as part of the license for the project and license Exhibit L drawing (FPC No. 1927–151) which has been superseded should be eliminated from the license for the project:

Exhibit L	FPC number	Title
Sheet No. 3, L–18 (Revised 2-2-66 by licensee).	1927–221	Fish Creek Development Diversion Dam Plan and Sections, Conduit Sections.

The Commission orders:

(A) The revised Exhibit L drawing described in the above finding is hereby approved as part of the license for Project No. 1927, and the superseded license Exhibit L drawing referred to in the same finding is hereby eliminated from the license for the project.

(B) Subparagraph (b) of Article 2 of the license for Project No. 1927, under the title *Fish Creek Development*, is hereby modified to read as follows:

Fish Creek Development

A low diversion dam comprised of a concrete slab spillway section surmounted by 2.5-foot high flashboards and earthfill abutment sections across Fish Creek, creating a pond with an area of approximately 4 acres; a conduit about 25,660 feet long consisting principally of gunite-lined canal and timber flume; an open forebay with capacity of 78 acre-feet; a steel penstock about 1,910 feet long; a powerhouse located on the North Umpqua River between Toketee powerhouse and Slide Creek diversion dam containing a 15,400-horsepower turbine connected to an 11,000-kilowatt outdoor-type generator; an outdoor substation; a 132,000 volt transmission line about 175 feet long connecting the substation with the licensee's Slide Creek-Toketee transmission line: the location, nature and character of which project works are more specifically shown and described by the exhibits hereinbefore cited for the development and by certain other exhibits which formed part of the application for amendment or approval of revised project exhibit and which are designated and described as follows:

Exhibit L-18: (FPC No. 1927–136) Forebay Plan and Sections; (FPC No. 1927–137) Penstock Plan and Profile; (FPC No. 1927–221) Diversion Dam Plan and Sections, Conduit Sections; (FPC No. 1927–139) Powerhouse Plan and Sections; and

Exhibit M-11: Two typewritten pages, Revised General Description and Specifications of Equipment, including a circuit diagram, filed in the Commission February 24, 1953.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP66-149 (PHASE II)

FURTHER FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 28, 1966)

On November 10, 1965, Texas Gas Transmission Corporation (Applicant) filed in Docket No. CP66-149 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing the construction and operation of certain other facilities together with increase in Contract Demand Service to existing customers for the 1966-67 and 1967-68 winter heating seasons, all as more fully set forth in the application.

The Commission, in its order issued April 12, 1966, 35 FPC 493, as amended July 12, 1966, 36 FPC 55, authorized during 1966: (1) the construction and operation of approximately 146.17 miles of pipeline varying in diameter from 4 to 36 inches, including river crossings on the Cumberland River in Kentucky, and Ohio River in Indiana; (2) installation of 30,530 additional horsepower of compression; (3) development of the Hanson Storage Field; (4) activation of the White River Storage Field; (5) the abandonment of 34.65 miles of pipeline; and (6) an increase of 85,888 Mcf/d in the contract demands of existing Texas Gas customers.

All of the above facilities and service constitute Phase I in the instant docket and were so designated in the Commission's April 12, 1966 order. The remaining proposed facilities and service were designated as Phase II and consideration thereof deferred to a future date.

Subsequent to the Commission's order issued April 12, 1966, authorizing Phase I of the instant docket, a petition to intervene filed by Tennessee Gas Transmission Corporation (Tennessee) regarding Phase II and the additional sale of 35,000 Mcf/d to Louisville Gas and Electric Company was withdrawn by Tennessee.

The Phase II facilities and service for which authorization was deferred and for which authorization is being granted herein consist of (1) 46.09 miles of 8 to 36-inch pipeline (including a river crossing) in Louisiana, Tennessee, and Kentucky, (2) the installation of 2,000 additional horsepower of compression at Applicant's Slaughters, Kentucky, Compressor Station, (3) increasing the maximum deliverability of the Hanson, Kentucky, Storage Field from 50,000 Mcf/d to 70,000 Mcf/d, and (4) increasing the contract demands of 50 existing customers by 61,040 Mcf/d for the 1967-68 winter heating season. The facilities involved in Phase II are proposed for construction and operation during 1967.

The estimated cost of the proposed Phase II construction is $7,638,285, which will be financed by long-term debt securities and by cash generated from operations.

No other petition to intervene in opposition to Applicant's proposals or notice of intervention or protest to the granting of the application, or to the amendments filed on February 14, 1966 (notice published March 4, 1966; 31 F.R. 3434), April 13, 1966 (notice published April 30, 1966; 31 F.R. 6554), July 28, 1966, and September 26, 1966 (notice published October 13, 1966; 31 F.R. 13255), have been filed.

At a hearing held on November 23, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and amendments thereto, and upon consideration of the record,

The Commission finds:

(1) Applicant, Texas Gas Transmission Corporation, a Delaware corporation having its principal place of business in Owensboro, Kentucky, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1948, in Docket No. G–855 (7 FPC 213).

(2) The proposed construction and operation of facilities, and the transportation and sale of natural gas in interstate commerce, as hereinbefore described as Phase II and as more fully described in the application filed in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, and the transportation and sale of natural gas in interstate commerce, are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Texas Gas Transmission Corporation, authorizing the construction and operation of the Phase II facilities, and the sale and transportation of natural gas as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized in Phase II shall be constructed and placed in actual operation, and the transportation of gas authorized in paragraph (A) above shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

THE DETROIT EDISON COMPANY, DOCKET NO. E–7318

ORDER AUTHORIZING THE ISSUANCE OF FIRST MORTGAGE BONDS

(Issued November 29, 1966)

The Detroit Edison Company filed an application with the Federal Power Commission on October 31, 1966, seeking an order, pursuant to Section 204 of the Federal Power Act, authorizing the issuance of $100,000,000 principal amount of General and Refunding Mortgage Bonds, Series R, —% due 1996.

Applicant is incorporated under the laws of the State of New York with its principal place of business in Detroit, Michigan, and is qualified to do business in the State of Michigan. Applicant is engaged primarily in the generation, purchase, transmission, distribution and sale of electricity in a service area of approximately 7,600 square miles in southeastern Michigan.

The $100,000,000 General and Refunding Bonds are to be dated December 1, 1966, and are to mature on December 1, 1996. The interest rate will be determined by the most favorable bid received and accepted pursuant to the Commission's Regulations under the Federal Power Act.

The new Bonds are to be issued under and secured by a Mortgage and Deed of Trust dated as of October 1, 1924, between the Applicant and Bankers Trust Company, New York, as Trustee, as amended and supplemented by various supplemental indentures and to be further amended and supplemented by a supplemental indenture to be dated as of December 1, 1966, creating the new Bonds. The new Bonds will be a first lien on substantially all of the Applicant's tangible properties and franchises.

The Applicant intends on or about December 1, 1966, to invite sealed, written proposals for the purchase from it of the $100,000,000 new Bonds. The Public Invitation for Proposals contains the following principal provisions:

Each bid, which may be made by a single bidder or by a group of bidders, must be for the purchase of all the bonds. No bidder may submit or participate in more than one bid. Each bid must be presented to the Applicant at the offices of Bankers Trust Company, Conference Room A, 11th Floor, 100 Broadway, New York, N.Y., before 11:00 A.M., New York City Time, on December 8, 1966, and be accompanied by a deposit of $5,000,000.

Each bid shall specify the interest rate to be borne by the bonds, which rate shall be a multiple of ⅛ of 1%; and shall also specify the price to be paid to the Applicant for the Bonds, which price shall not be less than 99% of principal amount. Each bid shall provide that the purchaser or purchasers of the Bonds shall pay to the Applicant accrued interest on the Bonds from December 1, 1966 to the date of payment therefor and delivery thereof.

Unless the Applicant shall reject all bids or exclude a bid or bids for reasons set forth in the Public Invitation for Proposals, it will accept the bid which provides for the lowest annual cost of money.

The net proceeds from the sale of the new Bonds will be used first, to provide for a refunding of short-term bank loans incurred and to be incurred prior to issuance of the new Bonds chiefly for construction purposes, which notes totaled $30,000,000 as of September 30, 1966, and are expected to total $40,000,000 as of the end of November, 1966, and second, to provide for further financing for permanent improvement.

During 1966 and 1967 the Company's construction and capital expansion program contemplates the expenditure of approximately $90,400,000 on a new steam-electric generating unit with an estimated capability of 519,000 kilowatts scheduled for service in late 1967 at the Trenton Channel power plant and a 527,000 kilowatt generating unit scheduled for service in December, 1968, at the St. Clair power plant. In addition, the Company expects to spend $16,700,000 on a new 120,000 kilowatt plant scheduled for service in 1968 at Harbor Beach, Michigan; to incur initial expenditures of $4,000,000 in connection with the construction of a 750,000 kilowatt steam-electric generating plant near Monroe, Michigan; and an additional $17,000,000 for oil-fueled combustion turbine-generator peaking units; some of which are presently in service with the remainder scheduled through the early months of 1967. The balance of expenditures in 1966 and 1967 are expected to include $44,700,000 for the construction of transmission and distribution lines; $24,300,000 for the construction of transmission and distribution stations and substations; $44,000,000 on new business extensions and $69,600,000 on other property and equipment.

Written notice of the application has been given to the Michigan Public Service Commission and the Governor of that State. Notice has also been published in the Federal Register on November 11, 1966 (31 F.R. 14528), stating that any person desiring to be heard or to make any protest with reference to the application shall file petitions or protests on or before November 22, 1966, with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) The Applicant owns and operates facilities which may be facilities for the transmission of electric energy in interstate commerce and it may be a public utility within the meaning of that term as used in Section 204 of the Federal Power Act.

(2) The proposed issuance and sale of Bonds, as described above, will constitute an issuance of securities within the purview of Section 204 of the Federal Power Act.

(3) Applicant is not organized and operating in a State under the laws of which the security issue here involved is regulated by a State commission within the meaning of Section 204(f) of the Act, and the proposed issuance of securities is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(4) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

(5) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) The proposed issuance and sale of Bonds, upon the terms and conditions and for the purposes specified in the application, as described above, are authorized, subject to the provisions of this order.

(B) The proposed issuance and sale of Bonds at competitive bidding shall not be consummated until:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

(C) This authorization shall expire unless the transaction hereby authorized is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission.

(E) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

FLORIDA GAS TRANSMISSION COMPANY, DOCKET NO. CP67-94

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 29, 1966)

On October 13, 1966, Florida Gas Transmission Company (Applicant) filed in Docket No. CP67-94 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain lateral facilities in order to purchase natural gas from Gulf Oil Corporation (Gulf), all as more fully set forth in the application.

Specifically, Applicant seeks authorization to construct and operate approximately 18 miles of 12-inch lateral supply pipeline and appurtenances extending in a generally northwesterly direction from a point of connection with an existing delivery point in Corpus Christi Bay to a point on Applicant's mainline in San Patricio County, Texas, downstream of Compressor Station No. 2 and east of Nueces River. By means of these facilities Applicant proposes to purchase from Gulf, transport and take into its main pipeline system a daily quantity of approximately 31,000 Mcf of natural gas.

The estimated total cost of the proposed facilities is $1,225,000 which will be paid out of cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 23, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, Florida Gas Transmission Company, a Delaware corporation having its principal place of business in Winter Park, Florida, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued July 3, 1963, in Docket No. CP63-277 (30 FPC 27).

(2) The proposed construction and operation of facilities and transportation of natural gas, hereinbefore described and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all other applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and the transportation of natural gas per day as hereinbefore described and as more fully described in the application in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed as authorized in paragraph (A) above as provided for in paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within one year from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NEW ENGLAND POWER COMPANY, PROJECT NO. 1904

ORDER AUTHORIZING SALE OF PROJECT LAND

(Issued November 30, 1966)

New England Power Company, licensee for constructed Vernon Project No. 1904, filed an application on July 28, 1966, and supplements thereto on August 12 and October 6, 1966, requesting Commission approval of a proposed conveyance to the Town of Brattleboro, Vermont, of a ten-acre parcel of project land situated on the western shore of the Connecticut River in the Town of Brattleboro.

According to the application, the licensee proposes to transfer the subject parcel of land to the Town of Brattleboro. Thereafter the Town would transfer the property to the A.P.W. Products Company, Inc. The proposed use of the land is for expansion of A.P.W. paper mill operations, presently conducted on land adjacent to the subject parcel. The ten-acre parcel is located approximately five miles upstream from the Vernon Dam.

The licensee has not submitted a recreational use plan, it not being specifically required by the order issuing the license for the Vernon Project, August 1, 1944 (4 FPC 670). That order provides in part, at p. 672, "* * * The operation by the licensee * * * of the project works * * * shall at all times be controlled by such reasonable rules and regulations * * * as the Commission may prescribe for the protection of life, health, and property and in the interest of the fullest practicable conservation and utilization of such waters * * * for * * * beneficial public uses, including recreational purposes * * *."

The licensee has submitted to this Commission a brochure setting forth in general terms the present development and use of a number of the licensee's hydroelectric developments in the stretch of the Connecticut River which includes Project 1904. Specific recreational facilities are not now included at Project 1904. And information set forth in the application does not cover all possible uses of the subject parcel as they may relate to the comprehensive use for the improvement and development of the Connecticut River. In this respect the application is limited to statements that the subject parcel will be used for industrial operations with waste treatment facilities and will be subject to State regulatory authority. Licensee requests an exemption of the proposed conveyance from the requirements of Commission Order No. 313, issued December 27, 1965, 34 FPC 1546, paragraph (c).*

Licensee indicates that in its opinion the structures and manufacturing processes to be employed on the subject parcel of project land will not affect adversely any recreational development. But without the covenant provided for in our Order No. 313 there is no assurance that a future owner of the land would use it in a manner which would be compatible with overall recreational use of project lands and reservoirs.

In our order authorizing issuance of the license for Project No. 1904, the Commission found, among other things, (4 FPC 671), that: "Under present circumstances and conditions, and upon the terms hereinafter imposed, the project is best adapted to a comprehensive plan for improving and developing the Connecticut River for the use and benefit of interstate commerce, for the improvement and utilization of water power development, and for other beneficial public uses, including recreational purposes;". Article 21 of the license for the project, which was issued jointly to Connecticut River Power Company and New England Power Company, (later transferred to New England Power Company (14 FPC 504)) provides, among other things, that "each Licensee, its successors and assigns will, during the period of this license, retain the possession of all project property covered by this license * * * including the project area * * * and that none of such properties necessary or useful to the project * * * will be voluntary sold * * * without the approval of the Commission."

The Commission finds:

It is necessary and appropriate for the purposes of the Federal Power Act to authorize the licensee to convey the subject parcel of project lands upon the terms and conditions as hereinafter provided.

The Commission orders:

(A) New England Power Company is hereby authorized to effect the conveyance of the parcel of Project No. 1904 land herein involved, subject to the retention in any such conveyance of flowage rights necessary in the construction, operation and maintenance of Project No. 1904.

---

*Paragraph (c) states in part as follows:

"The Commission will not grant any authorization for a licensee to dispose of any interest in project lands, unless a showing is made that such disposal is not inconsistent with any approved recreational plan or in the absence of such a plan, that the lands do not have recreational value. * * * The licensee, in the absence of specific Commission exemption from these requirements, shall include in the instrument of conveyance a covenant running with the land adequate to insure that, unless the Commission subsequently authorizes a different use as consistent with a comprehensive plan for improving or developing the waterway, the use of the lands conveyed will not endanger health, create a nuisance, or otherwise be incompatible with over-all project recreational use."

(B) Our approval of the conveyance of the subject parcel of project land is subject to the further condition that the licensee incorporate in any instrument of conveyance of such land a covenant ensuring that the use of such land will not endanger health, create a nuisance, or otherwise be incompatible with overall project recreational use in accordance with paragraph (C) of the Commission's Order No. 313, issued December 27, 1965 (18 CFR 2.7(c)).

(C) The licensee shall file copies of the instrument of conveyance with the Commission within 30 days of the date of its execution.

(D) The licensee shall, within 6 months from the date of issuance of this order, file a revised Exhibit F to show the present ownership of project lands.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN NATURAL GAS PIPELINE COMPANY, ET AL., DOCKET NO. CP66-307, ET AL.

ORDER DENYING MOTION TO HOLD PROCEEDINGS IN ABEYANCE

(Issued November 30, 1966)

On November 4, 1966, Texaco Inc. filed a motion pursuant to Section 1.12 and Section 1.13(e) of the Rules of Practice and Procedure requesting the Commission to hold the above proceedings in abeyance until a final determination has been made in the presently pending state court action in *Brooks Gas Corporation* v. *Sinclair Oil & Gas Company*, District Court of Harris County, Texas.

In that proceeding, the plaintiff applied for a temporary injunction against Sinclair Oil & Gas Company (Sinclair) and Skelly Oil Company (Skelly) on the ground of breach of an alleged agreement that their gas gathering system would not be extended into the Eldorado-Canyon Field. It is not necessary for our purpose to relate the details of the agreement. Suffice it to say that the Presiding Judge found that such agreement was in restraint of trade. The Texas Court of Civil Appeals affirmed the denial of the injunction by the lower court.

We believe that the motion should be dismissed since, it presupposes that the validity of Skelly and Sinclair's contracts, as such, to sell gas to Northern Natural Gas Company is at issue in the State Court proceeding. This is in error. While it is true that the Commission will defer such questions as to whether or not there is a contract, as such, under applicable state law, the issue in the Texas case is whether Skelly has agreed not to compete. The contract between Sinclair and Northern which forms the basis for the certificate application is not under attack nor is there any question of interpretation of that contract subject to determination under state law. The alleged potential conflict with Federal jurisdiction is too tenuous and remote to warrant our holding these applications in abeyance.

The Commission orders:

For the above reasons the motion of Texaco Inc. to hold the above-designated proceedings in abeyance is hereby dismissed.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

AREA RATE PROCEEDING, ET AL. (PERMIAN BASIN AREA), DOCKET NO. AR61-1, ET AL.

ORDER ACCEPTING QUALITY STATEMENTS

(Issued December 1, 1966)

The producers listed in the Appendix have submitted quality statements in response to Opinion Nos. 468 and 468-A, 34 FPC 159, 1068, or related orders issued subsequent thereto.

Sixteen of these quality statements, which relate to sales to El Paso Natural Gas Company (El Paso) and West Texas Gathering Company (West Texas), were filed late. The agreed upon treating charges for non-pipeline quality gas are based on costing methods utilized by El Paso and approved by the Commission in declaratory orders issued June 13 and 27, 1966, 35 FPC 960, 1083.

Seven quality statements have been revised to eliminate proposed upward adjustments for gas delivered in excess of 500 psig and for Btu content between 1000 and 1050 which were used initially as credits to treating cost deductions.

Seven quality statements submitted by Shell Oil Company (Shell) reflect for the first time agreement with El Paso. They disagreed initially as to whether certain sales were "new" or "old" gas sales and as to the proper method of determining New Mexico's "ad valorem" tax.

One quality statement involves sales to El Paso and Pecos Company at the Wilshire Plant in Upton County, Texas. The same cost adjustments approved in the Commission's order issued October 19, 1966, for other producer sales at the Wilshire Plant were utilized in the subject quality statement to the extent applicable.

The final quality statement relates to a sale by Humble Oil & Refining Company to The Nueces Company (Nueces). Nueces resells this gas to El Paso. The quality statement has been revised to reflect a deduction for compression. No deduction for compression was proposed in the initial quality statement.

The quality statements tendered herein conform with the requirements of Opinion Nos. 468 and 468-A and we shall therefore accept them.

The Commission orders:

The quality statements listed in the Appendix are accepted.

FOSTER PETROLEUM CORPORATION; GRAHAM-MICHAELIS DRILLING COMPANY (OPERATOR), ET AL., DOCKET NOS. RI65-427 AND RI65-428; WILLIAM GRAHAM OIL COMPANY (OPERATOR), ET AL., RI65-422 AND RI65-430

ORDER ACCEPTING NOTICES OF CHANGE IN RATE, REQUIRING REFUNDS, AND TERMINATING PROCEEDINGS

(Issued December 1, 1966)

The above-named parties have filed notices of change in rate relating to sales of natural gas to Cities Service Gas Company (Cities) in the Kansas Hugoton Field.[1] These sales are made pursuant to the terms and conditions of Pan American Petroleum Corporation's (Pan American) FPC Gas Rate Schedule

---

[1] Foster Petroleum Corporation, FPC Gas Rate Schedule No. 4, Supplement Nos. 2 and 3. Graham-Michaelis Drilling Company (Operator), *et al.*, FPC Gas Rate Schedule No. 1, Supplement Nos. 5 and 6; FPC Gas Rate Schedule No. 11, Supplement Nos. 13 and 14; Rate Schedule No. 19, Supplement Nos. 4 and 5; Rate Schedule No. 38, Supplement Nos. 4 and 5; and William Graham Oil Company (Operator), *et al.*, FPC Gas Rate Schedule No. 4, Supplement Nos. 5 and 6, and Rate Schedule No. 5, Supplement Nos. 7 and 8.

No. 84 because each of the parties have executed contracts with Cities adopting such terms and conditions.

On April 13, 1966, we issued an order in *Pan American Petroleum Corporation*, Docket No. G–9279, *et al.*, 35 FPC 502, approving a company-wide settlement proposal filed by Pan American, which, *inter alia*, included a settlement rate of 12.5¢ per Mcf of natural gas at 14.65 psia for the sale by Pan American under its FPC Gas Rate Schedule No. 84. Pan American also proposed to amend its contract with Cities to eliminate the price redetermination provision therefrom for twenty-five years and to provide for a definite price escalation of 1.0¢ per Mcf every five years commencing June 23, 1971.

Each of the parties here seeks the same settlement terms as we approved for Pan American's sale to Cities. Each has filed for a 12.5¢ rate and has tendered an executed amendatory agreement which conforms its contract to the provisions of the Pan American settlement.

Graham-Michaelis Drilling Company (Graham) filed for, and has been charging and collecting from Cities a rate of 14.5¢ per Mcf of natural gas at 14.65 psia, subject to refund, in Docket Nos. RI65–427 and RI65–428. It proposes to refund such monies above the settlement rate, with applicable interest, to Cities. Such refunds will approximate $4,500, exclusive of interest.

William Graham Oil Company (Operator), *et al.* (William-Graham) has been charging and collecting from Cities a rate of 14.5¢ per Mcf of natural gas at 14.65 psia, subject to refund, in Docket Nos. RI65–430 and RI65–442. It proposes to refund such monies above the settlement rate, with applicable interest. Such refunds will approximate $1,200.

For the reasons set forth in an order issued October 31, 1966, 36 FPC 800, in *Northern Pump Company (Operator), et al.*, Docket No. RI63–9, *et al.*, we think it appropriate to accept the notices of change filed herein. Our action should not be construed as constituting approval of any future rate increases, if any, that may be filed under the subject rate schedules in accordance with any reservation contained therein of the right to file increases under the subject rate schedules, and is without prejudice to any findings or orders of the Commission in any future rate proceedings, including area rate proceedings, or similar proceedings, involving each of the parties' rates and rate schedules.

The Commission orders:

(A) The notices of change in rate and contract amendments filed by the above-named parties to 12.5¢ per Mcf of natural gas at 14.65 psia for the subject sales to Cities are accepted and made effective as of November 20, 1966, as to Foster Petroleum Corporation, and November 21, 1966, as to the other parties named above.

(B) Graham and William-Graham (Respondents) shall compute the difference between the rates collected subject to refund and the settlement rate of 12.5¢ per Mcf of natural gas at 14.65 psia with applicable interest to the date of this order, and shall within 45 days from the date of issuance of this order submit a report to the Commission, with a copy to Cities, setting out the amount of refunds (showing separately the principal and applicable interest) the bases used for such determination, the period covered, and ten days thereafter each shall submit to the Commission a copy of a letter from Cities agreeing to the correctness of such amounts.

(C) Respondents shall retain the amounts shown in the report required under paragraph (B) above, subject to further action of the Commission directing the disposition of these amounts.

(D) Each Respondent may deposit the retained refunds in a special escrow account, and shall tender for filing within 60 days of the date of issuance of this order an executed Escrow Agreement, conditioned as set out below, accompanied by a certificate showing service of a copy thereof upon Cities.

Unless notified to the contrary by the Secretary within 30 days from the date of filing thereof, each escrow agreement shall be deemed to be satisfactory and to have been accepted for filing. The escrow agreement shall be entered into between each Respondent and any bank or trust company used as a depository of funds of the United States Government and the agreement shall be conditioned as follows:

(1) Each Respondent, the bank or trust company, and the successors and assigns of each, shall be held and formally bound unto the Federal Power Commission for the use and benefit of those entitled thereto, with respect to all amounts and the interest thereon deposited in the special escrow account, subject to such agreement, and such bank or trust company shall be bound to pay over to such person or persons as may be identified and designated by final action of the Commission and in such manner as may be therein specified, all or any portion of such deposits and the interest thereon.

(2) The bank or trust company may invest and reinvest such deposits in any short-term indebtedness of the United States or any agency thereof, or in any form of obligation guaranteed by the United States which is, respectively, payable within 120 days as the said bank or trust company in the exercise of its sound discretion may select.

(3) Such bank or trust company shall be liable only for such interest as the invested funds described in Paragraph (2) above will earn and no other interest may be collected from it.

(4) Such bank or trust company shall be entitled to such compensation as is fair, reasonable and customary for its services as such, which compensation shall be paid out of the escrow account to such bank or trust company. Said bank or trust company shall likewise be entitled to reimbursement for its reasonable expenses necessarily incurred in the administration of this escrow account, which reimbursement shall be paid out of the escrow account.

(5) Such bank or trust company shall report to the Secretary quarterly, certifying the amount deposited in the bank or trust company for the quarterly period.

(E) If any Respondent elects to commingle the retained refunds with its general assets and use them for business purposes, it shall notify the Secretary of the Commission of its intention so to do within sixty days of the issuance of this order, and shall pay interest on such monies at the rate of 6% per annum from the date of issuance of this order to the date on which they are paid over to the person or persons ultimately determined to be entitled thereto by final action of the Commission.

(F) Upon notification by the Secretary of the Commission that a Respondent has complied with the terms and conditions of this order, the proceedings involved herein shall terminate all without further order of the Commission.

(G) The acceptance by the Commission of Respondents' offers of settlement, is without prejudice to any findings or determinations that may be made in any proceeding now pending, or hereafter instituted by or against each Respondent and is without prejudice to claims or contentions which may be made by each Respondent, the Commission staff, or any affected party hereto, in any proceedings.

Commissioner Ross *dissenting* for the reasons set forth in his dissenting statement accompanying the order issued October 31, 1966, in Northern Pump Company (Operator), *et al.*, Docket No. RI63-9, *et al.*, 36 FPC at p. 803.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ILLINOIS POWER COMPANY, DOCKET NO. E-7245

ORDER ACCEPTING RATE SCHEDULE FILINGS EFFECTING RATE REDUCTIONS AND TERMINATING PROCEEDING

(Issued December 1, 1966)

This order accepts a settlement proposal of Illinois Power Company (Illinois Power) whereby the Company would reduce its wholesale electric rates and charges to Cedar Point Light and Water Company (Cedar Point) and the Villages of Ladd, Ogden and Oglesby, Illinois, by approximately $43,400 annually (based upon its 1965 operations) commencing with billings made on and after December 1, 1966. In addition to accepting for filing Illinois Power's accompanying rate schedules proffered for service to the four above-named customers and designated as set forth in the Appendix hereto, the order terminates the above-entitled proceeding, as requested. The subject rate reductions followed the initiation by this Commission of a formal rate investigation concerning the lawfulness of Illinois Power's rates and charges. See Commission orders issued herein September 16, 1965, 34 FPC 860, and August 8, 1966, 36 FPC 385.

The proffered rate schedule filings, which were submitted on October 24, 1966 would result in annual revenue reductions ranging from 11.8% to 20.5%, all as delineated in the tabulation below:

	1965 revenues	Revenues under proposed rates	Annual reduction	
			Amount	Percent
Ladd	$33,537	$27,744	$5,793	17.3
Ogden	21,883	18,381	3,502	16.0
Oglesby	159,298	126,676	32,622	20.5
Cedar Point	12,178	10,735	1,443	11.8
Total	226,896	183,536	43,360	19.1

The proffered rate schedules provide for a monthly two-part rate. The demand component is $2.00 per kva for the first 110 kva and $1.61 per kva for all additional kva. The energy component amounts to 9 mills per kwh for the first 50,000 kwh and 6.5 mills per kwh for all additional kwh. No changes are prescribed for the existing fuel adjustment clause, which averaged 0.3 mills per kwh during the calendar year 1965. The minimum monthly charge is the demand charge for demand established during the month or 110 kva, whichever is greater.

Illinois Power is engaged in the generation, transmission, and distribution of electrical energy in Illinois, and provides electric service in 49 counties of the State. Cedar Point, Ladd, Ogden, and Oglesby purchase all of their electric requirements from the Company.

The Commission's order of September 16, 1965, directed an investigation and hearing as to the lawfulness of Illinois Power's wholesale rates and charges to the Villages of Fithian, Ladd, Ogden, Oglesby and Sawyerville, Illinois; Cedar Point; and Central Illinois Electric & Gas Company (CIE&G). That order was amended by Commission order issued August 8, 1966, to exclude the lawfulness of the Company's rates and charges to Sawyerville from the scope of the hearing ordered therein[1], require Illinois Power to furnish cost and revenue data using 1965 rather than 1964 as the test year, and directed that a prehearing conference be held on October 4, 1966[2].

The subject settlement proposal results from conferences between Illinois Power representatives and the Commission staff during which the Company submitted a cost of service study reflecting costs for the test year 1965 and the staff proposed various adjustments thereto.

We believe that the subject rate schedules should be accepted for filing and this proceeding terminated. These schedules would result in eliminating more than $43,000 in annual charges to the four wholesale customers based on Company operations during the test year 1965 and an estimated $46,800 for the twelve months ending September 30, 1967. In accepting these rate schedules for filing, we note the immediate rate relief to the wholesale customers concerned. In doing so we do not determine the fair rate of return for the Company's wholesale business, nor do we determine the basis for resolving other cost of service items as would be done if this case were fully tried and decided on the merits on all issues. Inasmuch as our rate making authority is a continuing process, our disposition of this proceeding in the manner indicated above in no way limits our ability to re-examine Illinois Power's wholesale rates and charges at any time thereafter.

By order issued August 8, 1966, we included within the scope of this proceeding the issue of the lawfulness of Illinois Power's Rate Schedule FPC No. 34[3], which provides for an interchange arrangement among Illinois Power, CIE&G, and Commonwealth Edison Company (Commonwealth Edison). This schedule embodies an interchange arrangement similar to other interchange agreements of Illinois Power, and energy flows under the terms of the agreement are expected to reduce losses in the Illinois Power and Commonwealth Edison systems. It provides for an exchange of energy among the three systems to supply the loads of CIE&G's Homer and Bement Districts and does not involve the receipt of monetary compensation by any party to the agreement. Nothing raised in this investigation shows the need for further consideration of this schedule at this time, and we therefore terminate this proceeding with respect to Illinois Power's Rate Schedule FPC No. 34.

Illinois Power's settlement proposal does not include a rate for service to the Village of Fithian. Illinois Power's acquisition and merger of Fithian's system was approved by Commission order issued October 13, 1966, 36 FPC 743, *Illinois Power Company*, Docket No. E-7302. Illinois Power's Rate Schedule FPC No. 25 as supplemented for service to Fithian is subject to cancellation pursuant to notice of cancellation as provided in Section 35.15 of the Commission's Regulations[4] under the Federal Power Act.

The Commission finds:

It is necessary and appropriate for the purposes of the Federal Power Act that Illinois Power's rate schedule filings as referred to above and designated in the Appendix hereto, be accepted for filing and allowed to take effect as filed rate schedules applicable to service for which billings are rendered on and after December 1, 1966, and that the above-entitled proceeding be terminated in the manner hereinafter ordered.

---

[1] By order issued July 15, 1966, *Illinois Power Company*, Docket No. E-7282, 36 FPC 59, the Commission approved the Company's acquisition and merger of the electric system of Sawyerville.

[2] Because of settlement negotiations between the Commission staff and Illinois Power, the Presiding Examiner postponed the prehearing conference until November 1, 1966. Subsequently by Secretary's Notice of Continuance dated October 28, 1966, the prehearing conference was further postponed to December 15, 1966, or such later date as may be fixed by the Presiding Examiner.

[3] Superseded Rate Schedule FPC No. 31 for direct sale of energy to CIE&G by Illinois Power. This schedule is also designated as CIE&G's Rate Schedule FPC No. 2 and Commonwealth Edison's Rate Schedule No. 8.

[4] On November 7, 1966, Illinois Power filed its Notice of Cancellation. That notice was accepted for filing effective December 8, 1966.

The Commission orders:

(A) Illinois Power's rate schedules as referred to above and designated in the Appendix hereto are hereby accepted for filing and allowed to take effect as filed rate schedules applicable to service for which billings are rendered on and after December 1, 1966.

(B) Acceptance of Illinois Power's rate schedules as herein provided is without prejudice to any findings or orders which have been or may hereafter be made by this Commission in any proceeding by or against Illinois Power. Moreover, nothing in this order shall be construed as constituting approval by this Commission of any service, rate, charge, classification, or any rule, regulation, contract, or practice affecting such service or rate provided for in the rate schedules referred to above and designated in the Appendix hereto; nor shall this order be deemed as recognizing any claimed contractual right or obligation affecting or relating to such service or rates.

(C) The above-entitled proceeding, Docket No. E–7245, is hereby terminated.

APPENDIX

NEW ENGLAND POWER COMPANY, PROJECT NO. 1904

ORDER APPROVING AMENDMENT OF PROJECT EXHIBIT K DRAWINGS AND AUTHORIZING EASEMENT IN PROJECT LANDS

(Issued December 1, 1966)

New England Power Company (NEPCO), licensee for constructed Vernon Project No. 1904, filed an application on October 6, 1966 and amendments thereto on October 27 and November 9, 1966, requesting (1) Commission approval of amended Exhibit K drawings covering Project No. 1904 to delete from the area within the project boundary a strip of land 0 feet to 75 feet wide extending along the eastern project boundary of the right-of-way of the 69 kv transmission line running between the Vernon and Bellows Falls plants of NEPCO, a total of approximately 26 miles, of which approximately 3.3 miles will be utilized for a right-of-way for a new 115 kv transmission line to be constructed by Central Vermont Public Service (CVPS); and (2) Commission approval of an easement which NEPCO proposes to grant to CVPS to cross project lands.

As set forth in the application CVPS proposes to construct a 6.8 miles 115 kv transmission line (operated initially at 69 kv), over the lands involved, extending from Asheulot, New Hampshire in the east to Brattleboro, Vermont in the west. Nepco states that power and energy will be received from Public Service Company of New Hampshire at Asheulot and transmitted over the proposed line to CVPS's Brattleboro service area. CVPS will own and operate substation and terminal facilities at Brattleboro, a 0.7 mile portion of the 115 kv line crossing the Connecticut River and Nepco's Bellows Falls-Vernon 69 kv line right-of-way and other Project No. 1904 lands, (for which crossing the easement would be granted), and a 2.8 mile portion of the 115 kv line east of the Connecticut River to Asheulot. The intervening 3.3 mile segment of the 115 kv line will be owned by Nepco and operated by CVPS. CVPS will act as the construction entity for the entire line. Nepco will reimburse CVPS for that portion of the costs associated with Nepco's 3.3 mile segment.

Nepco's proposed revision of the boundary for Project No. 1904 is reflected in its amended Exhibit K-3, Sheets 2B and 3B of 8 (FPC No. 1904-40 and -41). Those sheets would supersede licensee Exhibit K-3, Sheets 2A and 3A of 8 (FPC No. 1904-33 and -34). As redrawn the project boundary would preserve a constant 25 foot wide strip on the east side of Nepco's Bellows Falls-Vernon 69 kv line.[1] Data set forth in the application or otherwise on file with the Commission shows that the land to be deleted from the project boundary is not needed for operation safety or adequacy of Nepco's Bellows Falls-Vernon line and is without recreational value.

The proposed easement covering the transmission line crossing of the Bellows Falls-Vernon transmission line and project lands will not adversely affect power and recreational value. Nepco states that the easement to CVPS will be subjected expressly to the requirements of Commission Order No. 313 issued December 27, 1965, 34 FPC 1546, Paragraph (C).[2]

In our August 1, 1944 order authorizing issuance of the license for Project No. 1904, we found, among other things, (4 FPC 670, 671), that: "Under present circumstances and conditions, and upon the terms hereinafter imposed, the project is best adapted to a comprehensive plan for improving and developing the Connecticut River for the use and benefit of interstate commerce, for the improvement and utilization of water power development, and for other beneficial public uses, including recreational purposes;". Article 21 of the license for the project, which was issued jointly to Connecticut River Power Company and New England Power Company, (later transferred to New England Power Company (14 FPC 504)) provides, among other things, that "each Licensee, its successors and assigns will, during the period of this license, retain the possession of all project property covered by this license * * * including the project area * * * and that none of such properties necessary or useful to the project * * * will be voluntarily sold * * * without the approval of the Commission.

---

[1] The western boundary of the line as set forth on the aforementioned Exhibit K-3, Sheets 2A and 3A of 8 (FPC No. 1904-33 and -34) now on file with the Commission is not affected by subject application.

[2] Paragraph (C) states in part as follows:

> The Commission will not grant any authorization for a licensee to dispose of any interest in project lands, unless a showing is made that such disposal is not inconsistent with any approved recreational plan or in the absence of such a plan, that the lands do not have recreational value. * * * The licensee, in the absence of specific Commission exemption from these requirements, shall include in the instrument of conveyance a covenant running with the land adequate to insure that, unless the Commission subsequently authorizes a different use as consistent with a comprehensive plan for improving or developing the waterway, the use of the lands conveyed will not endanger health, create a nuisance, or otherwise be incompatible with over-all project recreational use.

To date Nepco has not submitted a recreational use plan for the Vernon Project, it not being specifically required by the order issuing the license. That order provides in part, 4 FPC 672, " * * * The operation by the licensee * * * of the project works * * * shall at all times be controlled by such reasonable rules and regulations * * * as the Commission may prescribe for the protection of life, health, and property and in the interest of the fullest practicable conservation and utilization of such waters * * * for * * * beneficial public uses, including recreational purposes * * *." Licensee has submitted to this Commission a brochure setting forth in general terms, the present development and use of a number of the licensee's hydroelectric developments in the stretch of the Connecticut River which includes Project 1904. Specific recreational facilities are not now included at Project 1904.

The Commission finds:

(1) Amended Exhibit K-3, Sheets 2B and 3B of 8 (FPC No. 1904-40 and -41) conform to the Commission's rules and regulations and should be approved as part of the license for Project No. 1904 and license Exhibit K-3, Sheets 2A and 3A of 8 (FPC No. 1904-33 and -34) superseded by the aforementioned sheets should be eliminated from the license for the project.

(2) It is necessary and appropriate for the purposes of the Federal Power Act to authorize Nepco to grant the easement over Project No. 1904 lands or interests therein as described in the recital above upon the terms and conditions as hereinafter provided.

The Commission orders:

(A) The amended Exhibit K sheets described in the findings above are hereby approved as part of the license for Project No. 1904, and the license Exhibit K sheets described in the findings above as superseded are hereby eliminated from the license for the project.

(B) Nepco is hereby authorized to grant the aforementioned easement to CVPS, subject to recognition in the instrument granting any such easement of Nepco's rights and responsibilities under its license for Project No. 1904, and a covenant ensuring that the use of such lands will not endanger health, create a nuisance, or otherwise be incompatible with overall project recreational use in accordance with paragraph (C) of the Commission's Order No. 313, issued December 27, 1965, 34 FPC 1546 (18 CFR 2.7(C)).

(C) Nepco shall file copies of the easement referred to in paragraph (B) above within 30 days of its execution.

(D) Nepco shall, within six months of the date of issuance of this order, file for Commission approval a further revised Exhibit K, Sheet 3 of 14 (FPC No. 1904-21) to reflect the granting of the easement.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PERMISSIBLE PROVISIONS FOR PRICE CHANGES IN INDEPENDENT PRODUCER RATE SCHEDULES—LIBERALIZATION, DOCKET NO. R-298

ORDER NO. 329

AMENDING SECTION 154.93 OF THE REGULATIONS UNDER THE NATURAL GAS ACT

(Issued December 1, 1966)*

On January 26, 1966, the Commission issued a notice of proposed rulemaking in this proceeding (31 F.R. 1316, February 3, 1966) proposing to amend § 154.93 of the Regulations under the Natural Gas Act by enlarging the categories of permissible provisions for price changes in independent producer contracts for the sale of natural gas for resale in interstate commerce. In addition to the three categories of permissible provisions now permitted, a further type of contractual provision was proposed which would permit an additional price increase up to the just and reasonable area rate which may be prescribed in an area rate proceeding.

Of the nine responses to the notice, two[1] approve the proposed rule as drafted, three[2] favor the proposal but suggest some modifications and three[3] were opposed.

The suggested modifications of the proposed rule are similar in nature and suggest only a more precise definition of the term "area rate prescribed." Thus, the California Commission proposes the following language:

> Provisions that permit a change in price to the applicable, just and reasonable area ceiling rate which has been, or which may be, prescribed by the Commission for the area of the price in question for the quality of the gas involved.

We agree that the suggested language is more precise and should be adopted with a minor change.

Pan American argues in opposition to the proposed amendment that the Commission, by issuing regulations setting forth permitted price changing provisions and prohibiting all other provisions, instead of issuing orders specifying the price changing provisions that are inconsistent with the Natural Gas Act and permitting all others, is creating the necessity for continuously amending its regulations. It requests that Order Nos. 232, 232-A and 242[4], which amended the Regulations under the Natural Gas Act to prohibit the filing of contracts containing other than the permitted clauses, be vacated *ab initio* and that a hearing be held to determine specifically which contract provisions are to be prohibited. These arguments have been considered and rejected by the courts in reviewing the action taken by this Commission in these rulemaking orders[5], and we believe that there is no need to discuss again these contentions.

*Published in the Federal Register on December 8, 1966 (31 F.R. 15485).

[1] Shell Oil Company and The California Company.

[2] Philadelphia Electric Company, Washington Gas Light Company, and The People of the State of California and the Public Utilities Commission of the State of California (California Commission).

[3] Pan American Petroleum Corporation, Phillips Petroleum Company, and Associated Gas Distributors.

[4] Reported in 25 FPC 379, 25 FPC 609, and 27 FPC 339, respectively.

Phillips Petroleum agrees that the regulation should be amended to permit contract pricing provisions which provide for price increases to a just and reasonable rate prescribed by the Commission, but argues that the limitation of the permissible contract price clause to the just and reasonable *area* rate is undesirable and would limit rate increases only to those determined in area rate proceedings. Phillips also interprets the language of the proposal to preclude the filing of petitions for relief from the maximum rate set for any Permian Basin area sale, as provided for in Opinion No. 468, *Area Rate Proceeding,* Docket No. AR61-1, issued August 5, 1965, 34 FPC 159 (p. 227).

It appears that Phillips' objection to the proposed rule is basically an objection to the area rate approach of regulation adopted by the Commission in Opinion No. 468. These objections were there fully discussed and rejected. Nor does the proposed rule conflict, as Phillips contends, with our statement in Opinion No. 468 concerning the filing of petitions for relief from the maximum rate set for any jurisdictional Permian Basin area sale. Neither the rule as proposed or as here being adopted enlarges upon or diminishes whatever rights a producer otherwise may have to file such a petition. We see no present need to further liberalize the pricing provisions permitted in producer contracts beyond the scope of the proposed rule. The need for such action has not been shown since the producer should be able adequately to protect itself through the utilization of permissible pricing provisions.

The Associated Gas Distributors (AGD) contend that the proposed liberalization of the permissible contract provisions is not appropriate at this stage of the area rate proceedings and argue that the proposed rule appears to be inconsistent with the two-price system of producer regulation adopted by the Commission in Opinion No. 468 and recommended by AGD in the Southern Louisiana proceedings. AGD apparently fears that under the rule as proposed current gas prices could escalate to any higher future area rate ceiling that might be adopted. Our modification of the proposed rule in response to the California PUC comments to provide for changes to the *applicable* area ceiling would permit a change in price only to the ceiling applicable to gas of the vintage and quality involved. It will, of course, remain the Commission's responsibility in each area rate order precisely to define the area rate or rates in question.

The Commission further finds:

The amendment of § 154.93 is necessary and appropriate for the purposes of carrying out the provisions of the Natural Gas Act.

The Commission, acting pursuant to the provisions of the Natural Gas Act, as amended, particularly sections 4, 7, and 16 thereof (52 Stat. 822, 825, 830, 56 Stat. 84, 15 U.S.C. 717c, 717f, 717o, 717s), *orders:*

(A) Part 154, Subchapter E, Chapter I, Title 18 of the Code of Federal Regulations is amended as follows:

Section 154.93 is amended by deleting the word "and" at the end of paragraph (b), and by adding a new paragraph (b-1) as follows:

§ 154.93 Rate schedule defined.

* * * the permissible provisions for a change in rate are:

* * * * * * *

(b-1) Provisions that permit a change in price to the applicable just and reasonable area ceiling rate which has been, or which may be, prescribed by the Commission for the quality of the gas involved; and

(B) The amendments prescribed herein will be effective December 31, 1966.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

OPINION NO. 507

COMMONWEALTH EDISON COMPANY AND CENTRAL ILLINOIS ELECTRIC AND GAS COMPANY, DOCKET NO. E-7275

OPINION AND ORDER AUTHORIZING MERGER

(Issued December 2, 1966)*

Syllabus

1. Proposed merger, while not necessarily only course of action open to Central Illinois, is consistent with the public interest. P. 930.
2. Touchstone of successful operation in today's electric power industry is coordination of operating facilities to achieve full economies of scale made possible by advancing technology. P. 930.
3. In evaluating a merger application, a "showing that positive benefit to the public will result", is not required. P. 931.
4. Ultimate determination in passing upon a merger application is not whether in Commission's judgment merger is only technique by which over-all objectives of the Act could be accomplished, rather, it is enough if upon analysis Commission concludes that, in applicants' particular circumstances, merger is consistent with the public interest. P. 931.
5. Question of whether particular merger is consistent with public interest necessarily starts with its consistency with substantive standards of the Federal Power Act and particularly primary objective spelled out in Section 202(a) of promoting and encouraging maximum regional coordination and interconnection. P. 931.
6. It is not sufficient to consult Federal Power Act alone in evaluating scope of public interest standard of merger; it is necessary to examine entire Public Utility Holding Company Act of 1935. P. 931.
7. It is appropriate to inquire into extent to which operation of merged facility will be consistent with "integrated public utility" concept of Section 2(a) (29) (A) of Holding Company Act of 1935. P. 932.
8. Parallelism between the Securities and Exchange Commission's authority under Title I of Public Utility Act of 1935 and Commission's responsibilities under Title II is apparent here. P. 932.
9. Since instant case provides cross section of issues ordinarily arising in merger cases, Commission discusses its statutory responsibilities and the criteria applied in order to provide guidance to utilities contemplating merger—decision is not intended, and does not, establish Commission policy in favor or against mergers as such. P. 932.
10. Record indicates price is fair and reasonable to companies, their respective stockholders and customers. P. 937.

---

*Rehearing and stay denied by order issued January 30, 1967, 37 FPC 257. Affirmed, *Utility Users League, et al.* v. *F.P.C.*, 394 F. 2d 16 (CA7–1968); cert. denied, 393 U.S. 953 (1968).

11. Accounting fairly presents results of merger transaction and accords with generally accepted accounting principles and requirements of Uniform System of Accounts. P. 937.

12. Commission discusses cost savings and other benefits inherent in proposed merger. Pp. 937–940.

13. In passing on merger, it is Commission's responsibility to consider effect thereof on state regulation of retail rate design. P. 938.

14. Commonwealth's acquisition of Central Illinois will result in no immediate rate increases; no adverse economic consequences will flow from approval of merger. P. 940.

15. Commission *finds* merger was not coerced by acquiring utility. P. 940.

16. Commission spells out questions to be considered concerning "anti-competitive effect" of a merger in context of regulated public utilities. P. 941.

17. Commonwealth's merger with much smaller neighbor will not add appreciably to its command of economic power or relative size with respect to other utilities and will not choke off potential areas of competition between Central Illinois and Commonwealth. P. 941.

18. There is no showing that merger will have any adverse effect on any competition which may exist between electric power and other energy sources. P. 941.

19. Record is clear that future Federal and state commission regulatory effectiveness will not be impaired as result of merger. P. 942.

20. While requirements of Holding Company Act are not binding on Commission in determining public interest within meaning of Section 203 of the Power Act, basic congressional policies as to integrated operation imbedded in Holding Company Act are considerations in passing upon merger proposals of operating companies with burden on applicants to demonstrate why operation of noncontiguous electric territories or combined gas and electric facilities is consistent with the public interest. Pp. 942, 943.

21. Final determination of the propriety of Commonwealth's continued operation of gas properties and noncontiguous electric facilities need not be a condition precedent to approval of merger; Commission retains jurisdiction over question for final disposition at later date. P. 943.

22. Motion seeking dismissal of merger application, or in the alternative, requesting further hearing regarding public ownership of properties, is denied. Pp. 943, 944.

23. In a proceeding under Section 203 of the Federal Power Act, Commission *authorizes* merger of Central Illinois' facilities with those of Commonwealth, subject to future consideration of continued operation of acquired gas and isolated electric properties.

WHITE, *Chairman:*

Introduction

This proceeding, brought under Section 203 of the Federal Power Act,[1] involves a joint application filed March 2, 1966, by Commonwealth Edison Company (Commonwealth) and Central Illinois Electric and Gas Company (Central) for an order authorizing Commonwealth and Central to merge. Under the agreement and plan of merger, which is set out as Exhibit L to the application, and upon its becoming effective, Central will cease to exist as a separate entity and Commonwealth, as the surviving corporation, will succeed to all the rights, privileges, franchises, facilities, assets and liabilities of Central. The former Central system thereafter will be operated as an integral part of Commonwealth. The merger plan was approved by the Illinois Commerce Commission in an order issued April 27, 1966.

Following the filing on March 2, 1966, public notice of the application was issued on March 8, 1966, and a hearing thereon was set by order dated June 3, 1966. Pursuant to responses to the notice a further order was issued on July 6, 1966, granting intervention in the proceeding to the Utility Users League, *et al.*,[2] and the City of Rockford, Illinois; no other petitions to intervene were filed. Hearings commenced on July 11, 1966 and the record was closed on July 20, 1966, after five hearing days.[3] At the conclusion of the hearing, counsel for Commonwealth and Central moved that the intermediate decision procedure be waived and that the decision in the proceeding be rendered directly by the Commission. The motion was certified to us by Examiner William L. Ellis and was granted by order issued August 19, 1966,

---

[1] 49 Stat. 849, 16 U.S.C. 824(b).

[2] Utility Users League, Nickolas L. Barnes, Sidney J. Rosenberg and Harry R. Booth.

[3] Utility Users League was permitted to conduct cross-examination by the use of written interrogatories. It was not otherwise represented at the hearings. The City of Rockford made a statement of position urging our approval of the application but did not otherwise participate.

36 FPC 482. Briefs have been exchanged and the proceeding is now before us for decision on the merits.

The Commission has had occasion to consider a number of merger proposals in the past but, in recent years, public hearings have been required only infrequently. In setting this application for hearing[4] the Commission recognized the changing nature of the electric power industry and the important legal and policy considerations which mergers raise with respect to the administration of our regulatory responsibilities under the Federal Power Act. Accordingly, we announced our intention to require public hearings in the future on all applications requesting approval of the merger or consolidation of two or more Class A electric utilities. In order to have a complete record and the views of the parties on the legal and policy issues before us in this case, the parties were directed to address themselves to the general considerations raised by the proposed merger and the overall requirements of the Federal Power Act, in addition to providing the factual data with respect to their applications.

For reasons hereinafter set forth, we find that the proposed merger, while not necessarily the only course of action open to Central which would permit it to meet its ever-increasing demand for energy and to enjoy the economies of scale, is consistent with the public interest. An appropriate order authorizing the merger is attached to this opinion.

Legal and Policy Considerations

Section 203(a) of the Federal Power Act requires that a public utility, before merging or consolidating its facilities, must first secure the authorization of this Commission. We are to approve the request if we find that the planned consolidation or acquisition "will be consistent with the public interest."[5] Under subsection (b), we may apply such terms and conditions to our authorization as we find necessary or appropriate to secure the maintenance of adequate service and proper coordination.

The touchstone of successful operation in today's electric power industry is the coordination of operating facilities to achieve the full economies of scale made possible by advancing technology. There are several ways in which the advantages of coordination may be realized, merger being but one of them. Systems under common management usually operate as integrated entities and make better use of their available resources, including reserve capacity. At the same time, sophisticated techniques of intersystem coordination have been developed which enable two or more separate utilities to achieve a similar degree of operating efficiency. In the 15 year period from 1951 through 1965, 108 jurisdictional mergers involving class A electric companies were approved by the Commission, 40 of which involved the merger of two Class A companies.[6] In the same period, however, there have been approximately 190 coordination agreements of various types, not involving mergers, filed by electric companies subject to the jurisdiction of this Commission. By 1965, 97 percent of the industry's generating capacity was interconnected, and enjoying varying degrees of coordination.

The Commission is aware that the growing need for coordinated operation poses special problems for small systems and focused on the problem in our 1964 National Power Survey. In many cases, small systems are disadvantaged by their inability to share fully in the economies of scale associated with the large-scale generation and transmission of power. A major purpose of the Survey was to suggest alternatives to small and relatively inefficient generating plants, which would permit them to coordinate with large-scale, low-cost power sources on reasonable terms and with the assurance of adequate supply for future expansion. The alternatives to isolated operation, as suggested in the Survey, include the securing of bulk power from outside sources at reasonable prices and on fair terms, sharing reserves through strengthened interconnections, joint or staggered construction of larger and more efficient generating station facilities, and merger. The relative desirability of any one method depends largely upon the circumstances in each specific situation.

---

[4] Docket No. E-7275, Order Providing for Hearing, issued June 3, 1966, 35 FPC 877.

[5] See *Pacific Power & Light Co., et al.* v. *F.P.C.,* 111 F. 2d 1014 (CA9–1940). *Cf. Western Light & Telephone Co., Inc.,* Opinion No. 462, 33 FPC 1147 (1965).

[6] In 15 of the 40 cases, the mergers were of affiliated class A companies, both of which were owned by the same holding company. While technically mergers, these actions are more in the nature of intrasystem consolidations.

In evaluating a merger application, a "showing that positive benefit to the public will result," is not required. *Pacific Power & Light Co.* v. *F.P.C.*, 111 F. 2d 1014, 1017 (CA9–1940). At the same time, the Commission properly requires applicants to make a full disclosure of all material facts and "The burden is on them of showing affirmatively that the acquisition or merger is consistent with the public interest." (*Ibid.*) In other words, the ultimate determination in passing upon a merger application, is not whether in the Commission's judgment merger is the only technique by which the companies involved could accomplish the over-all objectives of the Act; rather, it is enough if, upon our analysis of all of the relevant factors, we conclude that the merger, in the particular circumstances of the applicants, is consistent with the public interest.

The question of whether a particular merger is consistent with the public interest necessarily starts with its consistency with the substantive standards of the Federal Power Act itself, and particularly the primary objective spelled out in Section 202(a) of the Act of promoting and encouraging the maximum regional coordination and interconnection "for the purpose of assuring an abundant supply of electric energy throughout the United States with the greatest possible economy and with regard to the proper utilization and conservation of natural resources."[7] It is, however, not sufficient to consult the Federal Power Act alone in evaluating the scope of the public interest standard; it is necessary to examine the entire Public Utility Act of 1935, Title II of which constitutes Parts II and III of the Federal Power Act.[8] The 1935 legislation was designed to bring the electric power industry under effective and continuing regulatory control. Pursuant to Title I (the Public Utility Holding Company Act[9]), the Securities and Exchange Commission supervises the reorganization, simplification, and continued operation of public utility holding company structures. Title II directs this Commission to exercise appropriate regulatory authority over the interstate operating companies including authority over mergers of such companies.

Soon after enactment of this legislation the Commission had occasion to consider the breadth of its review of mergers under Section 203. The Commission found that the section must be interpreted in light of the overall Public Utility Act of which it is a part.[10] More recently, in *Western Light & Telephone Company, Inc.*,[11] we held that the finding required under Section 203 "* * * must obviously be evaluated in the light of the broader context of which Section 203 is a part, namely the 1935 Wheeler-Rayburn legislation[12] directed to curing abuses of public utility operation which had developed during the twenties and early thirties." See also *Duke Power Co.*, Opinion No. 503, 36 FPC 399, issued August 9, 1966.

---

[7] Federal Power Act, Section 202(a).

[8] 49 Stat. 838, 16 U.S.C. 791a–825r.

[9] 49 Stat. 803, 15 U.S.C. 79, *et seq.*

[10] *Northern Pennsylvania Power Co. and Metropolitan Edison Co.*, 1 FPC 350, 354 (1936.)

[11] Opinion No. 462, 33 FPC 1147 (1965).

[12] Public Utility Act of 1935, 49 Stat. 803, *et seq.*

These cases and the legislative history of Section 203 plainly require that merger proposals, in addition to being scrutinized for their consistency with the substantive standards of the Federal Power Act, be subjected to analysis within the context of the broad purposes of the 1935 legislation. As part of this analysis, it is appropriate to inquire into the extent to which the operation of the merged facility will be consistent with the "integrated public utility" concept of Section 2(a)(29)(A) of the Public Utility Holding Company Act of 1935, as well as with the standards established under Sections 10 and 11 of that Act by which the SEC is to determine whether holding companies should be permitted to acquire new operating facilities or whether their organizational structure should be simplified.

The parallelism between the Securities and Exchange Commission's authority under Title I of the Public Utility Act of 1935 and our responsibilities under Title II is apparent in this case. While Commonwealth has elected to follow a course of merger with Central, the same end result could have been realized by Commonwealth's creation of a holding company to acquire the Central properties, in which case only the approval of the SEC would have been required. Commonwealth is at present technically a holding company, but has been exempted from the controls of the Public Utility Holding Company Act.

In the light of these considerations the Commission, in determining whether this particular merger is consistent with the public interest, has considered, among others, the following factors: the effect of the proposed action on the applicants' operating costs and rate levels, the contemplated accounting treatment, reasonableness of the purchase price, whether the acquiring utility has coerced the to be acquired utility into acceptance of the merger, the effect the proposed action may have on the existing competitive situation, and finally, whether the consolidation will impair effective regulation either by this Commission or the appropriate state regulatory authority.

Our decision is not intended to, and does not, establish a Commission policy in favor of or against merger as such. Each or all of the previously listed considerations may apply in other cases. It is possible that additional criteria will have applicability in regard to other merger proposals. Nevertheless, because this case provides a cross section of the issues which ordinarily arise in merger cases, to give insight into the scope of the Commission's inquiry we have discussed our statutory responsibilities and the criteria we have applied in order to provide guidance to utilities contemplating merger in the public interest.

The Applicants

Commonwealth, an Illinois corporation, is engaged exclusively in providing electric service in Illinois. Its service area, which is wholly contiguous and reasonably compact, includes approximately the northern third of the State (except for territory presently served by Central) and covers about 11,000 square miles. It provides electric service to the City of Chicago and surrounding suburbs. It has 2,272,700 customers in an area whose estimated population exceeds 7,100,000 persons. On December 31, 1965, Commonwealth's net utility plant totalled $1,788,082,518, and its operating revenues and net income reached $589,315,479 and $108,947,094, respectively. In the five years ending with 1965, its sales in kilowatt hours (kwh) to ultimate consumers increased at a compound annual rate of 7.3 percent. It currently operates 12 steam generating stations with a net capability of 7,764,000 kw. In 1966, its peak load reached

6,788,000 kilowatts (kw). Its average production cost was 2.73 mills per kwh for fuel and 3.60 mills per kwh for total production.

Central, too, is an Illinois corporation engaged in supplying electric energy within that state. Unlike Commonwealth, however, Central also operates a gas utility business, and provides minor amounts of water and steam heat services.[13] Its service area is comprised of five noncontiguous territories, the largest (about 500 square miles) being the Rockford division, which is located on the northern border of Illinois and is surrounded on three sides by Commonwealth's service area.[14] The Rockford division serves 78 percent of Central's electric customers and 81 percent of its gas customers. Central's other areas of service are its Lincoln division (consisting of three separate "islands" of service territory, the Lincoln, Homer, and Bement areas) and the Albion division, a small service area in the southeastern part of the state. The company serves 94,468 electric and 87,227 gas customers.

On December 31, 1965, Central's net utility plant totalled $91,681,655 ($56,422,122 electric, $33,761,799 gas), its operating revenues reached $40,533,403 ($22,951,829 from electric, $17,126,436 from gas), and it realized a net income of $6,542,284. For the five years ending in 1965, Central's kwh sales increased at a compound annual rate of 7.8 percent. It has a net generating capability of 239.5 megawatts (mw) from two generating stations (Fordham and Sabrooke in the Rockford Division) and it estimates a 1966 peak load of 210 mw. In 1965, its average fuel cost was 3.01 mills per kwh and its average total production cost reached 4.59 mills per kwh. Thus, comparing respective net plants, Central is 5 percent the size of Commonwealth; comparing only electric facilities, Central has little more than 3 percent of the plant enjoyed by Commonwealth.

Through its bulk power system, Commonwealth is interconnected with seven other power companies. It has two 345-kilovolt (kv) lines to American Electric Power Company; one 345-kv and one 138-kv line to Wisconsin Electric Power Company; four 138-kv lines to Illinois Power Company; three 138-kv lines to Northern Indiana Public Service Company; and one 138-kv line each running to Central Illinois Light Company, the Interstate Power Company, and to Central. Future interconnections are planned for three 345-kv lines to Central Illinois Public Service Company, Iowa-Illinois Gas and Electric Company, and Illinois Power Company. Three additional 138-kv lines are under construction—one each to Central Illinois Light Company, Northern Indiana Public Service Company, and Central. Furthermore, electric energy will soon be transmitted over a 345-kv line linking the Chicago area with downstate Illinois and the St. Louis, Missouri, area. Upon completion of the Quad-Cities project, owned jointly by Commonwealth and Iowa-Illinois Electric Company, power will be transmitted over a new 345-kv line passing through a large part of the Rockford territory now served by Central.[15] At least in recent years, Commonwealth has used most of these interconnections for reserve-sharing coordination with the other utilities.

Between 1958 and 1962, Commonwealth installed six units in the 300-mw class as well as a 200-mw nuclear unit. In 1963, it installed its first unit in the 500-mw class; in 1965 and 1966, two more steam units were added, each with a capability of 580 mw. The company now has under construction, or on order, two 600-mw units planned for 1967 and 1968, two 800-mw nuclear units planned for 1969 and 1970 and two other joint participation nuclear units of 800 mw each, which are to be completed in the 1970–71 period. Commonwealth submitted evidence to show a 27 percent savings in investment costs per kw from a 600-mw unit as against a 100-mw unit. This is consistent with the findings in the National Power Survey that great savings are associated with large generating units.

---

[13] Water service is supplied to 4,800 customers in the Lincoln division and steam heat service to about 400 customers, in Rockford, Illinois. Operating revenues from these services totalled $475,138 during 1965.

[14] A map showing Commonwealth's and Central's service areas is attached as Appendix A.

[15] Commonwealth participates in the Mid-America Interpool Network (MAIN), a planning group of eight large electric utilities in the Middlewestern area. It is also a member of the Interconnected Systems Group and North American Power Systems Interconnection Committee.

Central, on the other hand, has until recently operated on a virtually isolated basis, at least with respect to the Rockford division where all of its generation is located.[16] As mentioned earlier, it has one 138-kv tie to Commonwealth and another is under construction. Central in recent years has taken advantage of its interconnection (with Commonwealth's approval) to reduce the reserve capacity it would otherwise have to maintain. It has no interconnection or other direct relations with any other system, though, in recent years, it has tried unsuccessfully to associate its operations with those of some of the nearby Wisconsin, Illinois, Iowa and Indiana companies.

The Merger Proposal

Upon merger, the management of Commonwealth would be in complete control of the merged entity and the common shareholders of Central would become shareholders of Commonwealth. Each of the common shares of Central would automatically be converted into one share of new $1.425 convertible preferred stock of Commonwealth. Each share of Commonwealth preferred stock would be convertible, at the option of the shareholder, into six-tenths of one share of Commonwealth common stock. The convertible preferred stock would be redeemable at the option of Commonwealth after five years from the date of issue at a redemption price of $42.00 per share, plus accrued and unpaid dividends. Central will redeem its outstanding preferred stock.[17]

The transaction would be accounted for under the "pooling of interest" concept; the assets and liabilities reflected in the various accounts of the merged companies would be combined to form the accounts of the surviving corporation with no change in the basis of accountability. Commonwealth would record the $1.425 convertible preferred stock at its aggregate stated value ($31.80) per share and transfer from its premium on common stock the difference between such stated value and Central's common equity. Therefore, no plant acquisition adjustment would appear on the surviving corporation's books.

The merger plan has been adopted by the respective boards of directors of Commonwealth and Central and has been approved by the stockholders of Commonwealth and the Illinois Commerce Commission.

The merger proposal contemplates total integration of all of Central's facilities into those of Commonwealth. In the immediate future, 1967, 1968, and 1969, Commonwealth does not plan to alter the present operation of Central's facilities. Eventually, Central's customers would be wholly assimilated into the Commonwealth system. Although a reduction in the total number of employees is expected, Commonwealth says this will be accomplished by voluntary resignations in the same manner it has reduced its employment rolls from 15,849 at the end of 1954 to 12,251 at the end of 1965. Commonwealth's Board Chairman stated at the hearing that no involuntary separations of Central employees are anticipated.

---

[16] At its Rockford division, Central generates enough power to supply its Homer and Bement divisions. That power, pursuant to a multi-party interchange agreement, is sold first to Commonwealth and in turn to the Illinois Power Company which redelivers the power to Central at its Homer and Bement service areas. The energy requirements for Central's two remaining Central Illinois service areas are met entirely through purchase agreements, the Lincoln area being supplied power by the Central Illinois Light Company and the Albion area by the Central Illinois Public Service Company.

[17] Under Illinois law any shareholder dissenting from a proposed merger may (under certain circumstances) demand payment in cash from the surviving corporation for the fair value of his shares. Ill. Rev. Stat., 1965, Ch. 32, Sec. 157.70.

One major alteration in Central's present bulk power supply arrangement would be the interconnection of the Rockford service area with one of the planned 345 kv Commonwealth transmission lines which are to run from the company's Quad Cities nuclear project on the Mississippi River to the western edge of the Chicago metropolitan area. The interconnection will be completed by 1970. Two Commonwealth 138 kv transmission lines that now traverse Central's Rockford area also would become available to meet those needs. Additionally, two single circuit 345 kv lines will be constructed in 1967 and 1968 to carry power into what presently comprises Central's Lincoln service area. As an immediate effect of these alterations, Central's less efficient Fordham facilities will be retired by 1970, and annual generation at its Sabrooke station will be reduced substantially. It is estimated that Commonwealth will provide the Rockford area with 158 mw of capacity by 1970 (compared to the maximum of 20 mw now under contract) and 285 mw of capacity by 1975 through the new interconnections.[18]

According to the applicants, the single most important reason which necessitates the merger is Central's need for an increased power supply. Demand in its Rockford division has increased at a rate in excess of 6 percent per year in the 10 years between 1955 and 1965, and it is estimated that by 1971 it can expect a demand approximating 300,000 kw, representing almost a 50 percent increase over its 1965 peak demand. Prior to filing its merger application, Central considered three other courses of action: (1) continued self-generation by the installation of additional generating capacity; (2) the acquisition of its additional power requirements from other utilities, primarily Commonwealth; and (3) participation in a large generating unit through some form of condominium ownership with other utilities. Central's witnesses testified that it does not consider that any of these alternatives would suit its needs as satisfactorily as would the proposed merger.

Under the first plan Central would have added new generating units of 100 and 125 mw, respectively, in 1968 and 1972. The costs of the units were estimated at $13,300,000 and $16,750,000. With these additions, together with the purchase of relatively small amounts of energy from Commonwealth, it was estimated that Central would be able to meet its predicted loads through 1975. The record makes clear, however, that by installing the additional units contemplated, Central would forego much of the economies of scale available under present technology. Those savings are not insignificant; the record discloses that the additional economies of scale which would not be made available under the self-generation alternative could be expected to result in cost reductions in excess of $13 million over a ten-year period, some or all of which could be available for the reduction in electric charges to the ultimate consumers on the present Central system. Further, under the self-generation plan, a new plant would have to be located in or near the City of Rockford, against the wishes of the residents of that city. The City favors the merger since it would obviate the need for this plant.

---

[18] These figures do not take into account the residual peak generating capacity from Sabrooke of 146 mw. Thus, the total capacity available in 1975 will be 431 mw; the record indicates that 430 mw will be needed at that time, including a 12 percent reserve.

Under the second alternative Central would obtain the bulk of its future requirements from Commonwealth under an arrangement which, as a condition, would require that Central only maintain reserves equal to 12 percent of its estimated peak load. This is comparable to the reserve capacity maintained by Commonwealth in its own system. The price offered by Commonwealth is $1.75 per kw per month for capacity and Commonwealth's out-of-pocket cost plus 10 percent for energy. The same bulk power facilities that would become available as a result of the merger would be present in this situation. Without here attempting to pass on the exact rate to which Commonwealth would be entitled after a full rate proceeding, it appears on this record that the proposed rate is a bona fide offer which reasonably reflects Commonwealth's present average generation and transmission costs. But because the contract rate is fixed on the basis of present average costs, Central and its customers would not secure the full benefits of the lower costs which would be associated with the more efficient plants now under construction by Commonwealth and those planned for the future. Moreover, it does not appear that it would be appropriate to require Commonwealth to price such a major sale entirely on an incremental basis, which alone could give Central the full benefits of scale. From Central's point of view, this plan is not as attractive as the self-generation alternative, since its estimated net income with the self-generation would be more than $3,000,000 greater over a ten-year period than it would be if it accepted the Commonwealth offer.

The last alternative course of action considered by the applicants was the possibility that Central would join with other neighboring utilities in constructing a 500-mw mine-mouth generating facility in the central Illinois coal fields. But the other utilities contacted decided that they could not or would not participate in a plant of the type proposed by Central. One reason brought out by staff for the failure of the project lies in the fact that most of the other companies who could have participated are already involved in intrastate and interstate pool agreements or have geographic motivations for coordinating in directions other than toward Central's bulk power system which lies isolated within Commonwealth's service territory. Whatever the validity of their reasons for declining to join with Central in the construction of a project of this type, their refusal effectively eliminated this alternative.

While the record does not disclose any discussions between Central and Commonwealth looking towards joint construction of larger units, the relatively small needs of Central indicate the difficulties which would be associated with any such effort. Nevertheless, we believe that neighboring systems should be encouraged to explore the possibilities and opportunities inherent in this method of coordinating generation requirements along with the various other methods of coordination that are available. Significantly, Commonwealth has entered into a joint ownership arrangement with Iowa-Illinois Gas and Electric Company, which adjoins its territory to the west, and is only about twice as large as Central. In that instance, however, Iowa-Illinois was able to rely upon its membership in the Iowa pool to contract for a 400,000 kw commitment in 1966, more than four times Central's needs as of that date.

Analysis of the Merger

As noted earlier, there are a number of factors which this Commission must consider in analyzing whether a merger proposal is consistent with the public interest. These considerations are designed to determine the effect which the merger would have on the two utilities involved, their consumers, and on the maintenance of an adequate, reliable and economical power supply. Accordingly, we now turn to an evaluation of the Central-Commonwealth proposal.

Reasonableness of Purchase Price

As part of our evaluation of Section 203 acquisitions, we have jurisdiction to consider the reasonableness of the purchase price.[19] Based on the prices of the respective stocks on January 20, 1966, the date the announcement of the plan to merge was made, Commonwealth would have been paying approximately $24 million more than the then market value for the acquisition.[20] Obviously, Central, which is a prosperous going concern, would not agree to a merger which did not give its stockholders any immediate benefits. The evidence shows, however, that the purchase price was agreed upon after hard bargaining by both parties and that Commonwealth's offer was based on many factors, including market value, earnings, book value, sales and growth prospects considering the economies expected to be achieved by the merger. The record indicates that the price is fair and reasonable to the companies, their respective stockholders, and their customers who under applicable law, will not have to shoulder any burden resulting from the payment of a price in excess of the depreciated original cost of the Central properties merged into Commonwealth.

Accounting Treatment

The proposed merger involves an exchange of stock; no cash payment will be made. The capitalization of the surviving corporation, upon effectiveness of the merger, will not exceed the aggregate capitalization of Commonwealth and Central. There will be no acquisition adjustment and the assets will continue to be stated at original cost or less. Whatever premium is paid by Commonwealth over the book and market value of Central will be charged to the stock and capital surplus accounts and will not affect the ultimate consumers of either system.

We believe that the accounting fairly presents the results of the merger transaction and will accord both with generally accepted accounting principles and the requirements of our Uniform System of Accounts prescribed for public utilities subject to the Federal Power Act.

Economic Effect

We would be hard pressed to sanction a merger that would necessarily have the effect of increasing the operating costs that might be expected otherwise to result from independent operation or have an adverse effect on rate levels. But approval of the merger before us, far from having any such adverse economic consequences, should provide a basis for cost savings and eventual rate reductions.

The evidence shows that the merger will result in substantial bulk power economies as contrasted with the continuation of separate corporate entities. Because of its size, Commonwealth is able to take full advantage of the economies of scale. It has been able to work out large volume deliveries of coal in unit trains. A mine-mouth generating station will shortly begin operation, connected with the company's system by two EHV lines. Important economies of scale will be realized as a result of the construction of its four new 800-mw nuclear units. The primary benefits to be obtained through the merger, however, lie in its effect on the cost and quality of the bulk power supply available in the future to consumers in Central's service areas. For 1965 Central's production costs were 4.59 mills per kwh, even with a large supply of low-cost gas being used as boiler fuel. For the Commonwealth system as a whole, the corresponding figure was 3.60 mills per kwh, only 78 percent of

---

[19] See *Southern California Edison Company and Desert Electric Cooperative, Inc.*, Opinion No. 457, 33 FPC 687, 688.

[20] A comparable calculation using present market prices shows almost equal valuation under the 6:10 conversion rate set out in the merger agreement.

Central's production costs. Commonwealth's total costs, including carrying charges, for energy delivered to Commonwealth's system from its new, large generating plants now under construction has been estimated at 4 to 4.5 mills per kwh, less than Central's average production costs excluding carrying costs.

Other benefits anticipated from the merger include increased utilization of the two 138 kv transmission lines of Commonwealth which presently cross Central's Rockford service area as well as the 345 kv Quad-Cities line, improved service in the boundary areas, centralized planning of the transmission and distribution systems, the availability to Central's customers of Commonwealth's active research and development program and its industrial development department. In addition to the $13 million in generating and transmission costs which the merger will make possible over a ten-year period, substantial annual savings may be expected. These include $1 million from a reduction in the number of employees to carry on the merged operations, $300,000 from the elimination of duplicative administrative and general functions, $100,000 in interest savings, and an amount approximating $1 million in before-tax economies largely through replacing Central's preferred stock with debt capitalization.

Very much a part of our inquiry into the question of economic effect must be whether the elimination of the independence of the acquired company and resulting combination of the facilities of the now separate entities would in itself be likely to effect unnecessary rate increases or inhibit possible rate reductions. *Western Massachusetts Electric Co.*, 3 FPC 345; *Northwestern Electric Co.*, 5 FPC 312.

Aside from its limited interchanges with Commonwealth, Central has no wholesale sales, and the effect of the merger on Commonwealth's wholesale rates would be *de minimis.* The rate question insofar as the merger is concerned thus is essentially a matter of retail rates which are of course subject to regulation by the Illinois Commission which has already approved the merger. The continuing responsibility for insuring that the cost benefits of the merger will at the retail level properly be apportioned between stockholders and consumers and between various categories of consumers likewise is a matter for the state commission. Nevertheless, we believe it is our responsibility under the Federal Power Act in determining whether a merger is consistent with the public interest to consider what effect the fact of merger would have on rate levels or on state regulation of retail rate design.

For the immediate post-merger period, Commonwealth, in accordance with the order of the Illinois Commission in approving the merger, will maintain Central's existing rate structure, subject to the application of Commonwealth's fuel adjustment clause which will bring about a $270,000 annual reduction in charges to Central's customers. Moreover, these customers as a group will not be adversely affected should Commonwealth with the approval of the Illinois Commission subsequently substitute its own out-of-Chicago retail rate structure for that of Central. On the contrary, the record shows that the application of Commonwealth's rates to Central's business would yield four-tenths of one percent less revenues than Central's existing rates. While the aggregate revenues would therefore be approximately the same, there are, as might be expected, considerable variations from rate to rate. In some cases, Central's rates are lower; in others its charges are higher.

There are two factors favoring Central in a rate comparison, and two counterbalancing factors favoring Commonwealth. First, Central's Rockford urban residential rate has a service charge of 75 cents and Commonwealth's is $1.50. While Commonwealth's terminal block charge is lower, it takes a relatively large consumption to overcome the difference in service charge. Second, the demand rate applicable to Rockford's commercial customers contains a low terminal block charge, beginning at relatively low consumptions, as compared with Commonwealth's rate which is a standard two-part rate with demand and energy charges graduated as customer usage increases.

The factors favorable to Commonwealth are first, that Central's residential customers outside the Rockford division urban territory pay substantially higher charges than would be applicable under Commonwealth rates, and second, Central's industrial customers with demands in excess of 300 kw pay substantially higher rates than would be applicable under Commonwealth's rate schedule. As the industries in Central's service area continue to grow, the difference between Commonwealth's and Central's billings under existing rates for large customers would be even more pronounced in favor of Commonwealth's rates.

In general, and disregarding the relatively minor block differentials, the rate charges in the Rockford and Lincoln divisions would be approximately equal whether billed under Central's existing rate schedules, or under Commonwealth's presently applicable rate schedules. Central's Albion division has fewer than 2,000 residential customers, and billings under the applicable residential rates are in almost all cases higher than they would be under Commonwealth's rates. Albion's industrial and commercial revenues, in the aggregate, are only a little over $300,000 and are slightly higher than they would be under Commonwealth's rates. Of course, because of differences in rate structures not all customers are equally affected. Where generally lower charges have been indicated under Commonwealth's rates, particular customers may nevertheless pay more than under the Central rate schedule while the reverse may be true for rates which, in total, show an advantage for Central.

The long-range rate picture under merger is more complex, but here, too, there is nothing to indicate that Central's customers will fare worse than if it continued independent operations. Commonwealth has made rate reductions totaling $31,000,000 since 1962, and expects further fuel clause reductions totaling an additional $9,000,000 in the near future. Excluding fuel clause adjustments Commonwealth has reduced its rates by about 4 percent of gross revenues. Central also has made significant rate reductions but has not been reducing rates at the same pace as Commonwealth. It has reduced its rates an aggregate of about $854.000, or by about 2 percent of gross revenues exclusive of fuel clause reductions. And as we indicated *supra*, the cost savings available for rate reductions under merger will be greater than those available to an independent Central.

Central, operating almost entirely on its own and without access to the economies of scale, has still been able to maintain both a favorable profit picture and rates comparable to those of Commonwealth. This strongly suggests that the Rockford area possesses substantial cost advantages with respect to its distribution activities over Commonwealth, which must shoulder the special distribution burdens of operation in the City of Chicago, and at the same time serves many areas outside Chicago with much lower densities of use than in the Rockford area. To the extent this may be true, a retail rate design such as that apparently contemplated by Commonwealth, wherein it would apply its present rate schedules to Central's customers, makes the Rockford area shoulder some of the higher distribution costs of other Commonwealth service areas. Over a period of time this could dilute the advantages of the merger to Central's customers. But we need not attempt to evaluate here the extent of any such dilution, or whether it could be sufficient to outweigh the rate advantages of merger insofar as bulk power considerations are involved, for the entire rate design question is a matter of retail rate regulation coming within the competence of the Illinois Commission. Thus, to the extent that the public interest requires special consideration be given to any Rockford distribution advantages, the Illinois Commission can take such action as may be necessary to protect such factors.

In summary, we are satisfied that Commonwealth's acquisition of Central will result in no immediate rate increases (and in fact slight decreases), and over a course of years can make available to Central's customers significantly greater reductions than if Central were to remain independent. We do not believe, therefore, that any adverse economic consequences will flow from our approval of the proposed merger.

Was the Merger Coerced by the Acquiring Utility

As the dominant utility in northern Illinois, Commonwealth obviously was in a position, absent recourse to this agency under Section 202(b) of the Act, to inhibit Central's efforts to secure meaningful interconnections which could enhance its independent status. If we were persuaded that Commonwealth had in fact deprived Central of the opportunity to retain its independence through joint participation with it in the planning and construction of new facilities or of the opportunity to purchase power at a reasonable rate, or unfairly refused to share reserves, we might well conclude that the merger had been forced upon Central by Commonwealth, contrary to the public interest.

The record, however, permits no such conclusion. There is no evidence that Commonwealth ever acted to inhibit Central in its efforts to establish closer relations with other nearby utilities. Moreover, while the direct relationships between Commonwealth and Central over the years, since the latter was established as an independent company whose principal electric division was almost completely surrounded by Commonwealth, hardly demonstrate a pattern of close coordination, there is nothing to indicate that Commonwealth ever refused to cooperate with Central on reasonable terms. On the contrary, the record indicates that until about five years ago Central had little if any interest in establishing more than nominal emergency interconnections with its larger neighbor.

Since about 1961 the relations between the two companies has been considerably closer, with Central permitted to utilize the interconnection to reduce its reserve requirements first to 20 percent and, more recently, to the 12 percent figure Commonwealth itself utilizes. Moreover, when Central approached Commonwealth in 1964 and 1965 to explore the possibility of a long-term firm purchase of bulk power Commonwealth's offer, though not meeting Central's needs, appears to have been a reasonable one under the circumstances. In short, there is nothing in the record to indicate that Commonwealth sought to bring about a situation in which merger was the only acceptable alternative for Central's management through its unwillingness to deal with Central as an independent entity on equitable terms.

The Effect on the Competitive Situation

As part of our analysis we must consider what effect, if any, our approval of a proposed acquisition will have on the existing and future competitive situation in the electric utility industry. Although the general body of antitrust law is relevant to our considerations, it offers only limited guidance on the question presented here. Here we are dealing in the first instance with companies which are not in direct competition with each other in the major arena of their activities, namely, their sales to ultimate consumers. Such sales by Commonwealth and Central are limited to the respective franchised service areas of the two companies. Secondly, we are dealing with two companies which are regulated by the Illinois Commerce Commission and, insofar as they are engaged in interstate sales at wholesale, by this Commission. The circumstances of regulation operates as a powerful constraint on the possible abuse of monopolistic power by public utilities.

In the context of regulated public utilities, the "anti-competitive effect" of a merger requires consideration of at least three different questions: (1) will the merger bring a significant added concentration of economic power? (2) will it eliminate any meaningful competition which may exist, either directly or by example, in attracting new industries to their respective service areas, in making wholesale sales, or in providing economical service? (3) will it have an adverse effect on competing energy sources? On the record in this proceeding we find that each of these inquiries must be answered in the negative.

There is a legitimate public interest in the degree of concentration of economic power in American industries and, notwithstanding the safeguard of regulation, even in the electric utility industry. In this case, however, it does not appear that Commonwealth's merger with its much smaller neighbor will add appreciably to its command of economic power, or relative size with respect to other electric utilities. In 1965 Commonwealth ranked third among 211 Classes A & B private utilities (including combination gas and electric companies) in the United States based on either operating revenues or gross utility plant. This ranking will not be changed by the merger which will increase Commonwealth's operating revenues by about 7 percent, its net income by about 6 percent, and its net utility plant by about 5 percent. As noted above, this relatively modest increase in Commonwealth's size will permit the total integration of its facilities with Central's and promises to bring tangible rate advantages to the customers of both companies.

We do not believe approval of the merger will choke off actual or potential areas of competition between Central and Commonwealth. In this regard the evidence shows, first, that the competing rate structures of each really are only slightly different, and second, even though Central's residential rates have been slightly lower than Commonwealth's, on an overall basis, if Central were to bill under Commonwealth's rates, approximately the same revenue would be yielded. In the industrial sphere Commonwealth's rates are generally lower. Competition, if it were to exist, would be confined to wholesale sales or possibly to inducing new industries to locate within their respective service areas through attractive industrial rates. But Central does not make any wholesale sales and, even were it to remain independent, would probably not be in a position to serve that market for the foreseeable future. Since Commonwealth's industrial rates, as regulated by the Illinois Commission, have been and undoubtedly could be maintained at levels significantly lower than those of Central, the diminution of competition in this sphere does not appear to be real. In fact, Rockford's ability to attract major industry should be enhanced by merger and this undoubtedly is at least a partial explanation of why the City of Rockford has not objected to our approval of the merger proposal.

There is no evidence in this proceeding that the merger will have any adverse effect on any competition which may exist between electric power and other energy sources, such as oil, coal and natural gas within the companies' respective service areas. As part of the merger, Commonwealth will acquire Central's gas properties and, for the immediate future, will continue Central's practice of using excess gas under its firm contract to provide boiler fuel for its steam generators. It is unnecessary at this time to consider whether from a long range point of view the continued operation of these gas properties or this use of natural gas for boiler fuel is in the public interest for, as discussed more fully below, we are conditioning our approval of the merger to retain jurisdiction over the question of Commonwealth's continued operation of these properties for final disposition at a later date.

Effectiveness of Regulation

Impairment of the effectiveness of regulation is one of the abuses to be guarded against in considering whether a merger is consistent with the public interest, just as it is a factor in simplification and acquisition proceedings under the Public Utility Holding Company Act.

In past years mergers and other forms of consolidations have taken place between public utilities operating across state boundaries. Additional instances may well occur in the future. In such circumstances it is conceivable that problems will be presented regarding the proper allocation of the merged power system's total costs among its various consumers and that a consolidation could have the effect of impairing the ability of the several state commissions to regulate effectively the resulting company. However, no such problem is presented in this case. Virtually all the aggregate revenues of the two systems result from rates charged to ultimate consumers in Illinois. The State of Illinois will regulate all the retail rates of the combined Commonwealth system and the retail rates have been fixed and approved by the Illinois Commerce Commission. The record is clear that future state commission regulation will not, as a result of this merger, be hampered by a write-up of the physical assets or by an increase in the total capitalization. Our regulation of Commonwealth's interstate operations will not be adversely affected. Accordingly, we do not believe regulatory effectiveness will be impaired by the merger.

Gas and Noncontiguous Electric Properties

Under the merger, Commonwealth will acquire four noncontiguous electric service areas; additionally, for the first time in over a decade, it will be supplying natural gas to some of its electric customers. Thus, we must determine whether the operation of the merged facilities will be consistent with the public interest insofar as the merged company would own (1) noncontiguous electric properties and (2) both electric and gas properties.

By Section 11(b)(1) of the Public Utility Holding Company Act the operations of a holding company system are to be limited "to a single integrated public-utility," provided, however, that the holding company may be permitted to control one or more additional "integrated public-utility systems" if it is determined that "[e]ach of such additional systems cannot be operated as an independent system without the loss of substantial economies which can be secured by the retention of control by such holding company of such system." Section 11(b)(1)(A). The SEC has held that noncontiguous service areas cannot be retained by an integrated electric utility system unless those areas "are either physically interconnected or are capable of physical interconnection so that, under normal conditions, they may be economically operated as a single interconnected and coordinated system and in other respects meet the definition of an integrated public utility system as applied to electric utility companies set forth in Section 2(a)(29)(A) of the Act." *New England Electric System, et al.*, 38 SEC 193, 199–200. Further, it "has long held that a single 'integrated public-utility system' cannot include both gas and electric properties." *S.E.C.* v. *New England Electric System, et al.*, 384 U.S. 178, n. 7. But that does not mean that a holding company may not control both an integrated electric utility system and an integrated gas utility system. It may if, as noted, the systems cannot be operated independently "without the loss of substantial economies."

The requirements of Part I of the Public Utility Holding Company Act are, of course, not binding upon this Commission in determining what is consistent with the public interest within the meaning of Section 203 of the Federal Power Act and the policies prescribed by the SEC for dealing with holding companies are not necessarily applicable to the same degree in dealing with operating companies. Thus, in *Western Light & Telephone Co., Inc.*, 33 FPC 1147, 1149, we approved a merger of noncontiguous electric companies under circumstances which indicated that the mergers would expedite interconnections beneficial to the public interest. As we made clear in *Western*, however, we believe that the basic congressional policies as to integrated operation embedded in the Holding Company Act are applicable considerations in passing upon proposals for merger of operating companies, and that the burden is upon the applicants to demonstrate why operation of noncontiguous electric territories or combined gas and electric facilities is consistent with the public interest.

It would appear, therefore, that unless Commonwealth is able to demonstrate that the noncontiguous electric service areas to be acquired are capable of interconnection with its system and that its joint operation of gas and electric properties will be beneficial to its customers, divestiture of such properties should be ordered. There is no such showing in this record; Commonwealth has frankly indicated that its plans for operating Central's electric properties outside of the Rockford division are at best tentative [21] and that it has not formulated any plans for Central's gas properties. However, we do not believe that the final determination of the propriety of Commonwealth's continued operation of these facilities need be a condition precedent to the approval of the merger. Both the noncontiguous electrical territories of Central and its ownership of both gas and electric facilities are long standing and would represent but a small part of Commonwealth's business. It is clear that the merger would not be feasible if it did not initially include the transfer of those facilities. Accordingly, we shall retain jurisdiction over the question of Commonwealth's continued operation of the noncontiguous electric service facilities and gas distribution properties for final disposition at a later date. Consistent with the above considerations, Commonwealth will be required to show within three years why it should not be required to divest itself of the control and operation of these properties. Annual reports will be required on the status of its studies.

Utility Users League Motion

On September 23, 1966, the Utility Users League filed a motion seeking dismissal of the merger application or, in the alternative, requesting that a further hearing be set for the taking of additional testimony. Our review of the motion reveals that substantially the same arguments were made against the merger in the brief and reply brief filed earlier by the Utility Users League. We find no basis in the present motion for withholding our authorization of the merger, nor do we find any need for a further hearing to adduce the evidence referred to in the motion. The Examiner afforded the League an adequate opportunity during the hearing to develop all the facts it considered material to our determination of the merger's consistency with the public interest. Insofar as the Utility Users League now seeks to develop evidence in a reopened proceeding on "the possible benefits to the public in the event of public operation and acquisition of Central's properties," there has not even been a suggestion that any public authority has this desire. The motion will be denied.

---

[21] The Lincoln area, by far the largest of the noncontiguous electric service areas to be acquired, will soon be bisected by a new 345 kv line currently being constructed by Commonwealth. We agree with staff that, on this basis, the Lincoln area may be "capable of physical interconnection" so that Commonwealth's provision of electric service to the area will be proper under the integrated public utility standard. On the other hand, there is no evidence to show that the remaining three noncontiguous areas (Homer, Bement, and Albion) to be acquired from Central can or ever will be interconnected with Commonwealth's system.

CONCLUSION

The ever-increasing technological breakthroughs in the generation and long distance transmission of electric energy will carry with them marked changes in the patterns of operation and structure of the electric utility industry in this country. From both a cost and a reliability standpoint isolated or virtually independent operation of electric facilities is becoming a luxury which no company can afford if its customers are to secure electric service anywhere nearly equivalent to that provided by systems which, through one form or another of coordination, can better avail themselves of the economies provided by the new technology.

While the emerging patterns will to a large extent depend upon the initiative of the industry, the Federal Power Commission has a threefold role to play. First of all, pursuant to the mandate of Section 202(a) of the Act, it has the obligation to promote coordination in the public interest, an effort best exemplified by the National Power Survey, and the continuing follow-up programs stemming from the Survey. Second, it has been given in Sections 202(b), 205, 206, and 207 of the Act the responsibility of insuring that coordination among independent utilities is undertaken upon just and reasonable and nondiscriminatory terms, fair to both the large and small elements of the industry. Finally, it is empowered to pass upon proposed mergers to insure that they are consistent with the public interest.

In the present case, it is far from clear whether Central, if it had recognized the limitations of its essentially isolated mode of operation earlier or even at a later date had been more desirous of maintaining its independence, could not have achieved most if not all of the benefits of access to the savings of scale it cannot secure by itself. Certainly, it is not surprising that when it approached other companies who had long been engaged in coordinated planning among themselves or with other groups, it found that its immediate needs did not mesh into their plans.

For the reasons stated, we find that the merger proposed in this proceeding, subject to future consideration of the questions of Commonwealth's continued operation of Central's gas and isolated electrical properties, is consistent with the public interest. Coming when it does, the merger will avoid Central's making heavy and long-standing commitments to build what would, in these circumstances, be uneconomic generating facilities.

The Commission further finds:

(1) Commonwealth Edison Company is a corporation organized and existing under the laws of the State of Illinois with its principal office at Chicago, Illinois.

(2) Central Illinois Electric and Gas Company is a corporation organized and existing under the laws of the State of Illinois, with its principal office at Rockford, Illinois.

(3) Commonwealth and Central each own and operate facilities for the transmission and sale at wholesale of electric energy which is transmitted in interstate commerce and consumed outside of the state in which it was generated, all of which facilities are in addition to and do not include facilities

used for the generation of electric energy, facilities used in local distribution or only for the transmission of electric energy in intrastate commerce or facilities for the transmission of electric energy consumed wholly by the transmitter. Commonwealth and Central each is, therefore, a public utility within the meaning of that term as used in Section 203 of the Federal Power Act.

(4) By the proposed transaction, as described above, Commonwealth will acquire and merge or consolidate with its facilities, subject to the jurisdiction of the Federal Power Commission, all of the facilities of Central, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act, and Central will dispose of all of its facilities to Commonwealth, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(5) For the reasons set forth herein, the proposed acquisition of Central's facilities by Commonwealth, as described above, upon the terms and conditions specified in their application and as further expressed in their evidentiary presentation, and subject to the provisions of this order, will be consistent with the public interest, as expressed in Section 203 of the Act.

The Commission orders:

(A) The proposed acquisition and merger or consolidation of the facilities of Central by Commonwealth, and the proposed disposition of all of its facilities by Central to Commonwealth, referred to above and as described in the application, is hereby authorized and approved upon the terms and conditions set forth in the application, subject to the provisions of this order.

(B) Commonwealth shall record the transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts prescribed for Public Utilities and Licensees.

(C) Jurisdiction is retained over the question of Commonwealth's continued operation of Central's downstate divisions; namely, Lincoln and associated Homer and Bement areas, and the Albion division, and over the question of Commonwealth's continued operation of the gas distribution facilities of Central, for final determination by subsequent order. Not later than December 1, 1969, Commonwealth shall show why it should continue to own and operate such properties. The showing shall include a comprehensive report of studies and plans for the integration, disposition or realignment with other power companies of the noncontiguous properties referred to above, and of the gas properties. Interim reports on the status of its studies shall be filed on or before December 1, 1967 and December 1, 1968. Copies of all reports herein provided for shall be submitted to the Illinois Commerce Commission and shall be served on the other parties to this proceeding. Public notice will be given by the Commission regarding its intended disposition of these reserved issues.

(D) This authorization shall expire unless the transaction herein authorized is consummated within 90 days from the date of issuance of this order.

(E) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of costs, and specifically the matter of accounting for the proposed tax equalization payments to governmental bodies in Winnebago county, or any matter now pending or which may come before this Commission or any other regulatory body.

(F) The motion filed by the Utility Users League, *et al.*, on September 23, 1966, is denied.

COLUMBIA GULF TRANSMISSION COMPANY, UNITED FUEL GAS COMPANY AND KENTUCKY GAS TRANSMISSION CORPORATION, DOCKET NO. CP67-97; DELTA NATURAL GAS COMPANY, INC. AND KENTUCKY GAS TRANSMISSION CORPORATION, DOCKET NO. CP66-376

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND DISMISSING APPLICATION

(Issued December 5, 1966)

On October 14, 1966, Columbia Gulf Transmission Company (Columbia Gulf), United Fuel Gas Company (United Fuel), and Kentucky Gas Transmission Corporation (Kentucky Gas), collectively referred to as Applicants, filed in Docket No. CP67-97 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities for the transportation and sale for resale of natural gas in interstate commerce, all as more fully set forth in the application.

Specifically, Applicants request the following:

(1) Authorization for Columbia Gulf to construct and operate a main line tap on each of its two transmission lines and a measuring and regulating station, together with all appurtenant facilities, at a point on its main line transmission system near Kingston, Madison County, Kentucky, and to deliver volumes of gas through said facilities directly to Kentucky Gas for the account of United Fuel;

(2) Authorization for United Fuel to establish a new point of delivery to Kentucky Gas;

(3) Authorization for Kentucky Gas to deliver to Delta Natural Gas Company, Inc. (Delta) volumes of natural gas at such new delivery point near Kingston, Madison County, Kentucky, for resale by Delta in the unincorporated communities of Kingston and Terrill, Kentucky, and environs.

These facilities will be constructed, operated and owned by Columbia Gulf.

The total estimated cost of the proposed facilities is $36,595, which cost will be financed from cash on hand.

Columbia Gulf's operations are confined solely to the transportation of gas purchased in the supply areas and owned by United Fuel. Kentucky Gas is the Columbia company selling gas for resale in the Kentucky area and purchases part of its gas supply from United Fuel.

The total estimated annual and peak day volumes of natural gas required by the communities of Kingston and Terrill in the third year of proposed operations are 30,412 and 354 Mcf, respectively.

These volumes of gas will be delivered by Kentucky Gas to Delta under the same Rate Schedule SGS-1 under which Delta presently purchases gas from Kentucky Gas for distribution in other communities. The gas will be used for residential and commercial purposes. Delta has received the approval of the Public Service Commission of Kentucky for the service to the two communities.

In order to implement the instant proposal, Delta will construct a lateral transmission line and distribution system comprising a total of 6.55 miles of 2 and 4-inch pipeline, at an estimated cost of $85,000.

On May 17, 1966, Delta filed in Docket No. CP66-376 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Kentucky Gas to establish physical connection of its facilities with the facilities of Columbia Gulf for the purpose of obtaining a gas supply from United Fuel and establishing a delivery point on or near this point of supply for the purpose of selling and delivering to Delta volumes of natural gas for resale and distribution in the communities of Kingston and Terrill.

By letter dated October 6, 1966, Delta requested Kentucky Gas to establish an additional point of delivery to Delta near Kingston and to furnish Delta with the volumes of gas necessary for Delta to initiate the distribution and retail sale of natural gas in the communities of Kingston and Terrill, Kentucky, and environs.

Pursuant to Delta's request, the instant application was filed and is intended to supplant Delta's application filed in Docket No. CP66-376. The issuance of certificate authorization in the instant proceeding will obviate further consideration by the Commission of the order requested by Delta in its application filed in Docket No. CP66-376.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on December 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Columbia Gulf Transmission Company, a Delaware corporation having its principal place of business in New York, New York, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 5, 1958, in Docket No. G-15529 (20 FPC 681).

(2) Applicant, United Fuel Gas Company, a West Virginia corporation having its principal place of business in Charleston, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 1, 1944, in Docket No. G-341 (4 FPC 534).

(3) Applicant, Kentucky Gas Transmission Corporation, a Delaware corporation having its principal place of business in Charleston, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued on October 6, 1958, in Docket No. G-15288 (20 FPC 463).

(4) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) Applicants are able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) The construction and operation of the proposed facilities and the transportation and sale of natural gas by Applicants are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(7) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of said Regulations.

(8) The certificate hereinafter issued should be conditioned upon Applicants filing with the Commission appropriate service agreements in accordance with the Commission's Regulations under the Natural Gas Act.

(9) The application filed by Delta Natural Gas Company Inc., in Docket No. CP66-376 should be dismissed as moot.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicants authorizing the construction and operation of the facilities and the transportation and sale of natural gas as hereinbefore described and as more fully set forth in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and transportation and sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within one year from the date of this order.

(D) The certificate issued by paragraph (A) above is conditioned upon Applicant's filing with the Commission appropriate service agreements in accordance with the Commission's Regulations under the Natural Gas Act.

(E) The application filed by Delta Natural Gas Company Inc., in Docket No. CP66-376 is dismissed as moot.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

GEORGIA POWER COMPANY, DOCKET NO. E-7288

SUPPLEMENTAL ORDER PROVIDING FOR MAINTENANCE OF TEMPORARY INTERCONNECTION AND SERVICE

(Issued December 5, 1966)

On April 22, 1966, 35 FPC 629, we issued an order in this docket directing an immediate temporary emergency interconnection and service by Georgia Power Company (Georgia Power) to Crisp County Power Commission (Crisp County). By telegram of April 29, 1966, Georgia Power notified the Commission that service had been initiated. Today we are issuing a tentative decision in Docket No. E-7120, which would provide for a long-term interconnection between these parties.

Information in the Commission's files indicates that the capacity of the temporary interconnection, while adequate at present to serve Crisp County's emergency needs, may not be adequate to supply Crisp County with sufficient power to avoid interruptions in service to its customers during the period when the parties and the Commission are giving further consideration to the Commission's tentative decision in Docket No. E-7120. It is therefore necessary in the public interest and for the purposes of Section 202(c) of the Federal Power Act that Georgia Power and Crisp County be directed to take such steps as are required to provide interconnection facilities of a minimum capacity of 6000 kw, in order to avoid service interruptions in the event of outages of generating or transmission facilities.

The Commission orders:

(A) Georgia Power and Crisp County shall make provision for an increase in the capacity of their temporary interconnection to a minimum of 6000 kw either by reactivating their former 44 kw interconnection at Cordele, Georgia, by increasing the capacity of the existing 44 kv connection with Georgia Power's Flint River circuit or by such other means as they may deem to be appropriate.

(B) Georgia Power and Crisp County shall, within 30 days from the date of this order, inform the Commission of their plans for increasing the capacity of their interconnection facilities.

(C) When the capacity of the interconnection facilities has been increased as directed in this order, Georgia Power and Crisp County shall inform the Commission of the amount of capacity available for emergency use, the manner in which it has been provided, and any terms and conditions for the temporary emergency service agreed upon by Georgia Power and Crisp County. If no agreement is reached, the temporary interconnection and service shall be subject to such terms and conditions as may be fixed by supplemental order of the Commission pursuant to Section 202(c) of the Federal Power Act.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ILLINOIS POWER COMPANY AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP67-86

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued December 5, 1966)

On September 29, 1966, Illinois Power Company (Applicant), filed in Docket No. CP67-86 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Michigan Wisconsin Pipe Line Company (Respondent) to establish physical connection of its transmission facilities with Applicant's proposed new distribution system and to sell and deliver to Applicant volumes of natural gas for resale and distribution, all as more fully set forth in the application.

Applicant requests that Respondent make physical connection in Mercer County, Illinois, of its transmission facilities with the distribution system proposed to be built by Applicant to serve the unincorporated communities of Gilchrist, Wanlock, and Shale City and environs, Mercer County, Illinois. Applicant also requests that Respondent construct a sales station to serve this connection, and to sell and deliver volumes of natural gas for resale in the above mentioned areas.

The estimated third year annual peak day requirements for this service is 6,250 Mcf and 61.0 Mcf, respectively.

Applicant has obtained all necessary franchises to supply natural gas in said communities and on December 22, 1965, the Illinois Commerce Commission in its Docket No. 51865 granted Applicant a certificate to construct and operate the necessary facilities and to sell gas therein.

On November 7, 1966, Michigan Wisconsin filed an answer to the application and stated therein it had no objection to the entry of an order requiring it to establish connection of its facilities and provide the requested service.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on October 13, 1966, (31 F.R. 13255). No protest, petition to intervene or request for hearing has been filed in this proceeding.

The Commission finds:

(1) Michigan Wisconsin Pipe Line Company, a Delaware corporation having its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order dated November 30, 1946, in Docket No. G–699.

(2) Applicant, Illinois Power Company, an Illinois corporation having its principal place of business in Monticello, Illinois, is a corporation legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Michigan Wisconsin to sell and deliver to Applicant, under a service agreement to be executed by Applicant with Michigan Wisconsin in accordance with the Commission's Regulations, up to 61 Mcf for Gilchrist, Wanlock and Shale City, and environs in Mercer County, Illinois on a maximum day for distribution and resale as hereinbefore described.

(4) Applicant should be prepared to receive natural gas from Michigan Wisconsin for distribution in the named communities, and their environs, within one year from the date of the issuance of this order.

The Commission orders:

(A) Michigan Wisconsin Pipe Line Company is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant and to sell and deliver to Applicant up to 61 Mcf on a maximum day under a superseding service agreement to be executed by Applicant with Michigan Wisconsin in accordance with the Commission's Regulations, for transportation, distribution and resale as hereinbefore described and as more fully described in this proceeding, upon the terms and conditions of this order. Such service shall be rendered pursuant to Michigan Wisconsin's presently filed appropriate rate schedule.

(B) Michigan Wisconsin shall report to the Commission the date of commencement of service to Applicant within 10 days after such service begins.

(C) Applicant shall be prepared to receive service as directed herein one year from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PAN AMERICAN PETROLEUM CORPORATION, DOCKET NO. G-9279, ET AL.

DECLARATORY ORDER

(Issued December 5, 1966)

On April 13, 1966, 35 FPC 502, the Commission issued an order approving a rate settlement proposal filed by Pan American Petroleum Corporation (Pan American) on January 24, 1966, encompassing the rates for 257 of its currently effective FPC Gas Rate Schedules. Ordering Paragraph (D) of that order required Pan American to "compute the difference between the rates collected subject to refund and the related settlement rates or rate not subject to refund, whichever rate is the greater, for the period from July 1, 1962, to the date of the order, with interest as specified in each docket to January 1, 1966." Ordering Paragraph (E) required Pan American to retain such refund amounts, with certain exceptions, pending further action of the Commission.

On September 6, 1966, Pan American filed a petition for a declaratory order stating that a controversy existed between it and one of its purchasers, United Fuel Gas Company (United Fuel), concerning the amount of refunds due and owing to United Fuel under the settlement order. The controversy concerns amounts payable to United Fuel under Pan American's FPC Gas Rate Schedule Nos. 78, 173, 174, 190 and 384 for sales of natural gas in the State of Louisiana. All of the sales were covered by the general rate settlement and resolution of the dispute depends upon the interpretation of the April 13 settlement order and several prior Commission orders permitting certain tax changes to become effective.

The salient facts concerning the controversy, which involve refunds of $1,133,236.04 (inclusive of interest), are best illustrated by reference to Pan American's FPC Gas Rate Schedule No. 173. The other rate schedules involved here have essentially the same factual pattern, and therefore our decision as to the controversy surrounding Pan American's FPC Gas Rate Schedule No. 173 is equally applicable to the other rate schedules.

The firm rate under FPC Gas Rate Schedule No. 173 was 17.5¢, inclusive of 1¢ tax reimbursement which related to the then existing state gathering tax. Periodic increased rates of 17.9¢, 18.3¢, 18.7¢ and 19.1¢, each of which included 1¢ tax reimbursement, were suspended and thereafter placed in effect subject to refund. Due to a 1¢ increase in the state gathering tax, Pan American then filed for a tax reimbursement increase of 0.75¢ per Mcf from 19.1¢ to 19.85¢ (for a total tax reimbursement of 1.75¢) to be effective as of August 1, 1958. In view of challenges to the constitutionality of the additional gathering tax the increase was suspended in Docket No. G-15780 for one day and then became effective subject to refund. (Order No. 206, 20 FPC 28). All sums collected in Docket No. G-15780 above 19.1¢ were refunded in accordance with the Commission order issued March 5, 1962, in *Texaco Inc., et al.*, Docket No. G-15546, *et al.*, 27 FPC 441, following a state court ruling declaring the gathering tax to be unconstitutional.

Subsequent to these filings the State of Louisiana increased the gas severance tax and eliminated the gathering tax effective as of December 1, 1958. Pan American filed for a tax increase of 0.5¢ from 19.1¢ to 19.6¢ (the 19.6¢ rate included 1.5¢ tax reimbursement). The 19.6¢ filing actually reflected a decrease in the previously filed increased rate of 19.85¢ per Mcf which was then in effect subject to refund in Docket No. G–15780 as well as a decrease in total tax reimbursement from 1.75¢ to 1.5¢ per Mcf. In connection with the 19.6¢ filing the Commission issued an order in Docket No. G–14730[1] on February 26, 1959 allowing the new rate of 19.6¢ (0.5¢ *more* than the underlying rate in Docket No. G–14730 but 0.25¢ *less* than Pan American had been charging under the rate in Docket No. G–15780) to become effective as of December 1, 1958. The Commission stated that the rate change in no way modified, amended or changed the suspension proceeding involving Docket No. G–14730.

Pan American later filed for periodic increased rates of 20¢, 20.4¢, 20.8¢, 21.2¢ and 21.6¢, each of which included 1.5¢ tax reimbursement, that were suspended and thereafter placed in effect subject to refund. Pan American's settlement rate of 18.375¢ is below the 19.6¢ increased rate filing made by Pan American to increase the tax reimbursement from 1¢ to 1.5.¢ Pan American proposes to refund all amounts collected from the 18.375¢ settlement rate to 19.1¢ and all amounts above 19.6¢, but does not propose to refund those amounts collected from 19.1¢ to 19.6¢. United Fuel claims the amounts from 19.1¢ to 19.6¢ should also be refunded.

Pan American contends that the Commission in accepting its 0.5¢ per Mcf tax reimbursement increase did not impose any refund obligation with respect to the increased rate filing which included this additional tax reimbursement. Consequently, it avers the monies it charged and collected from United Fuel at the 19.6¢ increased rate level relating to the 0.5¢ tax reimbursement were not collected subject to refund, and therefore under the terms of the Commission's settlement order it is not required to refund such amounts.

In its response to Pan American's petition United Fuel points out that assuming the settlement rate included tax reimbursement of 1.5¢ per Mcf, adoption of Pan American's position would allow it to collect 2¢ tax reimbursement (the 1.5¢ tax reimbursement expressly made part of the settlement rate plus the 0.5¢ tax reimbursement collected between the settlement rate and the rate in effect subject to refund).

After the enactment of the additional severance tax and the concurrent elimination of the gathering tax by the State of Louisiana, the Commission modified its rules and regulations to permit abbreviated rate change filings reflecting these tax changes and waived the 30 day notice requirement of Section 4(d) of the Natural Gas Act so that the rate changes could be made effective as of December 1, 1958. (Order No. 210, 20 FPC 785). Consistent with that waiver, it permitted Pan American's tax change filing to become effective as of December 1, 1958, but provided that its action would not in any way affect the suspension proceeding in Docket No. G–14730 involving Pan American's then latest periodic rate increase filing.[2] It does not follow, however, as Pan American contends, that the acceptance order authorized the collection of the 0.5¢ tax increase over and beyond any figure the Commission might determine upon, or settle at, in Docket No. G–14730. On the contrary, the only reasonable interpretation of this order, we believe, is that the Commission's action effectuated for refund purposes an increase in the last firm rate of 17.5¢ by the amount of the 0.5¢ tax increase, which was treated as a known cost, while continuing Pan American's existing refund obligation at the increased rate level of 19.6¢. Pan American thus retained the same refund obligation in Docket No. G-14730 it had prior to its tax increase filing. The only difference is that after the acceptance of the tax increase both the underlying firm rate base and the rate being collected was increased 0.5¢ (to 18.0¢ and 19.6¢ respectively).

---

[1] Docket No. G–14730 involved the latest periodic increase (from 18.7¢ to 19.1¢) then in effect subject to refund.

[2] The order was issued in Docket No. G–14730, in lieu of Docket No. G–15780, because the only question presented in Docket No. G–15780 was the contractual issue involved in the validity of the additional gathering tax.

Our interpretation is consistent with Pan American's settlement proposal as well as our order approving such settlement. Pan American shows the 0.5¢ severance tax increase as a part of the "Last Firm Rate" in the exhibits appended to its offer.[3] The appendices to our order of April 13, 1966, did likewise.

Accordingly, we find Pan American's interpretation to be incorrect and conclude that it is required to make refunds under the April 13 settlement order of the disputed amounts involved here. As previously indicated, our decision is applicable to all of the rate schedules in dispute, even though we have specifically referred only to Pan American's FPC Gas Rate Schedule No. 173.

The Commission orders:

For the reasons set forth above, the refund monies of $1,133,236.04 (inclusive of interest) charged and collected by Pan American pursuant to the subject rate schedules during the refund period set forth in the order issued herein on April 13, 1966, in addition to other refund monies, are properly due and owing to United Fuel, and are to be retained by Pan American in accordance with ordering Paragraphs (E), (F) or (G) of said order.

---

[3] Pan American thus shows the last firm rate under its FPC Gas Rate Schedule No. 173 to be 18¢, inclusive of tax reimbursement. Prior to the tax increase filing, the last firm rate was 17.5¢. It is clear therefore that in its settlement proposal Pan American treated the 0.5¢ tax increase as part of the last firm rate. Under Pan American's present position the last firm rate would be 17.5¢, not 18¢ as reflected in its proposal.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PIPELINE PRODUCTION AREA RATE PROCEEDING, DOCKET NO. RP66-24

ORDER DENYING PETITION FOR PHASE I RULE-MAKING PROCEDURE

(Issued December 5, 1966)

On October 12, 1966, thirteen interstate pipeline companies styling themselves the "Pipeline Production Group"[1] filed a petition requesting that the Commission decide the issues presented in Phase I[2] of the above-captioned proceeding solely on the basis of written comments and oral argument presented in a rule-making proceeding. These issues are now slated to be tried on the basis of a formal evidentiary record and to be decided in the light of the facts thereby developed in accordance with the normal procedures governing adjudication. Petitioners' contemplate that the present evidentiary proceeding involving data questionnaire responses, hearing and decision by the Presiding Examiner would be redirected to the Phase II issues, and that such supplemental data as might be required for full resolution of those issues would also be collected.

---

[1] The "Pipeline Production Group" consists of Colorado Interstate Gas Company, Humble Gas (Transmission Company, Kansas-Nebraska Natural Gas Company, Inc., Lone Star Gas Company, Natural Gas Pipeline Company of America, Northern Natural Gas Company, The Ohio Fuel Gas Company, Panhandle Eastern Pipe Line Company, Preston Oil Company, Southern Natural Gas Company, Texas Gas Transmission Corporation, Transcontinental Gas Pipe Line Corporation, Trunkline Gas Company, and United Gas Pipe Line Company.

[2] Phase I encompasses all issues related to whether pipeline-produced and self-consumed gas on leases acquired after the date of any final Commission policy determination on such issues should be priced on an area basis and, if so, the exact nature of such area rate. (See Order Severing Proceedings and Prescribing Procedures, issued April 13, 1966, 35 FPC 497).

Petitioners also ask that if the decision in Phase I holds that area rates are appropriate for pipeline and affiliate produced gas, such decision be made effective as of January 1, 1961 or at least as of June 29, 1964.

Statements in support of the petitioners' position were filed by the subsidiaries of the Columbia Gas System;[3] Consolidated Gas Supply Corporation and Union Producing Company. Responses filed by Tennessee Gas Pipeline Company, a Division of Tenneco Inc., and El Paso Natural Gas Company do not object to petitioners' proposal to convert Phase I from an adjudicatory to a rule-making proceeding but request that the Commission's Phase I decision be applied prospectively only.

The Municipal Gas Group;[4] the California Public Utilities Commission; San Diego Gas and Electric Company; Pacific Lighting Service and Supply Company, Southern California Gas Company, and Southern Counties Gas Company of California; Pacific Gas and Electric Company and a number of independent producers,[5] oppose petitioners' request that the Phase I issues be decided without the benefit of any evidentiary record or the facts to be elicited by Staff's data questionnaire and the information requested by other parties. The Commission Staff, who also oppose petitioners' request, suggests that informal rule-making rather than adjudicatory procedures may well be appropriate for eventually resolving the Phase I issues, also opposes their resolution in the absence of the further factual data to be supplied. Petitioners filed a response expressing their opposition to the Staff's proposal that the Phase I issues be decided through informal rule-making procedures, but upon the basis of the comprehensive factual data now being gathered in this proceeding, contending that if the Commission considers those facts in reaching a decision, they are entitled to evidentiary hearings.

We cannot subscribe to petitioners' view that all of the issues in Phase I can be summarily decided without the aid of the factual material now being collected pursuant to the data handling procedures established by the parties and the Examiner. We have made clear that in this important and complex case a comprehensive factual framework is essential to an appropriate resolution of the specific issues determined by the Examiner to be relevant and material to the first phase of this proceeding.[6] Apart from the fact that petitioners' proposal is generalized and vague and does not define the scope or contents of an appropriate notice of proposed rule-making or outline the specific procedures thereafter to be followed, it comes at a stage when the data collecting and trial procedures in this proceeding are fully crystallized.

---

[3] Atlantic Seaboard Corporation, Cumberland & Allegheny Gas Company, Kentucky Gas Transmission Corporation, The Manufacturers Light and Heat Company, Ohio Fuel Company, United Fuel Gas Company, and Preston Oil Company.

[4] American Public Gas Association, the City of Chicago, the City and County of Denver, and the Memphis Light, Gas and Water Division.

[5] Texaco Inc., Pan American Petroleum Corporation, Gulf Oil Corporation, Mobil Oil Corporation, The Superior Oil Company, Sinclair Oil & Gas Company, Marathon Oil Company, Amerada Petroleum Corporation, and Warren Petroleum Corporation.

[6] Order Severing Proceedings and Prescribing Procedures, issued April 13, 1966, *supra*, page 498 and Order Denying Applications, issued June 16, 1966, 35 FPC at page 1033.

For these reasons, we reject petitioners' proposal for the use of informal rule-making procedures in Phase I of this proceeding unsupported by the data now being gathered and to be made available after compositing (along with other factual material which any of the parties can demonstrate is material) as the factual background upon which our decision is to rest. We again emphasize, however, our desire that the Presiding Examiner and all parties to this proceeding shall take all feasible steps to expedite this proceeding to the maximum extent consistent with the necessity for developing comprehensive factual data on all Phase I issues.

In denying petitioners' request that Phase I be decided solely on the basis of the opinions and arguments of the parties, we are not making any ruling on the propriety or desirability of Staff's proposal for rule-making based upon facts. In our view, it is neither feasible nor prudent to evaluate whether such legislative hearings or adversary type hearings will best be suited to the efficient and expeditious disposition of Phase I until the questionnaire facts have been compiled and distributed to the parties for their consideration. At that time, we should expect the hearing examiner to convoke a hearing conference to consider *inter alia* whether any factual dispute warranting further evidentiary hearing is presented and it would be appropriate for any party, including Staff, on the basis of the determinations at such conference to put forward for our consideration any concrete plan for proceeding to resolve any substantive issues by rule-making it may think appropriate.

We also reject petitioners' further suggestion that the scope of Phase I be enlarged to include gas produced from existing leaseholds. The request for such relief is premature since Phase II clearly includes the issue of whether such gas should be priced on an area rate basis and, moreover, petitioner ignores the fact that the issues concerning the pricing of presently dedicated reserves are materially different from those relating to the regulatory treatment of regulating future reserves. As we stated in our Motion to Dismiss, filed in *Colorado Gas Co.* v. *F.P.C.*, CA10 No. 8892:

> * * * The cost of presently dedicated reserves is already in part included in the pipeline producers' cost of service upon which their rates are currently regulated; exploration and development costs and the costs of dry holes are expensed; successful wells are capitalized and included in the rate base on which the pipeline receives a return. In this respect already dedicated reserves present problems quite different from future acquisitions * * *

Consequently, petitioners' suggestion to try Phase II issues in Phase I would necessarily broaden the scope of that initial phase and, inevitably, delay a final decision therein.

The Commission orders:

The petition of the thirteen interstate pipeline companies, filed on October 12, 1966, seeking to substitute informal rule-making procedures not involving the development of additional factual material in Phase I and an earlier date for applying the results of that initial phase be and it hereby is denied.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

SACRAMENTO MUNICIPAL UTILITY DISTRICT, PROJECT NO. 2101

ORDER APPROVING REVISED PROJECT EXHIBIT L DRAWING

(Issued December 5, 1966)

On August 3, 1966, Sacramento Municipal Utility District, licensee for Upper American River Project No. 2101, filed for Commission approval revised Exhibit L drawings relating to the Camino and White Rock developments of the project located on upper Rubicon River and South Fork American River and tributaries, California.

The revised Exhibit L drawing for the Camino penstock show the "as constructed" Camino penstock with minor changes in elevation and alignment of the penstock shown on the license Exhibit L drawings. The revised Exhibit L drawing for the White Rock powerhouse, relate to its design as presently being constructed and show: (1) the addition of a training wall designed to protect the powerhouse against flood flows and to confine the river's encroachment on the powerhouse to the tailrace only; and (2) a lower turbine setting at elevation 990 feet, or 25 feet lower than as initially proposed. The lower setting is to accommodate the normal and minimum tailwater elevations of 996.5 feet and 990.0 feet, respectively.

The Commission finds:

The following described revised Exhibit L drawings conform to the Commission's rules and regulations and should be approved as part of the license for the project, and the license Exhibit L drawings described in this finding as being superseded should be eliminated from the license:

Exhibit	FPC No.	Showing Camino Penstock	Superseding FPC No.
L-135, sheet 1	2101-231	Plan and profile	2101-112
L-136, sheet 2	2101-232	do	2101-113
WHITE ROCK POWERHOUSE			
L-137	2101-233	Site plan	2101-127
L-138	2101-234	Plan—Generator floor	
L-139	2101-235	Plan—Turbine floor	
L-140	2101-236	Plan—Distributor centerline	
L-141	2101-237	Transverse sections	2101-127

The Commission orders:

The revised Exhibit L drawings described in the above finding are hereby approved as part of the license for Project No. 2101, and the superseded license Exhibit L drawings described in the same finding are hereby eliminated from the license for the project.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NOS. CP61–203 AND CP54–5

FINDINGS AND ORDER FURTHER AMENDING ORDERS ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING SERVICE AGREEMENTS FOR FILING

(Issued December 5, 1966)

On October 4, 1966, Texas Eastern Transmission Corporation (Texas Eastern) filed in Docket Nos. CP61–203 and CP64–5 a motion to amend further the Commission's orders issued December 17, 1962, 28 FPC 1035, and December 19, 1963, 30 FPC 1559, in Docket Nos. CP61–203 and CP64–5, respectively, to reallocate the presently authorized sales of natural gas to the City of Grayville, Illinois (Grayville) in the total amount of 6,419 Mcf per day so as to authorize Texas Eastern to sell 1,647 Mcf of gas per day to Grayville and 4,772 Mcf per day to Mt. Carmel Public Utilities Company (Mt. Carmel), all as more fully set forth in the motion to amend further in these proceedings.

The order of December 17, 1962, authorized Texas Eastern to increase the quantities of gas sold to Grayville so that the latter would be able to initiate natural gas service to Mt. Carmel. The order of December 19, 1963, further increased the allocation of natural gas to Grayville to meet the requirements of Grayville and Mt. Carmel. Presently, Texas Eastern is authorized to sell a total of 6,419 Mcf of gas per day to Grayville to meet the latter's and Mt. Carmel's requirements.

Texas Eastern states that the subject motion is being filed at the request of Grayville and Mt. Carmel so that they, as low load factor customers, may continue to purchase natural gas under Texas Eastern's FPC Gas Rate Schedule SGS–B at the lowest cost. No new facilities will be required for the subject proposal since gas to be sold to Mt. Carmel will be delivered at the existing delivery point to Grayville and Grayville will continue to transport the gas to Mt. Carmel.

Concurrently with the filing of the subject motion, Texas Eastern tendered for filing service agreements with Grayville and Mt. Carmel dated September 22, 1966, and September 12, 1966, respectively.

Due notice of the filing of the motion to amend further and opportunity for hearing thereon has been given by publication in the Federal Register on October 15, 1966 (31 F.R. 13400). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's orders issued December 17, 1962, and December 19, 1963, in Docket Nos. CP61–203 and CP64–5, respectively, be further amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued December 17, 1962, and December 19, 1963, in Docket Nos. CP61–203 and CP64–5, respectively, are further amended to reallocate the presently authorized sales of natural gas to Grayville in the total amount of 6,419 Mcf per day so as to authorize Texas Eastern to sell 1,647 Mcf of gas per day to Grayville and 4,772 Mcf per day to Mt. Carmel, all as hereinbefore described and as set forth in the subject motion to amend further.

(B) Texas Eastern's service agreements with Grayville and Mt. Carmel, dated September 22, 1966, and September 12, 1966, respectively, covering the subject proposal, are accepted for filing to become effective on the date this order issues.

(C) In all other respects the orders of December 17, 1962, and December 19, 1963, as amended, shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. RP66-12

ORDER REJECTING SETTLEMENT OFFER

(Issued December 5, 1966)*

As a result of actions taken at various times in 1964 and 1965, the United Gas Pipe Line Company and the Humble Oil & Refining Company have been directed to refund excessive rates which each of those companies previously had collected. However, we have ordered retention of those funds until such time as we can determine "equitable entitlement" thereto. Texas Eastern Transmission Corporation, a customer of United, claims an absolute right to that portion of the refund which represents excessive payments which it made. Following an unsuccessful endeavor to convince the Fifth Circuit of the illegality of the retention order,[1] Texas Eastern has endeavored to establish its right to the refund. The hearing has been concluded; briefing time, however, has been stayed pending our consideration of Texas Eastern's settlement offer.

Under the settlement offer there would be released to Texas Eastern all refunds attributable to its pre-June 1, 1965 purchases, excluding those resulting from its Rayne Field lease transaction.[2] Texas Eastern would, in turn, flow through 69 percent of the refund to its jurisdictional customers. We are advised that each of the pipeline customers of Texas Eastern has agreed to flow through 100 percent of the refund which they would receive. The individual customer refund would be computed by multiplying the annual refund per Mcf (obtained by dividing the total refund for each year by the total sales responsible for that fund) by the customer's total annual purchase. A substantial number of Texas Eastern's jurisdictional customers have urged acceptance of the settlement. The Philadelphia Electric Company, a direct customer of Texas Eastern and the California Commission, parties to this proceeding, have urged rejection of the settlement. After careful consideration of the settlement we agree that the public interest would be benefited by its rejection.

In reaching the conclusion that this settlement should be rejected, we are not unmindful of the value of the settlement route. Where, for example, principles are established and the only question presented relates to the application of those principles to a particular factual setting, the settlement approach often will benefit all parties to the proceeding, including the ultimate consumer. And it may also sometimes be appropriate to approve an over-all settlement of a major complex rate case even though some relatively novel specific issues are involved.[8] But here we have a proceeding of general importance involving a novel issue of law and policy. The question of whether the Commission, in its disposition of rate refunds under Section 4(e) of the Natural Gas Act, may employ the doctrine of "equitable entitlement" and require, where appropriate, complete flow-through in the absence of a settlement agreement fixing that obligation, has not previously been settled. Indeed, Texas Eastern, notwithstanding its tender of the settlement offer, is unwilling to accept that construction of the Commission's authority, as are at least some of its pipeline customers who have urged approval of the settlement. Therefore, acceptance of this settlement would settle nothing; it would provide no guidance regarding the additional $20 million (exclusive of the $10 million at issue here) presently awaiting disposition pursuant to Commission action as the result of outstanding refund obligations.

---

*Reconsideration denied by order issued February 13, 1967, 37 FPC 306.

[1] *Texas Eastern Transmission Corp.* v. *F.P.C.*, 357 F. 2d 232 (CA5).

[2] The settlement would not affect that transaction.

The Commission finds:

That the public interest would be furthered by the rejection of the settlement proposal and by having the Examiner pass on the issues now before him.

The Commission orders:

(A) That the settlement offer certified to us by the Examiner is rejected.

(B) That the briefing schedule prescribed by the Examiner should commence upon issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

UTAH POWER & LIGHT COMPANY, PROJECT NO. 1744

ORDER APPROVING REVISED PROJECT EXHIBIT M

(Issued December 5, 1966)

On September 12, 1966, Utah Power & Light Company, licensee for major Project No. 1744, filed application for Commission approval of a revised Exhibit M for the Weber Project No. 1744 on the Weber River in Weber, Davis, and Morgan Counties, Utah, and affecting lands of the United States within the Wasatch National Forest.

The filing is pursuant to Article 29 of the license to show and describe the relocated portion of the Farmington-Weber transmission line, which was rerouted and is carried by the supporting structures of the Riverdale-Weber-Devil's Slide transmission line, and the new 7.2 kv plant service line from Gateway, all of which was made necessary because of highway construction in the area. The filing also describes the conductor cables and insulators rehung on the Riverdale-Weber-Devil's Slide transmission line to carry the relocated Farmington-Weber line and the relocated telephone line as parts of the project.

The Commission finds:

The revised Exhibit M, entitled "General Descriptions and General Specifications of the Mechanical, Electrical, and Transmission Equipment", which sup-

[8] In such cases where a particular issue has general precedential value we have frequently carved it out of a settlement, reserving it for subsequent adjudication. See *e.g., Cities Service Gas Company*, 25 FPC 582, 30 FPC 158 (reserving and then deciding the consolidated tax issue).

plements license Exhibit M, conforms to the Commission's rules and regulations and should be approved as part of the license for the project.

The Commission orders:

The revised Exhibit M described in the above finding is hereby approved as part of the license for Project No. 1744.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

VICI PUBLIC WORKS AUTHORITY AND PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP66–411

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued December 5, 1966)

On June 13, 1966, the Vici Public Works Authority, (Applicant) filed in Docket No. CP66–411 an application, and a supplement thereto on September 7, 1966, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Panhandle Eastern Pipe Line Company (Respondent) to establish physical connection of its natural gas transmission facilities with the facilities proposed to be constructed by Applicant, and to sell and deliver natural gas to Applicant for resale and distribution in the Town of Vici, Oklahoma, all as more fully set forth in the application, as supplemented.

Applicant proposes that Respondent construct a tap at a point on its transmission line approximately 5,300 feet south of the Town of Vici, Dewey County, Oklahoma, and provide a regulation station at such point where said town would connect its transmission line.

Applicant proposes to install a 3-inch transmission pipeline extending 5,300 feet from Respondent's transmission pipeline to the southern limits of the Town of Vici. Applicant further proposes to construct a natural gas distribution system and appurtenances in the Town of Vici. Applicant states that the proposed transmission and distribution facilities will be owned and operated by the Town of Vici.

The total estimated volumes of natural gas involved to meet Applicant's annual and peak day requirements for the initial three year period of proposed operations are stated to be:

	First year	Second year	Third year
Annual (Mcf)	39,047	44,702	49,826
Peak day (Mcf)	711	805	902

The total estimated cost of Applicant's proposed construction is $105,144.000, which cost will be financed through the issuance of revenue bonds.

On June 17, 1966, Respondent was duly advised of the application filed in this proceeding, and due notice of the filing and opportunity for hearing thereon has been given by publication in the Federal Register on June 25, 1966 (31 F.R. 8896). No protest, petition to intervene or request for hearing has been filed in this proceeding.

The Commission finds:

(1) Panhandle Eastern Pipe Line Company, a Delaware corporation having its principal place of business in Kansas City, Missouri, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 17, 1945, in Docket No. G-254 (4 FPC 1081).

(2) Applicant is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver to Applicant under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations, up to 902 Mcf per day of natural gas for distribution and resale as hereinbefore described and as more fully described in the application in this proceeding.

(4) The requirement that Respondent serve Applicant as hereinafter ordered, will not impair Respondent's ability to render adequate service to its existing customers.

(5) Applicant should be prepared to receive natural gas from Respondent for distribution in the Town of Vici, Oklahoma, and environs, within one-year from the date of issuance of this order.

The Commission orders:

(A) Panhandle Eastern Pipe Line Company is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant and to sell and deliver up to 902 Mcf of natural gas daily to Applicant for resale in Vici, Oklahoma all as hereinbefore described and as more fully described in the application in this proceeding.

(B) Respondent shall revise the availability and Btu provisions of its SG 3 Rate Schedule so as to encompass sales and deliveries to Applicant, and render service thereto in accordance therewith.

(C) Respondent shall file, pursuant to part 154 of the Regulations under the Natural Gas Act, an executed service agreement with Applicant.

(D) Respondent shall report to the Commission in writing the date of commencement of service to Applicant within 10 days after such service begins.

(E) Applicant shall be prepared to received service as directed, herein, within one year from the date of issuance of this order.

OPINION NO. 501-A

AMERADA PETROLEUM CORPORATION, ET AL., DOCKET NO. CI62-1544, ET AL.

MEMORANDUM OPINION AND ORDER CONFIRMING ORDER REQUIRING REFUNDS AND DENYING MOTIONS FOR STAY

(Issued December 6, 1966)

Syllabus

1. Commission *reaffirms Hawkins* holding that from time view of law was enunciated by Court on January 23, 1964, "every producer either knew or should

have known that refunds might be required of excess amounts collected under temporary certificates, even though these certificates contained no explicit refund conditions." P. 964.

2. Parties are not being held responsible for refunds on basis of facts established in other proceedings; prior cases were cited as established precedents applicable to present proceedings and not as establishing facts here. P. 964.
3. Contention that ordered refunds—so-called "retroactive rate making"—would have detrimental effect on industry's ability to plan, budget and finance future drilling or upon producers' financial stability is without merit. P. 964.
4. Loss sustained on individual producing property is not ground for refusal to order refunds. P. 965.
5. Motion for stay denied since order did not provide that refunds be made but provided only that refund amounts be computed and such amounts placed in escrow or retained by producers pending further order. P. 965.
6. Upon rehearing, Commission *confirms* prior order requiring refunds and *denies* motions for stay.

Commissioner O'Connor *dissenting.*
Commissioner Carver *not participating.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

On July 27, 1966, the Commission issued Opinion No. 501, 36 FPC 309, and its accompanying order in this proceeding, requiring refunds by certain natural gas producers of a part of the amounts collected by them in excess of the 16 cents per Mcf later determined to be the proper initial rate. Because these excess amounts were collected while operating under temporary certificates without express refund conditions, and because a balancing of the equities indicated that refunds in full should not be ordered, no refunds were required of certain excess amounts collected but later disbursed in production tax payments which cannot be recouped or in royalty payments. Applications for rehearing have been filed by Texaco Inc. (Texaco), Sunray DX Oil Company (Sunray), Standard Oil Company of Texas, a division of Chevron Oil Company (Sotex), Edwin L. Cox (Cox), Clark Fuel Producing Company (Operator), *et al.* (Clark), George H. Coates (Coates), Humble Oil & Refining Company (Humble), Sohio Petroleum Company (Sohio), Lamar Hunt (Hunt), American Petrofina Company of Texas (Petrofina), Patchin-Wilmoth Industries, Inc. (Patchin-Wilmoth), and Sun Oil Company (Sun). Motions for stay of the ordering clauses of Opinion No. 501 were made by a majority of the applicants. By order issued September 2, 1966, we granted rehearing for the purpose of reconsideration.

In general, the applications for rehearing reiterated arguments previously considered and rejected by this Commission in Opinion No. 501 and in *Skelly Oil Company, et al.*, Opinion Nos. 492, 35 FPC 849 and 492–A, 36 FPC 143 (1966), and *H. L. Hawkins & H. L. Hawkins, Jr. (Operator), et al.*, Opinion Nos. 498, 36 FPC 149 and 498–A, *infra*, p. 981 (1966). We have found nothing in the applications for rehearing which would cause us to alter our prior determinations. Certain statements in these applications, however, deserve comment.

Hunt alleges "The Commission erred in concluding that Hunt had notice of a potential refund obligation subsequent to February 1, 1964." (Hunt application, page 9.) This argument was dealt with in *H. L. Hawkins & H. L. Hawkins, Jr. (Operator), et al.*, Opinion No. 498–A:

> Some of the applicants argue that refund of excess amounts collected but later paid out in royalties should not be required even after February

> 1, 1964. We held that on that date producers should be considered to have knowledge that refunds might be required by reason of the doctrine declared by the Court of Appeals for the District of Columbia in *P.S.C. of the State of New York* v. *F.P.C.*, 329 F. 2d 242, issued January 23, 1964. As a legal matter the producers, like any other persons, might be charged with knowledge of what the law was, even prior to the time that it was first declared by a court and even though the Commission had previously held a different view. As a matter of equity, however, we think that the producers should not be charged with the knowledge of the law as declared by the Court of Appeals prior to the time of that court's decision. From the time this view of the law was enunciated by the court, every producer either knew or should have known that refunds might be required of excess amounts collected under temporary certificates, even though these certificates contained no explicit refund conditions. (p. 983)

Sotex and Clark object to the equities in the present case being determined by the Commission on the basis of Opinion Nos. 492, 492-A, 498 and 499, 36 FPC 164, to which Sotex and Clark were not parties. (Sotex application, page 7; Clark application, page 6.) Neither Sotex nor Clark nor any other applicant in this proceeding is being held responsible for refunds on the basis of facts established in other proceedings. These applicants have had full opportunity to set forth any facts and any evidence which they wished to present with respect to their particular circumstances in this proceeding. Clark and Sotex have alleged no facts which would serve to differentiate their cases from those cited by us. These cases were cited as established precedents applicable to the present proceeding, and not as establishing the facts in this proceeding.

Several applicants contend that they were improperly deprived of an opportunity to present evidence on the nature of their budgeting and planning activities "and how disastrous the ordering of refunds will be on such activities." (Texaco application, page 3; Humble application, page 5.) According to figures submitted by the two companies, the total refund exposure of Humble in this proceeding is under $25,000 and the total refund exposure of Texaco is under $1,500. No serious argument can be made that refunds of these amounts would seriously disrupt the fiscal activities of corporations such as Humble and Texaco. The broader arguments made by others that such "retroactive rate making" will have detrimental effect on the industry's ability to plan, budget and finance future drilling (Sunray application, page 3) or upon the financial stability of producers (Cox, page 4) have been fully considered by the Commission and found to be without merit.

Patchin-Wilmoth states that it has built three miles of pipeline with a metering station and compression plant at a total cost of $33,943.56 for the purpose of delivering the gas to the pipeline purchaser. Five cents per Mcf of the 18 cents per Mcf contract price was allotted to it by the other working interest owners as reimbursement for the building of the facilities. After recovery of the cost of construction 3.5 cents was allotted as compensation for maintenance of the pipeline, metering station and compression plant. Pursuant to Opinion No. 422, 31 FPC 623, which directed an initial price of 16 cents per Mcf, the total price to seller was reduced to 16 cents. Thereafter, in March 1966, the gas field became nonproductive, causing Patchin-Wilmoth to sustain substantial loss both in the drilling and equipping of its wells and the construction of the delivery facilities.

A loss sustained on an individual producing property is not grounds for refusal to order refunds. The initial price to which seller was entitled has previously been determined in this proceeding (Opinion No. 422), and we think that this price should be the measure of the refunds to be required here.

No substantial reason has been advanced why stay should be had of the ordering paragraphs of Opinion No. 501. Those paragraphs did not provide that refunds should be made; they provided only that the amounts of such refunds should be computed and that these amounts should be placed in escrow or retained by the producers pending further order of the Commission. In the event the in-line price is modified by court order, this will be taken into account in a later order disposing of the refund amounts.

The Commission finds:

(1) The assignments of error and applications for rehearing filed in this proceeding present no new facts or legal principles which would warrant any change in, or modification of, the Commission's Opinion No. 501 in this proceeding issued July 27, 1966.

(2) No good cause exists for granting the motions for stay of the ordering paragraphs of said Opinion No. 501.

The Commission orders:

(A) Opinion No. 501 and its accompanying order, issued July 27, 1966, are in all respects confirmed.

(B) The relief requested on rehearing in the applications for rehearing filed in this proceeding is hereby denied.

(C) The motions for stay of the ordering paragraphs of Opinion No. 501 are denied.

Commissioner O'Connor *dissenting.*

Commissioner Carver *not participating.*

O'CONNOR, *Commissioner, dissenting:*

In accordance with my dissent from the majority opinion in Opinion No. 501, I would grant the relief requested in the applications for rehearing. In addition, I would add further comments with regard to Patchin-Wilmoth Industries, Inc., *et al.* (Successor to Cherosage Enterprises, Inc.) (Patchin-Wilmoth).

On April 10, 1962, Patchin-Wilmoth entered into a gas sale contract with Natural Gas Pipeline Company of America (Natural) wherein Patchin-Wilmoth agreed to sell gas to Natural at a fixed price of 18.00 cents per Mcf without escalations for a period of 20 years. To make this sale, Patchin-Wilmoth constructed three miles of lateral line for delivery to Natural's main line as well as a metering station and compression plant. These facilities cost approximately $33,943.00.

On March 23, 1964, the Commission issued Opinion No. 422, *Amerada Petroleum Corporation, et al.*, Docket No. CI62-1544, *et al.*, 31 FPC 623, which set an initial price of 16.00 cents per Mcf for the gas in Patchin-Wilmoth's production area. In compliance therewith, the 18.00 cents price paid by Natural was reduced to 16.00 cents. Two years later, in March 1966, Patchin-Wilmoth's gas field became non-productive.

Total refunds owed by Patchin-Wilmoth are estimated to be $2,750.00. Furthermore, Patchin-Wilmoth has no other certificates on file with the Commission nor does it appear that it owns a working interest in any other properties for which rate schedules are on file with this Commission. During the period of production, revenues fell far short of costs and as a result, the company has suffered a substantial loss. Therefore, in light of the minimal refunds involved; the construction of delivery facilities by the seller; the fact that production has ceased; the limited amount of gas that was recovered; and, the substantial loss on investment, the majority, by ordering refunds, has shown an utter disregard of the equities involved and accordingly I dissent.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ARKANSAS LOUISIANA GAS COMPANY, DOCKET NO. CP67-89

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 6, 1966)

On October 4, 1966, Arkansas Louisiana Gas Company (Applicant) filed in Docket No. CP67-89 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities for the transportation and delivery of volumes of natural gas to a new industrial customer, all as more fully set forth in the application.

Applicant seeks authorization to construct and operate approximately 9,000 feet of 3½-inch line from Applicant's existing 18-inch line "L" with the necessary metering and regulating equipment, which will extend to the new plant facility of the Dow Chemical Company, near Magnolia, Columbia County, Arkansas.

Applicant estimates the natural gas requirements of the new service to be approximately 3,420 Mcf per day and approximately 1,125,000 Mcf per year.

The total estimated cost of construction is $27,980, which will be defrayed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, Arkansas Louisiana Gas Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of January 26, 1943, in Docket No. G-252 (3 FPC 910).

(2) The proposed construction and operation of facilities and transportation and delivery of natural gas as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, transportation and delivery are required by the public convenience and necessity

and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and transportation and delivery of up to 3,420 Mcf daily of natural gas as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation, and transportation of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within six months from the date on which this order issues.

(D) The certificate issued by paragraph (A) above is granted on the express condition that (1) the facilities authorized shall not be used to transport more than 3,420 Mcf daily of interruptible gas to the Dow Chemical Company (2) the interruptible service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers, and (3) Applicant shall file with the Commission copies of the contract with Dow as required by Section 155.1 of the Commission's Regulations under the Natural Gas Act.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CENTRAL MAINE POWER COMPANY, PROJECT NO. 2519

ORDER ISSUING LICENSE (MAJOR)

(Issued December 6, 1966)*

Application was filed on April 19, 1965 by Central Maine Power Company (Applicant) of Augusta, Maine, for a major license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2519, known as North

---

*See order issued January 25, 1967 granting rehearing.

Gorham Project, located on the Presumpscot River, which empties into Casco Bay, an estuary of the Atlantic Ocean at Falmouth, Maine, in the Towns of Gorham, Windham, and Standish, Cumberland County, Maine. No lands of the United States are affected by the project.

Hydroelectric development of the project site was first undertaken in 1898 which, when installation was completed, included four water wheels with a total capacity of 3,544 horsepower and four generators with a total capacity of 2,000 kilowatts. In 1915–1916 the spillway section of the dam was rebuilt and in 1925–1926 the old generating units were retired and two new water wheels of 1,460 horsepower each were installed, along with two generators of 1,125 kilowatts each. There have been no substantial alterations or replacements to the project thereafter.

The Presumpscot River originates at the easterly side of Sebago Lake and follows a meandering but generally southeasterly course for about 24 miles to its mouth in Casco Bay between the Towns of Falmouth and Portland, Maine. The North Gorham Project is located on the Presumpscot River 21.5 miles above its mouth. Historical records show that the Presumpscot from its source to its mouth was used for canoe transportation by the Indians and early explorers of the region, and was the avenue for the flotation of extensive quantities of pine logs to be made into boards at mills along the river at such places as Lower Falls and Saccarappa, for flotation of masts which were shipped from Casco Bay to England for the British Navy, and for the rafting or boating of other products such as corn and salt. Dams across the Presumpscot were constructed with sluiceways for the passage of logs, lumber, boats and fish. At the present time, the Presumpscot is used for recreation as a canoe route from Casco Bay up to Sebago Lake and on upstream to Harrison Village on Long Lake.

The Secretary of the Army and the Chief of Engineers have approved the plans of the project structures pursuant to Section 4(e) of the Act insofar as the interests of navigation are concerned.

The Department of the Interior, in reporting on the application, has advised that the terms and conditions in the interests of fish and wildlife and recreation resources, set forth in attached Form L-3, are adequate.

The Department of Health, Education, and Welfare has advised that the project has no adverse affects on water supply, water pollution control, or vector control, and none is anticipated.

The Department of Inland Fisheries and Game, of Maine, stated that any license issued for the project should include provisions for construction of a fishway or other fish passage facilities if and when it is deemed desirable by the Maine Inland Fisheries and Game Department, and the State Park & Recreation Commission has stated it agrees with the statement of the Department of Inland Fisheries and Game. It is our view that the pertinent provisions of attached Form L-3 and Article 33 are adequate.

For the reasons set forth in our April 25, 1962, Opinion No. 357 (27 FPC 830), the license herein granted shall have an effective date of April 1, 1962 and a termination date of December 31, 1993.

The Commission finds:

(1) The Presumpscot River from its source in Sebago Lake down to its mouth in Casco Bay between the Towns of Falmouth and Portland is a navigable waterway of the United States.

(2) North Gorham Project No. 2519 is located in and along a navigable water of the United States.

(3) Applicant is a corporation organized under the laws of the State of Maine, and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(4) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(5) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(6) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

(7) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 3,000 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable.

(8) The exhibits designated and described in paragraph (B) below conform to the Commission's rules and regulations and should be approved as part of this license to the extent indicated therein.

The Commission orders:

(A) This license is hereby issued to Central Maine Power Company (Licensee) of Augusta, Maine, under Section 4(e) of the Federal Power Act (Act), for a period effective as of April 1, 1962, and terminating December 31, 1993, for the continued operation and maintenance of North Gorham Project No. 2519, located on the Presumpscot River, navigable waters of the United States, in the State of Maine, subject to the terms and conditions of the Federal Power Act (Act) which is incorporated herein by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) North Gorham Project consists of:

(i) all lands constituting the project area and enclosed by the project boundary or the limits of which are otherwise defined, and/or interest in such lands necessary or appropriate for the purposes of the project, whether such lands or interest therein are owned or held by the Licensee or by the United States; such project area and project boundary being more specifically shown and described by certain exhibits which formed part of the application for license and which are designated and described as follows:

Exhibit J: Sheet 1 (FPC No. 2519-1) entitled "General Map, Transmission System," insofar as it shows the general location of the North Gorham project.

Exhibit K: Sheet 1 (FPC No. 2519-2) entitled "Detail Map."

(ii) project works consisting of: (1) a dam, including a cut stone nonoverflow wall about 600 feet long, a gated masonry intake section about 51 feet long, a deep sluice gate section (submerged gates) about 47 feet long, a concrete gravity spillway section about 256 feet long, a sluiceway (with stop logs) about 3¾ feet wide, a cutoff wall about 38 feet long; (2) a reservoir area with surface area of about 98 acres at full pond elevation 221.8 feet U.S.G.S., extending upstream about 1.1 miles; (3) four 8-foot diameter steel penstocks, two to each of two open-flume surge chambers at the powerhouse;

(4) a powerhouse containing two 1,460 horsepower turbines each directly connected to a 1,125 kw generator; (5) two tailraces; (6) an 11/38-kv substation; and (7) appurtenant electrical facilities—the location, nature and character of which are more specifically shown and described by the exhibits hereinbefore cited and by certain other exhibits which also formed a part of the application for license and which are designated and described as follows:

Exhibit L:

Sheet No.	FPC No.	Subject
1	2519-3	Dam.
2	2519-4	Powerhouse.

Exhibit M: Consisting of three typewritten pages filed April 19, 1965, as part of the application and entitled, "General Description and Specifications of Equipment and Appurtenances".

(iii) all other structures, fixtures, equipment or facilities used or useful in the maintenance and operation of the project and located on the project area, including such portable property as may be used or useful in connection with the project or any part thereof, whether located on or off the project area, if and to the extent that the inclusion of such property as part of the project is approved or acquiesced in by the Commission; also, all riparian or other rights, the use or possession of which is necessary or appropriate in the maintenance or operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L-3 (Revised September 1, 1966), entitled "Terms and Conditions of License for Constructed Project Affecting Navigable Waters of the United States" (*infra*, p. 971), which terms and conditions, designated as Articles 1 through 31, are attached hereto and made a part hereof; and subject to the following special conditions set forth herein as additional articles:

Article 32. The licensee shall pay to the United States the following annual charge, effective April 1, 1962:

> For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, a reasonable annual charge as determined by the Commission in accordance with the provisions of its regulations, in effect from time to time. The authorized installed capacity for such purpose is 3,000 horsepower.

Article 33. Licensee shall cooperate with State and local agencies and individuals in the development and maintenance of access area and roads and such other facilities necessary for full recreational utilization by the public of project lands and waters, consistent with the terms of the license and the operation of the project. At the end of three (3) years from the date of issuance of this license and every fifth year thereafter, Licensee shall advise the Commission of the results of cooperation with State and local agencies and of further recreation development at the project.

(D) The Commission reserves the right to determine at a later date what additional transmission facilities, if any, shall be included in this license as part of the project.

(E) The exhibits designated and described in paragraph (B) above are hereby approved as part of this license to the extent indicated therein.

(F) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgement of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

FORM L-3

(REVISED SEPTEMBER 1, 1966)

TERMS AND CONDITIONS OF LICENSE FOR CONSTRUCTED PROJECT AFFECTING NAVIGABLE WATERS OF THE UNITED STATES

Article 1. The entire project, as described in the order of the Commission, shall be subject to all the provisions, terms, and conditions of the license.

Article 2. No substantial change shall be made in the maps, plans, specifications, and statements described and designated as exhibits and approved by the Commission in its order as part of the license, until such change shall have been approved by the Commission: *Provided, however,* that if the Licensee or the Commission deems it necessary or desirable that said approved exhibits, or any of them, be changed, there shall be submitted to the Commission for approval amended, supplemental, or additional exhibit or exhibits covering the proposed change which, upon approval by the Commission, shall become a part of the license and shall supersede, in whole or in part, such exhibit or exhibits theretofore made a part of the license as may be specified by the Commission.

Article 3. The project area and project works shall be in conformity with the approved exhibits referred to in Article 2 hereof. If the Licensee shall contemplate any substantial alteration in or addition to the project area or project works shown and described by the approved exhibits referred to in Article 2 herein, the Licensee shall submit to the Commission for approval amended, supplemental, or additional exhibits under the provisions of said article covering such alteration or addition, together with a statement in writing setting forth the reasons which necessitate or justify such alteration or addition. Except when emergency shall require for the protection of navigation, life, health, or property, no substantial alteration or addition not in conformity with the approved plans shall be made to any dam or other project works under the license without the prior approval of the Commission; and any emergency alteration or addition so made shall thereafter be subject to such modification and change as the Commission may direct. Minor changes in the project works or divergence from such approved exhibits may be made if such changes will not result in decrease in efficiency, in material increase in cost, or in impairment of the general scheme of development; but any of such minor changes made without the prior approval of the Commission, which in its judgment have produced or will produce any of such results, shall be subject to such alteration as the Commission may direct.

Article 4. The project, including its operation and maintenance and any work incident to additions or alterations authorized by the Commission, shall be subject to the inspection and supervision of the Regional Engineer, Federal Power Commission, in the region wherein the project is located, or of such other officer or agent as the Commission may designate, who shall be the authorized representative of the Commission for such purposes. The Licensee shall cooperate fully with said representative and shall furnish him such information as he may require concerning the operation and maintenance of the project, and of any such alteration thereof, and shall notify him of the date upon which work with respect to any alteration will begin, and as far in advance thereof as said representative may reasonably specify, and shall notify him promptly in writing of any suspension of work for a period of more than one week, and of its resumption and completion. Licensee shall submit to said representative a detailed program of inspection by the Licensee that will provide for an adequate and qualified inspection force for construction of any such alterations to the project. Construction of said alterations or any feature thereof shall not be initiated until the program of inspection for the alterations or any feature thereof has been approved by said representative. The Licensee shall allow said representative and other officers or employees of the United States, showing proper credentials, free and unrestricted access to, through, and across the project lands and project works in the performance of their official duties. The Licensee shall comply with such rules and regulations of general or special applicability as the Commission may from time to time prescribe for the protection of life, health or property.

Article 5. In the absence of specific Commission exemption, the Licensee within five years from date of issuance of the license shall acquire title in fee or the right to use in perpetuity all lands, other than lands of the United States, necessary or appropriate for the maintenance and operation of the project. The Licensee, its successors and assigns shall, during the period of the license, retain the possession of all project property covered by the license as issued or as later amended, including the project area, the project works, and all franchises, easements, water rights, and rights of occupancy and use; and none of such properties shall be voluntarily sold, leased, transferred, abandoned, or otherwise disposed of without the prior written approval of the Commission, except that the Licensee may lease or otherwise dispose of interests in project lands or property without specific written approval of the Commission pursuant to the then current regulations of the Commission. The provisions of this article are not intended to prevent the abandonment or the retirement from service of structures, equipment, or other project works in connection with replacements thereof when they become obsolete, inadequate, or inefficient for further service due to wear and tear; and mortgage or trust deed or judicial sales made thereunder, or tax sales, shall not be deemed voluntary transfers within the meaning of this article.

Article 6. In the event the project is taken over by the United States upon the termination of the license, as provided in Section 14 of the Act, or is transferred to a new licensee under the provisions of Section 15 of the Act, the Licensee, its successors and assigns will be responsible for and will make good any defect of title to or of right of occupancy and use in any of such project property which is necessary or appropriate or valuable and serviceable in the maintenance and operation of the project, and will pay and discharge, or will assume responsibility for payment and discharge, of all liens or incumbrances upon the project or project property created by the Licensee or created or incurred after the issuance of the license: *Provided,* That the provisions of this article are not intended to require the Licensee, for the purpose of transferring the project to the United States or to a new Licensee, to acquire any different title to or right of occupancy and use in any of such project property than was necessary to acquire for its own purposes as Licensee.

Article 7. The actual legitimate original cost, estimated where not known, and the accrued depreciation of the project as of the effective date of the license shall be determined by the Commission in accordance with the Act and the rules and regulations of the Commission, and such cost less such accrued depreciation, so determined, shall be the net investment in the project as of such effective date.

Article 8. After the first 20 years of operation of the project under the license, six percent per annum shall be the specified rate of return on the net investment in the project for determining surplus earnings of the project for the establishment and maintenance of amortization reserves, pursuant to Section 10(d) of the Act; one-half of the project surplus earnings, if any, accumulated after the first 20 years of operation under the license, in excess of six percent per annum on the net investment, shall be set aside in a project amortization reserve account as of the end of each fiscal year: *Provided*, That, if and to the extent that there is a deficiency of project earnings below six percent per annum for any fiscal year or years after the first 20 years of operation under the license, the amount of such deficiency shall be deducted from the amount of any surplus earnings accumulated thereafter until absorbed, and one-half of the remaining surplus earnings, if any thus cumulatively computed, shall be set aside in the project amortization reserve account; and the amounts thus established in the project amortization reserve account shall be maintained therein until further order of the Commission.

Article 9. For the purpose of determining the stage and flow of the stream or streams from which water is diverted for the operation of the project works, the amount of water held in and withdrawn from storage, and the effective head on the turbines, the Licensee shall install and thereafter maintain such gages and stream-gaging stations as the Commission may deem necessary and best adapted to the requirements; and shall provide for the required readings of such gages and for the adequate rating of such stations. The Licensee shall also install and maintain standard meters adequate for the determination of the amount of electric energy generated by said project works. The number, character, and location of gages, meters, or other measuring devices, and the method of operation thereof, shall at all times be satisfactory to the Commission and may be altered from time to time if necessary to secure adequate determinations, but such alteration shall not be made except with the approval of the Commission or upon the specific direction of the Commission. The installation of gages, the ratings of said stream or streams, and the determination of the flow thereof, shall be under the supervision of, or in cooperation with, the District Engineer of the United States Geological Survey having charge of stream-gaging operations in the region of said project, and the Licensee shall advance to the United States Geological Survey the amount of funds estimated to be necessary for such supervision or cooperation for such periods as may be mutually agreed upon. The Licensee shall keep accurate and sufficient record of the foregoing determinations to the satisfaction of the Commission, and shall make return of such records annually at such time and in such form as the Commission may prescribe.

Article 10. The Licensee shall install additional capacity or make other changes in the project as directed by the Commission, to the extent that it is economically sound and in the public interest to do so, after notice and opportunity for hearing.

Article 11. The Licensee shall, after notice and opportunity for hearing, coordinate the operation of the project, electrically and hydraulically, with such other projects or power systems and in such manner as the Commission may direct in the interest of power and other beneficial public uses of water resources, and on such conditions concerning the equitable sharing of benefits by the Licensee as the Commission may order.

Article 12. Whenever the Licensee is directly benefited by the construction work of another licensee, a permittee, or of the United States of a storage reservoir or other headwater improvement, the Licensee shall reimburse the owner of the headwater improvement for such part of the annual charges for interest, maintenance, and depreciation thereon as the Commission shall determine to be equitable, and shall pay to the United States the cost of making such determination as fixed by the Commission. For benefits provided by a storage reservoir or other headwater improvement of the United States the Licensee shall pay to the Commission the amounts for which it is billed from time to time for such headwater benefits and for the costs of making the determinations pursuant to the then current Commission Regulations under the Federal Power Act within 60 days from the date of rendition of a bill therefore and, upon failure to do so, shall thereafter be subject to the payment of the penalties specified in the then current Regulations. The Licensee shall have the right to pay such amounts under protest within the 60-day period and to reconsideration of the determination of the amounts billed or a hearing as provided by the then current Regulations under the Act.

Article 13. The United States specifically retains and safeguards the right to use water in such amount, to be determined by the Secretary of the Army, as may be necessary for the purposes of navigation on the navigable waterway affected; and the operations of the Licensee, so far as they affect the use, storage and discharge from storage of waters affected by the license, shall at all times be controlled by such reasonable rules and regulations as the Secretary of the Army may prescribe in the interest of navigation, and as the Commission may prescribe for the protection of life, health, and property, and in the interest of the fullest practicable conservation and utilization of such waters for power purposes and for other beneficial public uses, including recreational purposes; and the Licensee shall release water from the project reservoir at such rate in cubic feet per second, or such volume in acre-feet per specified period of time, as the Secretary of the Army may prescribe in the interest of navigation, or as the Commission may prescribe for the other purposes hereinbefore mentioned.

Article 14. On the application of any person, association, corporation, Federal agency, State or municipality, the Licensee shall, after notice and opportunity for hearing, permit such reasonable use of its reservoirs or other project properties, including works, lands and water rights, or parts thereof, as may be ordered by the Commission in the interest of comprehensive development of the waterway or waterways involved and the conservation and utilization of water resources of the region, for water supply for the purpose of steam-electric, irrigation, industrial, municipal or similar uses. The Licensee shall receive reasonable compensation, at least full reimbursement for any damages or expenses which the joint use causes him to incur, for use of its reservoirs or other project properties or parts thereof for such purposes, any such compensation to be fixed by the Commission either by approval of an agreement between the Licensee and the party or parties benefiting or after notice and opportunity for hearing. Applications shall contain information in sufficient detail to afford a full understanding of the proposed use, including satisfactory evidence that the applicant possesses necessary water rights pursuant to applicable State law, or a showing of cause why such evidence cannot be concurrently submitted, and a statement as to the relationship of the proposed use to any State or municipal plans or orders which may have been adopted with respect to the use of such waters.

Article 15. In the construction or maintenance of the project works, the Licensee shall place and maintain suitable structures and devices to reduce to a reasonable degree the liability of contact between its transmission lines and telegraph, telephone and other signal wires or power transmission lines constructed prior to its transmission lines and not owned by the Licensee, and shall also place and maintain suitable structures and devices to reduce to a reasonable degree the liability of any structures or wires falling or obstructing traffic or endangering life. None of the provisions of this article are intended to relieve the Licensee from any responsibility or requirement which may be imposed by other lawful authority for avoiding or eliminating inductive interference.

Article 16. The Licensee shall, for the conservation and development of fish and wildlife resources, construct, maintain, and operate, or arrange for the construction, maintenance and operation of such facilities and comply with such reasonable modifications of the project structures and operation as may be ordered by the Commission upon its own motion or upon the recommendation of the Secretary of the Interior or the fish and wildlife agency or agencies of any State in which the project or a part thereof is located, after notice and opportunity for hearing and upon findings based on substantial evidence that such facilities and modifications are necessary and desirable, reasonably consistent with the primary purpose of the project, and consistent with the provisions of the Act.

Article 17. Whenever the United States shall desire, in connection with the project, to construct fish and wildlife facilities or to improve the existing fish and wildlife facilities at its own expense, the Licensee shall permit the United States or its designated agency to use, free of cost, such of Licensee's lands and interest in lands, reservoirs, waterways and project works as may be reasonably required to complete such facilities or such improvements thereof. In addition, after notice and opportunity for hearing, the Licensee shall modify the project operation as may be prescribed by the Commission, reasonably consistent with the primary purpose of the project, in order to permit the maintenance and operation of the fish and wildlife facilities constructed or improved by the United States under the provisions of this article. This article shall not be interpreted to place any obligation on the United States to construct or improve fish and wildlife facilities or to relieve the Licensee of any obligation under this license.

Article 18. The Licensee shall construct, maintain and operate or shall arrange for the construction, maintenance and operation of such recreational facilities including modifications thereto, such as access roads, wharves, launching ramps, beaches, picnic and camping areas, sanitary facilities and utilities, and shall comply with such reasonable modifications of the project structures and operations as may be prescribed hereafter by the Commission during the term of this license upon its own motion or upon the recommendation of the Secretary of the Interior or other interested Federal and State agencies, after notice and opportunity for hearing and upon findings based upon substantial evidence that such facilities and modifications are necessary and desirable, and reasonably consistent with the primary purpose of the project.

Article 19. So far as is consistent with proper operation of the project, the Licensee shall allow the public free access, to a reasonable extent, to project waters and adjacent project lands owned by the Licensee for the purpose of full public utilization of such lands and waters for navigation and recreational purposes, including fishing and hunting, and shall allow to a reasonable extent for such purposes the construction of access roads, wharves, landings, and other facilities on its lands the occupancy of which may in appropriate circumstances be subject to payment of rent to the Licensee in a reasonable amount: *Provided*, That the Licensee may reserve from public access, such portions of the project waters, adjacent lands, and project facilities as may be necessary for the protection of life, health, and property: *And provided, further*, That the Licensee's consent to the construction of access roads, wharves, landings, and other facilities shall not, without its express agreement, place upon the Licensee any obligation to construct or maintain such facilities. These facilities are in addition to the facilities that the Licensee may construct and maintain as required by the license.

Article 20. The Licensee shall be responsible for and shall take reasonable measures to prevent soil erosion on lands adjacent to the stream and to prevent stream siltation or pollution resulting from construction, operation or maintenance of the project. The Commission upon request, or upon its own motion, may order the Licensee to construct and maintain such preventive works to accomplish these purposes and to revegetate exposed soil surface as the Commission may find to be necessary after notice and opportunity for hearing.

Article 21. There is reserved to the appropriate department or agency of the United States, or of the State or county involved, the right to take over, maintain, and supervise the use of any project road as a public road.

Article 22. The Licensee shall clear and keep clear to an adequate width lands along open conduits and shall dispose of all temporary structures, unused timber, brush, refuse, or inflammable material resulting from the clearing of lands or from the maintenance or alteration of the project works. In addition, all trees along the margins of reservoirs which may die during operations of the project shall be removed. The clearing of the lands and the disposal of the material shall be done with due diligence and to the satisfaction of the authorized representative of the Commission.

Article 23. Insofar as any material is dredged or excavated in the prosecution of any work authorized under the license, or in the maintenance of the project, such material shall be removed and deposited so it will not interfere with navigation, and will be to the satisfaction of the District Engineer, Department of the Army, in charge of the locality.

Article 24. Whenever the United States shall desire to construct, complete, or improve navigation facilities in connection with the project, the Licensee shall convey to the United States, free of cost, such of its lands and its rights-of-way and such right of passage through its dams or other structures, and permit such control of pools as may be required to complete and maintain such navigation facilities.

Article 25. The Licensee shall furnish free of cost to the United States power for the operation and maintenance of navigation facilities at the voltage and frequency required by such facilities and at a point adjacent thereto whether said facilities are constructed by the Licensee or by the United States.

Article 26. The operation of any navigation facilities which may be constructed as a part of or in connection with any dam or diversion structure constituting a part of the project works shall at all times be controlled by such reasonable rules and regulations in the interest of navigation, including the control of the level of the pool caused by such dam or diversion structure, as may be made from time to time by the Secretary of the Army.

Article 27. The Licensee shall for the protection of navigation, construct, maintain and operate at its own expense such lights and other signals on fixed structures in or over navigable waters of the United States as may be directed by the Secretary of the Department in which the Coast Guard is operating.

Article 28. If the Licensee shall cause or suffer essential project property to be removed or destroyed or to become unfit for use, without adequate replacement, or shall abandon or discontinue good faith operation of the project for a period of three years, or refuse or neglect to comply with the terms of the license and the lawful orders of the Commission mailed to the record address of the Licensee or its agent, the Commission will deem it to be the intent of the Licensee to surrender the license, and not less than 90 days after public notice may in its discretion terminate the license.

Article 29. Upon abandonment of the project the Licensee shall remove all structures, equipment and power lines from the stream and restore said stream to a condition satisfactory to the Commission's authorized representative and shall fulfill such other obligations under the license as the Commission may prescribe.

Article 30. The right of the Licensee and of its transferees and successors to use or occupy waters, over which the United States has jurisdiction, under the license, for the purpose of maintaining the project works or otherwise, shall absolutely cease at the end of the license period, unless Licensee has obtained a new license pursuant to the then existing laws and regulations or an annual license under the terms and conditions of this license.

Article 31. The terms and conditions expressly set forth in the license shall not be construed as impairing any terms and conditions of the Federal Power Act which are not expressly set forth herein.

CITIES SERVICE GAS COMPANY, DOCKET NO. CP67-90

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 6, 1966)

On October 10, 1966, Cities Service Gas Company (Applicant), filed in Docket No. CP67-90 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas to The Gas Service Company (Gas Service) for resale and distribution by it to consumers in and about the City of Sheldon, Missouri, all as more fully set forth in the application.

Applicant seeks authority to sell and deliver gas to Gas Service through the existing Jasper-Lamar meter for resale by Gas Service to the consumers in Sheldon, Missouri and environs. No facilities will be constructed or installed by Applicant, and Gas Service will transport the gas through facilities it will construct from its 6-inch pipeline near Lamar, Missouri, to the vicinity of Sheldon, Missouri. The proposed sale for resale will be made under Cities' F-2, C-2 and I-2 FPC Gas Rate Schedules.

Peak day and annual requirements and deliveries, firm and interruptible for the first three years are estimated to be:

Year	1	2	3
Peak day—Mcf.:			
Requirements firm	172	225	279
Requirements int	290	290	290
Total	462	515	569
Deliveries firm	172	225	279
Deliveries int			
Total	172	225	279
Annual—Mcf.:			
Requirements firm	13,300	17,500	21,700
Requirements int	60,000	60,000	60,000
Total	73,300	77,500	81,700
Deliveries firm	13,300	17,500	21,700
Deliveries int	54,000	54,000	54,000
Total	67,300	71,500	75,700

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G–298 (4 FPC 471).

(2) The proposed sale and delivery of natural gas, as hereinbefore described and as more fully described in the application in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed sale and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Cities Service Gas Company authorizing the sale and delivery of natural gas as hereinbefore described and as more fully described in the application in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable

Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

(C) Applicant shall file pursuant to Part 154 of the Commission's Regulations an acceptable service agreement reflecting the terms and conditions of the sale and the delivery point.

(D) The service authorized shall be commenced as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

EL PASO NATURAL GAS COMPANY, DOCKET NOS. CP67-60 AND CP67-61

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 6, 1966)

On September 12, 1966, El Paso Natural Gas Company (Applicant) filed in Docket Nos. CP67-60 and CP67-61 budget-type applications pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for certificates of public convenience and necessity authorizing the construction during the calendar year 1967, and the operation of gas-purchase facilities to enable Applicant to attach to its Southern and Northwest Division Systems, respectively, natural gas which will be purchased from authorized independent producers or similar sellers thereof, all as more fully set forth in said applications.

The purpose of the subject applications is to augment Applicant's ability to act with reasonable dispatch in contracting for and attaching to its Southern (Docket No. CP67-60) and Northwest Division (Docket No. CP67-61) Systems new or expanded supplies of natural gas in various producing areas generally coextensive with said systems.

In consideration of Applicant's forthcoming divestiture of its Northwest Division facilities to Northwest Pipeline Corporation (Northwest) the budget-type authorization sought therefor is intended to encompass and be applicable to only those facilities and activities of Applicant's Northwest Division System. Upon divestiture of such system to Northwest, such authorization is also intended by Applicant to be applicable, upon appropriate order of the Commission, to Northwest.

The total estimated cost for the facilities proposed in the application filed in Docket No. CP67-60 (Southern Division System) will not exceed $2,000,000, with the total cost of any one project not to exceed $500,000. The total estimated cost for the facilities proposed in the application filed in Docket No. CP67-61 (Northwest Division System) will not exceed $500,000, with the total cost of any one project not to exceed $125,000.

Paragraph (F)(3) of the order issuing certificate to Applicant in Docket No. CP64-76 (accompanying Opinion No. 500, in the matter of Transwestern Pipeline Company, *et al.*, Docket No. CP63-204, *et al.*, 36 FPC 176) as corrected by order issued August 19, 1966, 36 FPC 491, contained a provision as to the amounts of prepayments for gas to be considered in setting rates. The authorization issued hereby does not alter, amend or modify the determination made in said order.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the subject applications has been filed.

At a hearing held on December 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the applications and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation with its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 29, 1942, in Docket Nos. G–242 and G–257 (3 FPC 851).

(2) The facilities hereinbefore described, as more fully described in the applications in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorizations granted hereinafter, statements in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificates hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorizations hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $2,000,000 and $500,000, with no single project to exceed a cost of $500,000 and $125,000, for Applicant's Southern and Northwest Division Systems, respectively.

The Commission orders:

(A) Upon the terms and conditions of this order, certificates of public convenience and necessity are issued authorizing Applicant, El Paso Natural Gas Company, to construct during the calendar year 1967, the proposed facilities hereinbefore described, as more fully described in the applications in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above statements in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificates issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorizations granted in paragraph (A) above are limited to construction during the calendar year 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $2,000,000 and $500,000, with no single project to exceed a cost of $500,000 and $125,000, for Applicant's Southern and Northwest Division Systems, respectively.

(E) The authorization issued hereby does not alter, amend or modify the condition as to the amount to be included for prepaid gas as in rate determinations set forth in ordering paragraph (F) (3) of the Commission's order issued July 26, 1966, as corrected August 19, 1966, accompanying Opinion No. 500 in Docket No. CP63-204, *et al.*

OPINION NO. 498-A

H. L. HAWKINS & H. L. HAWKINS, JR. (OPERATOR), ET AL., DOCKET NO. G-18077, ET AL.

OPINION AND ORDER AMENDING AND CONFIRMING ORDER REQUIRING REFUNDS

(Issued December 6, 1966)

Syllabus

1. It is now firmly established that cost evidence is not relevant to in-line determination—where refund is measured by excess above in-line price, cost evidence is irrelevant to a refund determination. P. 982.
2. Commission *reaffirms Amerada* holding that although "* * * distributors have failed or may fail to pass refunds received by them on to the ultimate consumers is not a ground for defeating the refund obligation of producers * * *." P. 983.
3. Quantity and continuity of gas supply will not be adversely affected to any appreciable extent by imposition of refund obligation in absence of prior warning. P. 983.
4. From time view of the law was enunciated by Court of Appeals on January 23, 1964, every producer either knew or should have known that refunds might be required of excess amounts collected under temporary certificates, even though certificates contained no explicit refund condition. P. 983.
5. Producer should not be excused from refund liability by reason of fact it furnished delivery facilities during period it was collecting in excess of in-line price; however, under instant circumstances, Commission *concludes* Kirby should not be required to make refunds. P. 985.
6. Commission *concludes* no refunds should be required where only well on property was plugged and abandoned in 1961. P. 985.
7. Motion for stay denied where order did not provide that refunds be made but provided only that such amounts be computed and placed in escrow or retained by producers pending further order. P. 985.
8. Upon rehearing, Commission *amends* and *confirms* order requiring refunds.

Commissioner O'Connor *concurring in part; dissenting in part.*

Commissioner Ross *not participating* in Docket No. CI60-610.
Commissioner Carver *not participating.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

BAGGE, *Commissioner:*

On July 22, 1966, the Commission issued its Opinion No. 498, 36 FPC 149, ordering partial refunds of amounts collected by certain independent natural gas producers in excess of the rates subsequently determined to be the proper initial rates in Texas Railroad Commission District No. 3. These excess amounts were collected while the producers were operating under temporary certificates which contained no express refund conditions. A balancing of the equities indicated that refunds in full should not be ordered. No refunds were ordered of excess amounts collected but later disbursed in payment of production taxes which cannot be recouped, or in payment of royalties or overriding royalties. Nine applications for rehearing have been filed.[1] Hunt also moved for stay of the order accompanying Opinion No. 498, and for an evidentiary hearing.

On examination of the rehearing applications, we find that a number of the points raised therein are restatements of arguments previously advanced which have been dealt with and which do not warrant further discussion here. We direct our attention to the remaining matters.

Shell contends[2] that the Commission held irrelevant "all equities against imposing refunds." This is not the case. For example, refunds of amounts paid out for royalties and production taxes were not required in certain circumstances. Also, we have held many of the considerations advanced by the producers to be relevant, but of insufficient weight to overcome "the ordinary equitable principle that one who has collected rates in excess of the rates determined to be proper should return the excess."[3]

Shell also argues that it was denied a fair hearing by the Commission's refusal to order a second stage of hearing on the in-line price "for the reason that evidence on the refund issue is irrelevant."[4] Evidence offered on the refund issue had already been received during the hearing, and was considered by the Commission. We declined to order a further hearing for reception of evidence of producer costs because that evidence was held irrelevant. The proffered evidence of the proportion of refunds previously ordered which have reached the ultimate consumer was also held irrelevant. Shell's basic argument is not that fair hearing has been denied, but that the Commission erred in holding certain evidence irrelevant.

It is now firmly established that cost evidence is not relevant to in-line price determinations.[5] Where the refund to be required is measured by the excess above an in-line price, cost evidence is irrelevant to a refund determination.

Shell, joined by the other applicants, argues that we should examine evidence showing that refunds in the past have resulted in windfalls to pipelines and distributors, with only a small portion of the refunds reaching the ultimate consumer. Under the terms of our orders in the present cases the applicants will not be required to relinquish the funds involved unless and until provision has been made for pipelines to flow these refunds through to the limits of our jurisdiction. Under these circumstances, the evidence of the producers as to the past is not relevant or material here. See *Amerada Petroleum Corporation, et al.*, Opinion No. 501, 36 FPC 309, at pp. 311, 312, confirmed in Opinion No. 501–A, issued this day, *supra*, p. 962, where we said: "The argument that distributors have failed or may fail to pass refunds received by them on to the ultimate consumers is not a ground for defeating the refund obligation of the producers, although it may be a ground for requiring that refunds be placed in escrow or that the producer retain them, paying interest thereon, until suitable arrangements can be made to see that refunds are flowed through * * *." We shall continue to do everything in our power to improve techniques to convey these funds to the ultimate consumer.

[3] *Skelly Oil Company, et al.* Opinion No. 492-A, 36 FPC 143, page 144 (July 21, 1966).

[4] Application, page 2.

[5] *United Gas Improvement Co. v. Callery Properties, Inc.,* 382 U.S. 223 (1965).

Hunt argues that the Commission's action is contrary to the express holding of the court in *P.S.C. of the State of New York* v. *F.P.C.*, 329 F. 2d 242, 250 (1964), that it was "The Commission's duty to consider the extent to which a refund obligation in the absence of a prior warning will, by increasing the risk producers must bear, affect the quantity and continuity of the supply of gas * * *."[6] It is our conclusion that the quantity and continuity of the supply of gas will not be adversely affected to any appreciable extent.

Superior and Skelly reiterate the arguments previously rejected that a burden or measure of proof has been imposed upon the applicants to show that refunds are inequitable. This contention was sufficiently dealt with in *Skelly Oil Company, et al.*, in Opinion No. 492–A, page 144:

> There was no question of burden or measure of proof in this proceeding. The statements of the producers as to the relevant facts were accepted at their face value without presentation of evidence. The only burden cast upon the producers was to set forth any particular equities which would be peculiarly within their knowledge, and which would outweigh the ordinary equitable principle that one who has collected rates in excess of the rate determined to be proper should return the excess.

In the present proceeding the producers did in fact introduce evidence as to the equities involved.

Some of the applicants argue that refund of excess amounts collected but later paid out in royalties should not be required even after February 1, 1964. We held that on that date producers should be considered to have knowledge that refunds might be required by reason of the doctrine declared by the Court of Appeals for the District of Columbia in *P.S.C. of the State of New York* v. *F.P.C.*, 329 F. 2d 242, issued January 23, 1964. As a legal matter the producers, like any other persons, might be charged with knowledge of what the law was, even prior to the time that it was first declared by a court and even though the Commission had previously held a different view. As a matter of equity, however, we think that the producers should not be charged with the knowledge of the law as declared by the Court of Appeals prior to the time of that court's decision. From the time this view of the law was enunciated by the court, every producer either knew or should have known that refunds might be required of excess amounts collected under temporary certificates, even though these certificates contained no explicit refund conditions.

The argument that it is virtually impossible for a producer to protect itself by withholding royalty payments or by obtaining indemnification agreements is entitled to little weight under these circumstances. Many temporary certificates now issued by this Commission contain express refund conditions. The amounts of possible refunds are undetermined until a permanent certificate has issued. The applicants here, after February 1, 1964, were in a similar position.

---

[6] Application, page 7.

Skelly has alleged numerous errors in its application for rehearing. All but one of these have been previously dealt with in the opinions in this proceeding or in *Skelly Oil Company, et al.*, Opinion Nos. 492, 35 FPC 849, and 492–A, *supra.* Skelly argues that it was offered a temporary certificate with an express refund condition in Docket No. G–20155, but declined to accept it, and that thereafter on November 2, 1961, the Commission revised the proffered temporary certificate, eliminating the refund condition and finding that Skelly would be permitted to render service under its rate schedule "without any conditions relating to initial prices." This is somewhat misleading as to what actually occurred. The Commission's prior order issuing certificates[7] permitted all but two of the 53 producers certificated to collect the initial prices proposed, subject to conditions providing for the future determination by the Commission of the proper initial prices for the sales and providing for refunds of amounts in excess of the prices determined proper. Thereafter, applications for rehearing were filed and rehearing was granted for purposes of reconsideration. The Commission[8] modified its prior order to provide that producers who charged rates above the guideline prices would not be allowed to collect them until an evidentiary record established the proper price, and that the other producers (whose prices were not above the guideline) would be issued temporary certificates without price conditions. The part of the Commission order quoted by Skelly appears at 26 FPC 683. It is a general statement and is not directed to the Skelly docket in particular; it is directed toward the determination of the initial price and not toward any determination of whether or not refunds might be required. Also, as pointed out by the Circuit Court of Appeals in *P.S.C. of the State of New York* v. *F.P.C.*, *supra*, the refund condition here imposed upon Skelly is not a condition of the temporary certificate. The implication in Skelly's argument is that the Commission first tendered a conditioned temporary certificate and then, after its rejection, proceeded to tender an unconditioned temporary, with an assurance that there would be no refunds required, in order to persuade Skelly to dedicate its gas to interstate commerce. The facts are directly contrary to this implication. The Commission amended its earlier order as a result of arguments presented by many producers. It did not amend the temporary certificate in order to persuade Skelly or any other producer to dedicate its gas, and the quoted language was directed not to the elimination of refund conditions but primarily to the initial price to be established. Under these circumstances, we conclude that Skelly has shown no equity which would set it apart from the other producers.

Kilroy also contends that the Commission's order of November 2, 1961, "was a final appealable order in which the Commission determined that a refund condition should not be imposed upon Kilroy's temporary or permanent certificate."[9] The portion of that order applicable to Kilroy, and quoted by Kilroy at page 3 of its application, stated that the authorization in the temporary certificate also would be "without modification pending issuance of permanent certificates."[10] This is a clear indication that the Commission intended to decide nothing with respect to the permanent certificates. Also, the quoted language was directed to the initial price to be established and not to any possible refunds. Kilroy was issued a permanent certificate which contained a refund condition, and this permanent certificate was later withdrawn. This was not a final determination that no refunds would be required. The refund condition in the original permanent certificate was part of one of the early attempts on the part of the Commission to effectuate a recouping system of price regulation. It became apparent from the arguments presented on applications for rehearing that the proposed method would not work and the certificate was withdrawn, but without any determination as to what conditions would be incorporated in the permanent certificate finally issued. There was no final or appealable order upon that question.

[8] By order issued November 2, 1961, 26 FPC 677.

[9] Application, page 4.

[10] 26 FPC 667, 683.

Kirby collected 17.5 cents per Mcf for its sales from July of 1960 to October 10, 1961. On the later date the pipeline purchaser exercised its option to purchase Kirby's gathering system through which the gas was delivered. Thereafter the price was reduced by 2 cents per Mcf to 15.5 cents per Mcf. Kirby argues that 2 cents of the original 17.5-cent price is attributable to the delivery by Kirby through its gathering service for the July 1960-October 1961 period, and that it should not be required now to make refunds of the 1.5 cents per Mcf collected during that period in excess of the 16-cent in-line price. We have held in this proceeding that a producer who furnishes delivery facilities is not for that reason alone entitled to a price greater than the in-line price and that the furnishing of delivery facilities is not in itself sufficient to make it inequitable for refunds to be ordered. Accordingly, Kirby should not be excused from its refund responsibility by reason of the fact that it furnished delivery facilities during that period when it was collecting in excess of the in-line price. Upon examination of all the circumstances in this case, however, we conclude that Kirby should not be required to make refunds.

Hawkins did not file any brief or statement of facts in connection with the equities in its case. On August 17, 1966, however, it filed an application for rehearing. It is there pointed out that the sales made by Hawkins took place from August, 1959 to June 1, 1961, at which time Hawkins sold the property to Johnson & McCurdy (Operator), *et al.* Johnson & McCurdy filed nothing at all with respect to the refund question but there is pending an application for abandonment in this docket. It appears that the only well on the property in question was plugged and abandoned October 23, 1961. The total refund, exclusive of royalties and of nonrecoupable taxes, amounts to approximately $750. There has been a suspension of service as a matter of necessity, even though no formal abandonment has yet been approved. The share of refunds to be borne by Johnson & McCurdy is small. The Hawkins share of refunds, while larger, is still of minor proportions and relates to operations which occurred more than five years ago. The cost and effort of proceeding with formal reports attempting to deal with transactions no longer related to a current operation is, under all the circumstances, disproportionate to the benefits which might be derived from the amount of refunds. Accordingly, we conclude that no refunds should be required of Hawkins or Johnson & McCurdy and our order requiring refunds will be amended to reflect this conclusion.

No substantial reason has been advanced why stay should be had of the order accompanying Opinion No. 498. That order did not provide that refunds should be made; it provided only that the amounts of such refunds should be computed and that these amounts should be placed in escrow or retained by the producers pending further order of the Commission. In the event the in-line price is modified by court order, this will be taken into account in a later order disposing of the refund amounts.

The Commission finds:

(1) The assignments and grounds for rehearing set forth in the applications for rehearing filed in this proceeding by Shell Oil Company, Skelly Oil Company, W. S. Kilroy (Operator), *et al.*, Marathon Oil Company, The Superior Oil Company, Sun Oil Company, H. L. Hunt, Hassie Hunt Trust, Caroline Hunt Sands, Caroline Hunt Trust Estate, Lamar Hunt Trust Estate, Nelson Bunker Hunt and Placid Oil Company present no new facts or legal principles which would warrant any change or modification in the Commission's Opinion No. 498 in this proceeding issued July 22, 1966.

(2) Upon consideration of all the equities, Kirby Petroleum Company (Operator), H. L. Hawkins & H. L. Hawkins, Jr. (Operator), *et al.* and Johnson & McCurdy (Operator), *et al.* should not be required to make refunds of any amounts collected by them during the period of their operation under temporary certificates of public convenience and necessity in Docket Nos. G–18077 and CI60–610.

The Commission orders:

(A) Appendix A to Opinion No. 498 and its accompanying order issued July 22, 1966, is hereby amended by deleting therefrom:

G–18077 H. L. Hawkins & H. L. Hawkins, Jr., Operator, *et al.*, 17.5 and CI60–610 Kirby Petroleum Company, Operator, 17.5,[5] and Footnote 5 thereto.

(B) Except as amended and modified herein, Opinion No. 498 and its accompanying order, issued July 22, 1966, are in all respects confirmed.

(C) The motions of H. L. Hunt, Hassie Hunt Trust, Caroline Hunt Sands, Caroline Hunt Trust Estate, Lamar Hunt Trust Estate, Nelson Bunker Hunt and Placid Oil Company for stay of the order accompanying Opinion No. 498, and for an evidentiary hearing, are denied.

Commissioner O'Connor *concurs* in the result in Docket Nos. G–18077 and CI60–610. In addition, he would grant the relief requested in the other applications for rehearing for the reasons stated in his dissent to Opinion No. 498, *supra*, at p. 156. Commissioner Ross *not participating* in this decision with respect to Docket No. CI60–610. Commissioner Carver *not participating.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP66–170

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 6, 1966)

On December 1, 1965, Natural Gas Pipeline Company of America (Applicant), filed in Docket No. CP66–170 an application and a supplement thereto on October 21, 1966, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a supply pipeline extending from the outlet side of the Henry Processing Plant of Texaco Inc., and miscellaneous facilities appurtenant thereto in the Erath Field, Vermilion Parish, Louisiana, to Applicant's existing natural gas transmission system in southwest Cameron Parish, Louisiana, to enable Applicant to take into its main pipeline system natural gas proposed to be purchased from Texaco Inc. (Texaco), all as more fully set forth in the application and supplement thereto.

The application reflects that Applicant and Texaco terminated the contract of August 10, 1965, providing for the purchase of 2.4 billion Mcf of natural gas and have entered into a new contract dated October 18, 1966, providing for the purchase of 1.4 billion Mcf of natural gas (the developed portion of the reserves covered by the previous contract).

Texaco was granted a temporary authorization for the sale of 1.4 billion Mcf of natural gas on November 18, 1966 in Docket No. CI67–505.

Applicant proposes to install approximately 114 miles of 30-inch pipeline, a purchase meter station and miscellaneous other facilities appurtenant thereto, at an estimated total cost of $19,463,000. Applicant states that it will finance this cost with funds to be obtained through interim and permanent financing.

After due notice, petitions to intervene in support of the application were filed by The Peoples Gas Light and Coke Company (Peoples Gas) and North Shore Gas Company on December 27, 1965. Iowa Electric Light and Power Company by telegram received by the Commission on December 27, 1965, stated its petition to intervene was not in opposition to Commission disposition of the application under its abbreviated procedures. No other petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and supplement thereto and exhibits submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 7, 1958, in Docket No. G–9966 (20 FPC 694).

(2) The proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce, as more fully described in the application filed in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Natural Gas Pipeline Company of America, authorizing the construction and operation of the facilities, and the transportation of natural gas as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The proposed facilities shall be completed and the transportation of gas authorized in paragraph (A) above shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 1 year of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-78

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 6, 1966)

On September 23, 1966, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant), filed in Docket No. CP67-78 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of an additional delivery point for the delivery of natural gas to The Manufacturers Light and Heat Company (Manufacturers), an existing customer, to enable Manufacturers to meet the requirements of its northwestern Pennsylvania market area during the 1966-67 winter heating season and thereafter, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate a mainline tap and appurtenant metering facilities on its 30-inch pipeline in Highland Township, Elk County, Pennsylvania.

Deliveries of natural gas by Applicant to Manufacturers at the new point will be made from Applicant's current authorized allocation to Manufacturers.

The gas to be delivered through the new facilities will be purchased under Applicant's Rate Schedule CD-4, which is the applicable rate schedule for present sales and deliveries to Manufacturers.

The total estimated cost of Applicant's proposed facilities is $24,713, which cost will be financed from current operating funds.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on December 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., a Delaware corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as

heretofore found by the Commission in its order of July 15, 1947 in Docket No. G-910 (6 FPC 777).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., authorizing construction and operation of the facilities hereinbefore described, as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Regulations under the Natural Gas Act, within 3 months from the date on which this order issues.

(D) Applicant shall file with the Commission a revised service agreement with Manufacturers reflecting the facilities and service authorized herein.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP66-149 (PHASE I)

FINDINGS AND ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 6, 1966)

On September 26, 1966, Texas Gas Transmission Corporation (Applicant) filed in Docket No. CP66-149 (Phase I) an application to amend further the Commission's order issued April 12, 1966, 35 FPC 493, in said docket, as amended by order issued July 12, 1966, 36 FPC 55, by authorizing in Applicant's Zone 2 an increase of 940 Mcf in the contract demand of an existing customer, Western Kentucky Gas Company (Western Kentucky), all as more fully set forth in the application to amend further.

The order of April 12, 1966, authorized Applicant, among other things, to construct and operate certain facilities and to increase the contract demands of certain of its existing customers. That order authorized Applicant to sell and deliver to Western Kentucky 34,500 Mcf of gas on a contract demand basis for the 1966–67 winter heating season in Zone 2.

Specifically, at Western Kentucky's request, Applicant now proposes to increase the former's contract demand in Zone 2 by 940 Mcf to a total of 35,440 Mcf. No new facilities will be required to render the proposed increased service.

Due notice of the filing of the application to amend further and opportunity for hearing thereon has been given by publication in the Federal Register on October 13, 1966 (31 F.R. 13255). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued April 12, 1966, in Docket No. CP66–149 (Phase I), as amended on July 12, 1966, be further amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued April 12, 1966, in Docket No. CP66–149 (Phase I), as amended on July 12, 1966, is further amended by authorizing Applicant in its Zone 2 to increase by 940 Mcf the contract demand of Western Kentucky, commencing with the 1966–67 winter heating season, thereby increasing Western Kentucky's contract demand for Zone 2 from 34,500 Mcf to 35,440 Mcf, all as hereinbefore described and as set forth in the application to amend further.

(B) In all other respects said order, as amended, shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TRANSWESTERN PIPELINE COMPANY, DOCKET NO. CP67–105

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 6, 1966)

On October 20, 1966, Transwestern Pipeline Company (Applicant) filed in Docket No. CP67–105 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and operation of certain natural gas purchase facilities, all as more fully set forth in the application.

Applicant proposes to construct, relocate, alter and operate during the calendar year 1967, certain routine field facilities to augment its ability to make, with a minimum of delay, alterations in and additions to its existing facilities and to permit the connection to its pipeline system new supplies of natural gas in various producing areas adjacent to said system.

The total estimated cost of Applicant's proposed facilities will not exceed $1,500,000, and no single project will exceed a cost of $375,000. Said costs will be financed from funds made available to Applicant through its operations.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Transwestern Pipeline Company, a Delaware corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued on August 10, 1959, in Docket No. G–14871, *et al.* (22 FPC 391).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $1,500,000, with no single project to exceed a cost of $375,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Transwestern Pipeline Company, to construct during the calendar year 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is not to be construed as authorization to attach new customers or to increase the volume of sales to existing jurisdictional customers.

(E) The authorization issued hereby does not alter, amend or modify the condition as to the amount to be included for prepaid gas in rate determinations set forth in ordering paragraph (E) of the Commission's order issued July 26, 1966, accompanying Opinion No. 500, in Docket No. CP63-204, *et al.*, 36 FPC 176.

(F) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $1,500,000, with no single project to exceed a cost of $375,000.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67-21

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 6, 1966)

On July 28, 1966, United Gas Pipe Line Company (Applicant), filed in Docket No. CP67-21 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities for the sale and delivery of additional natural gas to the Town of Rayville (Rayville), Richland Parish, Louisiana, to meet the additional requirements of Rayville's electric generating plant as set out in Applicant's contract with Rayville, all as more fully set forth in the application.

Applicant seeks authorization for the installation and operation of the following:

Dual 500-B metric meters, together with appurtenant equipment, located at the Rayville, Town Border Station site, Rayville, Louisiana, replacing existing dual No. 4 Emco meters.

Applicant proposes to increase from 1,000 to 1,750 Mcf per day its deliveries of natural gas to the Town of Rayville.

The estimated net cost of Applicant's proposed facilities is $4,076, and will be financed out of current working funds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 1, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, and exhibits submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G–232 (3 FPC 863).

(2) The proposed construction and operation of facilities and transportation and delivery of natural gas as hereinbefore described, and as more fully described in the application, and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and transportation and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and transportation and delivery of natural gas as hereinbefore described and as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation and transportation of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by January 1, 1967.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CITY OF MARIETTA, TEXAS AND NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP67–18

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued December 7, 1966)

On July 25, 1966, the City of Marietta, Texas (Applicant), filed in Docket No. CP67–18 an application, as supplemented on August 30 and October 13, 1966, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing the Natural Gas Pipeline Company of America (Respondent), to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in the City of Marietta, and the communities of Bryans Mill, Piney Grove, Laws Chapel, Bivins and adjacent areas, all located in Cass County, Texas, all as more fully set forth in the application.

Applicant proposes that Respondent make physical connection of its transportation facilities with Applicant's proposed distribution facilities at a point where said transportation facilities cross Texas Highway No. 77 approximately 1 mile west of Douglassville, Texas. Applicant's proposed distribution system will extend from said point of physical connection to the above referenced communities. The pipeline to said communities will be used to serve customers along its route.

The total estimated volumes of natural gas necessary to meet Applicant's annual and peak day requirements in the third year of proposed operations are 65,000 and 800 Mcf, respectively.

The estimates of Applicant's natural gas requirements are based on an assumed attachment of 574 residences, 28 commercial establishments, 1 plant farm, 2 sawmills, 2 schools and 12 churches.

The proposed natural gas service will be rendered to Applicant under Respondent's effective FPC Rate Schedule G-1 which specifies a rate of 34.74 cents per Mcf at 14.65 psia.

Applicant estimates the cost of its proposed distribution system at $557,000, which cost is proposed to be financed through the implementation of an agreement dated June 16, 1966, between Applicant and the Department of Housing and Urban Development. Said agreement covers a system cost of $616,000, and is based on a proposed project including natural gas service to Douglassville, Texas, which community has since been eliminated from the instant proposal. The agreement is conditioned upon the obtaining of a $28.00 deposit from 525 prospective residential consumers and $50.00 deposits from each of the above referenced schools and commercial establishments.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

Respondent has filed no objection to the issuance by the Commission of an order as requested by Applicant.

The Commission finds:

(1) Respondent, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G-235 (3 FPC 830).

(2) Applicant, City of Marietta, Texas, is a municipal corporation organized and incorporated under the laws of the State of Texas and is legally empowered to construct and operate natural gas facilities and to sell and distribute natural gas in said city.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver up to 800 Mcf of natural gas per day to Applicant, as set forth in the application, as supplemented, and as hereinafter ordered and conditioned.

(4) This order should be conditioned as follows:

(a) Applicant shall be prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues;

(b) Applicant shall provide evidence that it has met the provision of paragraph 2 of Exhibit B to its loan agreement of June 16, 1966, with the Department of Housing and Urban Development; and

(c) Applicant shall enter into a service agreement with Respondent, which agreement shall be filed by Respondent in conformity with the Commission Regulations.

(5) The requirement that Respondent serve Applicant, as requested, will not place an undue burden upon Respondent nor impair its ability to render adequate service to existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 800 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application, as supplemented.

(B) The order issued by paragraph (A) above is conditioned as follows:

(1) Applicant shall be prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues;

(2) Applicant shall provide evidence that it has met the provision of paragraph 2 of Exhibit B to its loan agreement of June 16, 1966, with the Department of Housing and Urban Development; and

(3) Applicant shall enter into a service agreement with Respondent, which agreement shall be filed by Respondent in conformity with the Commission Regulations.

(C) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

THE DETROIT EDISON COMPANY, DOCKET NO. E-7318

SUPPLEMENTAL ORDER AUTHORIZING ISSUANCE OF GENERAL AND REFUNDING MORTGAGE BONDS

(Issued December 8, 1966)

By order issued November 29, 1966, 36 FPC 909, in the above-entitled matter, the Commission authorized The Detroit Edison Company (Applicant) to issue and sell at competitive bidding $100,000,000, principal amount of General and Refunding Mortgage Bonds, due 1996, subject among others, to the provisions set forth in paragraph (B) of that order as follows:

(B) The proposed issuance and sale of Bonds at competitive bidding shall not be consummated until:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

Applicant on December 8, 1966, filed an amendment, pursuant to the requirements of the aforementioned Commission order, setting forth, among other things, that it proposes to accept as providing the lowest annual cost of money to it, the bid of The First Boston Corporation and Halsey, Stuart & Co., Inc., to purchase the proposed issuance of $100,000,000, principal amount of Bonds, for the price of 99.26% of principal amount, with an interest rate of 6%.

The Commission finds:

(1) Applicant has satisfactorily complied with the requirements of paragraph (B) of the Commission's order issued November 29, 1966, in the above docket, and under the bid it proposes to accept for the Bonds, the price to be received by Applicant therefor and the interest rate thereof are reasonable.

(2) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by the Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

The Commission orders:

(A) The price to be received by Applicant for the proposed Bonds and the interest rate thereof under the bid referred to above, are approved as reasonable.

(B) The proposed issuance and sale of Bonds referred to above upon the terms and conditions and for the purposes specified in the application, as supplemented by the amendment referred to above, are authorized, subject only to the provisions of paragraphs (A), (C), (D) and (E) of the Commission's order issued November 29, 1966, in the above docket.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP65-196; AMERICAN GAS COMPANY OF WISCONSIN, INC., RP67-4; GREAT PLAINS NATURAL GAS COMPANY, RP67-6; MIDWEST NATURAL GAS, INC., RP67-7

ORDER AMENDING ORDER, ACCEPTING SETTLEMENT AGREEMENT AND TERMINATING PROCEEDINGS

(Issued December 8, 1966)

American Gas Company of Wisconsin, Inc., (American Gas) on July 29, 1966, and Great Plains Natural Gas Company (Great Plains) and Midwest Natural Gas, Inc., (Midwest) on August 8, 1966, filed petitions pursuant to Section 1.7

of the Commission's Rules of Practice and Procedure requesting that the Commission issue an order authorizing Northern Natural Gas Company (Northern) to reduce the first year contract demands prescribed for said Petitioners in Opinion No. 491, and accompanying order issued May 25, 1966, 35 FPC 790, in Docket No. CP65-196. In support thereof, Petitioners, among other things, set out that there was insufficient time between the time of certification and the period of maximum requirements to fully construct the facilities and distribution systems to receive and distribute the entire first year contract demand by October 27, 1966, the date on which Northern was authorized by the aforementioned order to begin deliveries.

Following conferences with Petitioners and the Staff, Northern, on October 26, 1966, filed a proposed settlement of the issues involved. The Agreement executed by all parties provides that (1) the aforementioned contract demand as authorized to each of the Petitioners in Opinion No. 491, shall become effective as of January 27, 1967, rather than October 27, 1966, as provided in said Opinion; (2) during the interim period from October 27, 1966 through January 26, 1967, Northern shall provide all firm and small volume requirements of Petitioners at the Zone B commodity rate of 25.21 cents per Mcf, but, in addition, Northern shall permit Petitioners to connect and serve large volume customers, but such service shall be subject to interruption, and (3) except for the aforementioned changes, all requirements of Opinion No. 491 shall be binding upon the parties. The Commission construes this filing as a petition to amend the authorization granted by Opinion No. 491.

Since Northern has no rate schedule on file applicable to the service proposed during the interim period, Northern requests that the tendered agreement be accepted for filing as a special rate schedule, that the Commission's Regulations be waived and that the schedule be permitted to become effective as of October 27, 1966. The tender was duly noticed (31 F.R. 14424) and no protests have been received.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act (1) that Opinion No. 491 and accompanying order issued in Docket No. CP65-196 be amended as hereinafter set out; (2) that the Settlement Agreement be accepted for filing as a special rate schedule and be permitted to be effective as of October 27, 1966; and (3) that Docket Nos. RP67-4, RP67-6 and RP67-7 be terminated.

The Commission orders:

(A) The Settlement Agreement filed by Northern in Docket Nos. RP67-4, RP67-6 and RP67-7 is hereby accepted for filing, to be effective as hereinafter provided.

(B) Opinion No. 491, issued May 25, 1966, in Docket No. CP65-196, is hereby amended to permit the operations of the facilities therein certificated so as to conform to the specifications of this order and as more explicitly set out in the aforementioned Settlement Agreement.

(C) The Settlement Agreement tendered on October 26, 1966, in Docket Nos. RP67-4, RP67-6 and RP67-7, is accepted for filing as a special rate schedule to be effective as of October 27, 1966.

(D) All other provisions of the order accompanying the aforementioned Opinion No. 491 shall remain unchanged.

(E) The proceedings in Docket Nos. RP67-4, RP67-6 and RP67-7 are hereby terminated.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP63-159

ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 8, 1966)

On May 25, 1966, Panhandle Eastern Pipe Line Company (Petitioner) filed in Docket No. CP63-159 a petition to amend the certificate of public convenience and necessity issued in the order accompanying Opinion No. 410 in said docket on November 12, 1963, 30 FPC 1260, requesting authorization for the transportation of natural gas for the purpose of hydrocarbon extraction by National Helium Corporation (National) at its plant located in the vicinity of Liberal, Kansas, all as more fully set forth in the petition to amend.

Petitioner entered into a contract dated October 2, 1961, to provide National with volumes of gas for the extraction of helium and hydrocarbons and for fuel and National, in turn, entered into a contract dated October 13, 1961, with the United States pursuant to the Helium Act amendments of 1961, providing for the supply of a helium-gas mixture to be used in the government's helium conservation program.

Following hearings before the Commission, Petitioner received a certificate of public convenience and necessity, issued in the instant docket on November 12, 1963, for the transportation of fuel to National's plant, conditioned, *inter alia*, upon Petitioner seeking authorization to transport natural gas for the purpose of hydrocarbon extraction to be performed by National.

Because of the condition referred to above, Petitioner declined to accept the authorization granted by the aforementioned certificate and sought rehearing and court review of the Commission's order. On April 27, 1966, the United States Court of Appeals for the Eighth Circuit affirmed the Commission's order in *Panhandle Eastern Pipe Line Company* v. *Federal Power Commission*, 359 F. 2d 675.

By the instant filing, Petitioner requests authorization for the transportation of natural gas for the purpose of hydrocarbon extraction by National at its plant located in the vicinity of Liberal, Kansas.

In 1963, National, a company jointly owned by Petitioner and National Distillers Corporation, completed construction of its helium extraction plant near Liberal, Kansas, and adjacent to Petitioner's pipeline system.

The cryogenic process resulting in the removal of helium involves the liquefaction and subsequent regasification of hydrocarbons in the natural gas stream flowing through the helium extraction plant. Although National's plant was designed basically to process 850,000 Mcf of gas per day, removing or shrinking the total throughput volume by an estimated 18,000 Mcf per day, actual experience indicates that the plant can process in excess of 1,000,000 Mcf of gas per day with an average shrinkage of 22,000 Mcf per day and a peak shrinkage of 27,000 Mcf per day. Petitioner estimates that the annual shrinkage will total 8,000,000 Mcf of gas as compared with 6,500,000 set forth in its original application.

Petitioner delivers gas to National immediately up-stream of the Liberal Compressor Station. After processing the gas, National normally returns to Petitioner all of the methane, ethane, and nitrogen and sufficient amounts of propane and butane to maintain a predetermined Btu level.

In the first full paragraph of Opinion No. 410 (30 FPC 1260) the Commission indicated that consideration of a higher payment by National to Petitioner for both fuel and shrinkage, with a consequent rate reduction to Petitioner's customers, should await a more complete record made in hearing upon any application filed by Petitioner to transport the shrinkage volume. Further consideration of this issue is unwarranted at this time in that Panhandle's present rates, resulting from a settlement approved in Docket No. RP66-21 on February 24, 1966, 35 FPC 258, reflect an allocation of cost to the sale to National substantially more than the contract price of 35 cents per Mcf. In return, the settlement agreement provided that so long as the rates provided for in that agreement shall remain in effect no further adjustment shall be made in Petitioner's rates or tariff on the basis of the effect of Petitioner's deliveries to National, as a result of any certificate proceeding which might be held if Opinion No. 410 and order issued November 12, 1963, were upheld on appeal.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued in the instant docket on November 12, 1963 (Opinion No. 410), be amended as hereinafter ordered and conditioned.

The Commission orders:

(A) The Commission's order issued on November 12, 1963 (Opinion No. 410), is amended so as to authorize Petitioner to transport natural gas through its existing facilities for the purpose of permitting National Helium Corporation to extract hydrocarbons therefrom in an amount not to exceed 27,000 Mcf per day or 8,000,000 Mcf per year, all as more fully described hereinabove.

(B) The authorization granted in paragraph (A) above is conditioned as follows:

(1) The delivery of natural gas to National shall be subject to interruption as necessary to maintain firm deliveries to all jurisdictional customers.

(2) The delivery of natural gas by Petitioner to National is limited to 1,025,000 Mcf per day and the redelivery by National to Petitioner shall be no less than 1,025,000 Mcf per day less shrinkage.

(3) During the period in which Petitioner's rates provided for in the Commission's order of February 24, 1966, in Docket No. RP66-21 shall remain in effect, if for any calendar year the annual average heating value of Petitioner's sales to jurisdictional customers shall be less than 982 Btu per cubic foot, then for each Btu below such 982 average, Petitioner shall, during the next following calendar year, apply to the commodity component of its jurisdictional billings, a downward adjustment equal to one-tenth of one percent of such component.

(C) In all other respects the subject order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP65-87

ORDER AMENDING ORDER AUTHORIZING EXPORTATION OF NATURAL GAS

(Issued December 8, 1966)

On September 13, 1966, Panhandle Eastern Pipe Line Company (Panhandle) filed in Docket No. CP65-87, as supplemented on October 17, 1966, an applica-

tion to amend the Commission's order issued February 4, 1965, as clarified and modified on April 29, 1965, 33 FPC 180, 903, in said docket to authorize the exportation of additional quantities of natural gas from the United States to Canada for sale to the Union Gas Company of Canada, Limited (Union Gas), all as more fully set forth in the application to amend, as supplemented, in this proceeding.

Pursuant to orders issued on April 23 and August 20, 1946, 5 FPC 472, 718, in Docket No. G-612, on April 23, 1946, in Docket No. G-619, 5 FPC 476, on February 4 and April 29, 1965, in Docket No. CP65-87 and pursuant to permits issued in Docket Nos. G-611 and G-10798, Panhandle was authorized to construct and operate facilities under the Detroit River to connect the Union Gas' facilities at the Canadian border and to export up to 15,500,000 Mcf of natural gas per year for sale and delivery to Union Gas. Panhandle now seeks authorization to export, by means of the existing facilities, additional quantities of natural gas for sale to Union Gas in accordance with a contract, dated August 26, 1966. The term of the contract is for a one year period from and including September 1, 1966, and from year to year thereafter until terminated by written notice given by one party to the other at least sixty days prior to the end of any such yearly period. Panhandle proposes to export and sell to Union Gas up to an additional 50,000 Mcf of natural gas per day on an interruptible basis during the seasonal period September through April. These winter deliveries will be completely interruptible on a daily basis and curtailable to the extent of 75 percent of the total seasonal deliveries which are limited to 8,000,000 Mcf.

On October 18, 1966, Panhandle filed an application in Docket No. G-10798 for further amendment of the related amended permit, as further amended, issued November 8, 1965, in such docket.

Notice of the filing of the instant application to amend was issued on September 20, 1966. This notice fixed October 17, 1966, as the last day for filing protests or petitions to intervene. On October 14, 1966, Union Gas filed a petition to intervene in support of the application. No protest or other petition to intervene has been filed in this proceeding. Opportunity for hearing has been given by the issuance of said notice and the publication thereof in the Federal Register on September 27, 1966 (31 F.R. 12652).

The Commission finds:

(1) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the Commission's order issued February 4, 1965, as clarified and modified on April 29, 1965 in Docket No. CP65-87, be amended as hereinafter ordered.

(2) The proposed exportation of additional quantities of natural gas by Applicant, Panhandle Eastern Pipe Line Company, as hereinabove described and as set forth in the application to amend, as supplemented, in Docket No. CP65-87, will not be inconsistent with the public interest within the meaning of Section 3 of the Natural Gas Act provided that said exportation be on the terms and conditions hereinafter set forth:

(a) Panhandle shall file annually, by March 31, a report for the previous year's operations pursuant to the authorization issued hereinafter, showing in Mcf at 14.73 psia the annual and peak day volumes delivered to and the total dollars and rate per Mcf received from Union. Panhandle shall file statements or reports with the Commission from time to time under oath and in such details as the Commission may require with respect to the whole or any part of the instant export operation.

(b) The authorization granted herein is not transferable or assignable and shall remain in full force and effect only so long as Panhandle continues the acts or operations herein authorized in accordance with the terms and conditions herein set forth.

(c) The authorization granted hereinafter for the exportation of the proposed additional quantities of natural gas shall automatically terminate upon the termination or expiration of the August 26, 1966 contract, attached as an exhibit to the application to amend in this proceeding, and, upon such termination, Panhandle shall forthwith notify the Commission in writing of the fact and date of said termination.

(d) Panhandle shall not, during the term of the authorization granted by this order, materially change or alter its export operations without first obtaining the permission and approval of the Commission.

(e) In the event that Panhandle should abandon or permanently cease for any reason whatsoever all or any part of the instant export operation prior to the termination date of the contract described in (c) hereof, Panhandle shall forthwith notify the Commission of said fact and the reason therefor.

(f) The maximum seasonal (September through April) volume and maximum daily volumes exported for sale to Union Gas should not exceed 8,000,000 Mcf and 50,000 Mcf, respectively, under the instant authorization.

(g) The export authorization hereinafter issued is granted on the express condition that the interruptible service authorized should be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Panhandle for firm service to its customers.

The Commission orders:

(A) The Commission's order issued February 4, 1965, as clarified and modified on April 29, 1965, in Docket No. CP65-87 is amended to authorize Panhandle to export additional quantities of natural gas from the United States to Canada for sale to Union Gas, as hereinabove described and as set forth in the application to amend, as supplemented, in this docket, upon the conditions set forth in Finding (2), above, and subject to the provisions of the Natural Gas Act and the Commission's Regulations issued thereunder.

(B) Panhandle shall inform the Commission of the date of commencement of service under the instant authorization within 20 days thereof.

(C) The related amended permit, as further amended, is released concurrently with the issuance of this order.

Before Commissioners: L. J. O'Connor, Jr., Acting Chairman; Charles R. Ross and John A. Carver, Jr.

ST. LAWRENCE GAS COMPANY, INC., DOCKET NO. G-17500

ORDER AMENDING ORDER AUTHORIZING THE IMPORTATION OF NATURAL GAS

(Issued December 8, 1966)

On June 21, 1966, St. Lawrence Gas Company, Inc. (Petitioner) filed in Docket No. G-17500, as supplemented on October 4, 1966, a petition to amend the Commission's order issued August 8, 1961, 26 FPC 265, in said docket, by authorizing Petitioner, by means of existing facilities at the international boundary, to import from Canada into the United States maximum annual and daily quantities of natural gas in amounts of 5,519,987 Mcf and 23,000 Mcf, respectively, in lieu of the present maximum quantities authorized by the order of August 8, 1961, all as more fully set forth in the petition to amend in this proceeding.

The order of August 8, 1961, among other things, authorized Petitioner to import natural gas from Canada, which gas was to be purchased from Niagara Gas Transmission, Limited (Niagara). Niagara purchases from Trans-Canada Pipe Lines, Limited (Trans-Canada) the gas sold to and imported by Petitioner. Ordering paragraph (A) of that order limited maximum annual and daily quantities of gas to be imported to 3,765,700 Mcf and 16,710 Mcf, respectively. In order to meet its increasing natural gas requirements, Petitioner now proposes to purchase from Niagara and import additional quantities of natural gas. Accordingly, Petitioner requests that ordering paragraph (A) of the order of August 8, 1961, be amended to authorize the importation of maximum annual and daily quantities of natural gas in the amounts of 5,519,987 Mcf and 23,000 Mcf, respectively.

Petitioner and Niagara have entered into a gas purchase contract, dated April 19, 1966, providing for the sale of the quantities of natural gas herein proposed to be imported. Niagara will purchase from Trans-Canada the additional quantities of gas to be sold to Petitioner.

The existing facilities at the international boundary to be utilized for the subject importation were authorized by a permit issued October 20, 1961, in Docket No. G–17501.

Notice of the filing of the instant petition to amend was issued on July 1, 1966. This notice fixed July 29, 1966, as the last day for filing protests or petitions to intervene. No protests or petitions to intervene have been filed in this proceeding. Opportunity for hearing has been given by the issuance of said notice and the publication thereof in the Federal Register on July 13, 1966 (31 F.R. 9514).

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the Commission's order issued August 8, 1961, in Docket No. G–17500 be amended as hereinafter ordered.

The Commission orders:

(A) Ordering paragraph (A) of the Commission's order issued August 8, 1961 in Docket No. G–17500, is amended to authorize Petitioner to import from Canada into the United States maximum annual and daily quantities of natural gas in the amounts of 5,519,987 Mcf and 23,000 Mcf, respectively, in lieu of the heretofore authorized maximum annual quantity of 3,765,700 Mcf and maximum daily quantity of 16,710 Mcf, all as hereinbefore described and as set forth in the petition to amend in this proceeding.

(B) In all other respects said order shall remain in full force and effect.

(C) The authorization granted in paragraph (A) above is conditioned upon, and Petitioner shall submit to the Commission evidence of, issuance of any related export authorization by the National Energy Board of Canada to Niagara.

OPINION NO. 502-A

SUN OIL COMPANY, ET AL., DOCKET NO. G-8592, ET AL.

MEMORANDUM OPINION AND ORDER CONFIRMING ORDER REQUIRING REFUNDS AND DENYING MOTIONS FOR STAY

(Issued December 8, 1966)

Syllabus

1. There is no reason to incur expense and delay of evidentiary hearing where, as here, parties seek to prove no facts which would change Commission's judgment. P. 1004.
2. Commission *confirms* prior order requiring refunds; *denies* rehearing and motions for stay.

Commissioner O'Connor *dissenting.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

On July 28, 1966, 36 FPC 317, the Commission issued Opinion No. 502 and its accompanying order in this proceeding, requiring refunds by seven natural gas producers of a part of the amounts collected by them in excess of the 20.6 cents per Mcf later determined to be the proper initial rate in the State of Mississippi. These excess amounts were collected while operating under temporary certificates without express refund conditions. Because a balancing of the equities indicated that refunds in full should not be ordered, no refunds were required of certain excess amounts collected but later disbursed in production tax payments which cannot be recouped or in royalty payments. In the case of Sun Oil Company, refunds were not required for the period prior to October 1, 1964, by reason of the terms of any earlier settlement. Applications for rehearing were filed by General American Oil Company of Texas (General American), Humble Oil & Refining Company (Humble), Texaco Inc., and The California Company, a Division of Chevron Oil Company (Calco). General American and Humble also moved to stay the ordering clauses of Opinion No. 502. By order issued September 9, 1966, we granted rehearing for the purpose of reconsideration.

We have found nothing in the applications for rehearing which would cause us to alter our prior determinations. Certain arguments of the applicants, however, deserve comment.

Calco states that Opinion No. 502 contains no discussion of Calco's specific sale or the other sales dealt with in that opinion, but relies solely on prior opinions of the Commission to which Calco was not a party and by which it cannot be bound. Calco and other applicants are not being held responsible for refunds in this proceeding on the basis of facts established in other proceedings. Calco and the other applicants herein have had full opportunity to set forth any facts and any evidence which they wish to present with respect to their particular circumstances. Calco has alleged no facts which would differentiate its case from those cited in Opinion No. 502. These cases were cited as established precedents applicable to the facts in this proceeding, and not as establishing the facts in this proceeding. See *Amerada Petroleum Corporation, et al.*, Opinion No. 501-A, *supra*, p. 962 at p. 964.

Texaco Inc. and Humble urge that an evidentiary hearing is required. They state (Humble application page 5, Texaco application pages 2-3): "Contrary to the statement contained at p. 318 of Opinion No. 502 that 'producers here were given full opportunity to submit briefs and statements of facts and *evi-*

dence which might bear upon the equities' [Emphasis supplied], no evidentiary hearing as contemplated by Opinion No. 445 was convened."

The applicants herein were offered full opportunity to furnish statements of the evidence which they wish to present as well as statements of any facts which would militate against refunds being required. No evidentiary hearing was convened because the facts alleged and statements of evidence put forward by these applicants were considered by the Commission to be not sufficient, if presented at a hearing, to change the determination reached by the Commission in Opinion No. 501.

In the present case there is no reason to incur the expense and delay of evidentiary hearings when the parties seek to prove no facts which would change the judgment of the Commission. For purpose of our determination in proceedings such as this we assume the facts to be as the applicants state, and we assume that the evidence they asked to introduce is before the Commission as though it had been introduced at a hearing, to the extent that such evidence would be relevant and admissible. Under these circumstances we think it possible for the Commission to reach a final determination without the formality of a hearing which would add nothing to aid our determinations.

No good ground for stay of the ordering clauses of Opinion No. 502 has been shown. *H. L. Hawkins & H. L. Hawkins, Jr. (Operator), et al.*, Opinion No. 498–A, *supra*, p. 981 at p. 985; *Amerada Petroleum Corporation, et al.*, Opinion No. 501–A at p. 965.

The Commission finds:

(1) The assignments of error and application for rehearing present no facts or legal principles which should warrant any change in or modification of the Commission's Opinion No. 502 in this proceeding, issued July 28, 1966.

(2) No good cause exists for granting the motions for stay of the ordering paragraphs of said Opinion No. 502.

The Commission orders:

(A) Opinion No. 502 and its accompanying order issued July 28, 1966, is in all respects confirmed.

(B) The relief requested on rehearing in the applications for rehearing filed in this proceeding is hereby denied.

(C) The motion for stay of the ordering paragraphs of Opinion No. 502 is denied.

(D) The extension of time to December 28, 1966, heretofore granted by the Secretary for filing the reports required by paragraph (A) of Opinion No. 502 and order issued July 28, 1966, is hereby confirmed.

Commissioner O'Connor *dissenting* in accordance with his dissent to Opinion No. 502, and would grant evidentiary hearings if necessary to establish the equities alleged by the Applicants.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

GULF STATES UTILITIES COMPANY, DOCKET NO. E-7315

ORDER AUTHORIZING THE ISSUANCE OF SECURITIES

(Issued December 9, 1966)

Gulf States Utilities Company (Applicant), a corporation organized under the laws of the State of Texas and doing business in the States of Texas and

Louisiana, with its principal business office at Beaumont, Texas, filed an application on October 14, 1966, for authorization pursuant to Section 204 of the Federal Power Act, to issue unsecured short-term Promissory Notes in the principal amount up to an aggregate of $31,000,000 outstanding at any one time. The Notes are to be issued to: (1) commercial banks and (2) in the form of commercial paper to commercial paper dealers.

The proposed Notes will be issued to evidence loans from Irving Trust Company and The Chase Manhattan Bank, both of New York, New York, pursuant to credit agreements dated May 31, 1966 and May 25, 1966, respectively, between Applicant and the two banks, under which agreements Applicant may borrow or reborrow at any time during the period from July 1, 1966 to December 31, 1966, inclusive, up to a total principal amount of $28,000,000 on notes which will mature on December 31, 1966. Under more recent agreements dated October 28 and 31, 1966, respectively, with the foregoing banks, Applicant is permitted to obtain unsecured loans up to an aggregate of $21,000,000 at any one time outstanding during the period from December 31, 1966 to December 31, 1967, on notes which will mature on December 31, 1967. The notes are to bear interest at the New York prime rate in effect at the time of the borrowings.

Applicant also plans to issue promissory notes in the form of commercial paper at a discount to banking firms that are engaged in the buying and selling of commercial paper. The banking firms will, in turn, offer the commercial paper for sale to investors at a price that will provide the buyer with a lower yield. The difference will constitute a commission to the banking firms. The discount rate will be dependent upon the length of time the notes are to be outstanding and money market conditions. All commercial paper will have a maturity of not more than nine months from the date of its issuance and the aggregate amount to be outstanding at any one time will not exceed the sum of (1) the dollar amount of the Company's receivables arising out of the sale of electricity, gas and merchandise, and (2) the dollar amount of the Company's fuel supply. As of August 31, 1966, the sum of these items for the Company totaled $14,418,438. Applicant anticipates that the commercial paper to be issued will carry an interest rate which in general will not go more than ¼% above the prime rate. Applicant is of the opinion that the issuance of commercial paper at a discount rate near the prime bank rate will result in savings in real interest costs because all of the proceeds can be used instead of having a portion of borrowed funds tied up in compensating balances as required by some banks. Under Section 204(e) of the Federal Power Act the Applicant is permitted to issue up to $21,160,000 in notes and drafts without Commission approval. As of November 14, 1966, the Applicant had outstanding notes of $9,706,000 issued under its agreements with the two banks and $5,950,000 outstanding in commercial paper.

Applicant plans to utilize the proceeds from the proposed issuance of Notes to furnish temporary, interim capital for the Applicant's construction program. This program has a cost of $31,558,000 for the first seven months of 1966 and a cost of $24,442,000 for the last five months of 1966 for a total 1966 cost of $56,000,000; and it has a total 1967 cost of $41,648,000. Principal items include the completion of a 440,000 kw generating unit at the Sabine generating plant, scheduled for completion in 1968; the commencement of construction of 580,000 kw generating unit at the Nelson Station and the commencement of construction of the 220,000 kw unit of Conroe generating plant in Texas.

Applicant contemplates undertaking permanent financing from time to time to discharge all or a portion of the proposed Notes then to be outstanding. The exact amount and type of securities to be issued, however, cannot be determined at this time.

Written notice of the application has been given to the Louisiana Public Service Commission and the Texas Railroad Commission, and to the Governor of each of those States. Notice has also been given by publication in the Federal Register on October 27, 1966 (31 F.R. 13814), stating that any person desiring to be heard or to make any protest with reference to the application should file a petition or protest on or before November 9, 1966, with the Federal Power Commission, Washington, D.C. No protest, petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a Texas corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore determined and set forth in the Commission's order issued November 27, 1957, Docket No. E-6785, *Gulf States Utilities Company* (18 FPC 701).

(2) The proposed issuance of Promissory Notes, as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) Applicant is not organized and operating in a State under the laws of which the security issue here involved is regulated by a State commission within the meaning of Section 204(f) of the Act; and the proposed issuance of Promissory Notes, as described above, is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(4) The proposed issuance of Promissory Notes in the aggregate principal amount of $31,000,000, all as described above, will be in excess of 5% of the par value of the other securities of Applicant, and, therefore, will not be exempt by virtue of Section 204(e) of the Act from the requirements of Section 204(a) of the Act.

(5) The proposed issuance of Promissory Notes, described above, will be exempt from the competitive bidding requirements of Section 34.1a of the Commission's Regulations under the Federal Power Act by reason of paragraph 34.1a(a)(2) thereof.

(6) The proposed issuance of Promissory Notes, as hereinafter authorized, will be for a lawful object, within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by the Applicant of service as a public utility, and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

The Commission orders:

(A) The proposed issuance of Promissory Notes by the Applicant in an aggregate principal amount of not to exceed $31,000,000, at any one time outstanding, upon the terms and conditions and for the purposes set forth in the application, is hereby authorized, subject to the provisions of this order.

(B) This authorization is expressly conditioned upon the final maturity of all Notes to be issued pursuant thereto, being not later than December 31, 1967.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect of any securities to which this order relates.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

IOWA POWER AND LIGHT COMPANY, DOCKET NO. E-7311

ORDER AUTHORIZING ISSUANCE OF PROMISSORY NOTES

(Issued December 9, 1966)

Iowa Power and Light Company (Applicant), incorporated under the laws of the State of Iowa and doing business in that State, with its principal place of business in Des Moines, Iowa, filed an application on September 15, 1966, for an order, pursuant to Section 204 of the Federal Power Act, authorizing the issuance of up to $15,000,000 principal amount of unsecured Promissory Notes outstanding at any one time. Applicant is engaged in the electric and gas utility business in and around Des Moines, Iowa and 59 other communities in that State. The Applicant provides electric service at wholesale to five municipalities.

The Notes which are to be issued from time to time to commercial banking institutions are to have maturities of not more than 180 days from their dates of issue, and in any event not later than December 31, 1967 and will bear interest at the prime rate in effect at the time of the borrowings.

The Notes are to be issued to obtain temporary financing for the Applicant's 1966 and 1967 construction program, pending the receipt of proceeds from permanent financing. This construction program has an estimated cost of $20,150,000 for the last half of 1966 and for 1967. The prime items in this construction program include $6.3 million for the installation of eight 15,500 kw gas turbine units of Applicant's River Hills Station, $5.5 million for transmission line facilities and $6.5 million for electric distribution facilities.

Written notice of the application has been given to the Iowa Commerce Commission and to the Governor of that State. Notice of the application also was published in the Federal Register on September 27, 1966 (31 F.R. 12652), stating that any person desiring to be heard or to make any protest with reference to said application should on or before October 12, 1966, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests. No petition or protest or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission, as heretofore described and set forth in the Commission's order issued May 31, 1961, *Iowa Power and Light Company*, Docket No. E-6974 (25 FPC 1063).

(2) The proposed issuance of Promissory Notes up to $15,000,000, all as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) The proposed issuance of Promissory Notes in the aggregate principal amount of $15,000,000 outstanding at any one time, all as described above, will be in excess of 5 percent of the par value of the other securities of Applicant, and therefore, will not be exempt by virtue of Section 204(e) of the requirements of Section 204(a) of the Act.

(4) Applicant is not organized and operating in a State, under the laws of which the security issue here involved is regulated by a State Commission

within the meaning of Section 204(f) of the Act, and the proposed issuance is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(5) The proposed issuance of Promissory Notes will be exempt from the competitive bidding requirements of Section 34.1a of the Commission's Regulations under the Federal Power Act by reason of paragraph 34.1a(a)(2) thereof.

(6) The proposed issuance of securities, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance of service by Applicant as a public utility, and which will not impair its ability to perform that service, and reasonably necessary and appropriate for such purposes.

The Commission orders:

(A) The proposed issuance of Promissory Notes in the aggregate principal amount of $15,000,000 upon the terms and conditions and for the purposes set forth in the application, as described above, is hereby authorized, subject to the provisions of this order.

(B) This authorization is expressly conditioned upon the final maturity of all Notes to be issued pursuant thereto, being not later than December 31, 1967.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost or any other matter whatsoever which may come before this Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any securities to which this order relates.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN STATES POWER COMPANY (WISCONSIN), DOCKET NO. E-7320

ORDER AUTHORIZING ISSUANCE OF PROMISSORY NOTES

(Issued December 9, 1966)

Northern States Power Company (Applicant) filed an application on November 7, 1966, for an order, pursuant to Section 204(a) of the Federal Power Act, authorizing the issuance of short-term promissory notes in the aggregate principal amount of not in excess of $7,000,000 outstanding at any one time.

The Applicant, a Wisconsin corporation with its principal place of business at Eau Claire, Wisconsin, owns and operates utility properties in west-central Wisconsin and furnishes electric service at retail in 171 communities and adjacent territories and electric energy at wholesale for resale to 11 additional communities. The Applicant also furnishes natural gas at retail in 11 communities and hot water for heating purposes in one community. The Applicant had net plant of $98,667,000 as of September 30, 1966, and it received total operating revenues of $32,451,000 in the twelve months ended the same date.

The proposed notes will be issued on various days and for various periods of time up to twelve months from dates of issue, but the final maturity dates will be on or before December 31, 1968. As to each borrowing, the interest rate will not exceed the prime rate at the time and place of making. The Applicant will have the right to prepay the notes in whole or in part, without payment of a premium. The Applicant has said that it will not agree in connection with obtaining a loan from any bank as to any minimum balance which must be maintained in any of its checking accounts.

The Applicant is permitted under Section 204(e) of the Act to issue short-term notes in the total principal amount of about $4,274,000. Of this amount, the Applicant has seventeen notes outstanding, payable to local banks, in the total amount of $2,440,000, bearing interest at 5½%.

It is the present intention of Applicant to obtain the funds for the payment of its promissory notes through the issuance and sale of capital securities. The amount, date, and kind of such securities have not been determined.

The proceeds from the bank borrowings to be evidenced by the promissory notes will be added to the Applicant's general funds and used to pay a portion of the cost of the Applicant's 1966 and 1967 construction program. This program includes $273,000 for generating equipment, $2.5 million for transmission lines, and $6.3 million for distribution facilities.

Written notice of the application has been given to the Wisconsin Public Service Commission and to the Governor of that State. Notice has also been published in the Federal Register on November 11, 1966 (31 F.R. 14758), stating that any person desiring to be heard or to make any protest with reference to the application shall file petitions or protests on or before December 5, 1966 with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued on October 25, 1957 in *Northern States Power Company (Minnesota, et al.)*, Docket No. E-6774 (18 FPC 532).

(2) The proposed issuance of Promissory Notes in the aggregate principal amount of $7,000,000, all as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) The proposed issuance of Promissory Notes in the aggregate principal amount of $7,000,000, all as described above, will be in excess of 5% of the par value of the other securities of Applicant, and, therefore, will not be exempt by virtue of Section 204(e) from the requirements of Section 204(a) of the Act.

(4) Applicant is not organized and operating in a State, under the laws of which the issue here involved is regulated by a State Commission within the meaning of Section 204(f) of the Act, and the proposed issuance is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(5) The proposed issuance of Promissory Notes will be exempt from the competitive bidding requirements of Section 34.1a of the Commission's Regulations under the Federal Power Act by reason of paragraph 34.1a(a)(2).

(6) The proposed issuance of securities, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible

with the public interest, which is appropriate for and consistent with the proper performance of service by Applicant as a public utility, and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

The Commission orders:

(A) The proposed issuance of Promissory Notes in the aggregate principal amount of $7,000,000 outstanding at any one time, whether an original issue or a renewal note, upon the terms and conditions and confined to the purposes set forth in the application, all as described above, is hereby authorized, subject to the provisions of this order.

(B) This authorization is expressly conditioned upon the final maturity of said notes being not later than December 31, 1968.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost or any other matter whatsoever now pending or which may come before this Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

OPINION NO. 500-A

TRANSWESTERN PIPELINE COMPANY, DOCKET NOS. CP63-204, CP64-91; GULF PACIFIC PIPELINE COMPANY, DOCKET NO. CP63-223; EL PASO NATURAL GAS COMPANY, DOCKET NO. CP64-76

OPINION AND ORDER ON REHEARING

(Issued December 9, 1966)*

Syllabus

1. Even if Commission revised its position on other points, because of loss by Gulf Pacific of such a large portion of its gas supply it would not be possible to certificate project without reopening the record and permitting presentation of new gas supply evidence; however, upon examination of applications for rehearing, rehearing is *denied* on the merits. P. 1012.
2. While precise kinds of service proposed by TSP and Gulf Pacific projects may be different, unquestionably the certification of one would make the other unnecessary. P. 1013.
3. Commission *rejects* petitioner's request to respond, pursuant to 1.26(d) of the rules, to non-record documents since this misconceives purpose of references which was only to emphasize what record already demonstrated. P. 1014.
4. Present annual rate reductions ordered in this proceeding will be of more value to consumers than any speculative future reductions. P. 1015.
5. Contention that corrections to prior order changed guidepost for measuring extent of flow-through of rate reductions and refunds is without merit. P. 1017.
6. Upon rehearing, Commission *confirms* prior opinion and order, as amended.

Commissioner O'Connor *dissenting.*

Commissioner Carver *not participating.*

---

*Affirmed, *Southern California Edison Co. v. F.P.C.*, 387 F. 2d 619 (CA3-1967).

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

WHITE, *Chairman:*

Southern California Edison Company (Edison), on August 23, 1966, the City of Los Angeles and its Department of Water and Power (LADWP) on August 24, 1966, and Gulf Pacific Pipeline Company (Gulf Pacific), the People of the State of California and the Public Utilities Commission of the State of California, and the United States Department of Health, Education, and Welfare (HEW) on August 25, 1966, have filed applications for rehearing with respect to our Opinion No. 500 and accompanying order issued July 26, 1966, 36 FPC 176. California, on September 6, 1966, also asked for rehearing of our amending order of August 19, 1966, 36 FPC 491. Neither the Air Pollution Control District of Los Angeles nor Humble Oil & Refining Co. (Humble), which had contracted to supply about half of Gulf Pacific's gas, has asked for rehearing. On September 21, 1966, 36 FPC 658, we granted rehearing for purposes of adequate consideration of Opinion No. 500 and order, and our amending order of August 19, 1966.

In our opinion and order we granted certificates of public convenience and necessity to El Paso Natural Gas Company (El Paso) and Transwestern Pipeline Company (Transwestern) for the delivery of additional amounts of gas to the Pacific Lighting Group at the California border for resale to firm and industrial customers in southern California. El Paso's permanently certificated deliveries would be increased in steps by a daily contract quantity of 250 M^2cfd, and Transwestern's deliveries would likewise be increased in steps by a contract demand quantity of 340 M^2cfd. These additional deliveries have been designated by Pacific Lighting as its "Tailored Supply Program" (TSP). At the same time we denied a certificate to Gulf Pacific Pipeline Company to transport quantities of gas, increasing up to 865 M^2cfd, which were to be purchased by Edison and LADWP under a 20-year contract directly from Humble Oil & Refining Company and other producers in the Katy and Pledger Fields located on the Texas Gulf Coast in Railroad District No. 3.

Edison, LADWP and Gulf Pacific ask that the examiner's decision be reinstated granting a certificate to Gulf Pacific rather than El Paso and Transwestern. The California Commission asks that a certificate be issued to Gulf Pacific and Transwestern under certain conditions and denied to El Paso. HEW requests that the Commission correct certain errors which it alleges are contained in our discussion of air pollution in Opinion No. 500.

As a result of a statement made by Gulf Pacific in its application for rehearing and articles in the press, we issued an order on September 2, 1966, 36 FPC 577, requesting Gulf Pacific, Edison and LADWP to submit any notices of termination of the producers' gas supply contracts which they may have received. In view of this possible cancellation of the gas supply available to the Gulf Pacific project, we requested the applicants for rehearing to submit statements to the Commission showing why these proceedings should not be summarily terminated or whether some or all of the issues proposed by the applicants have been rendered moot.

In accordance with this order we have received copies of notices from a number of producers, including Humble, that they are terminating their gas supply contract representing the greater part of the gas supply of the Gulf Pacific Project. We have also received statements on the question of mootness from Edison, LADWP, Gulf Pacific, California, El Paso, and Pacific

Lighting. All these parties urge that a decision be made on the merits apart from gas supply. The proponents of the Gulf Pacific project also point out the possibility of reinstating the gas supply, and argue that the proceeding is not moot. Pacific Lighting and El Paso urge us to make a finding that there is now a failure of the gas supply and thus the proceeding is moot: nevertheless, these opponents of the Gulf Pacific project request us to make a determination of the matter on its merits.

It is clear that even if we were to revise our position on other points, because of the loss of such a large portion of its gas supply it would not be possible to certificate the Gulf Pacific project without our reopening the record and permitting the presentation of new gas supply evidence. Without determining whether this procedure would be consistent with our rules or previous orders in this proceeding, or with the public interest, we recognize that it would be a possible method of meeting the determination made in Opinion No. 500, and we shall rule on the applications for rehearing on the assumption that the Gulf Pacific project has an adequate gas supply. We conclude, however, that after examining the applications for rehearing, there is no reason to change our determination and shall accordingly deny rehearing on the merits to all applicants.

Many of the issues raised by the applications for rehearing have already been considered by the Commission and discussed in detail in Opinion No. 500, and therefore need not be discussed further. These include questions of whether we have considered a long-term supply of gas for California; the alleged competition which would result from certification of Gulf Pacific; the importance of the low incremental costs of moving additional gas to California by El Paso and Transwestern; and the sufficiency of the gas reserves available to these pipelines. The remainder of this opinion is devoted to a discussion of those issues raised by the petitioners which we believe warrant fuller discussion.

Air Pollution

With respect to our treatment of air pollution in the Los Angeles area, two contentions have been made. First, Edison contends that our statement in Opinion No. 500 that the 11.4 percent reduction in nitrogen oxides referred simply to an annual figure, and it argues that the percentage reductions would be 50–75 percent during the late fall and winter months when gas use by industry may be all or substantially curtailed. It contends that since we concede that a reduction of 50 percent in nitrogen oxide emissions would have a beneficial effect on photochemical smog we erred in focusing only on the annual average. Actually, we were comparing conditions during the winter months when Rule 62 was not in effect with conditions that would result if gas were substituted for fuel oil. However, even under conditions of complete gas curtailment by industries and power plants in Los Angeles County, a complete shift from oil to gas would reduce nitrogen oxide emissions by only about 25 percent, taking into account continued emissions of nitrogen oxides by motor vehicles. Furthermore, the problems of photochemical smog occur largely during the summer when 100 percent natural gas is already being burned and not during the fall or winter when some fuel oil is burned. It is obvious, therefore, that even substantially lesser concentrations of nitrogen oxide in the fall and winter months would have little effect, if any, on photochemical smog.

Second, HEW states that we erred in finding that there is no scientific assurance that the level of sulphur dioxide concentrations referred to by us will not adversely affect human health. This level was referred to by the witness for HEW as a concentration of 0.1 parts per million (ppm) lasting over a period of 24 hours and occurring one percent of the days. HEW cites a study, referred to on cross-examination, of a group of patients in Nashville, Tennessee, which related asthmatic attacks to atmospheric sulphur dioxide concentrations averaging between 0 and 0.042 ppm. In our opinion this study alone was not sufficient to indicate a correlation between human health and concentrations of SO_2 less than 0.1 ppm. The concentrations referred to by HEW were monthly averages, which are very different from the 24-hour 0.1 ppm level referred to in this record for Los Angeles. The study shows that the group of patients in Nashville was small, and according to the testimony, was subject to a large amount of coal smoke from the Nashville coal-burning plants. Moreover, we still do not have the benefit of HEW's advice as to what level of concentrations less than 0.1 ppm is harmful. Thus, as stated in Opinion No. 500, HEW's position simply does not provide this Commission with any meaningful guidance as to what concentrations of SO_2 may be harmful.

HEW also objects to our taking notice of the report "The Adequacy of Technology for Pollution Abatement", a report of the Research Management Advisory Panel (Subcommittee on Science Research and Development) to the Committee on Science and Astronautics, U. S. House of Representatives, 89th Cong., 2d Sess. (1966) cited at footnote 13 of Opinion No. 500 (*supra*, p. 189), without indicating the portion or portions of the report on which we relied. The report, which was released by the Committee on July 12, 1966, was cited simply as illustrative of the difficulty in defining pollution standards and the lack of clear knowledge of basic goals in the present state of technology.

Gas Market

Edison contends that TSP is a short-term solution which is not mutually exclusive with Gulf Pacific's proposal. The record clearly shows that TSP plus Gulf Pacific would deliver excessive quantities of gas in the first few years. Thus, if there is added to the 971 M^{2}cf of gas from TSP and the California customers in 1968, the 253 M^{2}cf available from Gulf Pacific in its first year there would be a total annual supply of 1226 M^{2}cf which would be well in excess of even Gulf Pacific's annual market estimate of 1069 M^{2}cf in that year. Similarly, there would be an excess of gas in the years 1969 and 1970. As we pointed out, if additional supplies should be required in the future, certification of the Gulf Pacific project would significantly diminish the ability of the southern California area to meet its energy requirements in the optimum manner. While the precise kinds of service proposed by the TSP and Gulf Pacific projects may be different, there can be no question but that certification of one project would make the other unnecessary.

Applicants also contend that we based our opinion as to the advent of nuclear generation of electric energy and coal generation in states outside of California on speculation and materials outside the record. On the contrary, the record shows the possibility of large new supplies of electric energy from both coal and nuclear sources. Evidence was introduced as to the coal reserves in some of the mountain states and plans for using these resources for the generation of electric energy. Edison's own evidence shows plans for increased generation from nuclear sources and was revised on the record to show that its program for receiving coal-generated energy was advanced beyond original expectations.

The petitioners attack the decision's additional references on this point to such matters as the nuclear program of TVA and the North-South intertie which are not detailed in the record. Relying upon Section 1.26(d) of our Rules, they request an opportunity to respond, presumably to show that some of the statements in these non-record documents are not factually accurate. This misconceives the purpose of these references, which was only to emphasize what the record already demonstrated—that the nature of the generation of electricity in and for California is in a state of constant change and that a project permitting a flexible approach to gas supply as these potential developments occur necessarily has advantages over one wherein a $300 million new pipeline is dependent for its financial base upon a twenty-year contract tying the electric utilities to a particular gas purchasing pattern.

Since this is the case, it is not material whether all of the possible coal generating plants will actually come into being; the extent to which the intertie will lessen the need for other generation of electric energy in Southern California or the exact time it will go into operation; or whether TVA's nuclear plans are a precise measure of the economics of nuclear generation in California. Thus, demonstration of the invalidity or inapplicability of some of the specific findings or conclusions in the non-record material to which we referred could not affect our determination. Accordingly, no purpose would be served by holding the proceeding open for any such showing.

The Commission has broad responsibilities in the field of electric power encompassing both regulatory and informational matters. The Commission's National Power Survey, conducted in cooperation with all segments of the industry, focused on the evolving patterns in the generation of electric power in all regions of the United States. Through this survey and its updating which is now in process, the Commission has kept abreast of events in the electric power field. The Commission's reliance on its expertise, as built up through such studies, in evaluating the future uncertainties in the fuel picture for southern California is not only an appropriate action but were we not to call upon such knowledge, we would be justly subject to criticism. See *F.P.C. v. Transcontinental Gas Pipe Line Corporation*, 365 U.S. 1 (1961).

Applicants argue that, apart from the needs of gas for future generating plants, the present gas-fired plants in southern California will require an assured gas supply for many years. These plants, the applicants say, represent a large investment and can neither be abandoned nor substantially converted to peak-load plants. It is a well-established fact that in the operation of electric systems the older or less efficient plants are converted to use for peaking purposes. It is not unreasonable to expect that the more efficient new plants built outside of California would be used for carrying base load in the southern California area.

The applicants argue that there is no evidence in the case to support any assumption that the cost of gas delivered to southern California would not increase over the next 20 years. It is equally true, however, that there is no basis in the record for assuming that costs, which have leveled out, will inevitably escalate. We do not believe, therefore, that a flat assumption—unsupported by the record—that purchased gas costs will escalate in the future is warranted.

Gulf Pacific has argued that the costs that El Paso will incur to construct facilities needed to connect new gas supplies will prevent rate reductions which the consumers would otherwise receive as a result of the "$40,000,000" per year depreciation deduction from El Paso's rate base, relating to existing facilities. In Opinion No. 500, we noted that the depreciation accruals of El Paso's existing rate base, approximately $40,000,000 per year, are sufficient to absorb any additional costs which El Paso might incur for installation of gathering facilities to attach new reserves. We did not intend to imply that all, or even a substantial part, of these depreciation accruals would necessarily be used to offset the construction of new gathering facilities, for there is no basis for an assumption that either El Paso or Transwestern would construct gathering facilities attributable to this project alone at anything approaching this cost. Moreover, as indicated in Opinion No. 500, El Paso already has extensive gathering facilities in the Permian and San Juan areas from which it will probably continue to secure a large portion of its gas. In any event, the present annual rate reductions which we have ordered in this proceeding will be of more value to the consumers than any speculative future rate reductions.

The applicants, particularly Edison, have criticized Opinion No. 500 for adopting TSP without regard to the cost burdens placed upon the electric utilities and their customers. We did not overlook this matter. In Appendix B to our opinion we compared the cost of gas at the load center with and without Gulf Pacific in operation. We found that costs at that point, the costs that would affect both the gas consumers and electric consumers, making the most favorable assumption possible by Gulf Pacific and ignoring some of the rate reductions which El Paso or Transwestern could make if they flowed through liberalized depreciation or the Permian reductions, were practically the same with Gulf Pacific in operation as without. The difference is that without Gulf Pacific the customers of Pacific Gas and Electric Company and customers of El Paso outside of California would benefit from El Paso's rate reductions in the amount of at least $4,442,000 annually. Our responsibilities require us to consider that one of the proposals would produce substantial savings to another group of gas consumers as well as the consumers in southern California at least equivalent to those available from Gulf Pacific.

It is argued that in our cost comparison we have failed to take into account any allowance for additional oil storage with El Paso and Transwestern certificated rather than Gulf Pacific. The record indicates that any such costs could affect only a small fraction of the $4,442,000 in savings to gas customers outside the California area.

Edison argues that we failed to take into account variations in the relationship between the prices of oil and gas. It says that if in the future the cost of fuel oil is cheaper than gas, the electric generating agencies will have to burn higher priced gas because of the APCD Rules 62 and 62.1, and to the extent oil is more expensive than the gas supplies rejected, the Commission has increased the cost of energy to the ultimate consumer by increasing the cost of electric generation. There is nothing in the record which will permit us to determine the relationship of oil and gas prices in 1968 and later years. The witnesses for Edison and other witnesses assumed that the price of oil would conform to the price of gas. One of the advantages of approving the TSP rather than Gulf Pacific or some other program is that it will permit supplies to be adjusted to future conditions in the market including the respective prices for oil and gas.

In any event, how the additional supplies may be utilized in California in case of any possible variations in the price of oil, would be a matter for the local authorities. If the price of oil falls in relation to gas, nothing we have done would prevent the power plants being permitted to burn larger amounts of oil. On the other hand if oil should become more expensive in relation to gas, something the record does not show now, this might be a factor in a later proceeding when there is a question of authorizing further gas supplies.

Edison has raised certain objections to the material contained in Appendix B to Opinion No. 500. First, it contends that it constitutes a denial of due process because it is highly complex, requiring the exercise of informed judgment and operating expertise and not a mere arithmetical arrangement of basic figures from the record. The Commission is not precluded from exercising its judgment on the basis of the record (see *Market Street R. Co.* v. *California Railroad Commission*, 324 U.S. 548, 560) merely because that judgment involves complicated computations. Although we did not attach the "gas balance" used in connection with Appendix B because of its physical size, upon reconsideration we believe it ought to be part of the public record and we have included it as an attachment to this order.

Edison also notes that in Appendix B, Schedule 1, *supra*, p. 224, "costs with Gulf Pacific in operation," we show an annual volume of seasonal gas from California sources in the amount of 1,634,100 Mcf although in computing the cost of California gas in Schedule 2 we show a volume of 6,634,100 Mcf. This computation assumes that under the contractual arrangements between Pacific Lighting and the California producers 10,000,000 Mcf of gas would be taken with Gulf Pacific, and that 15,000,000 Mcf would have to be returned or paid for. Cost, therefore, must be computed on the basis of this 15 million Mcf. Of this amount the calculation assumes 8,365,900 Mcf would be returned in kind, and that cash would be paid for 6,634,100 Mcf. The consumers would actually get a net amount of 10,000,000 Mcf less 8,365,900 Mcf or 1,634,100 Mcf, as shown, and cost would be computed on the basis of 6,634,100 Mcf for which payment was made.

There is one final contention which we believe deserves specific consideration. Edison contends that the Commission has construed the provisions of the Natural Gas Act relating to direct industrial sales contrary to its intent in describing such direct sales as "a useful adjunct to the normal operational pattern of interstate pipelines." Our comment was directed at the nature of Gulf Pacific's proposed operation, *i.e.*, an exclusively industrial pipeline, and not at direct sales as such. At the present time there are approximately 200,000 miles of high-pressure natural gas transmission pipelines in the United States, virtually all of which carry gas destined both for resale and for direct sale, and there is nothing to indicate that this general pattern of operation is not the most beneficial to gas consumers as a whole. At the same time we have certificated several pipelines which do not make sales for resale where the particular circumstances indicated that such operations would not adversely affect other gas customers in the area served.[1]

The Order of August 19, 1966

The California Commission on September 6, 1966, filed application for rehearing of our order issued August 19, 1966, which corrected the wording of three ordering paragraphs of Opinion No. 500 to conform those paragraphs with the conclusions and intent expressed in the text of that opinion. The need for such correction was brought to our attention by a "petition" filed by El Paso on August 5, 1966.

California contends that the August 19 correction of paragraph (f)(3) would result in a rate increase by El Paso rather than the further reduction there contemplated. The last portion of that paragraph in referring to exclusion of prepayments from rate base, was corrected to add at the end thereof the words "in excess of those prepayments reflected in the cost of service submitted in this proceeding."

---

[1] *Inland Gas Company*, 28 FPC 683; *Chandeleur Pipe Line Company*, 30 FPC 1515; *Blue Dolphin Pipe Line Company*, 33 FPC 1141; *Black Marlin Pipeline Company*, 35 FPC 976, Docket No. CP66–333, issued June 13, 1966.

The paragraph without such correction would have required adjustment of the cost of service submitted by El Paso in these proceedings. No such adjustment was intended. In referring to the rate reductions proposed by El Paso and Transwestern, we stated in Opinion No. 599 (p. 216):

> * * * they offered in evidence proposed rate reductions supported by cost of service computations. In both cases, however, the *rate reductions which they propose are inadequate* to bring the indicated rate of return down to that last allowed by the Commission.

We further there stated:

> * * * we agree with the staff and the California Commission that certification of El Paso and Transwestern should be conditioned to require them to file *rates based upon the cost of service they submitted in the proceeding* adjusted to reflect a 6⅛ percent rate of return in the case of El Paso and 6¼ percent rate of return in the case of Transwestern.

When read in context, and in the light of the record, it is apparent that we were directing the companies to reduce their rates to conform them to the costs of service submitted by removing the so-called "cushion" in those rates, to which reference was made on the record. We were not directing the companies to adjust their costs of service. Accordingly, we believe that California's contention that the referenced correction would result in an increase in El Paso's rates is unfounded.

California also alleges that the August 19 corrections to paragraph (G)(1) and (G)(2) of the order accompanying Opinion No. 500 changed the guideposts for measuring the extent of flow-through of rate reductions and refunds by El Paso and Transwestern. We are of the view that California's contentions are without merit.

The costs of service submitted in these proceedings reflect costs of purchased gas as of January 1, 1964. As originally worded, paragraph (G)(1) would have required the companies to reduce the rates based on those costs of service if their "present" (*i.e.* July 26, 1966) costs of purchased gas were reduced. We are not aware of any basis in these certificate proceedings which would warrant our placing the companies under express obligation to automatically reduce their rates if costs not reflected in those rates are reduced. Whether and the extent to which a reduction in such costs are to be given effect in the companies' rates should await further review of the companies' operations. We believe the public interest is amply protected by the present requirements for reductions in rates should the companies' costs of purchased gas be reduced. Moreover, our order herein does not modify El Paso's obligations to reduce rates or to flow-through refunds to the extent already provided in its outstanding settlement. Further, our order cannot be construed as an abandonment of our policy of escrowing supplier refunds pending a determination whether the pipeline or its customers are entitled thereto.

California's contention that El Paso and Transwestern have somehow gained an unfair competitive advantage by reflecting 1964 purchased gas costs in their proposed rates is similarly unpersuasive. The rate comparison in these competitive proceedings was discussed in our opinion (pp. 205, *et seq.*), without giving consideration to downward adjustments relating to rate of return, the application of Opinion No. 417, 31 FPC 208, and the effect of the *Permian* decision. Our order does not provide for automatic upward adjustment of those rates to reflect increases in costs of purchased gas, if any, which the companies may be incurring, over and above those reflected in the costs of service submitted in evidence. The companies may, of course, file appropriate application for increases in rates based upon such increased cost of purchased gas, if they deem such application justified.

Based on all the foregoing, we conclude that California's application for rehearing filed September 6, should be denied.

The Commission further finds:

The assignments of error and grounds for rehearing set forth in the applications for rehearing present no facts or principles of law which were not fully considered by the Commission when it issued its Opinion No. 500 and order or which, having now been considered, warrant any change in or modification of such opinion and order except as specified herein.

The Commission orders:

(A) The applications for rehearing filed herein by Edison, LADWP, Gulf Pacific, the California Commission and HEW are denied except as specified herein.

(B) The Commission's Opinion No. 500 and order issued July 26, 1966 as amended by order issued August 19, 1966, is hereby confirmed as the order of the Commission.

Commissioner O'Connor *dissenting.*

Commissioner Carver *not participating.*

O'CONNOR, *Commissioner, dissenting:*

For the reasons set forth in my dissent to the majority opinion, I would grant rehearing. Any question as to the adequacy of the gas supply could be considered at that time. In addition, the present majority order necessitates further comments with regard to reasons for granting rehearing.

It cannot be overemphasized that the majority in certificating the short-term tailored supply program (TSP) of El Paso and Transwestern, reversed itself with regard to the avowed purpose of these proceedings as enunciated in the Rock Springs case (*El Paso Natural Gas Co.*, Opinion No. 393, 30 FPC 92 (1963))," * * * to determine how the *long-term* needs for *natural gas* deliveries to southern California may be met in the manner which is most desirable from the standpoint of the public interest." Certification of the short-term project was done under the guise of "flexibility." Unfortunately, however, TSP is not more flexible than the 20-year assured price and volumes which were offered by Gulf Pacific nor is it less costly as demonstrated in my initial dissent. The argument of flexibility is based on the mistaken assumptions that as more gas is needed, it will be purchased at presently existing or lower prices and that less gas will be required to serve the market due to the forthcoming new sources of generation and transmission, *viz.*, remote mine-mouth coal and nuclear plants. Furthermore, in reaching its determination that nuclear and remote mine-mouth negate the need for a guaranteed 20-year supply of gas, the majority relied upon reports which were not even published until 1966—well after the close of the record in the case and by denying rehearing deprived the parties of their rights under Section 1.26(d) of the Rules of Practice and Procedure.

The use of these reports which were not made available to the parties to consider and cross-examine was assigned as error by Southern California Edison in its Application for Rehearing. In attempting to justify use of the reports, the majority argues that they were within its "expertise" and only reflected matters "demonstrated" in the record; however, Section 1.26(d) of the Commission's Rules of Practice and Procedure states:

> Official notice may be taken of such matters as might be judicially noticed by the courts of the United States or of any other matter of technical or scientific fact of established character peculiarly within the general knowledge of the Commission as an expert body; *Provided, That any party shall, on timely request, be afforded an opportunity to show the contrary.* [emphasis added]

Thus, the majority is unjustifiably denying a "timely request" in its order on rehearing.

The extent to which the majority relied on these reports in making its determination to certificate a short-term supply is evidenced in its discussion of remote mine-mouth generation and extra high voltage transmission (EHV) in the initial opinion. It said regarding EHV and the West Coast Intertie, "One 835-mile line is scheduled to be energized in 1969 and the second in 1971." For this proposition it cited, "Hearings Senate Subcommittee on Public Works, Committee on Appropriations, June 13, 1966." It is not coincidental that the apparent availability of these sources of energy by 1969 and 1971 coincides with the time TSP will require more gas. This report obviously had an influential effect on the majority in its decisional process, yet the report deals with such speculative issues as timing, energy, and availability which the protesting parties could not inquire into. Nor was this an isolated instance. Further, in the initial opinion, the majority refers to a study introduced by Pacific Lighting pertaining to production of electrical energy in southern California by nuclear plants. This study was attacked in the hearing by Gulf Pacific as being too optimistic. Nevertheless, the majority, having the advantage of a report entitled, "Comparison of Coal-fired and Nuclear Power Plants for the TVA System," published in June 1966 by the Tennessee Valley Authority, stated, "Whatever merits Gulf Pacific's position may have had in 1964 when testimony on this subject was taken, it now appears that nuclear generation is meeting this economic test." Of course, since the TVA report was outside the record it could not be questioned or looked into by the protesting parties. Furthermore, in the highly contested matter of air pollution, two recently published reports were relied upon by the Commission without the parties having the opportunity to cross-examine or introduce additional or counterbalancing evidence. The dictates of a fair hearing would seem to require that they be able to meet them in some manner. On this point I would refer to Davis, Administrative Law Treatise, Vol. 2, "Our thesis is that the reconciliation can best be accomplished by recognizing that the cardinal principle of fair hearing is not that all facts should be in the record or that all facts should be subject to cross-examination, *but rather that parties should have opportunity to meet in the appropriate fashion any materials that influence decision.*" [emphasis added] Thus, I cannot look upon a "timely request" so lightly as the majority and would allow an opportunity for the protesting parties to respond to these documents which were obviously relied upon heavily by the majority in its decision to certificate TSP rather than the often promised, but never granted, long-term supply of natural gas.

Competition

In its order, the majority claims that there is no longer any necessity to discuss the question of competition, and indeed there is not because by not certificating Gulf Pacific a monopoly has been granted to the existing suppliers, at least until the highly speculative new sources of energy and transmission come into competitive being. Furthermore, it is inconceivable that under the present circumstances, another pipeline would consider the southern California market. This may not seem too important unless the majority's optimism for the new energy sources proves overzealous!

Air Pollution

The majority apparently fails to comprehend the effects of its decision on the problem of air pollution in light of the expanding southern California market. Under TSP there will necessarily have to be more gas certificated in 1969. Assuming gas consumption is proportionate to present volumes, there will also be more fuel oil consumed. The end result is that regardless of what levels of the various contaminants are deemed "safe" or "harmful", greater quantities will be emitted into the atmosphere as more fuel oil is burned. This will be so regardless of the proposed new sources of generation since investment alone, estimated at one billion dollars, in the gas burning plants in southern California militates against the argument that they will be converted from base load to peaking in the near future. The upshot of this is that the majority's opinion will aggravate the air pollution problem rather than alleviate it.

Cost

In its bent for "flexibility," the majority has chosen a project which is planned to require additional gas by 1969. Assuming that this gas will continue to come from the Permian Basin it may further be assumed that it will not be sold at a wellhead old gas price of 14.5¢, but rather at the new gas price of 16.5¢. Added to the increased price will also be the cost of attachment. Consequently, the majority argument that, "We do not believe, therefore, that a flat assumption—unsupported by the record—that purchased gas costs will escalate in the future is warranted" is simply not so. In the event that El Paso should have to go outside Permian to one of its new sites of exploration, for example, Texas R.R. District 4, Texas Gulf Coast, costs could be even greater when price of gas and cost of attachment are rolled in together. Furthermore, there will unquestionably be a growing demand for gas in southern California in the future, regardless of the new sources of energy; at least until the present modern gas-burning plants can feasibly be converted to uses other than base load.

CONCLUSION

The result of the majority decision is that the people of southern California have been lulled into thinking that their long-term energy requirements have been taken care of, but in effect, the majority has presented them with a short-term, rising cost supply of natural gas, under the guise of "flexibility." In so doing, the majority has based much of its determination on documents published after the record was closed, and as a result the parties have, despite their strenuous protests, not been given an opportunity to answer or respond to these decision-influencing materials. The speculative nature of the subject matter covered in these reports and the fact that "timely request" to show to the contrary has been filed by the aggrieved parties, along with the reasons heretofore mentioned both in this dissent and my dissent to the initial opinion, impel me to favor granting rehearing.

ORDER CONSOLIDATING PROCEEDINGS

(Issued December 12, 1966)

On September 14, 1966, 36 FPC 628, an order to show cause was issued by the Commission directing The Superior Oil Company (Superior) to appear and show cause, if any there be, at a public hearing commencing November 15, 1966, why it should not be required to apply for and obtain *nunc pro tunc* a certificate of public convenience and necessity authorizing it to make the sale of gas to Tenneco which it has been making without authorization from the South Bon Air field, Calcasieu Parish, Louisiana, and whether the initial price for such sale should not be fixed at the appropriate in-line price for South Louisiana as of the date delivery was commenced, and why it should not be required to refund the difference between the lawful initial price and the price actually charged for the related deliveries of gas. The order to show cause further provided that the date from which refunds shall be made by Superior shall be determined in this proceeding, and evidence may be offered by any party as to the appropriate amount of refunds and the date from which liability for such refunds should be fixed.

Subsequently, by a letter of the Secretary of the Commission, dated October 13, 1966, the hearing date was postponed until January 10, 1967, and the date for filing Superior's case-in-chief was likewise postponed until December 10, 1966.

The order to show cause issued September 14, 1966, also required Superior to respond on or before October 14, 1966, by filing with the Commission an answer in writing in accord with the provisions of Section 1.9(c) of the Commission's Rules of Practice and Procedure. On October 6, 1966, Superior responded to the specific inquiries of paragraph (B) of the Commission's order to show cause by furnishing information as to the terms of its agreement pursuant to which it has sold natural gas to Tenneco from the South Bon Air field.

It appears that the above-captioned Docket No. CI67-287 involves issues of law and fact similar to the issues in the dockets consolidated in George Despot, Agent (Operator), *et al.*, Docket No. CI65-974, *et al.* The issues raised by Docket No. CI67-287 will be most expeditiously disposed of by consolidating the order to show cause against Superior heretofore issued on September 14, 1966, with the orders to show cause against the various respondents in Docket No. CI65-974, *et al.*

The Commission finds:

It is appropriate and in the public interest that the above-captioned matters be consolidated for hearing and decision as hereinafter ordered.

The Commission orders:

(A) Docket No. CI67-287 is hereby consolidated with Docket No. CI65-974, *et al.* for hearing and decision.

(B) The date heretofore set by the Examiner for the filing of exhibits and testimony by respondents in Docket No. CI65-974, *et al.*, *i.e.*, November 23, 1966, shall, in the case of Superior, be extended to January 13, 1967.

(C) In lieu of the hearing date of January 10, 1967, Superior shall comply with the procedures for hearing set up by the Examiner in Docket No. CI65-974, *et al.*, with the exception provided in paragraph (B) above.

(D) All parties to the above-captioned proceedings shall serve Superior with copies of their testimony and exhibits as well as motions and other documents heretofore filed in the consolidated proceedings in Docket No. CI65-974, *et al.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

GEORGE DESPOT, AGENT (OPERATOR), ET AL., DOCKET NO. CI65–974, ET AL. AND GULF OIL CORPORATION, DOCKET NO. CI67–477 AND CI60–322

ORDER TO SHOW CAUSE AND ORDER CONSOLIDATING PROCEEDINGS

(Issued December 12, 1966)

Gulf Oil Corporation, successor in interest to The British-American Oil Producing Company, has filed an application in Docket No. CI67–477 to abandon service heretofore commenced to Tennessee Gas Pipeline Company under a restricted use (compression fuel) contract similar to the contracts which were the subject of the Supreme Court's decision in *California* v. *Lo-Vaca Gathering Company, et al.*, 379 U.S. 366. In Docket No. CI60–322, Gulf Oil Corporation has filed an amendment which seeks authority to continue the sale to Tennessee Gas Pipeline Company under a new standard gas sales contract comprising its F.P.C. Gas Rate Schedule No. 349. Gulf Oil Corporation has not heretofore sought nor has it obtained from the Commission authority to make the above-mentioned compressor fuel sale to Tennessee Gas Pipeline Company.

The above-captioned Dockets involve issues of law and fact similar to the issues in the Dockets consolidated in *George Despot (Operator), et al.*, Docket No. CI65–974, *et al.* It may also be noted that Docket No. CI66–68, heretofore consolidated with *George Despot (Operator), et al.*, Docket No. CI65–974, *et al.*, is an application filed by Gulf Oil Corporation involving issues of law and fact similar to the issues arising out of Docket Nos. CI60–322 and CI67–477. Gulf Oil Corporation has participated in the proceeding thus far held in Docket No. CI65–974, *et al.*

The issues raised by Docket Nos. CI60–322 and CI67–477 will be most expeditiously disposed of by directing an order to show cause to Gulf Oil Corporation in these dockets similar to the orders to show cause heretofore issued in Docket No. CI65–974, *et al.*, and by consolidating Docket Nos. CI60–322 and CI67–477 with Docket No. CI65–974, *et al.* Thus the common questions of law and fact arising out of these dockets will be resolved without needless duplication of trial record.

The Commission finds:

(1) It is necessary and appropriate to carry out the provisions of the Natural Gas Act that the above-captioned Applicant appear and show cause, if any, as hereinafter ordered, why it should not be required to apply for and obtain, *nuno pro tunc*, certificate of public convenience and necessity authorizing the sale of gas which it has been making without authorization.

(2) It is necessary and appropriate in the public interest and to carry out the provisions of the Natural Gas Act that the request to abandon the original restricted use sale be determined herein.

(3) It is appropriate and in the public interest that Docket Nos. CI60–322 and CI67–477 be consolidated with Docket No. CI65–974, *et al.*, for hearing and decision as hereinafter ordered.

The Commission orders:

(A) The above-entitled Applicant shall appear and show cause, if any there be, why it should not be required to apply for, and obtain, *nunc pro tunc*, a certificate of public convenience and necessity authorizing it to make the sale specified in its application which it has previously made without authorization, and whether the initial price for such sale should not be fixed at the appropriate in-line price prevailing at the date delivery commenced for the area in which such sale is being made.

(B) The above-named Applicant shall also appear and show cause why it should not be required to refund the difference between the initial price determined in accordance with paragraph (A) above and the price actually charged for the related deliveries of gas. The date from which refunds shall be made, if any, by the Applicant shall be determined in this proceeding and evidence may be offered as to the appropriate amount of refunds, if any, and the date from which liability for such refunds should be fixed.

(C) Docket Nos. CI60–322 and CI67–477 are hereby consolidated with Docket No. CI65–974, *et al.* for hearing and decision. Gulf Oil Corporation shall respond to the Order to Show Cause directed to it in paragraphs (A) and (B) hereof and shall also comply with the procedures set up by the Examiner in Docket No. CI65–974, *et al.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN NATURAL GAS PIPELINE COMPANY, ET AL., DOCKET NO. CP66–307; NORTHERN NATURAL GAS COMPANY, CP66–308; SINCLAIR OIL & GAS COMPANY (OPERATOR), ET AL., CI66–410

ORDER DENYING MOTION TO RESCIND INTERVENTIONS

(Issued December 12, 1966)

On October 28, 1966, a joint motion was filed by Sinclair Oil & Gas Company (Sinclair), Skelly Oil Company (Skelly), Texaco Inc. (Texaco) and Tenneco Oil Company (Tenneco) requesting that the Commission rescind its orders granting Brooks Gas Corporation (Brooks Gas) and Brooks Pipe Line Company (Brooks Pipe Line) leave to intervene in these proceedings. The gravamen of the motion is that Brooks Gas and Brooks Pipe Line have not filed competitive applications and consequently their proposals to render a "mutually exclusive service" cannot be contested in a comparative hearing.

The motion is unsound. Even assuming it might be in the public interest to deny entry of other transportation facilities into the Eldorado Field, Brooks' willingness and ability to provide a reasonable accommodation to other producers in the field could well be another factor in determining where the public interest lies. The question here, however, is not the merits of the application but whether the Brooks interveners have standing to contest them.

As to this question the allegations set forth in their petitions to intervene show a reasonable likelihood that they would be adversely affected economically if the applications in question were granted. Accordingly, they are entitled to introduce any evidence reasonably related to the matters asserted in their petitions as demonstrating the grants would be contrary to the public interest.

The Commission orders:

For the above reasons the motion of Sinclair, Skelly, Texaco, and Tenneco to rescind the intervention of Brooks Gas Corporation and Brooks Pipe Line Company is denied.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

INVENTORY OF RECREATIONAL FACILITIES AT LICENSED HYDROELECTRIC PROJECTS, DOCKET NO. R-276

ORDER NO. 330

PRESCRIBING F.P.C. FORM 80

(Issued December 12, 1966)*

On July 15, 1965, the Commission gave notice (30 F.R. 9113, July 21, 1965) in this proceeding that it was proposing to prescribe rules providing for an inventory of existing and potential recreational use and development at hydroelectric projects licensed by the Commission pursuant to the Federal Power Act. These projects form a large segment of the nation's water-based recreation resources, which must be fully utilized if the rapidly expanding recreational needs of our people are to be met.

This proceeding is in furtherance of the Commission's program, more fully described in the notice herein, to insure such utilization. It is being conducted in cooperation with the Bureau of Outdoor Recreation of the Department of the Interior and other interested federal and state agencies. The information which the report form here prescribed is designed to supply is a necessary part of the program, for only through it will the Commission and other agencies know how present needs for recreational facilities are being met by the licensees of these projects, and where additional efforts should be made to meet these and future needs.

Of the responses listed below[1] one supported the proposal, three offered no objection, three opposed, and six suggested modification. While we are still of the opinion that the collection of this information is necessary to the progress of the recreational program, the modifications suggested by some of the respondents have enabled us to reduce the reporting burden substantially below that which would have been required by the rule as originally proposed.

---

*Published in the Federal Register on December 17, 1966 (31 F.R. 16201).

[1] Urban America, Inc., Department of Water Resources of the State of California, Montana Power Co., New England Power Co., Pacific Gas and Electric Co., Philadelphia Electric Co., Virginia Electric & Power Co., Wisconsin Michigan Power Co., Appalachian Power Co., Duke Power Co., Georgia Power Co., Warrior River Electric Cooperative Association, and Riegel Textile Corporation.

More specifically, and of most significance, we have decided not to prescribe the separate Form 80–A which was proposed for use by licensees of projects under minor license. We are instead prescribing only one form (No. 80) which has been adapted to serve a dual purpose. The instructions to that form provide that certain portions thereof (Items F and G in Part 2; Items D and E in Part 3; and Part 8) may be omitted in reports relating to minor projects.

Several respondents having a number of developments under license complained that the regulation would create a substantial burden because of the comparatively short period of time and the frequency of reporting. We recognize that to require reports by a licensee which has several developments to inventory within the six-month period for the initial inventory might be unnecessarily burdensome. Any licensee who believes he will need additional time may make an application under § 1.13(d) of our Rules of Practice and Procedure for an extension of time, setting forth a schedule which he considers to be reasonable. We disagree, however, with the claim of hardship due to frequency of reporting (biennially) since reports filed subsequent to the initial filing in 1967 need be completed only to the extent necessary to update the data submitted in the original filing. Less frequent reporting, on the other hand, would not enable the Commission to keep abreast of the rapid increase in demand for and use of outdoor recreation facilities.

In response to other comments and suggestions, we have made some changes of a clarifying nature to the rule as proposed and have added a new Part 8 to the form proposed to replace the information previously requested in map form.

Two respondents suggested alternative methods of inventorying; in one system, only existing recreation facilities for projects licensed before June 1, 1963 (effective date of the "*Exhibit R*" rule, 18 CFR 4.41 *Exhibit R*) would be inventoried; in the other, only existing facilities would be counted until a Commission-industry task force could develop a superior method of inventorying planned facilities. We consider it necessary to have reasonably complete information on planned recreational development as soon as possible, in order to determine where future needs will be met by presently planned facilities and where still more development than is now contemplated will be needed. Neither of these alternative schemes would accomplish those objectives.

Other objections to the proposal are that the Commission (a) cannot impose on consumers the cost of recreation facilities at licensed projects, and (b) cannot unilaterally change recreation conditions in existing licenses, and consequently can make no use of the information required by the proposed inventory. The objections are misdirected for neither of these actions was proposed nor are they now being taken. We are merely requiring that information with respect to recreational facilities be furnished to assist us in the proper administration of the Federal Power Act as we are authorized to do pursuant to section 304(a).

The Commission finds:

(1) The amendments to the regulations and the prescription of a new report form, F.P.C. Form No. 80,* are necessary and appropriate for the administration of the Federal Power Act.

(2) The revisions made in the form originally proposed result from suggestions made in the comments received; and since they neither amount to a

---

*Omitted in printing.

substantial departure from the original proposal nor impose further burdens on respondents, no further notice thereof prior to adoption is necessary.

The Commission, acting pursuant to the provisions of the Federal Power Act, and particularly sections 4(g), 10, 304, 309 and 311 thereof (41 Stat. 1065, 1068; 49 Stat. 839, 842, 855, 858, 859; 16 U.S.C. 797, 803, 825c, 825h, 825j), *orders:*

(A) (1) The title of Part 8, Subchapter B of Chapter I, Title 18 of the Code of Federal Regulations, is amended to read:

PART 8—RECREATIONAL OPPORTUNITIES AND DEVELOPMENT AT LICENSED PROJECTS

(2) The analysis at the head of the said Part 8, preceding § 8.1, is amended to include the following:

8.11 Information respecting use and development of public recreational opportunities.

(B) The following new section is added to the said Part 8:

§ 8.11 Information respecting use and development of public recreational opportunities.

(a) Except as provided in paragraph (b) hereof, each licensee of a project under major or minor Commission license shall prepare with respect to each such project owned and file by June 30, 1967, and biennially thereafter, an original and two conformed copies of F.P.C. Form 80 prescribed by § 141.14 of this chapter for use by licensees of projects under major and minor license. Forms filed subsequently to the 1967 filing need be completed only to the extent necessary to correct, supplement, update or add to the information supplied in a previously filed form. One copy of the report should be retained by the correspondent in its files.

(b) A licensee or applicant who submits a statement that it has previously filed an acceptable recreational use plan pursuant to a special license condition or § 4.41 *Exhibit R* of this chapter will not be required to file Form 80 until December 31, 1968 or at such time as may be required by a special license condition. Such statement shall indicate the document previously so filed and its status, *i.e.*, whether approved as being an accepted recreational use plan submitted pursuant to a special license condition, or as an *Exhibit R* in a pending license application, or as the case may be.

(C) The following new section is added to Part 141, Subchapter D of Chapter I, Title 18 of the Code of Federal Regulations:

§ 141.14 Form No. 80, Licensed Projects Recreation Report,

The form of report, Licensed Projects Recreation Report, designated as F.P.C. Form No. 80, for use by licensees in reporting information with respect to recreational use and development data relating to projects under major and minor license, is approved and prescribed for use as provided in § 8.11 of this chapter.

(D) The effective date of these amendments shall be December 31, 1966.

(E) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP67-51

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 13, 1966)

On September 6, 1966, El Paso Natural Gas Company (Applicant), filed in Docket No. CP67-51 an application and supplement thereto on October 14, 1966, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing a limited-term, best efforts sale and delivery of natural gas to Pacific Gas and Electric Company (PG&E) by use of Applicant's existing facilities, all as more fully set forth in the application.

Applicant and PG&E have entered into a letter agreement dated July 28, 1966, whereby Applicant has agreed, *inter alia,* to sell and deliver to PG&E an additional and annual quantity of 36,500,000 Mcf of natural gas. The additional deliveries will be made for a limited-term, on an interruptible, best efforts basis, and will be additional to the presently certificated firm daily quantity of 1,025,000 Mcf.

The limited-term for which certification is requested will commence on a date coincident with receipt by PG&E from Applicant of all gas paid for but not taken by PG&E under Applicant's Rate Schedule G and deliverable under the Service Agreement between the parties dated September 13, 1965, or from January 1, 1967, whichever first occurs, through October 31, 1967.

Applicant proposes to render the additional service through maximum utilization of its presently certificated pipeline facilities at the existing point of interconnection between Applicant and PG&E's present systems located on the Arizona-California border. The additional service will be provided in such daily quantity of gas as Applicant has available and PG&E may request up to the extent of the available capacity of Applicant's existing facilities. Performance of the service will, however, be subject to the availability of natural gas from Applicant's several sources of supply and the satisfaction of priority requirements of Applicant's customers served from its pipeline system.

No additional pipeline facilities are proposed or required to be constructed by Applicant to enable it to render the proposed natural gas service.

The proposed sale and delivery to PG&E will be performed under Applicant's Rate Schedule G-X-2, FPC Gas Tariff, Volume No. 1.

After due notice a petition to intervene in support of the application was filed by PG&E on October 6, 1966, and a petition in opposition was filed by Transwestern on October 10, 1966. On November 2, 1966, Transwestern withdrew its said petition to intervene. No other petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 8, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the

Commission in its order of October 29, 1942, in Docket Nos. G-242 and G-257 (3 FPC 851).

(2) The proposed sale of natural gas, as hereinbefore described, and as more fully described in the application and exhibits in this proceeding are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed sale of natural gas is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon El Paso's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant, El Paso Natural Gas Company, in this proceeding authorizing the sale of natural gas, as hereinbefore described and as more fully described in the application, supplement and exhibits herein, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

(C) The service authorized shall be commenced, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within six months of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

GRANITE STATE GAS TRANSMISSION, INC., DOCKET NO. CP67-80

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 13, 1966)

On September 23, 1966, Granite State Gas Transmission, Inc. (Applicant), filed in Docket No. CP67-80 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities for the sale and delivery of additional volumes of natural gas to Allied New Hampshire Gas Company (Allied), an existing customer, for resale and distribution in the towns of East Kingston, Kensington, Hampton Falls and Plaistow, New Hampshire, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate two taps and related metering facilities on its main pipeline in Rockingham County, New Hampshire, near the aforementioned towns of Plaistow and East Kingston, and to increase its maximum daily deliveries of natural gas to Allied from 3,570 Mcf to 3,855 Mcf, commencing with the 1966–67 winter season.

Estimated annual deliveries through the new delivery points are 19,970 Mcf in the first year and 65,200 Mcf in the third year of proposed operation. The Public Utility Commission of New Hampshire has authorized Allied to serve the aforementioned communities.

The total estimated cost of Applicant's proposed Plaistow delivery point is $9,900, and the estimated cost of its proposed East Kingston facilities is $10,197. These costs will be financed from funds on hand and Allied will later reimburse Applicant for the cost of the metering stations.

On October 20, 1966, Allied filed a petition for leave to intervene in the instant proceeding in order to protect its rights in the event the Commission determined that a formal hearing was required on the application filed in the subject docket.

After due notice, no other petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on December 8, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Granite State Gas Transmission, Inc., a New Hampshire corporation with its principal place of business in Portsmouth, New Hampshire, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 15, 1965, in Docket No. CP66–37.

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The construction and operation of the proposed facilities and the transportation and sale of natural gas by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of said Regulations.

(5) The certificate hereinafter issued should be conditioned upon Applicant's filing with the Commission an appropriate revised service agreement with Allied New Hampshire Gas Company in accordance with the Commission's Regulations under the Natural Gas Act.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of the facilities and the transportation and sale of natural gas as hereinbefore described and as more fully set forth in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and transportation and sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within three months from the date of this order.

(D) The certificate issued by paragraph (A) above is conditioned upon Applicant's filing with the Commission an appropriate revised service agreement with Allied New Hampshire Gas Company in accordance with the Commission's Regulations under the Natural Gas Act.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

THE MANUFACTURERS LIGHT AND HEAT COMPANY, DOCKET NO. CP67-58

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 13, 1966)

On September 8, 1966, The Manufacturers Light and Heat Company (Applicant) filed in Docket No. CP67-58 an application and an amendment thereto on November 10, 1966, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of 3.5 miles of 8-inch pipeline and metering and regulating facilities comprising a main line tap on Transmission Line No. 94 at Newell, Grant District, Hancock County, West Virginia, all as more fully set forth in the application and amendment thereto.

Applicant specifically requests authority to make a main line tap on Transmission Line No. 94 at Newell, Grant District, Hancock County, West Virginia, in order to provide a source of supply of natural gas for a new retail market area along the east bank of the Ohio River, southwest of Newell, which will be served by Applicant by a gas transmission pipeline to be constructed by Applicant which will extend from said tap in a southwesterly direction terminating at a point near the community of Arroyo, Hancock County, West Virginia. Third year (1969) market estimate in Mcf is:

	Annual	Peak day
(1) Custom Chemicals, Inc	80,000	240
(2) Air Reduction Company, Inc	101,000	375
(3) Waterford Park Race Track	40,000	200
(4) Reductioneering, Inc	40,000	200
Total	261,000	1,015

The total estimated cost of the project is $115,775 which cost will be financed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 8, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, and exhibits submitted in support of the authorization, and upon consideration of the record,

The Commission finds:

(1) Applicant, The Manufacturers Light and Heat Company, a Pennsylvania corporation having its principal place of business in Pittsburgh, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 29, 1944, in Docket No. G-593, *et al.* (4 FPC 821).

(2) The proposed construction and operation of facilities and transportation and delivery of natural gas as hereinbefore described, and as more fully described in the application, and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and transportation and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and transportation and delivery of up to 1015 Mcf per day of natural gas as hereinbefore described and as more fully described in the application, amendment and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The transportation of gas authorized in paragraph (A) above shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 6 months of the date on which this order issues.

(D) The certificate issued by paragraph (A) above shall not entitle the industrial customers to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increase in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NIAGARA MOHAWK POWER CORPORATION, DOCKET NO. E-6890; VIRGINIA ELECTRIC & POWER COMPANY, DOCKET NO. E-6910; NEW YORK STATE ELECTRIC & GAS CORPORATION, DOCKET NO. ORDER TERMINATING PROCEEDINGS

(Issued December 13, 1966)

This order terminates the above styled eight proceedings relating to the accounting and reporting practices of these companies arising from use of accelerated amortization and/or liberalized depreciation. Review of correspondence between the Commission's staff and these companies, and of annual report forms and other papers on file with this Commission indicates compliance with the accounting and reporting requirements of this Commission.[1]

These eight proceedings were initiated by orders to show cause issued over an eleven month interval in the latter half of 1959 and early 1960 as follows:

Niagara Mohawk Power Corporation, Docket No. E-6890, July 30, 1959, 22 FPC 157.

Virginia Electric & Power Company, Docket No. E-6910, December 7, 1959, 22 FPC 1012.

New York State Electric & Gas Corporation, Docket No. E-6911, December 16, 1959, 22 FPC 1047.

South Carolina Electric & Gas Company, Docket No. E-6921, January 8, 1960, 23 FPC 49.

Portland General Electric Company, Docket No. E-6922, January 7, 1960, 23 FPC 44.

Atlantic City Electric Company, Docket No. E-6924, January 24, 1960, 23 FPC 113.

Carolina Power & Light Company, Docket No. E-6925, February 1, 1960, 23 FPC 258.

Central Hudson Gas & Electric Company, Docket No. E-6944, June 7, 1960, 23 FPC 769.

The Commission finds:

It is necessary and appropriate for the purposes of the Federal Power Act and the Commission's Uniform System of Accounts that these proceedings be terminated.

The Commission orders:

The above captioned proceedings are hereby terminated.

---

[1] On December 31, 1962, this Commission issued its opinion in *Appalachian Power Company*, Docket No. E-6900, 28 FPC 1199, affirmed 328 F. 2d 237 (CA4-1964), certiorari denied, 379 U.S. 829. Among other things the *Appalachian* opinion noted that Order No. 204 (19 FPC 837) required companies electing deferred tax accounting to record and report the accumulated accruals arising therefrom in balance sheet and income accounts now designated as Accounts 281, 282, 283, 410 and 411.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67-30

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 13, 1966)

On August 10, 1966, United Gas Pipe Line Company (Applicant), filed in Docket No. CP67-30 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities in order to replace certain existing pipeline facilities and to provide additional pipeline capacity in order to meet the anticipated requirements of its customers in the Tyler, Texas area, Smith and Gregg Counties, Texas, all as more fully set forth in the application.

Applicant seeks authorization for the following:

(1) Construct approximately 0.9 mile of 12-inch loop on Applicant's existing 6-inch pipeline extending from the delivery line to Texas Eastern Transmission Corporation in Longview Compressor Station yard, in Gregg County, Texas;

(2) Construct 0.13 mile of 12-inch pipeline and 0.04 mile of 8-inch pipeline, and remove 0.11 mile of 10-inch yard piping at Longview Compressor Station, Gregg County, Texas;

(3) Construct 21.93 miles of 12-inch pipeline and remove or abandon 21.27 miles of 8-inch pipeline, beginning at approximately Milepost 40.5 on the existing 8-inch Waskom-Tyler line in Gregg County, Texas, and extending in a westerly direction to end at Milepost 61.7 in Smith County, Texas;

(4) Construct 2.15 miles of 10-inch pipeline, orifice meter station and appurtenant equipment, leaving in place the existing 2.05 miles of 8-inch line to serve rural sales and farm tap deliveries only, beginning at Tyler Junction at approximately Milepost 69.5 on the existing 8-inch Waskom-Tyler line and extending to Milepost 71.6 at the Tyler City Gate #1, all in Smith County, Texas.

Applicant states that it is necessary to replace the existing 8-inch pipeline on its Waskom-Tyler line with a 12-inch line because the existing 8-inch line has undergone, since its installation in 1925, subsequent erosion and washing, thereby reducing the amount of cover on portions of the line such that it does not fulfill its standard requirements.

Applicant estimates that the total net cost of the proposed facilities will be approximately $1,419,795.

Temporary authorization for the construction and operation of the proposed facilities was issued by letter dated September 15, 1966.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 8, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 10, 1942 in Docket No. G-232 (3 FPC 863).

(2) The proposed construction and operation of facilities by Applicant as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid construction and operation of facilities are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (b), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding authorizing the construction and operation of facilities hereinbefore described and as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations, within 12 months of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TRANSWESTERN PIPELINE COMPANY, DOCKET NO. CP64–34

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 14, 1966)

On September 26, 1966, Transwestern Pipeline Company (Petitioner) filed in Docket No. CP64–34 a petition to amend further the Commission's order issued December 16, 1963, 30 FPC 1520, in the subject docket, as amended December 4, 1964, 32 FPC 1403, and December 27, 1965, 34 FPC 1560, to authorize Petitioner to sell and deliver up to 460,000 Mcf of gas per day on an annual average basis to Pacific Lighting and Gas Supply Company (Pacific Lighting) for a period ending April 1, 1967, or until the date of commencement of any new service resulting from the order accompanying Opinion No. 500, issued July 26, 1966, 36 FPC 176, in Docket No. CP63–204, *et al.*, whichever date is earlier. Petitioner also proposes to increase its maximum daily demand obligation for such deliveries to 460,000 Mcf, at a border pressure of 620 psig, effective January 1, 1967. Petitioner's proposals are more fully set forth in the subject petition to amend further.

The Commission's order issued December 16, 1963, as amended, authorized Petitioner, among other things, to increase its annual average deliveries to Pacific Lighting from 345,000 Mcf per day to 440,000 Mcf per day for a temporary period ending December 31, 1966, or until the commencement of a new service sought to be initiated in a proceeding pending before the Commission in Docket No. CP63–204, *et al.*, whichever date was earlier. The Commission has been advised that initiation of the new service authorized in Docket No. CP63–204, *et al.*, is expected to commence in the early part of 1967. Accordingly, Petitioner requests the subject extension of the authorization in Docket No. CP64–34.

Due notice of the filing of the petition to amend further and opportunity for hearing thereon has been given by publication in the Federal Register on October 8, 1966 (31 F.R. 13100). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued December 16, 1963, as amended, in Docket No. CP64–34 be further amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued December 16, 1963, as amended, in Docket No. CP64–34 is further amended by increasing the volume of natural gas which may be sold and delivered by Petitioner to Pacific Lighting from 440,000 Mcf to 460,000 Mcf per day on an average annual basis and by extending the terms of the certificate for a period ending April 1, 1967, or until the date of commencement of any new service resulting from the order accompanying Opinion No. 500, issued July 26, 1966, in Docket No. CP63–204, *et al.*, whichever date is earlier, all as hereinbefore described and as set forth in the application to amend further. Further, Petitioner is authorized to increase its maximum daily demand obligation for Pacific Lighting to 460,000 Mcf, at a border pressure of 620 psig, effective January 1, 1967.

(B) Pursuant to the Commission's Regulations, Petitioner shall make any timely and appropriate rate filing which may be required as the result of the subject authorization.

(C) In all other respects said order, as amended, shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

WASHINGTON COUNTY UTILITY DISTRICT OF WASHINGTON COUNTY, TENNESSEE AND EAST TENNESSEE NATURAL GAS COMPANY, DOCKET NO. CP66–189

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued December 14, 1966)

On December 8, 1965, Washington County Utility District of Washington County, Tennessee (Applicant), filed in Docket No. CP66–189 an application, as supplemented on May 23, 1966, pursuant to Section 7(a) of the Natural Gas

Act for an order of the Commission directing East Tennessee Natural Gas Company (Respondent) to establish physical connection of its transmission facilities with the facilities proposed to be constructed by Applicant, and to sell and deliver up to 1,547 Mcf of natural gas per day to Applicant for resale and distribution in the Southwest and Northwest areas of Washington County, Tennessee, and in the adjacent areas of Sullivan County, Tennessee, all as more fully set forth in the application.

Applicant proposes to construct and operate two separate, non-integrated natural gas distribution systems to serve the aforementioned areas. Applicant also proposes to obtain taps from Respondent's existing transmission lines for each of the proposed systems.

On November 14, 1966, the Commission authorized Respondent, by order issued in Docket No. CP66-375, 36 FPC 844, to construct two 2,000 horsepower natural gas compressor stations on its North Line, one to be located near Greenbrier, Tennessee, and the other near Monterey, Tennessee. Said construction will increase Respondent's daily design capacity to approximately 235,338 Mcf per day and its sales capacity by 47,224 Mcf per day. The construction of the two compressor stations and the corresponding increase in design and sales capacity will enable Respondent to comply with the instant proposal.

Applicant's estimated annual and peak day natural gas requirements in the third year of proposed operations are 137,948 and 1,547 Mcf, respectively.

Respondent proposes to construct one of Applicant's proposed interconnections without cost to Applicant, and Applicant proposes to reimburse Respondent for its actual cost of constructing the second interconnection. The total estimated cost of Applicant's proposed facilities is $955,000. Included in this cost is $10,000, representing the reimbursement of Respondent's construction cost. An additional $82,000 construction cost will be incurred by Applicant during the first three years of service.

Applicant's cost of construction will be financed through the sale of natural gas revenue bonds in an amount of $955,000. Revenue generated from the proposed service will be used to finance the additional construction costs during the first three years of service.

Respondent's tariff (Section 4.1, FPC Gas Tariff Fourth Revised Volume No. 1) requires that Respondent bear the cost of installing, maintaining and operating, at or near each point of delivery, a measuring station properly equipped to measure the contract volumes. Thus, Applicant's contribution in aid of construction would be in violation of Respondent's tariff. Accordingly, the Commission will limit the subject order so as to require Respondent to bear the cost of both metering stations.

Correspondingly, Applicant's estimated initial cost of facilities will be reduced from $955,000, to $945,000, with the additional $82,000, cost of construction remaining constant.

On January 12, 1966, Respondent filed an answer to the application herein, stating that upon receipt of authorization for and construction of the requisite system capacity it would have no objection to establishing the physical connections and the service requested by Applicant. In view of the authorization granted by the Commission in the aforementioned Docket No. CP66-375, it appears that Respondent has no objection to the issuance by the Commission of an order as requested by Applicant.

On March 17, 1966, Volunteer Natural Gas Company filed with the Commission a petition to intervene in the instant proceeding. On August 5, 1966, Volunteer withdrew its petition to intervene after resolving its differences with Applicant as to franchise authority and division of service areas.

After due notice, no other petition to intervene, notice of intervention or protest has been filed herein.

The Commission finds:

(1) Respondent, East Tennessee Natural Gas Company, a Tennessee corporation having its principal place of business in Knoxville, Tennessee, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of May 3, 1949, in Docket No. G-1065 (8 FPC 836).

(2) Applicant, Washington County Utility District of Washington County, Tennessee, a corporation organized and existing under the laws of the State of Tennessee, is authorized to construct and operate natural gas facilities and distribute and sell natural gas as proposed.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transmission facilities with the proposed facilities of Applicant and to sell and deliver natural gas to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned as follows:

(a) Applicant shall execute a service agreement with Respondent in accordance with the Commission's Regulations.

(b) Applicant shall be ready to receive natural gas service from Respondent within one year after an order is issued in the instant application.

(c) Respondent shall bear the cost of construction, installation and maintenance of both of the interconnections proposed by Applicant together with the appurtenant metering facilities.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 1,547 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall execute a service agreement with Respondent in accordance with the Commission's Regulations.

(C) Applicant shall be ready to receive natural gas service from Respondent within one year from the date of this order.

(D) Respondent shall bear the cost of construction, installation and maintenance of both of the interconnections proposed by Applicant together with the appurtenant metering facilities.

(E) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

MISSISSIPPI RIVER TRANSMISSION CORPORATION, DOCKET NO. CP67-52

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING RATE FILINGS

(Issued December 16, 1966)

On September 6, 1966, Mississippi River Transmission Corporation (Applicant) filed in Docket No. CP67-52, as supplemented on October 18 and 28, 1966, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the sale and delivery, on a priority interruptible basis, of natural gas to its resale customers for a period ending October 31, 1967, all as more fully set forth in the application, as supplemented, in this proceeding.

Specifically, Applicant proposes to construct and operate a 3,280 horsepower turbine driven centrifugal compressor, together with appurtenant facilities, on its existing 18-inch East Line at a point in Clinton County, Illinois, immediately down-stream from the existing interconnection between Applicant's line and the 30-inch line of Natural Gas Pipeline Company of America.

Further, Applicant proposes to render priority interruptible service to its resale customers electing to receive such service pursuant to Applicant's proposed FPC Gas Rate Schedule PI-1. Such service under the proposed rate schedule is limited to a period ending October 31, 1967. The proposed compressor station will be utilized to transport during the winter season volumes of gas expected to be available from Applicant's East Line supply sources that Applicant would otherwise be unable to deliver because of the capacity limitations of the East Line. Applicant states that installation of the proposed compressor will provide some reserve capacity on its system, resulting in increased system flexibility and in safer and more reliable service for Applicant's customers.

The total estimated cost of the proposed facilities is $711,000, which cost will be financed from funds on hand.

On October 24, 1966, Applicant tendered for filing proposed Original Sheets Nos. 7A through 7E and First Revised Sheet No. 23 to its FPC Gas Tariff, First Revised Volume No. 1, providing for the proposed priority interruptible service. Also on October 24, 1966, Applicant tendered for filing proposed First Revised Sheets Nos. 8 and 10 to its FPC Gas Tariff, First Revised Volume No. 1, cancelling Rate Schedules E-1 and I-1, respectively. These last two rate schedules are those under which Applicant presently sells gas on an interruptible basis to its resale customers.

On October 7, 1966, Owens Illinois, Inc. and Granite City Steel Company, *et al.*, * filed petitions to intervene in this proceeding; however, on October 17, 1966, said petitions were withdrawn. Several other petitions to intervene have been filed herein. None of said other petitioners requests formal hearing in this proceeding. Inasmuch as the shortened procedure is being used herein, no further action on said other petitions appears necessary.

---

*Granite City Steel Company, Cerro Copper & Brass Company, Laclede Steel Company, National Lead Company–Titanium Division, Olin Mathieson Chemical Corporation, and the Pittsburgh Plate Glass Company.

After due notice, no other petition to intervene, notice of intervention or protest to the granting of the application, as supplemented, has been filed.

At a hearing held on December 15, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplements and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Mississippi River Transmission Corporation, a Delaware corporation having its principal place of business in St. Louis, Missouri, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 29, 1960 in Docket No. CP60-95 (24 FPC 1020).

(2) The facilities hereinbefore described, as more fully described in the application, as supplemented, in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sales of natural gas for a period ending October 31, 1967, by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and sales of natural gas for a period ending October 31, 1967, by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) Applicant's proposed Original Sheets Nos. 7A through 7E and First Revised Sheet No. 23 to its FPC Gas Tariff, First Revised Volume No. 1, should be accepted for filing to become effective on the date this order issues and to remain effective only for the period ending October 31, 1967.

(7) Applicant's proposed First Revised Sheets Nos. 8 and 10 to its FPC Gas Tariff, First Revised Volume No. 1, should be accepted for filing to become effective on the date this order issues.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Mississippi River Transmission Corporation, to construct and operate the proposed facilities and to sell and deliver natural gas for a period ending October 31, 1967, as hereinbefore described, all as more fully described in the application, as supplemented, in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the sales and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 6 months from the date on which this order issues.

(D) Applicant's proposed Original Sheets Nos. 7A through 7E and First Revised Sheet No. 23 to its FPC Gas Tariff, First Revised Volume No. 1, are accepted for filing to become effective on the date this order issues and to remain effective only for the period ending October 31, 1967. Applicant shall file appropriate service agreements with those customers electing to receive such service.

(E) Applicant's proposed First Revised Sheets Nos. 8 and 10 to its FPC Gas Tariff, First Revised Volume No. 1, are accepted for filing to become effective on the date this order issues.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PUBLIC WORKS COMMISSION OF THE CITY OF FAYETTEVILLE, NORTH CAROLINA

v.

CAROLINA POWER & LIGHT COMPANY, DOCKET NO. E-7256

ORDER ACCEPTING RATE SCHEDULE FOR FILING EFFECTING RATE REDUCTION, GRANTING WAIVER OF NOTICE REQUIREMENTS, AND PERMITTING WITHDRAWAL OF COMPLAINT

(Issued December 16, 1966)

This order accepts for filing a rate schedule[1] effecting a $238,000 rate reduction by Carolina Power & Light Company (Carolina) to the Public Works Commission of the City of Fayetteville (Fayetteville) submitted pursuant to a settlement agreement proposed by Fayetteville and Carolina in this docket; waives the prior notice requirements of the Commission's Regulations, thus allowing the reduction to become effective December 1, 1966; and permits Fayetteville to withdraw its complaint against Carolina, thus terminating this proceeding.

Fayetteville initiated this matter by a complaint filed November 19, 1965, seeking a rate reduction in Carolina's wholesale rates and charges to Fayetteville which is an all-requirements customer of Carolina. Following Carolina's answer, settlement conferences were held. The settlement proposal embodying the rate reduction presently before the Commission resulted from these conferences. Concurrently with Carolina's filing on December 7, 1966 of the settlement agreement and rate schedule, Fayetteville submitted for our consideration a notice of withdrawal of its complaint.

As indicated above, under the terms of the settlement agreement, Carolina would reduce its rates to Fayetteville by approximately $238,000 annually (based on figures for 12 months ending September 30, 1966). The new agreement would run for a term of seven years, cancellable by either party at the end of that period upon three years notice. Fayetteville has stated that it will pass on to ultimate consumers the entire rate reduction. In addition,

---

[1] Designated in the Commission's files as: Carolina Power & Light Company Rate Schedule F.P.C. No. 93, superseding Rate Schedule F.P.C. No. 80 and Exhibit A thereto.

Carolina states that upon acceptance for filing of the Fayetteville rate schedule by the Commission, it will submit for filing a similar rate reduction for its 23 other municipal customers and two small investor-owned wholesale customers, also to become effective December 1, 1966.

The demand and energy portions of the rate are as follows:

$1.75 per kw for the first 400 kw of demand.
$1.35 per kw for the next 5,600 kw of demand.
$1.25 per kw for all additional kw of demand.
0.65¢ per kwh for the first 125,000 kwh.
0.55¢ per kwh for the next 125,000 kwh.
0.47¢ per kwh for the next 2,250,000 kwh.
0.43¢ per kwh for all additional kwh.

By accepting the proffered rate schedule we do not determine what would be the fair rate of return for Carolina to earn upon its wholesale electric business, nor the basis for disposition of disputed items in the respective cost of service data exchanged by Carolina and the staff, as would be done were this proceeding terminated following a complete trial of all issues. Our rate making authority is a continuing process and disposition of this proceeding on the indicated basis in no way limits our ability to re-examine Carolina's wholesale rates and charges at any time hereafter. In disposing of this case upon the basis of the proffered rate schedule and resulting revenue, we take note of the immediate rate relief which will be afforded thereby.

The Commission finds:

(1) Good cause has been shown that the 30-day notice period provided in Section 35.3 of the Commission's Regulations under the Federal Power Act be waived with respect to Carolina's rate schedule filing referred to above and designated as Carolina's Rate Schedule F.P.C. No. 93, and that such rate schedule be accepted for filing and allowed to take effect as of December 1, 1966.

(2) It is necessary and appropriate for the purposes of the Federal Power Act that Fayetteville be permitted to withdraw its complaint against Carolina and that this proceeding thereby be terminated.

The Commission orders:

(A) The 30-day notice period provided in Section 35.3 of the Commission's Regulations under the Federal Power Act is waived with respect to the proposed rate schedule as referred to above and designated as Carolina's Rate Schedule F.P.C. No. 93 and the rate schedule is accepted for filing and allowed to take effect as of December 1, 1966.

(B) The issuance of this order shall constitute full notice of the filing and publication of the rate schedule in question insofar as its effective date is concerned.

(C) Acceptance of Carolina's rate schedule as herein provided is without prejudice to any findings or orders which have been or may hereafter be made by this Commission in any proceeding by or against Carolina. Moreover, nothing in this order shall be construed as waiver in any other respect of the requirements of Section 205 of the Federal Power Act or Section 35.11 of the Commission's Regulations under the Federal Power Act; nor shall this order be construed as constituting approval by this Commission of any service, rate, charge, classification, or any rule, regulation, contract or practice affecting such service or rate provided for in the rate schedule referred to above and designated as Carolina's Rate Schedule F.P.C. No. 93; nor shall this order be deemed as recognizing any claimed contractual right or obligation affecting or relating to such service or rates.

(D) Fayetteville is granted permission to withdraw its complaint in this docket and this proceeding is terminated.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67-21

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 16, 1966)

On July 28, 1966, United Gas Pipe Line Company (Applicant), filed in Docket No. CP67-21 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities for the sale and delivery of additional natural gas to the Town of Rayville (Rayville), Richland Parish, Louisiana, to meet the additional requirements of Rayville's electric generating plant as set out in Applicant's contract with Rayville, all as more fully set forth in the application.

Applicant was authorized to install and operate dual 500-B metric meters, together with appurtenant equipment, located at the Rayville Town Border Station site, Rayville, Louisiana, replacing existing dual No. 4 Emco meters.

Applicant, by paragraph (C) of the order of the Commission issued on December 6, 1966, *supra*, p. 992, was required to construct and place in operation the authorized facilities by January 1, 1967. Applicant has requested that the date for commencement of operation thereof be extended to March 1, 1967.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued December 6, 1966, in Docket No. CP67-21 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued December 6, 1966, in Docket No. CP67-21 is amended so as to extend the time for completion of the authorized facilities from January 1, 1967 to March 1, 1967.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

LONE STAR GAS COMPANY, DOCKET NO. CP67-124

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 19, 1966)

On November 2, 1966, Lone Star Gas Company (Applicant) filed in Docket No. CP67-124 a "budget-type" application pursuant to Section 7(c) of the

Natural Gas Act, as implemented by Section 157.7(c) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and the operation of certain miscellaneous gas sales transportation facilities for the purpose of making direct sales of natural gas, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate facilities to be utilized for direct sales of natural gas to industrial customers located in areas outside of the franchise areas of any local distributor. The maximum delivery to any one customer will not exceed 100,000 Mcf of natural gas annually and the gas will not be sold for boiler fuel purposes as defined by Section 157.7(c)(9) of the Regulations under the Natural Gas Act.

The total estimated cost of Applicant's proposed facilities will not exceed $75,000, with each individual project limited to a maximum cost of $15,000. Applicant proposes to finance its cost of construction from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on December 15, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Lone Star Gas Company, a Texas corporation having its principal place of business in Dallas, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 11, 1944, in Docket No. G-442 (4 FPC 565).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation and sale of natural gas in interstate commerce and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c)(1)(ii), (c)(2) and (c)(7) of Section 157.7 and paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $75,000, with the total deliveries to any one direct industrial customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(8) The certificate issued hereinafter should not entitle the industrial customers to whom firm deliveries are authorized to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of resale customers desiring to acquire additional gas to meet any future increases in their requirements.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant to construct during the calendar year 1967 the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities for miscellaneous rearrangements and to sell natural gas to distributors for resale as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c)(1)(ii), (c)(2) and (c)(7) of Section 157.7 and paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $75,000, with the total deliveries to any one direct industrial customer limited to a maximum of 100,000 Mcf of natural gas per year.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued shall not entitle the industrial customers to whom firm deliveries are authorized to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

MIDWESTERN GAS TRANSMISSION COMPANY, DOCKET NOS. G-18313, CP66-172

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 19, 1966)

On October 4, 1966, Midwestern Gas Transmission Company (Petitioner), filed in Docket Nos. G-18313 and CP67-172 a petition to amend the orders issued in the said dockets on October 31, 1959, 22 FPC 775, and March 25, 1966, 35 FPC 416, respectively, by requesting authorization to extend the term of the contract dated March 25, 1966, between Petitioner and Trans-Canada Pipe Lines, Limited (Trans-Canada), all as more fully set forth in the petition to amend.

The order of March 25, 1966, in Docket No. CP66–172, *et al.*, authorized Petitioner to sell up to 25,000 Mcf of natural gas per day to its existing northern system customers on an interruptible basis for a term ending on October 31, 1966. That order also, by further amending paragraph (M) of the Commission's order issued October 31, 1959, in Docket No. G–18313, *et al.*, as amended by order issued August 10, 1965, 34 FPC 457 in Docket No. CP64–308, *et al.*, authorized Petitioner to import on an interruptible basis up to 25,000 Mcf of natural gas daily from Trans-Canada during the same term.

Petitioner commenced service to its northern system customers as authorized and commenced the importation of natural gas as authorized from Trans-Canada. Recently Petitioner has received requests from its northern customers for an extension of the availability of the interruptible service after October 31, 1966.

Petitioner specifically requests that the Commission's order of March 25, 1966, in Docket No. CP66–172, *et al.*, be amended to extend the term of such authorization for a period terminating on November 1, 1967, and that the Commission's order of October 31, 1959, in Docket No. G–18313, *et al.*, be further amended to authorize the continued importation of 25,000 Mcf per day of natural gas on an interruptible basis for the same term.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on October 15, 1966 (31 F.R. 13400). No protest or petition to intervene has been filed in the proceeding concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that the order of the Commission issued on March 25, 1966 in Docket No. CP66–172 be amended so as to extend the term of such authorization for a period terminating on November 1, 1967, and that the Commission's order of October 31, 1959 in Docket No. G–18313, *et al.*, be further amended so as to authorize the continued importation of 25,000 Mcf per day of natural gas on an interruptible basis for the same term on the following conditions:

(1) Midwestern shall file an amendment to its contract of March 25, 1966 with Trans-Canada which shall incorporate in said contract the conditions set out in the letter agreement between the parties dated September 16, 1966.

(2) Trans-Canada shall obtain necessary authorization from the appropriate Canadian regulatory authorities.

(3) Midwestern shall make such rate filings as may be necessary in order that its TGS–2 rate shall continue to reflect its CD–2 rate at 200 percent load factor.

The Commission orders:

(A) The order of the Commission issued on March 25, 1966 in Docket No. CP66–172 is amended so as to extend the term of such authorization for a period terminating on November 1, 1967, and the Commission's order of October 31, 1959 in Docket No. G–18313, *et al.*, is further amended so as to authorize the continued importation of 25,000 Mcf per day of natural gas on an interruptible basis for the same term on the conditions that:

(1) Midwestern shall file an amendment to its contract of March 25, 1966 with Trans-Canada which shall incorporate in said contract the conditions set out in the letter agreement between the parties dated September 16, 1966.

(2) Trans-Canada shall obtain necessary authorization from the appropriate Canadian regulatory authorities.

(3) Midwestern shall make such rate filings as may be necessary in order that its TGS-2 rate shall continue to reflect its CD-2 rate at 200 percent load factor.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-79

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 19, 1966)

On September 23, 1966, Northern Natural Gas Company (Applicant), filed in Docket No. CP67-79 an application and on November 4, 1966 a supplement thereto pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the acquisition and operation of certain facilities of Northern Natural Gas Pipeline Company (Pipeline) and the transportation and sale of natural gas in interstate commerce, all as more fully set forth in the application.

Applicant proposes to acquire by merger from and operate the jurisdictional facilities of its wholly owned subsidiary, consisting of approximately 150 miles of main, lateral and gathering pipelines varying in diameter from 3.5 inches to 16 inches, a compressor station with total horsepower of 2,720 and 3 treatment plants all located in Val Verde, Sutton, Schleicher and Crockett Counties, Texas.

Applicant purchased all of the outstanding securities of Pioneer Gathering System, Inc. on June 30, 1961, and since that date has been operating such company as a wholly owned subsidiary under the name of Northern Natural Gas Pipeline Company.

The application states that upon dissolution of Pipeline, Applicant will continue to render service to Pioneer Natural Gas Company through the facilities now owned by Pipeline Company. Pipeline sells to Northern, pursuant to its FPC Rate Schedule P-1, at a rate of 14.0 cents per Mcf. Sales to Pioneer are pursuant to contract provisions at 17.0 cents per Mcf.

Under FPC Rate Schedules T-1, natural gas is exchanged and transported for El Paso and under FPC Rate Schedule T-2 gas is transported for Northern, both at a rate of 1.75 cents per Mcf. In addition, a small amount of gas is transported for Northern (FPC Rate Schedule T-3) at 0.04 cents per Mcf. All measurements are at 14.65 psia.

Upon acquisition, Northern will continue serving Pioneer and the transportation and exchange with El Paso will be continued. Applicant's Rate Schedules P-1, T-2 and T-3 will be cancelled.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

Northern proposes to effectuate the merger on December 31, 1966, and thereby simplify accounting and bookkeeping of the consolidation. It also requests that all authorizations and orders, as supplemented or amended, be amended by substituting its name for Pipeline's.

At a hearing held on December 15, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and exhibits, submitted in support of the authorizations sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The proposed acquisition and operation of facilities, as hereinbefore described and as more fully described in the application and exhibits, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed acquisition and operation of facilities are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (d)(2), (d)(3), (e) and (f) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the acquisition and operation of facilities, as hereinbefore described and as more fully described in the application, and exhibits filed in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (d)(2), (d)(3), (e) and (f) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be acquired as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by December 31, 1966.

(D) All authorizations and orders issued to Pipeline, as supplemented or amended, are hereby amended by substituting Northern Natural's name for Pipeline's.

(E) Within 30 days after the issuance of this order Applicant shall make appropriate filing of notices of cancellation of Pipeline's Rate Schedules P–1, T–2 and T–3.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PORTLAND GENERAL ELECTRIC COMPANY, PROJECT NO. 2030

ORDER APPROVING REVISED AND ORIGINAL PROJECT EXHIBIT L DRAWINGS AND REVISED EXHIBIT M

(Issued December 19, 1966)

On July 1, 1966, Portland General Electric Company, licensee for Project No. 2030 located on the Deschutes River in Oregon, filed for Commission approval "as built" revised and other Exhibit L drawings and revised Exhibit M for the Round Butte development. The exhibits were filed pursuant to Article 5 of the license.

The exhibits show that the project has been built substantially as shown on license Exhibits L and M approved by Commission order issued on September 12, 1960, 24 FPC 408. The "as built" drawings reflect minor changes made to the original project design and layout resulting from additional project design studies, foundation conditions revealed following actual excavation, and the characteristics of the construction materials used during construction. The changes referred to are such as location of power and spillway intakes, powerhouse alignment, increase in dam width at crest from 35 to 44 feet, and redesign of spillway structures.

By letter of October 12, 1966, the Department of the Interior advises that its Fish and Wildlife Service considers that the Exhibit L drawings for the fish facilities adequately depict the fish facilities installed except there is no drawing to show the floating collector for the downstream migrant fish. However, the latter facility was used during the filling of the reservoir until the lake reached sufficient elevation to operate the permanently installed downstream migrant facilities shown on Sheets Nos. 7 and 8 (FPC No. 2030–157 and –158). Since the collector for the migrants is not a permanent facility and was used only for a limited period it need not be included as a project work under the license but costs associated with the collector may be allowed.

The Commission finds:

The following described exhibits conform to the Commission's rules and regulations and should be approved as part of the license for the project, and the license exhibits described herein as being superseded should be eliminated from the license for the project:

Exhibit L:

Revised sheet No.	FPC No.	Title	Superseding FPC No.
1	2030–151	General plan	2030–97
2	2030–152	Typical sections	2030–98
3	2030–153	Spillway diversion and power tunnels	2030–99
4	2030–154	Spillway and power tunnel intake and control structures.	2030–100
5	2030–155	Powerhouse plans and sections	2030–101
6	2030–156	Fish facilities upstream migrant structure	
7	2030–157	Fish facilities downstream migrant structure	
8	2030–158	Fish facilities downstream migrant locking tank and facilities diagrammatic layout.	

Exhibit M (Revised): Comprising two typewritten pages filed July 1, 1966, superseding Exhibit M filed March 19, 1959.

The Commission orders:

The exhibits designated and described in the above finding as conforming to the Commission's rules and regulations are hereby approved as part of the license for Project No. 2030, and the superseded license exhibits described in the same finding are hereby eliminated from the license for the project.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP67–96

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 19, 1966)

On October 14, 1966, Southern Natural Gas Company (Applicant), filed in Docket No. CP67–96 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act as implemented by Section 157.7(c) of the Regulations under the Act for a certificate of public convenience and necessity authorizing the construction during the twelve-month period extending from December 30, 1966 through December 29, 1967, and operation of certain natural gas facilities to be used in the transportation and sale of natural gas in interstate commerce, all as more fully set forth in the application.

Specifically, Applicant seeks authorization to construct and operate facilities to make sales of natural gas to existing distributors in existing market areas, facilities to make direct sales of natural gas to consumers located in areas outside the franchise area of any local natural gas distributor, and facilities representing miscellaneous rearrangements of existing facilities, not resulting in any change in service.

Applicant's proposed construction will consist of line taps, metering and regulating stations, and various types of pipelines, including lateral and loop pipelines.

Deliveries by Applicant to any one distributor or consumer through the proposed facilities will not exceed 100,000 Mcf of natural gas annually and will not be used by the distributor or consumer for "boiler fuel purposes" as defined in Section 157.7(c)(9) of the Commission's Regulations.

The total estimated cost of Applicant's proposed facilities will not exceed a cost of $300,000, with no single project exceeding a cost of $50,000. Applicant will finance its cost of construction from funds on hand or from funds generated from operations.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 15, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Southern Natural Gas Company, a Delaware corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 6, 1942, in Docket No. G–296 (3 FPC 822).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation and sale of natural gas in interstate commerce and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c)(1), (c)(2), (c)(3) and (c)(7) of Section 157.7 and paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to the period extending from December 30, 1966, through December 29, 1967, and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $300,000, with no single project to exceed a cost $50,000, and the total deliveries to any one customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant to construct during the period extending from December 30, 1966, through December 29, 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities to sell natural gas to distributors for resale and to direct customers as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c)(1), (c)(2), (c)(3) and (c)(7) of Section 157.7 and paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is limited to construction during the period extending from December 30, 1966, through December 29, 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $300,000, with no single project to exceed a cost of $50,000, and the total deliveries to any one customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued shall not entitle the industrial customers to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP67-85

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 19, 1966)

On September 28, 1966, Texas Gas Transmission Corporation (Applicant) filed in Docket No. CP67-85 an application and supplement thereto on October 31, 1966, pursuant to Section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the construction and operation of a 2-inch side valve and a positive meter station south of Applicant's Petersburg Compressor Station on its existing 12-inch line in Warrick County, Indiana, all as more fully set forth in the application and supplement thereto.

Applicant seeks authority to establish a new delivery point for Southern Indiana Gas and Electric Company (Southern Indiana), an existing customer. Natural gas delivered through this delivery point is for resale by Southern Indiana to the town of Elberfeld, Warrick County, Indiana and its environs and in rural areas in Vanderburgh and Warrick Counties, Indiana.

Annual and peak day requirements associated with service to Elberfeld are 24,920 Mcf and 274 Mcf respectively. No increase in the contract demand of Southern Indiana is proposed for this service.

The cost of the facility is estimated to be $6,000 and will be financed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, has been filed.

At a hearing held on December 15, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Texas Gas Transmission Corporation, a Delaware corporation having its principal place of business in Owensboro, Kentucky, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1948, in Docket No. G-855 (7 FPC 213).

(2) The proposed construction and operation of facilities, and the sale of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application, filed in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, and the

sale of natural gas in interstate commerce are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Texas Gas Transmission Corporation, authorizing the construction and operation of facilities, and the sale of natural gas as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, and the sale of natural gas authorized in paragraph (A) above shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

(D) Applicant shall file pursuant to Part 154 of the Commission's Regulations an acceptable revised service agreement reflecting the terms and conditions of sale and delivery at the new delivery point to Southern Indiana Gas and Electric Company.

OPINION NO. 509

TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP66-150

OPINION AND ORDER GRANTING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 19, 1966)*

Syllabus

1. Proposed 16-inch Tryon lateral, as opposed to 12-inch line, offers opportunity for large additional growth and additional net revenues more than sufficient to cover comparatively little additional cost—this does not mean that once it is determined lateral will earn adequate return Commission shall automatically accept management's judgment that it be built. P. 1062.
2. In future proceedings, Commission expects record to be developed to show as clearly as possible whether proposed lateral is or is not unnecessarily large in light of expected market development. P. 1062.

---

*Initial decision appears on p. 1070.

3. Since lateral will earn adequate return even with no increases above sales proposed to distributors, Commission is justified in granting pipeline's request to build line long enough to take care of increases in load in next decade or more. P. 1063.
4. To limit size of line here because of its potential use in channeling off-peak or valley gas to distributor's area to the benefit of firm customers of both pipeline and distributor would represent protection of Coal Interests from competition at expense of gas consumers. P. 1063.
5. Since 16-inch lateral will earn adequate return, prior cases requiring filing of contracts to show economic feasibility are not applicable. P. 1063.
6. Non-discriminatory treatment of all Transco's customers requires extension of line beyond Tryon in accordance with its lateral line formula. P. 1064.
7. Order No. 328 is not intended to require that a pipeline state the considerations which might lead it voluntarily to provide new or increased service to a customer. P. 1065.
8. Commission does not intend by lateral line formula to take away a pipeline's discretion to build a lateral, but if lateral is built voluntarily or required by Commission order, pipeline must build or furnish funds for building in order to treat its customers equitably. P. 1065.
9. In a proceeding under Section 7 of the Natural Gas Act, Commission *issues* certificate of public convenience and necessity authorizing Tryon lateral and requires pipeline to file lateral line extension formula as part of tariff.

Edward B. Hipp for the North Carolina Utilities Commission.

David S. Lichtenstein for the Staff of the Federal Power Commission.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

O'CONNOR, *Commissioner:*

This is a proceeding under Section 7(c) of the Natural Gas Act in which Transcontinental Gas Pipe Line Corporation (Transco) seeks a certificate of public convenience and necessity authorizing facilities to increase the capacity of its mainline transmission system, the construction of a lateral to Tryon, North Carolina, and the sale for resale of an additional 22,556 Mcfd of gas to two of its customers, the Public Service Company of North Carolina, Inc. (Public Service) and the Piedmont Natural Gas Company (Piedmont).

Transco's application was filed November 12, 1965, was supported by its customers, and was opposed by the Coal Interests (Fuels Research Council, Inc., the National Coal Association and the United Mine Workers of America). After the hearing was completed and briefs exchanged, Transco, on June 7, 1966, filed an application for a temporary certificate or, alternatively, a motion for omission of the intermediate decision of the examiner alleging need of the facilities to render service for the winter season 1966–1967, but the Commission by order of July 7, 1966, 36 FPC 25, found no showing of a clearly defined emergency and denied both requests. On August 22, 1966, the Presiding Examiner, Harry C. Shriver, issued his decision granting Transco a certificate with certain conditions.

On August 24, 1966, alleging the need for the Tryon lateral this winter, Transco filed a second motion for a temporary certificate to construct the Tryon lateral, to be used to serve Public Service and Piedmont. On September 30, 1966, the Commission by letter granted a temporary certificate, limiting deliveries through the Tryon lateral to 18,000 Mcfd and providing that should the Commission deny a permanent certificate the cost of the facilities should not be included in Transco's rate base. By telegram of October 5, 1966, Transco rejected this certificate because of the rate base condition. Transco, the Coal Interests and our staff have filed exceptions to the Examiner's decision; Transco and the North Carolina Utilities Commission have filed briefs opposing exceptions.

Factual Background

Transco's main pipeline extends from the Texas Gulf Coast by way of South Carolina and North Carolina to New York. Transco presently renders service to Public Service at a number of delivery points including Transco's compressor station 145 just north of the North Carolina-South Carolina border. From there Public Service's line extends westerly to Asheville, North Carolina, serving parts of its Western Division and United Cities Gas Company (See attached map).

In the present application Transco proposes to construct 7.65 miles of 36-inch main pipeline loop in Mississippi and 4.15 miles in Alabama. In addition, it plans to construct the Tryon lateral consisting of 28 miles of 16-inch line extending from its station 140 near Moore, South Carolina in a northerly direction to Tryon just across the border in North Carolina. Delivery would be made from this lateral to Piedmont at Inman and Landrum in South Carolina and to Public Service at Tryon. The total cost of Transco's proposed facilities would be $3,730,000, of which $1,790,000 applies to the Tryon lateral.

Among the possible issues in this proceeding there is no question about gas supply, engineering feasibility, financing, or the need for an additional gas allocation to Public Service and Piedmont. Public Service presently receives 85,558 Mcf on a peak day; and it projects 107,000 Mcf for its peak day demand in the winter of 1967–68. Under the proposed allocation Transco would supply the difference, 21,442 Mcfd. Of this amount 12,627 Mcfd will be delivered through the Tryon lateral in 1967–68. On its part Piedmont shows that at Inman and Landrum its requirements will increase in the third year (1968–69) to 1,114.0 Mcfd, which Transco would supply entirely through the Tryon lateral.

There are left in issue two important matters: (1) the size and length of the Tryon lateral and (2) the form of Transco's lateral line formula and whether it should be filed as a part of its tariff. There is also a question of whether a certificate should be issued for Transco's mainline facilities before a final determination is made with respect to the prior expansion.

The Size of the Tryon Lateral

The basic question here is whether we should approve the construction of a lateral line only large enough to meet firm demands for a few years or whether we should permit Transco to build a larger line at a greater cost, but proportionately much greater capacity, that will meet probable needs for more than a decade. Transco proposes that its Tryon lateral be 16 inches in diameter, and is supported by the North Carolina Commission. On the other hand, the Coal Interests contend that such a lateral would be extremely oversized and that it should be 8 inches in diameter. The Examiner notes the contentions of the Coal Interests, admits that the capacity of the lateral is beyond immediate future needs, but grants a certificate for the 16-inch lateral.

The record does not show the capacity or cost of an 8-inch line as proposed by the Coal Interests, but information as to the capacity of similar lines, of which we can take notice, indicates the capacity would be about 18,000 Mcf per day (Mcfd) and would cost approximately one million dollars. A 12-inch line, on which evidence was presented and which is advocated in the dissenting opinion, would have a capacity of approximately 50,000 Mcfd and would cost only about $300,000 less than the proposed 16-inch lateral, which would have a capacity of 93,791 Mcfd and would cost $1,790,000.

In our opinion the 8-inch line would be too small in view of the expected market for the gas. By the third year of operation the market attached to that part of Public Service's Western Division to be served through the Tryon lateral and the Asheville line (Tryon-Asheville area) would represent a total maximum firm demand of 31,080 Mcfd, and by the fifth year it would amount to 34,475 Mcfd. The 8-inch line would supply 18,000 Mcfd less 1,114 Mcfd for Piedmont, and the Asheville line would supply 15,600 Mcfd less a transportation obligation of 1,862 Mcfd for United Cities Gas Company. The total gas available with the 8-inch line would thus be only 30,624 Mcfd, less than the third year estimated firm market.

A 12-inch line in conjunction with the Asheville line after deducting the Piedmont and United Cities loads, would have a capacity of 62,624 Mcfd and would enable Public Service to meet its Tryon-Asheville peak, accepting its market estimates. However, it appears that Public Service has a substantial interruptible industrial market attached in its Tryon-Asheville area.

Public Service's market evidence relating to the future of the industrial load is based in part on interviews with industrial customers, but also makes somewhat conjectural assumptions regarding the attachment of customers now utilizing other fuels. This evidence, however, does not take into account new industries that would undoubtedly locate in the presently served areas nor does it consider the unserved market areas in adjoining counties referred to by the North Carolina Commission. We are here dealing with a long range projection of markets as to which there obviously could be no guarantee, but such a long range forecast represents the best judgement of the distributor serving the area. With these considerations in mind, we shall accept Public Service's evidence as a rough indication of the future Tryon-Asheville load that by the tenth year the average day sales will amount to about 75,000 Mcf, which is more than could be delivered by a 12-inch Tryon lateral plus the Asheville line, but which could be delivered over the proposed 16-inch Tryon lateral.

Transco's Vice-President testified that "We have to do some long-range planning on this system if we are not to end up with a maze of relatively small diameter pipes, with a high investment cost, and a high cost of service." He believed Public Service was a growing customer, and that Transco should put in a 16-inch line instead of a 12-inch line at a cost of only $300,000 more and get approximately 43,000 Mcfd of additional capacity. In our opinion the use of compression to obtain this additional capacity would be more expensive.

The record indicates that while Public Service does not purchase additional contract demand gas for service to interruptible customers, the company does desire to maintain or better its load factor of 85 percent. Under Transco's established tariffs all purchases of gas by Public Service even on a primarily interruptible basis will, over and beyond meeting incremental costs, return significant amounts on Transco's fixed costs to the advantage of its firm customers.

Furthermore, a high load factor under state regulation should also result in lower costs for the firm customers of Public Service. Since Public Service now pays a demand and a commodity charge to Transco, the greater volumes it takes, the lower will be its average unit cost of gas.

Public Service apparently plans to achieve a high load factor by delivering substantial amounts of gas to its interruptible customers during those periods when its system is not demanding peak service. During these valley periods it could take additional gas from Transco at Tryon rather than at other points of delivery and deliver this gas to interruptible customers in the Tryon-Asheville area. To deliver gas to this area at the estimated tenth-year level of 75,000 Mcfd would, of course, require increases in Public Service's contract demand purchases. Transco, the record shows, now has a deliverability life of about 14 years. The additional requirements of this proceeding plus the projected increased requirements of the Western Division in the next decade would not reduce this deliverability life as much as a year even if Transco attached no more gas. If the market became so great that Public Service had to purchase gas in excess of its contract demand as provided in its tariff, the fact that it may have excess capacity will not enable Transco to discriminate in its favor, because the tariff provides for an allocation of such excess gas among Transco's customers requesting such service in proportion to their contract demands.

There is little doubt that the 16-inch lateral as planned will produce an adequate return on the proposed investment. The record shows that on the basis of the third year of operation, the Tryon portion of Transco's expansion project would on an incremental basis produce a return of 16.68 percent. The fact, however, that the 16-inch lateral will earn an adequate return is not a sufficient justification by itself for building a line of this size. Here it is our opinion that the 16-inch line, as opposed to the 12-inch line, offers the opportunity for large additional growth and additional net revenues more than sufficient to cover the comparatively little additional cost. The record does indicate a favorable outlook for future markets, particularly the interruptible market, and a 16-inch lateral would enable Public Service to serve more fully and encourage the development of its markets. This should contribute to a higher load factor and a lower unit cost of purchased gas to the benefit of its firm customers.

This conclusion does not mean that once it is determined that a proposed lateral will earn an adequate return we shall automatically accept the judgment of management that the lateral should be built. In future proceedings we shall expect that the record will be developed to show as clearly as possible whether a proposed lateral is or is not unnecessarily large in the light of the expected development of the market. Here, in view of the comparatively small increase in investment necessary to build a 16-inch line as opposed to a 12-inch line, the expected development of the market and the other factors listed above, we shall approve the 16-inch line as proposed, thus affirming the Examiner on this question. The arguments made by the Coal Interests do not alter this conclusion.

The Coal Interests argue that extrapolation of industrial requirements into the tenth year and beyond is particularly tenuous because of the highly competitive prices of other energy. Pointing to Public Service's estimates they contend that Public Service is being unduly optimistic in estimating it will attach customers, particularly the large Champion Paper Company at Canton, North Carolina. They also argue that no contracts have been submitted for Champion Paper or any other customers although the Commission in numerous cases has required the submission of contracts.

It is clear that Public Service's estimates for the distant future could not be relied upon to show whether it would earn an adequate return, but since the line will do so even with no increases above the sales proposed to Public Service and Piedmont, the Commission would be justified in granting Transco's request to build a line large enough to take care of increases in load in the next decade or more in the Tryon-Asheville area and possibly in adjacent counties. While some of this territory may not be economically attractive at the present time it is reasonable to build a somewhat larger line at a minimal increase in cost to provide for the contingent future needs that are indicated by this record. In fact, to limit the size of the line here because of its potential use in channeling off-peak or valley gas to Public Service's Tryon-Asheville area to the benefit of the firm customers of both Transco and Public Service would represent protection of the Coal Interests from competition at the expense of gas consumers. As said in *National Coal Association* v. *F.P.C.*, 191 F. 2d 462 (CADC), even if the Gas Act be construed to confer a right upon competing fuel to participate in Commission proceedings, "it does not follow that the interests of such groups in retention of markets may bar issuance of a certificate found to satisfy the explicit criteria furnished by §7(e) of the Act." *Cf. Mid-America Pipeline Co.* v. *F.P.C.*, 330 F. 2d 226 (CADC–1964).

Since the 16-inch line will earn an adequate return, the cases that require the filing of contracts in order to show the economic feasibility of a branch line are not applicable. Furthermore, in *Northern Natural Gas Co.*, 30 FPC 859, 864, the Commission said there is no reason in every case to require certificate applicants to obtain firm commitments from their anticipated customers: "firm commitments will be required only where the contemplated sales appear to have a strong bearing on the economic feasibility of the project." There the Commission required contracts to be filed where the industrial sales involved account for more than 15 percent of the branchline revenues. It would appear that here the largest of the prospective customers, the Champion Paper Company, would represent less than 15 percent of the annual volumes of gas estimated to be sold in the Tryon-Asheville area, except for the first year, and presumably less than 15 percent of the revenues.

The Length of the Tryon Lateral

Transco and Public Service have agreed that Transco build as far as Tryon and that Public Service should build from there to Mill Springs and beyond. The North Carolina Commission, however, points out that under Transco's lateral line formula the $1,790,000 proposed cost of the Tryon lateral is $475,000 short of the maximum expenditure under the formula, argues that this additional amount would permit Transco to construct 7.3 miles of lateral line beyond Tryon, asks that Transco make this additional investment, and requests that Transco be required to build the entire distance to Mill Springs or the connection with Public Service's Asheville line. The Examiner finds that Transco should extend the lateral beyond Tryon, for he finds that Tryon is not a natural terminus. Transco excepts, pointing out that Public Service did not request that it build beyond Tryon.

In this proceeding Transco has set forth its policy in considering pipeline facilities for new services. Its statement consists of a formula for computing its investment in any pipeline extension and certain reservations regarding its discretion in making a pipeline extension. The relationship of these reservations to the investment formula will be discussed below. The formula itself is directly applicable to the Tryon extension.

Under Transco's formula its investment in any pipeline extension would be based on third-year revenues less (1) cost of gas, and (2) a system contribution which is the result of multiplying the Mcf of contract demand utilized in computing the third-year revenues by $33. The net amount would be divided by 15 percent to obtain Transco's investment. Transco asserts that its policy statement is fair and reasonable and should be approved by the Commission.

There is no dispute that Transco's formula when applied to the estimated third-year (1969) revenues from the Tryon lateral provides that Transco's investment should be $2,265,000 or $475,000 more than the proposed expenditure of $1,790,000. Testifying generally as to the operation of the formula Transco's Executive Vice-President says that the company will build within the limits of the formula, although it would minimize cost to it if agreeable to the customer. In this case he admitted the market the company was seeking was to feed into Public Service's Asheville line.

In our opinion non-discriminatory treatment of all Transco's customers requires that Transco extend its line beyond Tryon in accordance with its lateral line formula. To so require would be consistent with our practice of ordering a pipeline to extend its facilities pursuant to its lateral line formula in order to make deliveries of gas to applicants for service. *American Louisiana Pipe Line Co., et al.*, 27 FPC 967, 969, 981, 983; *City of Wetmore, Kansas*, 33 FPC 851, 855; *Wisconsin Gas Co.*, 36 FPC 348, Docket No. CP66–389, August 1, 1966. We do not interpret Transco's formula to mean that it must build distribution type facilities, such as facilities beyond the "city gate".

We do not think it persuasive that Public Service did not request the extension of the Tryon lateral to the limits of the formula. Agreement was reached before the formula was established and Transco's policy known. Furthermore, it is not persuasive that the additional mileage of line could be used for line pack, that is gas storage. There is nothing to show that an equal amount of storage could not be produced for less than the $475,000 that Public Service would otherwise have to invest in the lateral. We agree with the North Carolina Commission that this amount could well be invested in other parts of the Public Service system. In arriving at this result, however, we do not mean to imply that in all cases we will insist on literal application of a lateral line formula even though the distributor company would obtain benefits greater than its expenditures by building part of the lateral for itself, but this has not been shown here. Therefore, we shall require as a condition of the certificate issued to Transco that it extend its line beyond Tryon as far as permitted by its lateral line formula with the option to build the additional distance to an interconnection with Public Service's Asheville line.

Filing the Lateral Line Formula

The issue as posed by the proceedings has been whether Transco in stating its lateral line policy has properly included a reservation, which gives it complete discretion on whether to build a given lateral line. The question also has arisen as to whether it must file a statement of its lateral line policy as a part of its tariff. This whole matter must now be determined in the light of our recently issued Order No. 328 amending our regulation.[1]

In its statement of lateral line policy Transco, in addition to the mathematical formula outlined above, adds that, while the formula sets forth a simplified uniform test, it must be recognized that "there are many factors which must be considered in making a judgment determination whether to make a significant extension of the pipeline system." These, it says, include markets to be obtained, growth prospects, competition, exposure to state taxes and the possibility of being classified as a local public utility.

---

[1] Statement of Lateral Line Policy in Rate Schedules Filed by Natural Gas Pipeline Companies, 36 FPC 774, Order No. 328, Docket No. R–301, issued October 19, 1966.

Transco's witness explains that the Company does not want to be in the position of having to file an application under Section 7(c) that it does not agree with, that it reserves the right to make the test of public convenience and necessity, and that, if the customer disagrees, he can file under Section 7(a). It argues, "it is impossible for either Transco or the Commission at this time of inception of Transco's lateral line policy to envision the variety of factual situations which might be presented by a customer" falling within the formula yet not in accord with the Commission's criteria. It says that it should have the initial privilege of flagging such projects by refusing to file subject to review by the Commission either under Section 7(a) or by petition to show cause or some other means.

The staff does not differ with Transco's mathematical formula but contests Transco's reservations. It contends that the acceptance or rejection of a request by a customer to construct a lateral cannot be left to the private determination of the company, asks that the qualifying statements be deleted, and that the mathematical part of the policy statement be filed in Transco's tariff. In reply to the staff's contentions, Transco redrafted the qualifying language (see Examiner's decision, p. 1078), but the redrafted language likewise retains discretion stating that Transco will not be compelled to file an application to construct a lateral under Section 7(c) that it deems impractical, infeasible, unnecessary or not in the public interest, subject, however, to review by the Commission.

The Examiner finds that Transco's announced policy "lacks the degree of certainty and predictability which its customers have a right to reasonably expect" (p. 1077), and he rejects the reservations in the policy statement and the substitute language. Because the record is devoid of evidence of the effect of the application of the formula on other parts of Transco's system, he would not require that Transco incorporate its formula in its tariff.

Order No. 328 is not intended to require that a pipeline state the considerations which might lead it voluntarily to provide new or increased service to a customer. It is rather designed to require a clear and accessible declaration of the criteria by which a pipeline company determines to what extent, if at all, it will participate financially in lateral line construction so as to assure the company's customers of equitable treatment. The pipeline would be required solely to set forth the basis for the financial obligations it would assume in the event it were authorized or directed to provide such service after proceedings brought under Section 7(a) or 7(c) of the Act. In other words, we do not intend by formula to take away a pipeline's discretion whether or not to build a lateral, but if it builds a lateral voluntarily or is required to do so by Commission order, it must build or furnish funds for the building of the lateral in order to treat its customers equitably, and the basis for the amount of its construction or furnishing of funds must be set forth plainly in its tariff. This is entirely consistent with the Commission's opinion in *Michigan Wisconsin Pipe Line Co.*, 34 FPC 621, Opinion No. 471, August 30, 1965, requiring the filing of the company's lateral line formula.

In the present proceeding it follows that the mathematical formula part of Transco's lateral line policy statement showing the amount of its contributions to a lateral line should be filed as part of its tariff in accordance with Order No. 328. The remaining or discretionary part of Transco's lateral line policy statement is not properly part of the lateral line formula and should not be included in its tariff filing as a limitation thereon. To the extent that

Transco may wish to state separately in its tariff the policies underlying its determinations as to whether or not it would voluntarily provide new or increased service to its customers it may do so, but such statement should be kept separate from the statement of its lateral line formula. This separate statement would, of course, not be controlling in any proceeding brought before the Commission on whether or not Transco will build a particular lateral.

Mainline Facilities

In order to obtain sufficient capacity to serve the Tryon lateral, Transco proposes to build two loops on its main line. The staff points out that this proposed mainline expansion is one of a series proposed in Docket Nos. CP64-270, CP65-181, CP66-150, and CP66-233. It suggests that the expansion in this proceeding, CP66-150, not be given a permanent certificate pending final decision in CP65-181. On May 26, 1966, the Commission granted a temporary certificate for certain mainline facilities specifically including those involved in the present docket, CP66-150, designed to serve the Tryon lateral.

The Examiner here discusses the difficulty of relating mainline facilities to the service proposed, but concludes that the mainline facilities should be permanently certificated in CP66-150. However, in the event that the proposals in CP64-270[2] and CP65-181 are not granted in full, he provides that Transco should submit revised flow and cost data.

We agree with the disposition made by the Examiner. We shall grant a permanent certificate for the mainline facilities here proposed, but shall provide that within 30 days after the final decision in Docket No. CP65-181, Transco shall submit revised flow and cost data. This should reflect the reductions in Transco's proposed market in Docket No. CP64-270 and any reduction that may be made in its requirements in CP65-181. On the basis of this data Transco's request to build mainline facilities in Docket No. CP66-233 can be appropriately adjusted.

The Commission finds:

(1) The Transcontinental Gas Pipe Line Corporation is engaged in the transportation of natural gas in interstate commerce and in the sale in interstate commerce of natural gas for resale for ultimate public consumption and is therefore a "natural-gas company" within the meaning of the Natural Gas Act.

(2) The facilities which Transco proposes to construct and operate, described in its application in Docket No. CP66-150, and those which it will be required to construct and operate, will be used in the transportation and sale of natural gas in interstate commerce for resale, subject to the jurisdiction of the Commission, and the construction and operation of such facilities are subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Transco is able and willing properly to do all the acts, to make the sales and to perform the services proposed by it in Docket No. CP66-150, and to conform to the provisions of the Natural Gas Act, and the requirements, rules, and regulations of the Commission thereunder.

(4) The construction and operation of the mainline facilities, the lateral line to Tryon, North Carolina, including its extension required below, and the new sales of natural gas proposed by Transco, namely, 21,442 Mcf per day of firm gas to the Public Service Company of North Carolina and 1,114 Mcf per day to the Piedmont Natural Gas Company, are required by public con-

---

[2] The Commission did in fact reduce the proposed market in this docket, *Transcontinental Gas Pipe Line Corp.*, 35 FPC 917, Opinion No. 493, Docket No. CP64-270, issued June 8, 1966.

venience and necessity, and certificates therefor should be issued as hereinafter ordered and conditioned.

(5) In order to carry out the terms of its lateral line formula, Transco should be required to extend its proposed lateral line beyond Tryon, North Carolina, or to a connection with Public Service's Asheville line at Mill Springs, North Carolina, as required below.

(6) Transco's lateral line statement within the meaning of Order No. 328 is as follows:

Transco's investment in any pipeline extension, excluding measuring station facilities, shall be based upon estimated third-year revenues generated by sales from such extension for that year under Transco's CD, G and OG Rate Schedules, which estimate shall be acceptable to Transco. There will be deducted from the estimated third-year revenues (1) an amount representing the cost of gas included therein, which amount will be computed by multiplying the sales volumes for the third-year by the average cost per Mcf of gas purchased by Transco as reported in its latest FPC Form 2 filed with the Federal Power Commission, and (2) a system contribution which will be the result of multiplying the Mcf of Contract Demand, or Maximum Daily Quantity, utilized in computing the third-year revenues by $33. The net amount thus determined will be divided by 15% to obtain Transco's investment in any pipeline extension.

"Pipeline extension," for purposes of this statement, shall include any extension from Transcontinental's existing system involving pipe of not less than 4 inches diameter and not more than 20 inches O. D. For pipeline extensions larger than 20 inches, for supply of gas to more than one customer at main line pressures, management reserves the right to construct such extension as part of its mainline facilities where the facts and circumstances show such to be in the public interest.

Such statement should be filed by Transco as part of its tariff.

(7) The public convenience and necessity require that the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of the Commission's Regulations under the Act shall attach to the certificates issued to Transco and to the exercise of the rights granted thereunder, and that the time within which the facilities authorized by this order shall be constructed and placed in actual operation shall be fixed at one year from the effective date of the final order herein.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Transcontinental Gas Pipe Line Corporation, authorizing Transco to construct and operate the facilities proposed herein, and to transport and sell an additional 22,556 Mcf per day of natural gas in interstate commerce, as more fully described in its application, upon the terms and conditions of this order.

(B) Transco shall construct and operate an extension of its proposed 16-inch Tryon lateral beyond Tryon in the direction of Mill Springs, N.C., to the extent required by its lateral line formula and may, if it chooses, further extend the line to an interconnection with the Asheville line of Public Service near Mill Springs.

(C) Within thirty days from final Commission decision in Docket No. CP65-181 therein, Transco shall (a) submit revised flow diagrams setting forth the facilities necessary to render the proposed service to Public Service and Piedmont; (b) the cost associated with such facilities; and (c) a showing of the incremental rate of return on such facilities.

(D) Within the time limit specified in Order No. 328, Transco shall file the lateral line extension formula set forth in (6) above as part of its tariff.

(E) Within thirty days the certificate issued in paragraph (A) above shall be accepted in writing by a responsible official of Transco, and the general terms and conditions set forth in (a), (b), (c)(3), and (c)(4) and (e) of Section 157.20 of the Commission's Regulations under the Natural Gas Act shall attach to the issuance of such certificate, and to the exercise of the rights granted thereunder.

(F) Construction of the proposed lateral line shall be completed within one year of the issuance of this order.

(G) The decision of the Presiding Examiner to the extent not inconsistent herewith is adopted as the decision of the Commission.

(H) Exceptions not granted herein are denied.

Commissioner Ross *concurring in part* and *dissenting in part.*

Ross, *Commissioner, concurring in part* and *dissenting in part:*

I am not convinced that the public convenience and necessity requires Transco to construct the Tryon lateral 16 inches in diameter. In my opinion, a 12-inch lateral would be more than ample.

The majority contends that the amount of money involved is so slight that we can ignore the fact Transco is being authorized to construct capacity that by the end of 10 years will be 260 percent greater than the needs of their firm customers. Despite the majority's denial, it would seem to be implicit in this decision that management has the unquestioned right to speculate with the consumers' dollars not for a typical 3 or 5 year forecast, but for ten years or more. Why would not the same reasoning hold for mainline extensions as well?

I do not mean to suggest that pipeline capacity should be squeezed down to bare bones present needs. To the contrary, pipelines should be given substantial flexibility in building increments of capacity in the most economic manner possible, considering both present and reasonably anticipated requirements. However, there is a limit. And this case, in my opinion, constitutes a clear case of the Commission going too far. The interruptible needs upon which the larger diameter pipe is based are extremely questionable. Besides being dangerous from a precedential basis, the results of the decision places a competing energy source under a severe handicap. Moreover, to the extent the market does not develop, the consumers will be required to pay the carrying charges throughout this period on the additional investment.

INITIAL DECISION

OF THE PRESIDING EXAMINER UPON APPLICATION FOR A CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY UNDER THE NATURAL GAS ACT

(Issued August 22, 1966)

SHRIVER, *Presiding Examiner:* In this proceeding, the Transcontinental Gas Pipe Line Corporation (Transco) seeks a certificate of convenience and necessity authorizing the construction, installation, and operation of certain natural gas lines and facilities in Alabama, Mississippi, North Carolina, and South Carolina, and authorizing the sale for resale of an additional 22,556 Mcf of gas per day to two of its customers, the Public Service Company of North Carolina, Inc. (Public Service) and the Piedmont Natural Gas Company, Inc. (Piedmont). The cost of the new construction is estimated at $3,370,000. The case also involves Transco's lateral line policy.

Transco's application was filed pursuant to Section 7(c) of the Natural Gas Act on November 12, 1965. Nine persons filed petitions to intervene.[1] Transco's application was supported by three of its customers, Public Service, Piedmont, and the United Cities Gas Corporation (United Cities). Exhibits and direct testimony were introduced by Transco, Public Service, Piedmont, and the Carolina Natural Gas Corporation. The Carolina Natural Gas Corporation withdrew its intervention during the course of the hearing, April 6, 1966. The Fuels Research Council, Inc., the National Coal Association, and the United Mine Workers of America opposed Transco's application. Hearings were held in the case on March 28, 30, 31, April 1, 4, and 6, 1966.

The construction proposed by Transco consists of 7.65 miles of 36-inch main pipeline loop between its compressor stations 65 and 70 in Mississippi, and 4.15 miles of 36-inch loop between compressor stations 100 and 110 in Alabama; 28 miles of 16-inch lateral line from the discharge side of its station 140 near Spartanburg or Moore, South Carolina, to Tryon, North Carolina, and three sales meter and regulator stations to be used in supplying gas to Public Service and to Piedmont.

The Carolina Natural Gas Corporation asks that Transco extend its proposed lateral from a point beyond the Tryon terminus to make a direct connection with the facilities of Public Service, *i.e.*, to Mill Springs point and at a subsequent date to Morganton, North Carolina (Tr. 8–9); (Appendices I and II).[2] While the North Carolina Utilities Commission supports Transco's proposal for the construction of the lateral to Tryon, it claims that Transco should extend the lateral to Mill Springs.

Although Transco's proposed lateral would end at Tryon, it is contemplated that the line would be continued some 8.71 miles northward to connect with the main western transmission line of Public Service near Mill Springs and that this 16-inch extension would be constructed by Public Service. As previously indicated, Public Service is a customer of Transco, and is a distributor in some 20 counties in the north central and southwestern part of North Carolina. Transco asks for an allocation of 21,442 Mcf per day of firm gas for Public Service and 1114 Mcf per day for Piedmont to enable Piedmont to supply gas to the villages of Inmann and Landrum in South Carolina. Piedmont is served from Public Service's line extending from Transco's main pipeline at station 145 westward to Asheville, North Carolina.

---

Carolina Natural Gas Corporation, December 10, 1965.
North Carolina Natural Gas Corporation, December 13, 1965.
Fuels Research Council, Inc., December 13, 1965.
National Coal Association, December 13, 1965.
United Mine Workers of America, December 13, 1965.
North Carolina Utilities Commission, December 9, 1965.

[2] Appendices I (*infra*) and II (*supra*, p. 1069) are reproduced from Exhibit 11, pp. SM–1 and SM–2.

It is apparent at the outset that Transco's application is designed primarily to increase its mainline capacity, and to provide additional gas to the western division of Public Service for the new markets and the increased gas requirements in Asheville and extended surrounding communities. At the present time, Transco delivers gas to the western division of Public Service at station 145 some ten miles south of Gastonia, North Carolina. It is claimed that the transmission line of Public Service leading from station 145 westerly is now utilized to capacity. Transco's application is predicated on the claim that the expanding western division market of Public Service requires additional gas, and that Public Service's transmission line must either be looped or that this market be served by a line from a new takeoff point on Transco's mainline, hence the Tryon lateral.

By way of justification for the location of the lateral, it is urged that it will serve new territory in South Carolina, mainly Inmann and Landrum through Piedmont, and that a line from Spartanburg to Tryon is considerably shorter and thus cheaper to construct, than a loop of the western transmission line of Public Service from Transco's station 145. When it is considered that the haul is reduced, this claim is plausible.

As to the lateral, Transco's proposal to construct the Tryon lateral is a definite departure from its past practice. Transco's major laterals are located farther from its sources of gas supply and in industrial areas at or north of Philadelphia, Pennsylvania. Many are short lines to industrial consumers. Transco says, however, that construction of the Tryon lateral is in accord with its filed statement of lateral line policy pursuant to which it will install a lateral line to secure a new market under a mathematical formula establishing the amount of investment justified by the new market.

In support of its application for the granting of the certificate, Transco says it meets all the tests which are normally required, such as gas reserves, market, economic feasibility, adequacy and reasonableness of facilities, and finances. Transco says that the investment in the proposed facilities of $3,730,000 represents .526 percent (less one percent) of its total net investment as of August 31, 1965 of $708,017,567; that the third-year annual volumes of gas deliveries attributable to the new service of 6,977,500 Mcf represent 1.09 percent of Transco's total annual requirements and that the gas needed for the instant project would reduce the life index supply of 18.5 to approximately 18.3 years. None of the intervenors nor the Staff make an issue of gas supply. As to market, the proposed sales represent an increase in the purchases by Public Service and by Piedmont and an expansion of Transco's market. Public Service presently purchases 85,558 Mcf per day of firm contract demand gas under Transco's rate schedule CD–2 for its total system requirements. Public Service has a two-year commitment for 9,442 Mcf per day for 1966–67, and an additional amount of 12,000 Mcf per day for 1967–68, or a total increase of 21,442 Mcf per day. Piedmont's third-year contract demand requirements for delivery through the Tryon lateral in 1968 are 1114 Mcf per day. (Exh. 11, p. MD–1; Exh. 9.)

The adequacy of Transco's mainline facilities was not questioned. Mr. Schorre testified that the proposed 16-inch Tryon extension would have a maximum winter day capacity of 93,791 Mcf per day. The capacity of the Tryon lateral necessarily far exceeds the third-year requirements of Transco's customers. The cost of the pipeline loop facilities was estimated at $1,696,488, the 28-mile lateral at $1,649,943, the sales meter and regulator stations at $93,096, the general overhead interest, contingencies, and other costs at $291,473, for a total of $3,730,000. These cost figures represent Transco's best estimate based on its recent experience in pipeline installation. No valid objection was raised at the hearing concerning the adequacy of the facilities to render the proposed service, nor was the cost of the facilities seriously challenged.

The Coal Interests, Fuels Research Council, Inc., National Coal Association, and the United Mine Workers of America, object that the Tryon lateral is too large, that its capacity exceeds the third-year gas requirements of Public Service and Piedmont, and contend that Transco's request for a 16-inch line be denied. But it must not be forgotten that it is Transco which seeks a certificate not its customers. Although it may be admitted that the capacity of the lateral is beyond immediate future needs, we cannot say after considering the potential load growth of the area to be served, Transco's customers and all the relevant circumstances, that Transco is unwise in proposing to construct a 16-inch line.[3]

Transco claims that a calculation of the estimated cost of services and the expenses shows in third year, on an incremental basis, a rate of return on the proposal of 17.73 percent or 11.23 percent above 6.50 percent, and that the proposal is therefore economically feasible.[4] In considering the economic feasibility of the service incident to the Tryon lateral and the portion of the mainline facilities related thereto, Transco claims that this is governed by its lateral line formula rather than the conventional test.[5] Notwithstanding, Transco claims that the Tryon portion of the total service is economically feasible by conventional tests as well as by its lateral line formula.[6]

---

[3] In support of its policy and line size Transco's vice president, Mr. Henderson, testified on cross-examination in part as follows:

Q. Why do you feel as a policy witness that in view of the amounts which Public Service Company of North Carolina will be taking in 1966 or '67 through the Tryon lateral, why do you think that you should support a line which has some odd 93,000 Mcf capability?

A. Well, for the following reasons: We have to do some long-range planning on this system if we are not to end up with a maze of relatively small diameter pipes, with a high investment cost, and a high cost of service. We have to do some long-range planning to try and keep our costs down. I repeat, we are in a highly competitive market.

Now we know that Public Service Company of North Carolina has been a growth company on our system. It has been a good customer, a growing customer. Now Mr. Schorre testified that we could do this job for the first several years with 12-inch pipe instead of 16-inch pipe, and the 12-inch pipe would give us approximately 50,000 a day capacity. We can put in 16-inch pipe instead of 12-inch pipe at a cost of approximately $300,000 more and get approximately 43 million cubic feet a day of capacity more.

Well, it doesn't make sense to us to try and save this $300,000 today at the cost of spending a great deal more money later on to lay another line into this market, at the same location, and have a higher cost of service.

For the same reason, Mr. Lichtenstein, long-range planning, that we went to 36-inch pipe on our main system, and we are now going to 42-inch pipe because the cost does not increase in the same ratio that the capacity increases. It is for this reason that the cost of transporting gas on our system today is not very much different than it was when we went into operation in 1951.

[4] Exh. 8, p. 20.

[5] See Appendix III, reproduced from pages 1 to 3 of Exhibit 10 containing a statement of Transco's lateral line policy.

[6] Exh. 8, p. 21.

The rate of return shown in Transco's application (Application, Exh. N, p. 21) relates to a rate base which is made up of the cost of the Tryon extension plus an allocated portion of the mainline loops—allocated on the basis of a capacity of 13,741 Mcf to Public Service as compared to the overall capacity of the loops of some 53,000 Mcf. Transco's witness Henderson testified that the incremental rate of return of 16.68 percent related to a rate base of $2,163,243. (Tr. 383–384)

Transco indicates that the facilities may be financed by cash generated from operations, or by means of short-term bank loans. Its witness Andrews testified that the Company has a revolving credit agreement providing for bank loans up to an aggregate amount of $80,000,000. Transco's ability to finance the project was not contested at the hearing. Accordingly, we conclude, based on the evidence of record, that to the extent approved hereafter, Transco's proposal meets the conventional tests which are required in certificate applications.

Main-Line Facilities

In its application for a certificate of public convenience and necessity, Transco estimates the cost of installing the main-line loops in this case at $1,696,488 —one loop between stations 65 and 70, and one between stations 100 and 110. (Application, Exh. N, p. 24) These loops were also proposed in CP65–181 before the instant application for the construction of the Tryon lateral was removed from the earlier docket. Mr. Schorre testified for Transco that the purpose of showing the loops in this docket "is to give us sufficient main-line capacity to take care of the additional allocation sought in this docket." (Tr. 110) Mr. Henderson testified that the loops are necessary before Transco can render the service through the Tryon lateral because it does not have sufficient existing capacity, but he indicated that he could not "identify the balance of the capacity of those two loops with particular markets."[7] In responding to a question by Staff counsel as to whether it is Transco's policy to request authorization for main-line loop facilities that go beyond association with a pending docket, he replied that, "If it is going to save us money, it is. Of course, you can't design facilities on a system such as ours for the exact capacity." (Tr. 430)

The Staff says that the facilities proposed in Docket No. CP65–181 constituted an expansion step beyond that proposed in Docket No. CP64–270, and that the facilities proposed in the instant case constitute a still further extension beyond the two previous dockets. The Staff contends that it is impossible to determine what facilities associated with these dockets would be required for service in the instant case.[8] The Staff recommends that any authorization to render service through the Tryon lateral (including, of course, authorization to construct the lateral) be conditioned to provide that the certificate shall not be construed as authorization to construct any of the main-line facilities associated with the instant docket for the reason that the main-line facilities proposed in the instant case constitute an expansion beyond that proposed in Docket Nos. CP64–270 and CP65–181. Staff says that Transco should be required to submit revised flow diagrams setting forth the main-line facilities necessary to render the Tryon service in the event that any of its facilities for which authorization is requested in Docket Nos. CP65–181 and CP64–270 are not authorized. We agree with the Staff's recommendation.

---

[7] The loops have a capacity of approximately 50,000 Mcf. (Tr. 429).

[8] Transco's witness Schorre testified that "I am saying when all of these cases are finally settled, when in 270 we have final order and we have a final in 181, then we can make the final determination of what our facility requirements are and then we will modify or amend our applications to that extent necessary to meet the situation as it then exists." (Tr. 204. pp. 13–19).

It may be noted that there is an overlap of the main-line facilities requested by Transco in this docket with those in other dockets. Transco's application in Docket No. CP64–270 was filed on May 8, 1964, supplemented on June 29, 1964, and amended on September 18, 1964. In the application, as supplemented, Transco requested authorization to construct and operate 103 miles of 30- and 36-inch pipeline loops in Louisiana, Mississippi, and Alabama, estimated to cost $20,100,000 for the purpose of increasing its main-line capacity by 81,935 Mcf per day and a new 60-mile, 20-inch pipeline extending about halfway from its main-line near Monroe, Georgia to Chattanooga, Tennessee. In its amended application Transco sought authorization to construct and operate 57 miles of 30- and 36-inch pipeline loops in Louisiana, Mississippi, and Alabama to increase main-line capacity by 47,045 Mcf per day, and a new 126-mile, 20- and 16-inch pipeline to Chattanooga to serve market requirements of 81,936 Mcf per day.[9]

In its application for a certificate in Docket No. CP65–181, as amended, filed April 26, 1965, Transco asked for authorization to construct certain facilities estimated to cost some $87,222,108 to provide additional pipeline firm service of 203,810 Mcf per day. Including the instant case (Docket No. CP66–150), Transco has on file a fourth requested expansion contained in Docket No. CP66–233. Out of the facilities requested in Docket No. CP64–270, the Commission issued a temporary certificate authorizing incremental deliveries of 15,000 Mcf per day. (Tr. 105, 219) Of the total pipeline service proposed in Docket No. CP65–181, the Commission authorized 119,110 Mcf per day under a temporary certificate. In his Initial Decision, in Docket No. CP64–270, Examiner Williams denied Transco's application for additional facilities contained therein except as to the increment of 15,000 Mcf per day being supplied to Atlanta Gas pursuant to the temporary certificate granted by the Commission on December 1, 1964. The Commission, however, in this case (Docket No. CP64–270), *Transcontinental Gas Pipe Line Corporation*, Opinion No. 493, June 8, 1966, 35 FPC 917, ordered, "That Transco's request for authorization to provide service to Chattanooga is denied; in all other respects decision on the application filed in Docket No. CP64–270 is deferred."

As to Docket No. CP65–181, *Columbia Gulf Transmission Company, et al.*, a consolidated proceeding, Examiner Hall stated in his decision dated June 13, 1966, 37 FPC 137, at p .146:

> Each of these expansion applications is built on top of the prior application and, while some of the facilities proposed in Docket No. CP64–270 will apparently not be required in that docket should the Commission deny certain markets to Transco therein, such facilities may be required to render the services in Docket No. CP65–181. Similarly, the result of a denial of certain services in Docket No. CP64–270 may eliminate the need for certain of the facilities proposed in Docket No. CP65–181 to serve the markets herein, but such facilities would apparently be required as a first step in Docket No. CP66–233.
>
> Because of the past necessity for pyramiding of applications; the fact that the consolidated proceeding of which Docket No. CP64–270 is a part, is now awaiting Commission decision on exceptions*; and the fact that Transco's latest application in Docket No. CP66–233 is now pending, the
>
> *But see, Opinion No. 493, June 8, 1966, referred to above. Note added.

---

[9] See, Initial Decision of Examiner Williams' in *Transcontinental Gas Pipe Line Corporation*, Docket No. CP64–270, *et al.*, December 21, 1965, 35 FPC 930 at 931.

> Examiner adopts Transco's suggestion that authorization to Transco in this case be granted subject to the condition that Transco be required to amend its latest expansion application (Docket No. CP66–233) in order to eliminate therefrom any facilities which might require elimination should the Commission deny any of the markets in Docket No. CP64–270. In this way, Transco will be able to obtain a permanent certificate for all of the facilities proposed in Docket No. CP65–181, to the extent authorized by this decision, and will be able to avoid the amendment of three applications. This appears to be the most feasible course of action available to the Examiner.

In the Initial Decision by the Examiner in Docket No. CP65–181, it was ordered, among other things, subject to review by the Commission, that a certificate of public convenience and necessity be issued to Transco authorizing the construction and operation of all facilities which have been constructed and operated, or are in the process of construction and operation pursuant to temporary certificates theretofore issued by the Commission; and further that 20 days after the Commission issues its decision disposing of Transco's Docket No. CP64–270, Transco shall file an amendment to its latest certificate filed in Docket No. CP65–233 to eliminate therefrom all facilities requiring elimination as a result of Commission denial of service to markets proposed in Docket No. CP64–270.

Unless the facilities constructed are related to the service contemplated in an application, it is impossible to determine the economic feasibility of a particular request. Transco's request for authorization to construct the two loops in the instant docket should be considered as incident to the service requested for the Tryon lateral in accordance with its application—certainly to the extent such facilities may be included in any of Transco's other pending dockets which may not be permanently certificated.

In view of the foregoing we conclude that Transco's request for authorization for the construction and operation of the mainline facilities in this case should be certificated but such certification should be conditioned upon the submission of revised flow diagrams showing the facilities (both mainline and lateral) necessary to render the Tryon service, the cost of such facilities, and the incremental rate of return thereof.

Lateral Line—Lateral Line Policy

As previously indicated, Transco proposes to construct a 28-mile, 16-inch lateral from its main pipeline to Tryon, North Carolina. Tryon is not a natural terminus for the lateral. Transco's proposal contemplates that Public Service will construct a 16-inch connecting line approximately 8.71 miles from Tryon to its western line at Mill Springs. Transco contends that the economic feasibility of the portion of the service proposed to be rendered to the Tryon extension and the erection of the mainline facilities relating thereto is governed by its formula of lateral line policy.[10] The rate of return claimed for the lateral based on the third-year operation is 17.73 percent. The cost of the lateral as estimated by Transco under its formula is $1,790,000.[11]

The mathematical formula contained in Transco's policy statement reads as follows:[12]

> Transco's investment in any pipeline extension, excluding measuring station facilities, shall be based upon estimated third-year revenues gen-

---

[10] See. Appendix III.

[11] Exh. 8, p. 21.

[12] Exh. 10.

> erated by sales from such extension for that year under Transco's CD, G and OG Rate Schedules, which estimate shall be acceptable to Transco. There will be deducted from the estimated third-year revenues (1) an amount representing the cost of gas included therein, which amount will be computed by multiplying the sales volumes for the third-year by the average cost per Mcf of gas purchased by Transco as reported in its latest FPC Form 2 filed with the Federal Power Commission, and (2) a system contribution which will be the result of multiplying the Mcf of Contract Demand, or Maximum Daily Quantity, utilized in computing the third-year revenues by $33. The net amount thus determined will be divided by 15% to obtain Transco's investment in any pipeline extension.

In addition to the mathematical formula, Transco's policy statement contains a statement of what is meant by "pipeline extension", and reservations or some of the factors to be considered in determining whether or not a lateral shall be built in a particular case. Transco asks that its lateral line extension policy be approved by the Commission, but that it not be made a part of its tariff.[12a] The Staff does not challenge the mathematics of Transco's formula but recommends that the reservations or last two paragraphs of Transco's statement be rejected. Staff also recommends incorporation in the tariff.

In *Michigan Wisconsin Pipe Line Company*, Opinion No. 471, August 30, 1965, the Commission stated (34 FPC 621, at p. 626):

> A consistent and predictable source of conduct of the supplier that affects its financial relationship with the consumer in our opinion is a 'practice' subject to the filing requirements. The filing of such a procedure as part of the pipeline tariff is not only consistent with but furthers the purpose underlying the filing and posting requirements of rate schedules. A pipeline tariff announces not only what the pipeline has done in the past but the terms and conditions upon which it would, as a matter of policy, provide service to new customers meeting the tariff's eligibility requirements. Even if the tariff were viewed as merely an informational description of existing service obligations, this description of the pipeline's actual practice would be of real benefit to both existing and potential customers, for it would show them, as well as the Commission, the terms by which gas would be sold upon completion of Section 7 proceedings.

In the Commission's NOTICE OF PROPOSED RULE MAKING, *in re* Statement of Lateral Line Policy in Rate Schedules Filed by Natural Gas Pipeline Companies, Docket No. R–301, April 12, 1966, the Commission observes:

> There is opportunity for unjust discrimination and undue preference among customers where a pipeline does not follow a consistent policy. Such being the case, whether it is the obligation of the pipeline company or of the customer to construct a lateral should not be left to negotiation in each individual instance.
>
> We believe, therefore, that each pipeline company should make a clear statement in its tariff describing its policy in building lateral lines. If its policy is not to build any lateral lines, or is to build all lateral lines, the tariff should so state. If a specific formula is used in determining the portion of the lateral line that the pipeline company will build, the tariff should so state and provide the formula. The appropriate place in the tariff for the statement of lateral line policy is in the General Terms and Conditions.

[12a] Initial brief, p. 14; Reply brief, p. 4.

The reservations contained in Transco's policy statement and the testimony of Mr. Henderson disclose that Transco's announced policy[13] lacks the degree of certainty and predictability which its customers have a right to reasonably expect. Mr. Henderson testified at length as to Transco's policies in explanation of Transco's lateral line policy.[14]

Transco in effect would reserve to itself the right to make the test of public convenience and necessity. The reservations claimed leaves Transco in each instance in the position of bargaining with its customers concerning whether a particular lateral will be built which in the end can readily lead to discrimination as between its respective customers. Some customers will have built or be required to build their own connecting lines, others will not.

In the Examiner's Opinion in *Transcontinental Gas Pipe Line Corporation*, Docket No. CP64–270, it was stated: (p. 940)

> The Examiner is convinced that Transco's historical experience militates against the construction of laterals or mainline extensions and the evidence advanced in this proceeding is insufficient to demonstrate the abandonment of the established precedent. Also, if permitted in this instance, the departure would obviously discriminate against existing customers who were in the past required to build facilities to reach Transco's mainline.

In the instant case, the evidence adduced indicates that Transco intends to build lateral lines or share such lines (part to be built by the customers) in particular cases. While the formula may provide some guidance for Transco's customers, the reservations attached to its policy statement (Exh. 10) enables Transco to follow or refuse to follow its policy as it may see fit. As previously indicated, Transco asks that its policy be approved. Approval of Transco's statement with the reservations would provide but little guidance to Transco's customers. Transco's policy statement even without the reservations is rather indefinite as to the situations in which Transco would construct a lateral extension. If a lateral line policy has any significance it must provide some prescription for the customers involved and the Commission, otherwise it is merely symbolic. Accordingly, the reservations contained in Transco's policy statement (the last two paragraphs) must be rejected.

---

[13] Exh. 10.

[14] Tr. 61–67, 326–436, and particularly at pages 354–356, 361–367. In explanation of the formula, Mr. Henderson stated:

The first step is to take Transco's total revenues from its 1964 Form 2 on file with the Commission. The next step is to deduct from that total revenue figure the revenue derived from Transco's storage operations. The third step is to deduct from the above remainder the cost of gas purchased. The remainder thus arrived at represents all other system costs. The next step is to divide that figure for all other system costs by the daily capacity of the pipeline, which capacity figure represents the actual results of operation. The quotient thus arrived gives an average annual transmission cost of a rounded $66 per Mcf of capacity. Taking 50% of that $66 figure gives the $33 figure included in the formula (p. 65).

On cross-examination Mr. Henderson testified in part that:

Now we don't want to be in a position of having to file an application under section 7(c) of the Act for a line that we do not believe in and disagree with (Tr. 367).

I am saying that in addition to this mathematical formula, that we reserve the right to make the test of public convenience and necessity that we know the Commission is going to make, regardless of who files for this line, whether we file under section 7(c) or the customer files under section 7(a) (Tr. 368).

But the customer may disagree entirely with us. He may want a particular line, at a particular cost, at a particular location, that we don't think meets the test of public convenience and necessity, and yet we would be required to file an application for that if we didn't have the right to take a look at it and determine whether in our opinion it does meet this test and if in our opinion it doesn't, and the customer's opinion it does, then he can file. If we think it does, we file (Tr. 369).

In its reply brief Transco proposes a reservation[15] as a substitute in the event that the last two paragraphs of its policy statement are unacceptable. By the proposed revision, Transco on the one hand suggests that nothing in its lateral line policy shall preclude it from proposing projects which do not meet its mathematical formula, and on the other, yielding as to matters which are inherent under the Act. Also, under this reservation, Transco might well refuse to file an application under Section 7(c) to construct a lateral extension when it clearly and mainfestly should. The revision, like the language to be replaced, may be construed to negate the mathematical formula within Transco's discretion. The substitute reservation likewise is therefore rejected.

The Staff recommends that Transco's formula (mathematical formula) be incorporated in Transco's tariff. No line is drawn, however, as to whether this should be done merely in respect to the intervenors in this proceeding, in respect to Transco's customers in zone 2, or to be applied generally in zones 1, 2, and 3. No testimony was adduced for the Staff in justification for this request. Transco objects that its formula should not be incorporated in its tariff pending the outcome of the Commission's proceedings in Docket No. R-301 relating to lateral line policy. Transco says that incorporation would have the effect of rigidifying its policy and placing Transco at a disadvantage among its customers.

Since Transco relies in this proceeding on its announced policy in support of its application, there is some justification for requiring that it be incorporated in its tariff notwithstanding the proceedings in Docket No. R-301. But the record is devoid of evidence of the effect of the application of Transco s formula to customers in zones 1 and 3 and indeed as to customers, other than the intervenors to this proceeding, in zone 2. The varying rates in the respective zones would necessarily affect the application of Transco's formula. What this would be might better be shown in a proceeding to show cause. Accordingly, based on the record here, we are of the opinion that Transco should not be required to incorporate its formula into its tariff.

We conclude also, based on the evidence of record and Transco's lateral line formula, that Transco is obliged not to stop short with the construction of its proposed lateral at Tryon but to extend it some 7.3 miles beyond, or to Mill Springs. Utilizing its own estimates there is a surplus of approximately $475,000 under its formula, above the cost of construction to Tryon, which if utilized would enable Transco to extend its line about 7.3 additional miles beyond Tryon. This would save Public Service the expense of building a line from Tryon to Mill Springs. Insofar as Public Service is concerned, there is no serious opposition to the extension by Transco. The Tryon destination under the proposal is not an actual delivery point, but seems to have been arrived at after negotiations between Transco and Public Service. This was admitted by Mr. Henderson. Construction beyond Tryon would be beneficial also to Transco's other customers besides Public Service, so that Transco's lateral line policy in turn would be useful to a larger consuming public than would be possible otherwise. The conclusions reached herein were arrived at after consideration of the entire record.

---

[15] The text of the reservation is as follows:

Nothing contained in this policy statement shall be construed to compel Transco to file an application under Section 7(c) to construct any lateral extension which Transco deems impractical, infeasible, unnecessary or not in the public interest, even though such lateral line project may fit the mathematics of the formula. This reserved privilege shall not preclude review by the Commission of Transco's refusal to file a 7(c) application through appropriate proceeding' instituted before the Commission by the person seeking the construction of the lateral line extension. Furthermore, nothing in this policy statement shall preclude Transco from proposing to the Commission, through an application filed under Section 7(c), the construction of a lateral line project which may not meet the mathematics of the formula.

FINDINGS AND CONCLUSIONS

Upon consideration of the entire record in this proceeding, including the briefs and arguments of Counsel, it is found and concluded in addition to the other findings and conclusions heretofore stated, that:

(1) The Transcontinental Gas Pipe Line Corporation is engaged in the transportation of natural gas in interstate commerce and in the sale in interstate commerce of natural gas for resale for ultimate public consumption and is therefore a "natural-gas company" within the meaning of the Natural Gas Act.

(2) The facilities which Transco proposes to construct and operate, as described in its application in Docket No. CP66-150, will be used in the transportation and sale of natural gas in interstate commerce for resale, subject to the jurisdiction of the Commission, and the construction and operation of such facilities are subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Transco is able and willing properly to do all the acts, to make the sales and to perform the services proposed by it in Docket No. CP66-150, and to conform to the provisions of the Natural Gas Act, and the requirements, rules, and regulations of the Commission thereunder.

(4) The facilities to be constructed and operated by Transco and referred to in paragraph (2) above, are adequate and appropriate to render the services which Transco is authorized to provide as hereinafter ordered and conditioned.

(5) The construction and operation of the mainline facilities and the new sales of natural gas proposed by Transco, namely, 21,442 Mcf per day of firm gas to the Public Service Company of North Carolina and 1,114 Mcf per day to the Piedmont Natural Gas Company, are required by the public convenience and necessity, and certificates therefor should be issued as hereinafter ordered and conditioned.

(6) Transco's application in this proceeding was filed with the Commission on November 12, 1965; its lateral line policy was filed thereafter.

(7) The lateral extension proposed in this proceeding calls for the construction of a 28-mile pipeline lateral by Transco, and contemplates the construction of 8.75 miles by one of its customers, the Public Service Company of North Carolina, and in point of fact is a continuing connection between Transco's pipeline near Spartanburg and the main western transmission line of Public Service at Mill Springs.

(8) The application of Transco's lateral line policy requires, insofar as possible, that it provide similar treatment to all Transco's customers which may be directly affected.

(9) The application of Transco's lateral line policy to the proposed Tryon extension is estimated to cost approximately $1,790,000, leaving a balance of $475,000 for application in the construction of the lateral for some 7.3 miles beyond Tryon, which under Transco's estimates is feasible, and Transco's lateral policy should be so applied.

(10) Transco's lateral line policy (Appendix III), excepting the last two paragraphs thereof, is incident to the record in this proceeding and its sanction is limited to the record herein.

(11) The authorization herein granted for the construction and operation of the lateral referred to in (2) and (9) above are necessary and required by the public convenience and necessity.

(12) The public convenience and necessity require (a) that the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of the Commission's Regulations under the Act shall attach to the certificates hereinafter issued to Transco and to the exercise of the rights granted thereunder, and that the time within which the facilities authorized by this order shall be constructed and placed in actual operation shall be fixed at one year from the effective date of the final order herein.

ORDER

WHEREFORE *It is hereby ordered*, subject to review by the Commission, that,

(A) A certificate of public convenience and necessity is hereby issued to the Transcontinental Gas Pipe Line Corporation, upon the terms and conditions of this order and subject to all the pertinent provisions of the Natural Gas Act and the Commission's rules and regulations issued thereunder, authorizing Transco to construct and operate the facilities proposed herein, the transportation and sale of 22,556 Mcf per day of natural gas in interstate commerce, as more fully described in Transco's application and upon the following terms and conditions:

(1) An authorization is hereby granted to construct the mainline loops only to the extent and insofar as they are not finally authorized in Docket Nos. CP64-270 and CP65-181. In the event that any of the facilities for which authorization is requested in the foregoing dockets may not be authorized, then within thirty days from final Commission decision therein, Transco shall (a) submit revised flow diagrams setting forth the facilities necessary to render the Tryon service; (b) the cost associated with such facilities; and (c) a showing of the incremental rate of return on such facilities.

(2) Authorization is hereby granted for the construction of the 16-inch lateral and the facilities directly incident thereto, extending from Transco's pipeline near Spartanburg to Mill Springs, or to a point some 7.3 miles beyond Tryon in accordance with Transco's lateral line policy as indicated in the findings above.

(B) The certificate issued in paragraph (A) above shall be accepted in writing by a responsible official of Transco, and the general terms and conditions set forth in (a), (c) and (e) of Section 157.20 of the Commission's Regulations under the Natural Gas Act shall attach to the issuance of such certificate, and to the exercise of the rights granted thereunder.

HARRY C. SHRIVER,
Presiding Examiner.

APPENDIX III

TRANSCONTINENTAL GAS PIPE LINE CORPORATION

Statement Re: Extension Of Pipeline Facilities For New Service

Pursuant to informal request from the Commission's Staff, Transcontinental Gas Pipe Line Corporation hereby advises the Commission with respect to its policy in considering extensions of pipeline facilities for new services.

Transcontinental, in determining the position it will take with respect to proposals for pipeline extensions, including applications under Sections 7(a) and 7(c), will subject the proposals to the following economic test:

> Transco's investment in any pipeline extension, excluding measuring station facilities, shall be based upon estimated third-year revenues generated

by sales from such extension for that year under Transco's CD, G and OG Rate Schedules, which estimate shall be acceptable to Transco. There will be deducted from the estimated third-year revenues (1) an amount representing the cost of gas included therein, which amount will be computed by multiplying the sales volumes for the third-year by the average cost per Mcf of gas purchased by Transco as reported in its latest FPC Form 2 filed with the Federal Power Commission, and (2) a system contribution which will be the result of multiplying the Mcf of Contract Demand, or Maximum Daily Quantity, utilized in computing the third-year revenues by $33. The net amount thus determined will be divided by 15% to obtain Transco's investment in any pipeline extension.

"Pipeline extension," for purposes of this statement, shall include any extension from Transcontinental's existing system involving pipe of not less than 4 inches diameter and not more than 20 inches O. D. For pipeline extensions larger than 20 inches, for supply of gas to more than one customer at mainline pressures, management reserves the right to construct such extension as part of its mainline facilities where the facts and circumstances show such to be in the public interest.

While the above sets forth a simplified uniform test, it must be recognized that there are many factors which must be considered in making a judgment determination whether to make a significant extension of the pipeline system. It must be considered whether the extension will enable resale markets to be obtained which would not otherwise be obtained and whether the areas to be served are presently without natural gas service or are inadequately served. Growth prospects of the markets being entered must be evaluated. Continuity of service to major market areas is of significant importance. Competition in existing market areas must be a consideration. Possible exposure to state taxes greatly in excess of the revenues to be received as a result of constructing extensions in some jurisdictions, or the possibility of being classified as a local public utility, under state law, must be considered.

It is, of course, not possible to list all pertinent factors which must be considered as they may arise in the future and the above are only illustrative.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67–43

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF SERVICE AND FACILITIES

(Issued December 19, 1966)

On August 24, 1966, United Gas Pipe Line Company (Applicant) filed in Docket No. CP67–43 an application, as supplemented on September 15, 1966, pursuant to Section 7(b) of the Natural Gas Act for permission and approval for the removal and abandonment of certain natural gas facilities, all as more fully set forth in the application.

Specifically, Applicant seeks permission and approval for the removal, abandonment and sale of the following facilities:

1. Refugio Compressor Station No. 1, consisting of 8 Hope Type 3 VSA 160 horsepower compressor units located in Lot No. 2, Block 6, Fee 2144, Refugio County, Texas;

2. Edna Compressor Station No. 1, consisting of 24 Hope Type 3 VSA 160 horsepower compressor units located in the Elizabeth McNutt Survey, Fee 2259, Jackson County, Texas;

3. Sterlington Compressor Station No. 1, consisting of 4 Cooper Bessemer Type TSA 170 horsepower compressor units located in Sections 31 and 32, Township 20 North, Range 4 East, Fee 2271, Ouachita Parish, Louisiana; and

4. Burns Compressor Station, consisting of one Ingersoll Rand Type XVG 150 horsepower compressor unit, located in Section 15, Township 17 South, Range 9 East, SL 3326, St. Mary Parish, Louisiana.

The functions of three of these compressor stations, Refugio No. 1, Edna No. 1, and Sterling No. 1, are now being performed by their related number 2 stations. Burns Compressor Station was originally installed to recover flare gas from Applicant's offshore two-phase flow operations and is no longer needed for that purpose.

These compressor stations are no longer needed in Applicant's operations and none have been operated since December, 1961.

Applicant proposes to salvage and sell as scrap the majority of the facilities proposed to be abandoned. Some minor portions will remain in service as part of the remaining compressor facilities at the sites of the first three of the aforementioned stations.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on December 15, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation, having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G-232 (3 FPC 863).

(2) The facilities to be abandoned, as hereinbefore described, and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered and conditioned.

The Commission orders:

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, all as more fully described in the application in this proceeding, are granted upon the terms and conditions of this order.

(B) The time within which the abandonment of the facilities hereinbefore described, as authorized in paragraph (A) above, shall be accomplished is fixed at 6 months from the date of this order.

(C) Applicant shall advise the Commission of the date of said abandonment within ten days thereof.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

WISCONSIN POWER AND LIGHT COMPANY AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP67-100

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued December 19, 1966)

On October 17, 1966, Wisconsin Power and Light Company (Applicant) filed in Docket No. CP67-100, an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Michigan Wisconsin Pipe Line Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant up to 878 Mcf of natural gas per day for resale and distribution in the villages of Cambria and Randolph and the adjoining towns of Springvale, Courtland, Randolph, Fox Lake and Westford in Columbia and Dodge Counties, Wisconsin, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate distribution systems in the aforementioned service areas and 1 mile of 6-inch and 5 miles of 4-inch lateral pipelines connecting the service areas to Respondent's facilities.

Applicant further proposes that Respondent, pursuant to its "10-cent formula", construct 7.8 miles of 4-inch lateral pipeline from its transmission system, serving the Madison-Weyauwega area of Wisconsin to a terminal gate station connecting with Applicant's proposed facilities.

Applicant has been granted certificate authority by the Public Service Commission of Wisconsin in Docket No. CA-4653, dated July 14, 1966, and franchises by the villages of Cambria and Randolph on July 5, 1966 and August 2, 1965, respectively.

Applicant's estimated third-year annual and peak day requirements are 234,320 Mcf and 878 Mcf of natural gas, respectively.

The total estimated cost of Applicant's proposed project is $397,750, which cost will be financed from cash on hand or from funds borrowed from the sales of securities as may be necessary as a part of Applicant's overall construction program.

Respondent has filed no reply to the instant application and in accordance with Section 156.7 of the Commission's Regulations under the Natural Gas Act, it is assumed that Respondent has no objection to the issuance of an order as requested by Applicant.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

The Commission finds:

(1) Respondent, Michigan Wisconsin Pipe Line Company, a Delaware corporation with its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G-669 (5 FPC 953).

(2) Applicant, Wisconsin Power and Light Company, a corporation organized and existing under the laws of the State of Wisconsin, is authorized to construct and operate facilities and distribute and sell natural gas as proposed.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transmission facilities with the proposed facilities of Applicant and to sell and deliver natural gas to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 878 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application in this proceeding.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service to Applicant within 10 days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations under the Natural Gas Act.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

REPORTING OF MAJOR ELECTRIC POWER INTERRUPTIONS BY ALL ENTITIES ENGAGED IN GENERATION AND TRANSMISSION, DOCKET NO. R-302

ORDER NO. 331

PRESCRIBING REPORT OF BULK ELECTRIC POWER SUPPLY INTERRUPTIONS

(Issued December 20, 1966)*

The Commission in this order is amending its regulations to require all public utilities, licensees and other entities engaged in the generation or transmission of electric energy, whether or not otherwise subject to the jurisdiction of the Commission, to report major interruptions of bulk power supply. This regulation applies to privately, publicly and cooperatively owned systems.

The Federal Power Commission has the statutory responsibility for encouraging actions to assure an abundant supply of electric energy throughout the country and is authorized by subsection 202(c) of the Federal Power Act to take appropriate action as in its judgment will best meet an emergency situation arising out of any failure of an adequate power supply. In addition, section 207 requires the Commission, under certain circumstances, to determine and fix by order the proper, adequate or sufficient interstate service to be rendered by a public utility. Under section 311 of the Act the Commission is responsible for reporting the problems and developments of the electric industry to Congress and is directed to collect information regarding the generation, transmission, distribution and sale of electric energy, however produced, and whether or not otherwise subject to its jurisdiction. The information which we are requiring will enable us more adequately to carry out these responsibilities.

---

*Published in the Federal Register on December 30, 1966 (31 F.R. 16691).

The regulation prescribed by this order will enable the Commission to keep currently informed of major service interruptions in bulk power supply. It establishes a reporting system, applicable to all segments of the electric industry, which will secure necessary information during a service interruption or in the period immediately thereafter. It will not necessarily secure all the data which would be desirable in order to build up comprehensive statistics on the reliability of electric power service. (For example, this regulation does not provide for collecting data on the equipment outages which electric systems sustain without interruption of service.)

On April 14, 1966, we issued a Notice of Proposed Rulemaking in this proceeding, published in the Federal Register on April 20, 1966 (31 F.R. 6055) and, thereby, invited the submission of comments by May 17, 1966 with respect to the proposal. The date for submission was subsequently extended to June 17, 1966 (31 F.R. 7287). Some eighty responses were received.[1] A majority indicated that immediate reporting could interfere with service restoration and perhaps the release of misleading information. There were many suggestions for increasing the minimum magnitude of reportable interruptions, for excluding interruptions affecting customers served under interruptible contracts, for excluding interruptions affecting only one large industrial customer, and for less prompt reporting. Some features which needed clarification were noted.

We recognize the merit of the points raised and certainly do not wish to interfere with service restoration. We believe we can largely avoid this by allowing time for reasonably expeditious initial reporting and permitting initial reporting to be limited to the bare essentials necessary for appraising the general significance of the interruption. We are providing, also, that for the purpose of defining a reportable interruption, the aggregate of loads interrupted shall not include any load which is interrupted pursuant to the terms of the contract under which such load is served. For all other interruptions, however, we believe it is desirable to retain the magnitudes and duration of interruption originally proposed for both telephonic and telegraphic reporting. Increasing these limits could result in a failure to report significant interruptions of service without being reported. Furthermore, on the basis of the views presented to us and of the experimental voluntary reports during the period after issuance of the notice we doubt that the frequency of required reporting will result in being a burden on either the utilities or the Commission.

We have given careful consideration to all of the comments received and have adopted several of the suggestions made and we believe that the text of the regulations here prescribed will make clear our original intention to require prompt reporting of major interruptions of bulk power supply of public significance without unduly impeding service restoration.

The Commission therefore finds:

(1) It is necessary and appropriate for the administration of the Federal Power Act that the amendment of the Commission's regulations set out in paragraph (A), below, be adopted.

---

[1] A list of the respondents is appended.

(2) In view of the foregoing, it is necessary and appropriate that the interruption reporting procedure proposed in the notice of proposed rulemaking issued in this proceeding be revised and, as so revised, now be prescribed.

The Commission, acting pursuant to the authority of the Federal Power Act, as amended, particularly sections 202, 207, 304, 307, 309 and 311 (49 Stat. 848, 853, 855, 856, 858, 859, as amended 67 Stat. 461; 16 U.S.C. 824a, 824f, 825c, 825f, 825h, 825j), *orders:*

(A) Part 141, Subchapter D, Chapter I, Title 18 of the Code of Federal Regulations, is amended by adding a new § 141.58 to read as follows:

§ 141.58 Report of bulk electric power supply interruptions.

(a) *Definitions.* For the purpose of this rule, a bulk electric power supply interruption shall be any interruption or loss of service to customers of any electric utility, licensee, or other entity engaged in the generation or transmission of electric energy caused by or involving an outage of any generating unit or of electric facilities operating at a nominal voltage of 69 kv or higher. In determining the aggregate of loads which are interrupted, any load which is interrupted in accordance with the provisions of contracts permitting interruption in service shall not be included. If the interruption affects only a single ultimate customer, the interruption need not be reported. For the purpose of this rule a report or a part of a report may be made jointly by two or more entities.

(b) *Telephonic reports.* Every electric utility, licensee and other entity engaged in the generation or transmission of electric energy shall report to the Commission's Washington office by telephone any loss in service for 15 minutes or more of bulk power supply to aggregate loads in excess of 200,000 kw. Calls should be placed as soon as practicable without unduly interfering with service restoration and in any event within one hour after the beginning of the interruption to Area Code 202, number 962–1307. This number is in service at all times. The information supplied in the initial telephonic report should include at least the approximate territory affected by the interruption, the time of occurrence, an estimate of the number of customers and amount of load involved, and an appraisal of the likely duration of the interruption. To the extent known or suspected, the report desirably will include a description of the cause(s) of the interruption and a description of the initial incident resulting in the interruption. The Commission or the Chief of its Bureau of Power may require further reports during the period of interruption and restoration of service, such reports to be made by telephone or telegraph or both as required.

(c) *Telegraphic reports.* Every electric utility, licensee and other entity engaged in the generation or transmission of electric energy shall report to the Commission's Washington office by telegram any loss in service for 15 minutes or more of bulk power supply to aggregate loads exceeding the lesser of 25,000 kw or half the system load, and not required to be reported under paragraph (b) above. The report shall be sent to the Chief, Bureau of Power, Federal Power Commission, 441 G Street, N.W., Washington, D.C. within two hours after the beginning of the service interruption. The information supplied shall include the approximate territory affected by the interruption, a description of the initial incident resulting in the interruption, cause of the interruption or an appraisal of the likely duration of the interruption, and an estimate of the number of customers and amount of load involved. To the extent known or suspected, the report should include the time of occurrence and the time or times of restoration. Telephonic reports in lieu of telegraphic reports will be accepted (Area Code 202, Number 962–1307) if preferred by the respondent.

(d) *Report of details.* (1) If so directed by the Commission or the Chief of its Bureau of Power, an entity experiencing a service interruption of bulk power supply reportable under paragraphs (b) or (c) of this section shall submit a full report of the circumstances of the interruption and the conclusions the entity has drawn therefrom. The report shall be filed at such time subsequent to the submittal of the initial report by telephone or telegram as may be directed by the Commission or the Chief of its Bureau of Power.

(2) The report shall be prepared in such detail as may be appropriate to the severity and complexity of the incident experienced and should include an account understandable to the informed layman in addition to the following technical and other information:

(i) The cause or causes of the initial disturbance clearly described, including the manner in which the incident was initiated.

(ii) A description of any operating conditions of an unusual nature preceding the initiation of the disturbance.

(iii) If the interruption was geographically widespread, an enumeration of the sequence of events contributing to its spread.

(iv) An account of the measures taken which prevented further spreading in the loss of service, *e.g.*, manual or automatic load shedding, unit isolation, or system sectionalization. These actions and all chronicled events should be keyed to a record of the coincident power frequencies which occurred.

(v) A description of the measures taken to restore service with particular evaluation of the availability of start-up power and the ease or difficulty of restoration.

(vi) A statement of the capacity of the transmission lines into the area of load interruption, the generating capacity in operation in the area at the beginning of the disturbance, and the actual loading on the lines and generating units at that time.

(vii) A summary description of any equipment damage and the status of its repair.

(viii) An evaluation of the impact of the interruption on people and industries in the affected area, including a copy of materials in the printed news media indicative of the impact.

(ix) Information on the steps taken, being taken, or planned by the utility, to prevent recurrence of interruption of a similar nature, to ease problems of service restoration, and to minimize impacts on the public and the customers of any future service interruption.

(Secs. 202, 207, 304, 307, 309, 311; 49 Stat. 848, 853, 855, 856, 858, 859, as amended 67 Stat. 461; 16 U.S.C. 824a, 824f, 825c, 825f, 825h, 825j.)

(B) This amendment shall be effective December 31, 1966.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

ARKANSAS LOUISIANA GAS COMPANY, DOCKET NO. CP67-91

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 21, 1966)

On October 10, 1966, Arkansas Louisiana Gas Company (Applicant) filed in Docket No. CP67-91 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and the operation of miscellaneous natural gas facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new and existing supplies of natural gas in various producing areas generally coextensive with said system.

The total cost of the facilities covered by this application will not exceed a maximum of $3,459,400, with no single project to exceed a cost of $500,000, which costs are proposed to be financed from funds on hand, cash generated by operations and from internal sources.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 15, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Arkansas Louisiana Gas Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of January 26, 1943, in Docket No. G–252 (3 FPC 910).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $3,459,400, with no single project to exceed a cost of $500,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Arkansas Louisiana Gas Company, to construct during the calendar year 1967 the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $3,459,400, with no single project to exceed a cost of $500,000.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

BLUEBONNET GAS CORPORATION, DOCKET NO. CP67-123

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 21, 1966)

On November 2, 1966, Bluebonnet Gas Corporation (Applicant) filed in Docket No. CP67-123 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas gathering facilities and the transportation and sale of natural gas to Florida Gas Transmission Company (Florida), an existing customer, all as more fully set forth in the application in this proceeding.

Specifically, Applicant proposes to construct and operate metering, regulating, and requisite interconnecting facilities required to transport gas purchased by Applicant in the State of Louisiana from Franks Petroleum, Inc., Operator (Franks), which gas will be produced in the Bayou Fordoche Field, Pointe Coupee Parish. Said gas is to be sold to Florida at a point in Pointe Coupee Parish where Florida's transmission line traverses the State of Louisiana.

The present estimate of reserves dedicated to Applicant by contract with Franks is 1,018 MMcf at 15.025 psia. Estimated daily deliveries are 600 Mcf of natural gas which will be sold under Applicant's presently effective FPC Rate Schedule X-1.

On August 18, 1966, Franks filed with the Commission in Docket No. CI67-188 an application for a certificate of public convenience and necessity authorizing the sale of natural gas to Applicant.

Applicant estimates the total cost of its proposed facilities, including a tap to Florida's transmission line, to be $10,500. Applicant proposes to issue 10,500 additional shares of $1.00 par value common stock to its parent, Lumar Gas Corporation, to finance the subject project.

At a hearing held on December 21, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Bluebonnet Gas Corporation, a Texas corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of May 21, 1965, in Docket No. CP65-326 (33 FPC 1032).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The aforesaid construction and operation of facilities and transportation and sale of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) The certificate hereinafter issued should be issued concurrently with the related certificate to be issued to Franks Petroleum, Inc., Operator, in Docket No. CI67-188.

(6) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Applicant, Bluebonnet Gas Corporation, authorizing the construction and operation of facilities and transportation and sale of natural gas hereinbefore described, as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The certificate issued by paragraph (A) above shall be issued concurrently with the related certificate to be issued to Franks Petroleum, Inc., Operator, in Docket No. CI67-188.

(D) The certificate issued by paragraph (A) above is conditioned upon Applicant filing with the Commission a revision of Rate Schedule X-1 reflecting the additional reserves dedicated to it by Franks Petroleum, Inc., Operator, as hereinbefore described and as more fully described in the application in this proceeding.

(E) The facilities hereby authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Regulations under the Natural Gas Act, within 6 months from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

SUN OIL COMPANY (SOUTHWEST DIVISION), DOCKET NO. RI67-152

ORDER ACCEPTING INCREASED RATE FILING AND TERMINATING PROCEEDING

(Issued December 21, 1966)

On November 2, 1966, Sun Oil Company (Southwest Division) (Sun) filed under its FPC Gas Rate Schedule No. 8, a "fractured" rate increase, from 10.81979¢ to 14.0¢ per Mcf, amounting to $239 annually, for gas sold to Natural Gas Pipeline Company of America from the LaGloria Field, Jim Wells and Brooks Counties, Texas (Railroad District No. 4). Although contractually due a higher rate, Sun limited its proposed increase so as not to exceed the area increased ceiling level, consistent with its settlement moratorium which prohibits the filing of increased rates in excess of the applicable area ceiling. Sun's moratorium provision expires August 1, 1967. The moratorium period was considered insufficient and since Sun did not waive its right to file for any further increases until its next contractual increased rate became due, the proposed rate increase, designated as Supplement No. 8 to Sun's FPC Gas Rate Schedule No. 8, was suspended for one day from December 3, 1966, the proposed effective date, by the Commission's order issued November 30, 1966, in Docket No. RI67-152. Sun has not filed its agreement and undertaking and the proposed increased rate has not been made effective subject to refund in accordance with paragraph (B) of the Commission's aforementioned suspension order issued November 30, 1966.

On November 29, 1966, Sun submitted a letter whereby it now waives its right to seek any amount higher than the 14.0¢ rate, inclusive of tax reimbursement, proposed in its rate increase filing, for the remainder of the relevant escalation period which expires January 3, 1969, but reserves its right to file for any increase up to any increased price level, if contractually entitled, which might in the future be established by the Commission. In view of the filing of the aforementioned waiver, we conclude that it would be in the public interest to accept Supplement No. 8 to Sun's FPC Gas Rate Schedule No. 8, suspended in Docket No. RI67-152, without refund obligations, effective as of December 4, 1966, the date such increase would have become effective subject to refund, and to terminate the suspension proceeding.

The Commission finds:

For the foregoing reasons, good cause exists for accepting the increased rate contained in Supplement No. 8 to Sun's FPC Gas Rate Schedule No. 8, without refund obligation, to be effective as of December 4, 1966, the date the proposed increased rate would have become effective subject to refund in Docket No. RI67-152, and for terminating the rate suspension proceeding in said docket.

The Commission orders:

(A) The 14.0¢ per Mcf rate increase contained in Supplement No. 8 to Sun's FPC Gas Rate Schedule No. 8 is accepted, without refund obligations, to be effective as of December 4, 1966.

(B) The rate suspension proceeding in Docket No. RI67-152 is terminated.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

VINCENT & WELCH, INC. (OPERATOR), ET AL., DOCKET NO. G-19261

ORDER ACCEPTING AMENDED OFFER OF SETTLEMENT, TERMINATING PROCEEDINGS, AND REQUIRING REFUNDS

(Issued December 21, 1966)

On October 3, 1966, Vincent & Welch, Inc. (Operator), *et al.* (V & W) filed an offer of settlement in Docket No. G-19261 pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure, for a sale of natural gas to Transcontinental Gas Pipe Line Corporation (Transco) under its FPC Gas Rate Schedule No. 2 in the Grand Coulee Field, Acadia Parish, Louisiana.[1] V & W had been charging and collecting a rate of 18.5¢ per Mcf, since April 1, 1960, which proposed increased rate was suspended by order of the Commission, and had been made effective by V & W subject to refund in Docket No. G-19261 since that date. The last firm rate was 17.5¢ per Mcf of natural gas at 15.025 psia, inclusive of tax reimbursement.

On October 9, 1966, V & W amended its proposal to include a sale to Valley Gas Transmission, Inc. in the Woodlawn Field, Jefferson Davis Parish, Louisiana, at a rate of 17¢ per Mcf of natural gas at 15.025 psia, which rate is below the applicable area ceiling fixed by the Commission's Statement of General Policy No. 61-1 (18 CFR 2.56) and to apply a moratorium of 36 months to said sale from October 1, 1966. This is the only other jurisdictional sale of natural gas made by V & W.

Consequently, the amended proposal causes it to come within the refund formula set forth by us in *Jack W. Grigsby (Operator), et al.*, Docket Nos. RI61-96, RI62-536, 32 FPC 529, and we shall order refunds accordingly. Such refund monies will approximate $13,700, inclusive of interest, through September 30, 1966. It is noted that V & W propose that the date of termination of the interest computation be September 30, 1966; however, consistent with our past action, we shall require payment of interest to the date of issuance of this order. However, we shall require Transco to retain any such refund monies which may be due and owing to its customers. The Manufacturers Light and Heat Company and United Natural Gas Company, until such time as the Commission shall by final action determine the "flow-through" obligations of those companies to their respective purchasers of natural gas.

Since the proposed settlement rate is acceptable under the provisions of the Commission's Statement of General Policy No. 61-1, as amended, 18 CFR 2.56, the offer of settlement filed by V & W on October 3, 1966, and amended on October 9, 1966, and herein conditioned, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act, and should be approved and made effective as hereinafter ordered.

Our action herein shall not be construed, nor may it be, as constituting approval of any future rate increase, if any, that may be filed under its remaining rate schedule, and is without prejudice to any findings or order of the Commission in any future proceedings, including area rate proceedings, or other similar proceedings, involving V & W's rate and rate schedule.

---

[1] This sale ceased in 1963 and V & W was granted permission to abandon it by order of the Commission on December 1, 1966 in Docket No. CI67-375.

The Commission finds:

The proposed settlement of the proceeding herein, on the basis described herein, as more fully set forth in the offer of settlement filed with the Commission by V & W on October 3, 1966, as amended on October 9, 1966, and herein conditioned, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act, and should be approved and made effective as hereinafter ordered.

The Commission orders:

(A) The offer of settlement filed with the Commission by V & W on October 3, 1966, as amended on October 9, 1966, is hereby approved in accordance with the provisions of this order.

(B) V & W shall refund to Transco to the date of last delivery the difference between the rate collected subject to refund in Docket No. G–19261 under the rate schedule herein and the related settlement rate, and shall report to the Commission in writing, within 45 days from the date of issuance of this order, the amount of such refund, showing separately the amount of principal and interest, and the bases used for such determination, and ten days thereafter shall file a release for the same from Transco.

(C) Transco shall retain such refund monies it receives from V & W which it computes is due and owing to The Manufacturers Light and Heat Company and United Natural Gas Company pending further action of the Commission.

(D) Upon notification by the Secretary of the Commission that V & W has complied with the terms and conditions of this order, the proceeding in Docket No. G–19261 shall be deemed terminated insofar as such proceedings pertain to sales made by V & W under the rate schedules involved therein.

(E) The acceptance by the Commission of V & W's offer of settlement is without prejudice to any findings or determination that may be made in any proceedings now pending, or hereafter instituted by or against V & W, including area rate or other similar proceedings.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

BANGOR HYDRO-ELECTRIC COMPANY, DOCKET NO. E–7316

ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued December 22, 1966)

Bangor Hydro-Electric Company (Bangor) filed an application with the Federal Power Commission on October 17, 1966, seeking an order pursuant to Section 203 of the Federal Power Act authorizing it to acquire all of the electric facilities of Hampden and Newburg Light and Power Company (Hampden).

Bangor is incorporated under the laws of the State of Maine and qualified to do business in that state with its principal business office in Bangor, Maine, and is engaged in the electric utility business in the Maine counties of Penobscot, Hancock, Washington and Piscataquis and serves over 58,000 customers in this area.

Hampden is an electric utility organized under the laws of the State of Maine with its principal business office at Newburg, Maine and serves approximately 750 customers in four towns in Penobscot County and one town in Waldo County, all within the State of Maine. Hampden has no generating or transmission facilities of its own. It is interconnected with Bangor which furnishes the entire requirements of its system.

According to the application, the transaction contemplates the acquisition by Bangor of the entire electric operating property of Hampden. Most of the facilities are distribution property typically found in an electric utility. The facilities are currently and will continue to be used in the distribution of electric energy or sale at retail. Bangor intends to utilize all of the electric operating property to be required from Hampden.

Bangor and Hampden entered into an agreement on September 12, 1966, for the transfer of Hampden's properties, net assets, and franchises to Bangor in exchange for that number of Bangor's Common Stock, $5 par, that will allow each holder of Hampden's Capital Stock (Preferred and Common Stocks) to receive one share of Bangor's Common Stock in exchange for each full share so held of the Capital Stock of Hampden. Stockholders of Hampden whose fractional interests of Capital Stock equals or exceeds one-half share will receive a whole share of Bangor's Common Stock. This transaction will require 4,393 shares of Bangor's Common Stock.

Bangor has purchased the 4,393 shares of its Common Stock on the over-the-counter market at an average cost of $20.50 per share and at a total cost of $90,057. Bangor's transfer of these shares in exchange for Hampden's Net assets of $73,533 would have created an acquisition adjustment of $16,524 on the books of Bangor as of December 31, 1965. According to Bangor, any acquisition adjustment which will be created by the transaction will be eliminated by a debit to Earned Surplus. Upon the receipt of the shares of Common Stock from Bangor, Hampden will distribute them to its shareholders in the above-mentioned manner. Also upon receipt of these shares, the officers of Hampden will transfer Hampden's electric properties to Bangor and will institute proceedings to liquidate the corporation.

Bangor represents that the integration of the smaller electric utility system of Hampden into its integrated system, which is interconnected with the New England grid, will result in assuring an adequate supply of electric energy in the territory now served by Hampden at the generally lower rates of Bangor. After the transaction is completed, Bangor will put into effect its own rates for the former customers of Hampden. Bangor estimates that it will reduce annual residential rates by $14,571 or 19% and commercial rates by $1,630 or 1.3%.

Written notice of the application has been given to the Public Utilities Commission of Maine and to the Governor of that State. Notice was also published in the Federal Register on November 3, 1966, (31 F.R. 14088), stating that any person desiring to be heard or to make any protest with reference to said application should on or before November 17, 1966, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, owns and operates facilities for the transmission and sale at wholesale of electric energy which is generated in the States of New Hampshire and Massachusetts, and consumed in the State of Maine, all of which facilities are in addition to and do not include facilities used for the generation of electric energy, facilities used in local distribution, or only for the transmission of electric energy in intrastate commerce, or facilities for the transmission of electric energy consumed wholly by the trans-

mitter. Applicant is, therefore, a public utility within the meaning of that term as used in Section 203 of the Act.

(2) By the proposed transaction, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of Hampden, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Applicant, as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(4) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) The proposed acquisition by Applicant of the aforementioned electric facilities, all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescense by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

LONE STAR GAS COMPANY, DOCKET NO. CP67-111

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 22, 1966)

On October 25, 1966, Lone Star Gas Company (Applicant) filed in Docket No. CP67-111 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and the operation of certain miscellaneous field facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application in this proceeding.

By the instant application, Applicant seeks authorization to construct and operate various lateral pipelines and related facilities as additions to and extensions of existing jurisdictional facilities to enable it to take into its existing pipeline system natural gas from new reserves discovered in proximity to said system.

The total cost of Applicant's proposed facilities will not exceed a maximum of $1,000,000, with no single project to exceed a cost of $250,000, which costs will be financed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on December 21, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Lone Star Gas Company, a Texas corporation having its principal place of business in Dallas, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued April 11, 1944, in Docket No. G–442 (4 FPC 565).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $1,000,000, with no single project to exceed a cost of $250,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Lone Star Gas Company, to construct during the calendar year 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $1,000,000, with no single project to exceed a cost of $250,000.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

MIDWESTERN GAS TRANSMISSION COMPANY, DOCKET NOS. RP61-19, RP62-7 (REOPENED) AND KNOXVILLE UTILITIES BOARD, ET AL. v. EAST TENNESSEE NATURAL GAS COMPANY, RP65-4

ORDER GRANTING STAYS

(Issued December 22, 1966)

On November 28, 1966, Midwestern Gas Transmission Company (Midwestern) and East Tennessee Natural Gas Company (East Tennessee) filed separate motions requesting a stay of the rate reductions required by our Opinion Nos. 497 and 497-A and accompanying orders, 36 FPC 61, 599, during the pendency of judicial review proceedings of those opinions and orders. Midwestern also seeks a stay of our requirement that it make refunds of liberalized depreciation tax deductions available from the period October 13, 1964 to January 1, 1967. On December 12, 1966, Knoxville Utilities Board, *et al.* (Knoxville), opposed East Tennessee's motion and on December 14, 1966, the City of Chicago opposed Midwestern's motion.

The substantive issues involved in our original opinion and the supplemental opinion denying applications for rehearing are now in court for judicial decision. The ordered reductions in annual rates and charges and Midwestern's refund are relatively small in amount and the basic question involved is one of first impression before this Commission. Movants have expressed willingness to provide an undertaking to make the necessary refunds to their customers so as to protect their interests in the event that a stay is granted. In view of these exceptional circumstances, we believe that it would be appropriate to grant the requested stay subject to the condition that Midwestern and East Tennessee will file an undertaking and agreement expressly obligating them to make refunds retroactive to January 1, 1967, regardless of whether or not they resume the use of liberalized tax depreciation, if the Commission's Opinion Nos. 497 and 497-A are affirmed by the courts.

There is also pending before us the collateral and peripheral question of whether East Tennessee should be directed to reduce its annual rates by the larger amount proposed in Appendices C and D of Opinion No. 497 or by the smaller amount set forth in its calculations underlying such ordered rate reductions in its filing of October 17, 1966, which has been opposed by Knoxville. In view of our action in granting a stay, we find it unnecessary to decide this narrow question of the proper method of mathematical calculation during the pendency of court review proceedings concerned with the lawfulness of our order requiring a rate reduction designed to reflect the tax savings available through the use of liberalized tax depreciation deductions.

The Commission orders:

(A) Ordering paragraphs (A) and (B) of the order accompanying Opinion No. 497 and ordering paragraph (C) of the order accompanying Opinion No. 497-A are hereby stayed for a period of 30 days after the conclusion of judicial review of the above-identified opinions and orders or until such orders otherwise become final. Provided, however, that such stay shall only become effective if, within 30 days of the date of issuance of this order, Midwestern and East Tennessee shall each execute and file an agreement and undertaking to refund to their respective jurisdictional customers all amounts hereby allowed to be charged in excess of the just and reasonable rates as heretofore or hereafter determined by the Commission and affirmed on judicial review by the court of last resort, which amounts are attributable to gas sold on and after January 1, 1967, with interest thereon at 7 percent per annum from the date of receipt to the date of payment following such affirmance. Midwestern shall also include in its agreement and undertaking an express obligation to pay interest at 7 percent per annum, from January 1, 1967 onwards, on the refunds required by Opinion No. 497 for the period from October 13, 1964 through January 1, 1967.

(B) Final decision is reserved on the question of the proper amount of the annual rate reduction to be made by East Tennessee, and of the rate refund (covering the period from October 13, 1964 to January 1, 1967) to be made by Midwestern, pending the outcome of the petitions for review now awaiting judicial review.

(C) The revised tariff sheets setting forth Midwestern's proposed rate reductions, as required by Opinion Nos. 497 and 497-A and the accompanying orders of July 15 and September 9, 1966, which were filed on October 7, 1966, are hereby approved.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ANNUAL REPORTS OF ELECTRIC UTILITIES AND LICENSEES—SCHEDULES FOR REPORTING PUMPED STORAGE DATA—OTHER MISCELLANEOUS MODIFICATIONS, DOCKET NO. R-313

ORDER NO. 332

AMENDING ANNUAL REPORTS, FPC FORMS NOS. 1 AND 1-F AND PERMITTING THE USE OF CERTAIN REVISED SCHEDULES IN FORM NO. 1 FOR REPORTING PUMPED STORAGE DATA FOR THE YEAR 1966

(Issued December 22, 1966)*

FPC Form No. 1, prescribed by § 141.1 of the Commission's regulations for electric utilities, licensees and others, is filed by several licensees which operate pumped storage facilities. Such licensees, in order to supply the complete information with respect to their projects required by the form, have submitted the data relating to their pumped storage operations on schedules of their own devising because there is no appropriate provision therefor in the form. Necessary revisions have been suggested but the matter is still under consideration though we anticipate that they will be included, probably among others, in a notice of proposed rulemaking to be issued early next year in order that such, or substantially similar, revisions may be prescribed for inclusion in the annual report for the reporting year 1967.

---

*Published in the Federal Register on December 28, 1966 (31 F.R. 16560).

In the meantime, a request has been made on behalf of those licensees and transmitted to us through the Office of Statistical Standards in the Bureau of the Budget that they be permitted to report their pumped storage data in FPC Form No. 1 for the year 1966 in accordance with revised schedules which they have suggested, notwithstanding the schedules have not as yet been prescribed by the Commission for inclusion in the form. Since the submission of the data on the revised schedules, more particularly described below, will inure not only to the benefit of the licensees but, as well, to the Commission and other interested persons and agencies, we are permitting their use for the reporting year 1966 in lieu of the same schedules now included in the form.

It has come to the attention of the Commission that some of the companies submitting Form No. 1 issue not only their annual reports to stockholders but, as well, other regular reports of financial, statistical and operational reviews for the information of stockholders, security analysts and other interested persons. Some of these publications have come into our hands and we have found them to be of considerable value in the exercise of our functions. Accordingly, we are here amending the instructions in Form No. 1 to require the filing not only of any published annual reports to stockholders but also of any such other reports or similar documents which a reporting company may regularly issue for the information of its stockholders and others. Since we are requiring only the submittal of material which the respondents have already prepared, albeit for other purposes, the added burden of submittal will be minimal.

The other amendments here made to FPC Forms Nos. 1 and 1-F are minor editorial revisions in several of the schedules, some of which have been suggested by the respondents which file the forms and others for the purpose of conforming these forms with similar revisions already prescribed for reporting in the Power System Statements—the Form 12 series.[1]

Finally, we approve the substitution, heretofore made, of a "Verification" for an "Attestation" page in FPC Form No. 1-F and here amend § 141.2 to prescribe and codify that change.

The Commission finds:

(1) The revisions of the several schedule pages of the annual reports, FPC Form No. 1 and 1-F, and to § 141.2 are necessary and appropriate to the administration of the Federal Power Act.

(2) Since it is apparent from the foregoing discussion, that the revisions here prescribed are of a minor or clarifying nature and impose no added burden on the respondents, it is unnecessary to comply with the requirements of section 4 of the Administrative Procedure Act with respect to prior notice and opportunity to comment.

The Commission, acting pursuant to the authority granted by the Federal Power Act, as amended, particularly sections 4(a), 304, 309 and 311 thereof

---

[1] Order No. 312 in Docket No. R-289, 34 FPC 1490, 30 F.R. 16106.

(41 Stat. 1065; 49 Stat. 839, 855, 858, 859; 16 U.S.C. 797(a), 825c, 825h, 825j), *orders:*

(A) The annual report FPC Form No. 1, prescribed for Classes A and B public utilities, licensees and others by § 141.1, Part 141, Subchapter D, Chapter I, Title 18 of the Code of Federal Regulations, is amended, effective for the reporting year 1966 and thereafter, as follows:

1. General Instruction No. 14 is revised to read as follows:

14. In addition to filing this form, the respondent shall also file with the Commission, immediately upon publication, five copies of its latest annual report and, immediately upon publication, five copies of any regular financial, statistical, or operational reviews or reports that a company may prepare for distribution to stockholders, bondholders, other security holders, security analysts, prospective stockholders, or any other interested parties. If such reports are not prepared, that fact should be stated below:

----

2. The schedule (page 228) "Investment Tax Credits Generated and Utilized" is revised to read as set out in *Attachment A** hereto.

3. The second sentence of instruction paragraph 2 of the schedule (page 412) "Sales for Resale (Account 447)" is revised to read as follows:

For *each sale* designate statistical classification in column (b) thus: FP. for firm power supplying total system requirements of customer or total requirements at a specific point of delivery; FP(C), for firm power supplying total system requirements of customer or total requirements at a specific point of delivery with credit allowed customer for available standby; FP(P), for firm power supplementing customer's own generation or other purchases; DP, for dump power; O, for other.

4. In instruction paragraph 1. of the schedule (page 432) "Steam Electric Generating Plant Statistics (Large Plants)", delete "10,000 kw" and insert in lieu thereof "25,000 kw".

5. In instruction paragraph 1. of the schedule (page 433a) "Hydro-electric Generating Plant Statistics (Large Plants)," delete "2,500 kw" and insert in lieu thereof "10,000 kw".

6. In instruction paragraph 1. of the schedule (page 434) "Generating Plant Statistics (Small Plants)", delete "10,000 kw" and "2,500 kw" and insert in lieu thereof "25,000 kw" and "10,000 kw", respectively.

7. In instruction paragraph 1. of the schedule (page 436) "Steam-Electric Generating Plants". delete "10,000 kw" and insert in lieu thereof "25,000 kw".

8. In instruction paragraph 1. of the schedule (page 438) "Hydro-electric Generating Plants", delete "2,000 kw" and insert in lieu thereof "10,000 kw".

(B) Part 141, Subchapter D, Chapter I, Title 18 of the Code of Federal Regulations, is amended as follows:

1. In § 141.2, paragraph (c) is amended by deleting the last item, "Verification", in the list of schedules there set out and inserting, in lieu thereof, the item "Attestation".

(Secs. 4(a), 304, 309, 311, 41 Stat. 1065, 49 Stat. 839, 855, 858, 859; 16 U.S.C. 797(a), 825c, 825h, 825j.)

(C) The annual report FPC Form No. 1-F prescribed for Classes C and D public utilities and licensees by the said § 141.2 is amended, effective for the reporting year 1966 and thereafter, as follows:

1. The schedule (page 9) "Investment Tax Credits Generated and Utilized" is revised to read as set out in *Attachment B** hereto.

---

*Omitted in printing.

(D) Licensees, required to submit FPC Form No. 1, which operate pumped storage facilities may submit, for the reporting year 1966, their pumped storage data on the following entitled schedule pages:

Electric Plant In Service (Continued), page 401,
Accumulated Provisions for Depreciation of Electric Plant, page 408,
Electric Operation and Maintenance Expenses (Continued), pages 418, 419, 419a, and 420,
Depreciation and Amortization of Electric Plant, page 429,
Electric Energy Account, page 431,
Pumped Storage Generating Plant Statistics (Large Plants), pages 433c and 433d,
Generating Plant Statistics (Small Plants), page 434,
Pumped Storage Generating Plants, pages 439a and 439b,

appended hereto in *Attachment C** (pages 1 through 13).

(E) The amendments here made to the Commission's regulations and to FPC Form Nos. 1 and 1–F and the permission granted by ordering paragraph (D) shall be effective December 31, 1966.

(F) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67–113

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT

(Issued December 22, 1966)

On October 27, 1966, United Gas Pipe Line Company (Applicant) filed in Docket No. CP67–113 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval for the abandonment and removal of certain natural gas transmission facilities, all as more fully set forth in the application.

Applicant seeks to abandon and remove facilities originally installed to service Humble Pipe Line Company at its Gwenville Trunk Line Pump Station which facilities include a positive meter station and appurtenant equipment, all being located in Jefferson Davis County, Mississippi.

Applicant states that by letter agreement dated August 31, 1966, the parties agreed to the cancellation of their contract dated October 11, 1963, under which deliveries of gas had been made.

After due notice, no petition to intervene, notice of intervention, or protest to the granting of the application has been filed.

At a hearing held on December 15, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas

---

*Omitted in printing.

company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued November 10, 1942, in Docket No. G-232 (3 FPC 863).

(2) The facilities proposed to be abandoned, as hereinbefore described and as more fully described in the application herein, are used in the transportation of natural gas in interstate commerce subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and approval thereof should be granted as hereinafter ordered.

The Commission orders:

(A) Permission for and approval of the abandonment of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted to Applicant, United Gas Pipe Line Company.

(B) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within 10 days of such abandonment.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

PERRY R. BASS (OPERATOR), ET AL., DOCKET NO. RI66-188

ORDER DENYING REHEARING AND RECONSIDERATION

(Issued December 23, 1966)

By order issued December 3, 1965, in the above-entitled proceeding the Commission suspended for one day a proposed increased rate of 13.19¢ per Mcf[1] designated as Supplement No. 2 to Perry R. Bass (Operator), *et al.*, FPC Gas Rate Schedule No. 1, relating to sales of gas to El Paso Natural Gas Company (El Paso) from the Brown-Bassett Field, Terrell County, Texas. The proposed rate was suspended because the area rate ceiling applicable to this sale had not yet been determined in accordance with the provisions of Opinion Nos. 468 and 468-A, 34 FPC 159, 1068. Subsequent to the suspension order Bass filed a quality statement for the subject sale reflecting an applicable area rate of 14.25¢ per Mcf which was accepted by the Commission.

After the acceptance of Bass' quality statement the Commission by order issued November 15, 1966, 36 FPC 852, terminated the proceeding in Docket No. RI66-188 and relieved Bass of any refund obligation in such proceeding because the proposed increased rate of 13.19¢ per Mcf was below the just and reasonable ceiling. It was also pointed out in the order that Bass must file a notice of change in rate if he seeks at sometime in the future to charge and collect a rate in excess of 13.19¢.

Bass on December 1, 1966, filed a motion for rehearing and reconsideration of the November 15 order. Bass claims that the Commission erred in holding the ceiling on the rate he can collect at the present time is 13.19¢ per Mcf and does not in fact reflect the rate increase from 16.0¢ to 16.5¢ per Mcf filed for in Docket No. RI66-188. It is his position that although in his filing he indicated the contractual processing deduction was 3.31¢ per Mcf he should be allowed to collect a rate of 14.25¢ reflecting the 16.5¢ gross rate minus the 2.25¢ per Mcf quality deduction specified in his quality statement.

---

[1] 16.5¢ base rate less deduction of 3.31¢ per Mcf by El Paso for the removal of carbon dioxide.

The base rate provided for in Bass' contract is subject to a contractual deduction of El Paso's processing cost which shall not exceed 4.5¢ per Mcf. Both the notice of change filed by Bass and the Commission's suspension order made it clear that the base rate increase from 16¢ to 16.5¢ per Mcf was subject at that time to a processing cost of 3.31¢. The proposed net increased rate was thus 13.19¢ per Mcf. This is the rate which the November 15 order allowed to become effective without refund obligation. The acceptance of the Bass quality statement reflecting a lower processing cost does not and cannot change the status of the filing upon which Bass' rate must be predicated, though it did remove the reason for the suspension. It may well be that Bass under his contract is now in a position to file for a higher net effective rate than the one involved in Docket No. RI66-188, and our action does not preclude him from so doing. But obviously until such a filing is made Bass cannot collect more than his filed rate and when such a filing is made we can consider any questions which might then be raised as to Bass' contractual authority to seek any such increase. Bass' motion should therefore be denied.

The Commission orders:

The motion for rehearing and reconsideration filed herein by Bass on December 1, 1966, is denied.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

GREAT LAKES GAS TRANSMISSION COMPANY, ET AL., DOCKET NO. CP66-110, ET AL.

ORDER REMANDING PROCEEDING TO PRESIDING EXAMINER

(Issued December 23, 1966)

On June 23, 1966, the formal hearing in this proceeding was concluded; final briefs were submitted to the Presiding Examiner on September 12, 1966, following the Commission's order of August 5, 1966, 36 FPC 379, denying a motion to omit the intermediate decision procedure. On September 13, 1966, the Presiding Examiner certified the proceeding to the Commission for its consideration of the question of the future disposition of the proceeding in view of a report that the Canadian Government had refused to grant approval to the Canadian projects upon which the applications herein were based. The Examiner also directed that the parties show cause why the pending applications should not be dismissed without prejudice or make other recommendations which they consider appropriate to the Commission. In accordance with the Examiner's direction, responses were filed by the applicants together with answers by other parties to the case. Great Lakes Transmission Company (Great Lakes) submitted a filing on October 6, 1966, which stated that "the Canadian Government has now approved the National Energy Board's issuance of a certificate of public convenience and necessity together with the related export and import licenses in connection with the Great Lakes Project." As a result of that response, the Commission, on October 13, 1966, directed that Great Lakes submit as a formal filing, in addition to any licenses that may have issued, copies of the agreements and undertakings referred to by Great Lakes in its response, along with "all other documents submitted by your clients to the Canadian Government and the National Energy Board which formed the basis for the agreements and undertakings."

On November 3, 1966, Great Lakes and its associates[1] submitted a further supplement in response to the Commission's order incorporating certain material submitted to the Canadian Government and statements of members of that Government. By letter of November 14, 1966, the Secretary of this Commission sought additional documents not yet submitted and on December 2, 1966, Great Lakes submitted further material which reflected all of the correspondence not previously filed with the Commission which was submitted by Trans-Canada or Great Lakes to or received from the Canadian Government and the National Energy Board following the Canadian Government's initial action refusing to approve issuance of the certificate orders and licenses applied for by Trans-Canada in connection with the Great Lakes project.

Great Lakes contends, however, that the material submitted other than that incorporated in its November 3, 1966 response cannot properly be considered by the Commission in its further evaluation of its application. Great Lakes also requested that the Commission remand the proceeding to the Examiner with directions to resume his consideration of the existing record and to issue a prompt decision thereon. Responses to this request were submitted by various parties to the proceeding: some support the Great Lakes' request, others argue that in view of material changes in the situation that the record must be reopened, and still others contend that the changes are so major that the Great Lakes' application should be dismissed.

The initial reason why the Examiner certified the proceeding to the Commission—the fact that the Canadian Government had apparently mooted the Great Lakes' application by denying the appropriate authorizations required from that Government—now appears to have been removed by the subsequent action by the Canadian Government. However, it seems clear that a factual issue is presented as to whether any changes in Great Lakes' plans or other material developments have taken place since the close of the record which would render impossible or inappropriate an evaluation of the Great Lakes' or competing proposals on the basis of the existing record. We believe the Examiner who is familiar with the existing record and the positions of the parties is in the best position initially to evaluate the materiality and relevancy of any changes which have taken place. In making such evaluation the documents which have been filed with us by Great Lakes in its several pleadings will be material and we shall direct that they be made a part of the record for this purpose.[2]

Notwithstanding paragraph (F) of our order of February 23, 1966, consolidating the applications in this proceeding for hearing, we are of the opinion that, in view of the circumstances detailed above, any modification or supplement of the application or change in facts as the Examiner may determine exists which requires further proceedings should not be grounds for dismissal of the applications herein. However, to the extent that any such changes may exist the Examiner should consider to what extent other parties to these proceedings should be given an opportunity to modify their positions, or to present additional evidence, and to what extent further public notice of the application or applications as modified should be given. In the event he decides that such notice is appropriate, the Secretary of the Commission is hereby authorized to issue such notice as the Examiner may submit to him.

---

[1] Trans-Canada Pipe Lines Limited (Trans-Canada), Michigan Wisconsin Pipe Line Company, Michigan Consolidated Gas Company.

[2] If the Examiner subsequently determines that the record should be reopened, the appropriateness of the documents as part of such reopened record and for use in deciding the case on the merits can be decided in the usual manner.

The Commission orders:

(A) Great Lakes' submissions to the Commission of November 3, 1966 and December 2, 1966 are made a part of the record for the further consideration of the Examiner as detailed herein.

(B) The proceeding is remanded to the Examiner for his further consideration.

OPINION NO. 510

PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP66-50

OPINION AND ORDER ISSUING CERTIFICATE AND DIRECTING SALE OF GAS

(Issued December 23, 1966) *

Syllabus

1. Deficiencies of unsatisfactory record cannot be permitted to frustrate Commission in arriving at a decision in conformity with law and Commission policy. P. 1109.
2. Commission policy favoring service to industrial customers by local distributors is well established. P. 1109.
3. In considering whether order requiring delivery of interruptible gas to Fulton "would impair [Panhandle's] ability to render adequate service" to Harbison-Walker, Commission notes precedent establishes that Panhandle's industrial customer is entitled to no preference against interruption over pipeline's I-2 customers, including those subsequently connected—it also establishes that "impairment" as referred to in Section 7(a) must be significant and substantial. P. 1111.
4. It has not been shown that a significant impairment of service to Harbison-Walker would result from this order [*supra*, 3]. P. 1111.
5. Pipeline must be authorized or ordered by Commission to interconnect and make deliveries to distributor using new facilities—policy is to refuse issuance of such order if construction of proposed facilities is not economically feasible. P. 1112.
6. Panhandle's tariff obligates it to offer available supplies of interruptible gas to its industrial and retail customers on an equal basis. P. 1112.
7. In event existing facilities cannot supply all gas needed by Panhandle's customers on any given day, the two interruptible customers [Porter and one served directly by Panhandle] shall receive gas on proportional basis. P. 1113.
8. In a proceeding arising under Section 7 of the Natural Gas Act, Commission *grants* Panhandle's certificate application *in part; orders* increased deliveries to a distributor-customer on an interruptible basis and *denies* motion for oral argument.

Raymond N. Shibley, William J. LeBuhn and *G. R. Redding* for Panhandle Eastern Pipe Line Company.

---

*Initial decision appears on p. 1115. Amended by Opinion No. 510-A and order issued February 14, 1967, 37 FPC 314. Affirmed, *Panhandle Eastern Pipe Line Company* v. *F.P.C.*, 386 F. 2d 607 (CA3-1967).

Charles F. Wheatley and *W. C. Whitlow* for the City of Fulton, Missouri.

William J. Grove, J. A. Drabek and *Philip R. Ehrenkranz* for the H. K. Porter Company, Inc.

Russell B. Mamone for the Staff of the Federal Power Commission.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CARVER, *Commissioner:*

This is a proceeding pursuant to Section 7 of the Natural Gas Act on competing applications by Panhandle Eastern Pipe Line Company (Panhandle) and the City of Fulton, Missouri (Fulton) for such authorizations and orders from the Commission as would be necessary to permit one of the applicants to render service to an industrial customer, H. K. Porter Company, Inc. (Porter) at Fulton, Missouri.

The Applications

Panhandle seeks a certificate of public convenience and necessity for transportation of up to 3,000 Mcf of natural gas per day to fulfill a contract of sale it has with H. K. Porter, Inc., a brick manufacturing company, for the delivery of up to 3,000 Mcf per day of gas on an interruptible basis, together with authorization to construct the facilities necessary to render this service, including 14.1 miles of looping on its existing Fulton lateral, plus 1.25 miles of line to connect the Porter plant to the lateral.

The City of Fulton, having gas distribution responsibility within its corporate limits, makes what amounts to a competitive application to render the service Porter needs.

Although the filings and proceedings are not straightforward, Fulton's position is that Panhandle's application be denied, and that instead Panhandle be ordered to deliver to Fulton and increased volume of gas to permit Fulton to render service to Porter.

To conform its position with the proviso of Section 7(a), Fulton suggests that the Commission order Panhandle, not directly to install increased capacity, but to "restore" the lateral serving Fulton to its "original" capacity, or, at its option, to loop the lateral.

In the event we do not order Panhandle directly or indirectly to provide the capacity to provide Fulton the volume necessary to serve Porter, Fulton is willing to build a new lateral over a right-of-way to be acquired.

The Examiner's Decision

By decision issued June 21, 1966, Presiding Examiner Harry C. Shriver recommended the grant of Panhandle's application. He found that the capacity of the existing lateral was inadequate to serve the existing customers and the Porter load. His conclusion with respect to the proviso of Section 7(a) precluded an order to Panhandle to expand the lateral facilities. Thus he did not order Panhandle to serve Fulton. He found Fulton's proposal to undertake construction of a separate lateral to lack economic feasibility.

Exceptions

Exceptions by Fulton and the Commission staff contend that the Examiner's recommendations contravene Commission precedent favoring the local distributor for service to industrial customers. Fulton and Staff further except to the Examiner's finding that Fulton's proposal to undertake the construction of the new lateral itself was not economically feasible.

Fulton contends additionally that the Examiner erred in failing to find that the existing lateral had an original capacity greater than that at which the line presently operates, and urges that the Commission has authority to require Panhandle to restore the line to such original capacity. Fulton also believes the Commission has power to order Panhandle to loop its existing lateral.

In support of its contention that it should be allowed to render the service, Fulton points out that gas would be delivered to Porter by Fulton at a price 5¢ per Mcf lower than the 40¢ per Mcf in the Panhandle-Porter contract.

Fulton requests oral argument before the Commission on its exceptions.

Panhandle, in its reply to exceptions, supports the Examiner's conclusion, including the finding that the Fulton proposal is not economically feasible. Panhandle agrees with the Examiner that the Commission lacks the authority to order the expansion of Panhandle's facilities. Panhandle also contends that it would not be economically feasible under its existing tariff rates for Panhandle to construct facilities to render service to Fulton to meet Porter's needs. It vigorously urges that Fulton is disentitled to consideration having filed no formal application embodying any of its proposals.

Decision of This Commission

This is a very unsatisfactory record. However, its deficiencies cannot be permitted to frustrate the Commission in arriving at a decision conformable to the law and Commission policy.

Our policy to favor service to industrial customers by local distributors is well established.[1] We think that policy can be applied here, although we confess that in applying it, we are opening the possibility of a further evidentiary hearing which might, on our further consideration, lead to a contrary result.

Briefly, we have determined to issue a certificate of public convenience and necessity to Panhandle to transport gas to *Fulton* sufficient to supply Porter, and to authorize Panhandle to provide the necessary capacity, as discussed hereafter.

Panhandle, we recognize, may refuse to accept such a certificate and authority. If it does, these proceedings will be remanded, also as hereafter provided.

In aid of our decision, effective immediately, Panhandle will be ordered to deliver gas to Fulton to supply Porter on an interruptible basis, up to the limit of Panhandle's present facilities. The basis and authority for this action are also discussed hereafter, particularly with reference to the effect on existing interruptible customers of Panhandle.

As can be seen, we have also determined that Fulton's proposals are entitled to be considered on their merits. This, we believe, is the necessary import of our order of January 28, 1966, wherein we granted Fulton leave to intervene. Fulton's proposals were the subject of a full hearing and oral argument before the Examiner.

Discussion

Having determined to certificate Panhandle for a project other than that requested by it, we turn first to the legal and evidentiary support for this order.

Section 7(a)

Section 7(a) of the Natural Gas Act provides that after notice and opportunity for a hearing the Commission may "direct a natural-gas company to extend or improve its transportation facilities to * * * sell natural gas to, any person or municipality engaged * * * in the local distribution of * * * natural gas to the public, and for such purpose to extend its transportation facilities to communities immediately adjacent to such facilities or to territories served by such natural-gas companies if the Commission finds that no undue burden will be placed upon such natural-gas companies thereby: *Provided*, That the Commission shall have no authority to compel the enlargement of transportation facilities for such purposes, or to compel such natural-gas companies to establish physical connection or sell natural gas when to do so would impair its ability to render adequate service to its customers."

---

[1] *Northern Natural Gas Company*, Opinion No. 453, 33 FPC 501 (1965); *Southern Natural Gas Company*, 25 FPC 925 (1961); *Panhandle Eastern Pipe Line Company*, 13 FPC 301 (1954).

Panhandle, as we have noted, argues that it cannot be compelled to sell additional gas from its existing lateral to Fulton because "to do so would impair its ability to render adequate service to its customers"[3] connected to that lateral, specifically on winter peak days.

Fulton's request that Panhandle be ordered to increase this capacity, either by restoring the line to its "original" capacity, or by looping, is based, under one of its theories, on the contention that the existing lateral at one time could accommodate more gas. Fulton contends that Section 7(c) does not inhibit us from ordering a "restoration" of original capacity.

On the "restoration" question, such evidence as there is on the capacity of the line itself, exclusive of valves and fittings, indicates that its safe pressure exceeds five hundred pounds per square inch; the actual design pressure is not shown. However, the valves and fittings originally installed have a design limitation of 500 psig, and at present its actual operating pressure would not be expected to exceed this.

It may be necessary in further proceedings to adduce more evidence on this point. We find it unnecessary at this time to consider whether we may require the valves and fittings to conform with the maximum pressure potential of the original pipe installation, or to determine whether or by how much such action would produce additional capacity.

One reason for our disinclination is that the question of whether we may order looping is likewise reserved for possible further proceedings. The record does not contain enough for us even to discuss this question—Panhandle's lateral line policy and the discriminatory implications of a failure to loop for Fulton's benefit in the circumstances are issues the Examiner may, if the remand provisions of this decision become operative, be required to consider.

Panhandle, we reiterate, now has the option—it may accept the proffered authority to serve Fulton. We would not expect, in such circumstances, that the method of achieving such capacity would present any particular problem.

If Panhandle declines the certificate, the further proceedings which will be required can yield a record on capacity, looping, lateral line policy, and related matters, to enable a resolution of all legal and policy questions.

The Interim Order

Section 7(a) is also applicable to the temporary action we have ordered, and it is necessary to examine whether the record and the law support that action.

Our order that Panhandle serve Fulton with gas for the Porter plant, in the face of conceded capacity limitations of the lateral, compels discussion of another unsatisfactory aspect of the record before us.

The existing lateral now serves, besides the City of Fulton and the Missouri Power and Light Company at Auxvasse, another industrial refractory, Harbison-Walker. Harbison-Walker was one of the customers that the lateral was constructed to serve. (Panhandle also sought to serve retail customers in the Fulton area through a subsidiary distributor, but authorization therefor was not obtained.) Harbison-Walker receives service under Panhandle's standard industrial interruptible sales contract.

---

[3] Section 7(a).

The problem presented to us by the proviso of Section 7(a), revolves around whether issuance of our proposed order to deliver interruptible gas to Fulton "would impair [Panhandle's] ability to render adequate service" to Harbison-Walker.

Precedent establishes that Harbison-Walker is entitled to no preference against interruption over Panhandle's I-2 customers, including those subsequently connected.[3] Precedent also establishes that the "impairment" referred to must be significant and substantial.[4]

Whether in the situation of a coincidence of peak load requirements of Porter, Harbison-Walker and the other customers of the lateral, interruptions would be suffered in winter seems not open to question—they would. But these interruptions would be infrequent, partial, and of short duration, if the available history is a guide to the future.

Whether such interruptions would constitute significant impairment, remembering that Harbison-Walker has no contract or tariff protection against interruptions, ideally can be determined only by an examination of the situation of Harbison-Walker, which company is not before us.

The amount of gas taken by the City of Fulton each day from January 1, 1958, through January 31, 1966, is of record (Exhibits 45-51). So is the historical level of takes by Harbison-Walker and the Missouri Power and Light for its Auxvasse deliveries. Based on 1965 usage, Staff's brief argues (page 15) that if Porter were to be served by Fulton, only six days of curtailment in the next year could be predicted for Porter, and only one day of curtailment would exceed 25%. Staff's extrapolation assumes full utilization of the existing capacity of the lateral (11,400 Mcf daily) with existing customers being accorded the full present service, and further assumes a coincidence of peak requirements of all customers served by the lateral, including Porter. This assumed coincidence of customer peaks on the lateral is of course somewhat unlikely. Interruptions would be proportionately reduced as coincidence of peak diminished. Under this order, of course, such deprivation as would be experienced would be shared equally by all of the interruptible customers.[5]

Adjustments to give consideration to the future growth of Fulton, and the other customers' requirements, to the use of the addition of 400 Mcf to Fulton's contract demand for its new electric peaking facility, and to Fulton's system losses which are 5% of the gas delivered to it, point in the direction of more interruptions. Nevertheless, upon such record as we have, we find that it has not been shown that a significant impairment of service to Harbison-Walker would result from this order.

A supply of gas for Porter on an interim basis is of overriding importance at this stage of the proceedings. Resolution of the other issues herein may take many months. Under these circumstances, issuance of this order should not be delayed.

Economic Feasibility

Our interim order not offending the proviso of Section 7(a), and Panhandle having the option to protect its rights as to the impact of the same proviso on a permanent certificate, we must now consider the economic feasibility of the various proposals.

---

[3] *Panhandle Eastern Pipe Line Company*, 13 FPC 301 (1954), aff'd 232 F. 2d 467 (CA3-1956), cert. den. 352 U.S. 891.

[4] *The Manufacturers Light and Heat Co.* v. *F.P.C.*, 204 F. 2d 404 (CA3-1953). *Granite City Steel Company* v. *F.P.C.*, 320 F. 2d 711 (CADC-1963).

[5] The nature of a brickyard's operations (such as that of Harbison-Walker and Porter) is such that damage does not occur as a result of temporary interruption of gas service, although loss of production may occur if standby fuel facilities are not available.

The policy of this Commission which protects the right of the local distributor to render sales to industrial customers within its area of service is conditional—it does not apply if economic considerations preclude it.

Panhandle's cost evidence purports to show that its General Service tariff rates, as applied to service to Fulton for Porter, would not yield a fair rate of return on the cost of expanding its facilities. Particularly, it offered cost evidence to show that looping the lateral would not be economically feasible, assuming its present contract demand rate of 35¢ per Mcf, or under the I-2 (interruptible) rate.

Panhandle, of course, put in a case to establish the economic feasibility of its proposal to serve Porter directly. Although we may not conclude from this that the 35¢ rate to Fulton would *not* be economically feasible, neither in ordinary circumstances would we use such evidence to show that it *would* be economically feasible.

Because we are faced with the necessity of making a finding of economic feasibility to support our proffered option to Panhandle to accept a certificate and authority to serve Fulton for Porter, we must do so in this case. In doing so, we emphasize that Panhandle's option simplifies the matter for us—and we point out that enough questions are raised in Panhandle's own case on matters such as reallocation of the cost of looping among all customers, adjustment of the purchased cost of gas to take into the account the cost of Panhandle's production on its own account, and the like, to support, from the standpoint of the question of economic feasibility, an acceptance by Panhandle of the certificate and authority we have proffered.

Panhandle service directly to Porter as proposed by Panhandle was found by the Examiner to be economically feasible. Economic feasibility of construction by Fulton was not persuasive on the Examiner. We do not disagree with either view, at this time.

Fulton, of course, is not a natural-gas company within the contemplation of the Natural Gas Act, and does not require authorization from this Commission to construct the proposed facilities. But Panhandle would have to be ordered or authorized by this Commission to interconnect and to make deliveries to Fulton using the new facilities. The policy of the Commission is to refuse issuance of such orders if construction of the facilities to render the proposed service would not be economically feasible.

Fulton's Gas Supply

Under its existing contract with Panhandle, Fulton might not have contractual rights sufficient to render the needed service to Porter, in addition to serving other Fulton customers. This would be particularly true in the summer months, when the contract demand is low.

Fulton undertook to show that it could make deliveries to Porter out of its contract demand requirements from Panhandle, but alternatively requested that a supply be made available, on an interruptible basis.

We order such additional supply. Panhandle's tariff (see *Panhandle Eastern Pipe Line Company*, 13 FPC 301, 323-5[6], obligates it to offer available supplies of interruptible gas to its industrial and retail customers on an equal basis. Panhandle can hardly be heard to deny the existence of an available supply of gas, since it seeks authority in these proceedings to supply the very amount.

---

[6] Affirmed *Panhandle Eastern Pipe Line Company* v. *F.P.C.*, 232 F. 2d 467 (CA3-1956).

Pursuant to the authority of Section 7 of the Act, we order Panhandle to transport and sell on an interruptible basis under its I-2 tariff, up to 2,500 Mcf daily until October 1, 1968, and up to 3,000 Mcf daily thereafter until further order of this Commission. This shall be in addition to Fulton's existing contract demand entitlements.

In the event the existing facilities cannot supply all the gas needed by its customers on any given day, the two interruptible customers, Porter and the one served directly by Panhandle, shall receive gas on a proportional basis.

Panhandle's Option

The Commission recognizes that Panhandle may feel aggrieved at being confronted with an option to accept a certificate for what amounts to competitive service, or to undergo a full remand and expose itself to the possibility that on a different and better record other and possibly more onerous conditions may attach. Despite the admittedly unsatisfactory record in this case, the Commission's policy favoring local distributors is sound. It may well be that pipelines, including Panhandle, will recognize the long-range benefits to the industry from such a policy and make special efforts to cooperate with local distributors in implementing it.

Oral Argument Denied

We believe the benefit to be conferred by oral argument is not proportionate to the detriment attendant upon delay in the issuance of this order. Accordingly, Fulton's motion for oral argument will be denied.

The Commission finds:

(1) The Panhandle Eastern Pipe Line Company is engaged in the transportation of natural gas in interstate commerce, and in the sale in interstate commerce of natural gas for resale, and is a "natural-gas company" subject to the Natural Gas Act.

(2) The City of Fulton, a customer of the Panhandle Eastern Pipe Line Company, is a municipality in the State of Missouri authorized to engage in the local distribution of natural gas to the public.

(3) The H. K. Porter Company, Inc., brick plant on the outskirts of the City of Fulton, Missouri, has estimated peak day requirements for the first three years of 2,073 Mcf, 2,127 Mcf, and 2,451 Mcf per day, respectively.

(4) Under the circumstances herein, the City of Fulton is unable to supply the peak day requirements of H. K. Porter Company, Inc., from its existing firm contract demand because such requirements are in excess of Fulton's total contract demand for several summer months of the year.

(5) The sale and delivery of up to 3,000 Mcf daily of interruptible natural gas by the Panhandle Eastern Pipe Line Company to the City of Fulton for resale to H. K. Porter Company, Inc., in accordance with the terms and conditions of this order, are and will be necessary and desirable in the public interest.

(6) The Panhandle Eastern Pipe Line Company's existing Fulton lateral possesses insufficient capacity as presently operated to meet the coincident peak day requirements of existing customers served by that lateral in addition to the requested allocation of 3,000 Mcf daily to the City of Fulton for resale to the H. K. Porter Company, Inc.

(7) The public convenience and necessity require the construction by Panhandle Eastern Pipe Line Company of the facilities involved in increasing the existing capacity of the Fulton lateral, all as more particularly set out in Panhandle Eastern Pipe Line Company's application and the exhibits in this proceeding, but not including the proposed 1.25 miles of 4-inch line to connect

the Fulton lateral with the plant of H. K. Porter Company, Inc., or any other facilities proposed in connection with the said 4-inch line.

(8) The ability of Panhandle Eastern Pipe Line Company to render service to its existing customers will not be impaired by sale and delivery by said company to the City of Fulton of up to 3,000 Mcf of natural gas daily on an interruptible basis in accordance with the terms and conditions of this order.

(9) The proposed sale by the City of Fulton to H. K. Porter Company, Inc., of up to 3,000 Mcf of natural gas daily to be supplied out of the City's present contract demand and from an additional amount up to 3,000 Mcf daily to be supplied the City on an interruptible basis is economically feasible.

(10) The construction of facilities and sale of gas by Panhandle Eastern Pipe Line Company to the City of Fulton, as herein authorized, is economically feasible.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to the Panhandle Eastern Pipe Line Company authorizing the construction of the facilities involved in looping the existing Fulton lateral for a distance of approximately 14.1 miles, all as more particularly set out in the application of Panhandle Eastern Pipe Line Company and the exhibits in this proceeding, but not including the proposed 1.25 miles of 4-inch line to connect the Fulton lateral with the plant of H. K. Porter Company, Inc., and not including any other facilities proposed in connection with the said 4-inch line for delivery of gas therefrom.

(B) Panhandle Eastern Pipe Line Company shall signify its acceptance of the certificate issued pursuant to paragraph (A) hereof within 30 days of the date of this order, or, if it fails to do so, said certificate shall no longer be valid.

(C) The facilities authorized by paragraph (A) hereof shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within one year from the date on which this order issues.

(D) Panhandle Eastern Pipe Line Company shall sell and deliver up to 2,500 Mcf of natural gas per day to the City of Fulton on an interruptible basis in addition to the present contract demand of the City of Fulton, until October 1, 1968, or until earlier Commission order to the contrary, and shall sell and deliver up to 3,000 Mcf of natural gas per day to the City of Fulton on an interruptible basis in addition to the present contract demand of the City of Fulton, from October 1, 1968, until whenever such sale and delivery shall be terminated or reduced by later order of this Commission, and a certificate of public convenience and necessity is hereby issued to Panhandle Eastern Pipe Line Company for the transportation and sale of such gas.

(E) In the event Panhandle Eastern Pipe Line Company shall not accept the certificate issued by paragraph (A) above, the proceeding shall be remanded for further hearing in accordance with this opinion and order before the Presiding Examiner or such other as the Chief Examiner of the Commission shall appoint to hear the same.

(F) Unless a different time is fixed by the Presiding Examiner or other hearing officer designated to conduct the hearing, a pre-hearing conference shall be held on February 14, 1967, at ten o'clock in the forenoon, at the offices of the Commission, 441 G Street, N.W., Washington, D.C.

(G) Unless a different time is fixed by the Presiding Examiner or other hearing officer designated to conduct the hearing, the hearing shall commence at 10 o'clock in the forenoon on March 14, 1967, at the offices of the Commission, 441 G Street, N.W., Washington, D.C.

(H) All proceedings after remand shall be conducted with all possible expedition consonant with due consideration and just disposition of the proceeding.

(I) Except to the extent herein granted, Panhandle Eastern Pipe Line Company's application for a certificate of public convenience and necessity is denied.

(J) The motion of the City of Fulton for oral argument is denied.

INITIAL DECISION

OF THE PRESIDING EXAMINER ON APPLICATION TO TRANSPORT AND SELL GAS AND TO BUILD A LATERAL NEAR FULTON, MISSOURI

(Issued June 21, 1966)

SHRIVER, *Presiding Examiner:* This is a proceeding on an application of a pipeline company to construct a lateral and to sell and transport natural gas to an industrial plant at Fulton, Missouri. The case arises out of an application filed by the Panhandle Eastern Pipe Line Company, with the Commission on August 13, 1965, seeking a certificate of convenience and necessity for the sale and transportation in interstate commerce of up to 3000 Mcf of natural gas per day on an interruptible basis to the H. K. Porter Company, Inc., at Fulton, pursuant to Sections 7(c) and (e) of the Natural Gas Act. The applicant also seeks authorization to construct some 15.3 miles of lateral and related facilities at an estimated cost of approximately $479,000 in connection with the proposed sale.

Following the filing of Panhandle's application the Commission on August 23, 1965 issued its Notice of Application providing that petitions to intervene be filed by September 20, 1965. (30 F.R. 11156). On October 13, 1965, Panhandle filed a supplement to its application in response to a request for additional information made by the Secretary of the Commission on September 22, 1965. On October 29, 1965, the City of Fulton filed a petition to intervene out of time. However, on January 28, 1966, the Commission issued an order, 35 FPC 164, granting Fulton leave to intervene and set February 28, 1966, as the date for hearing. Meanwhile, on February 18, 1966, the H. K. Porter Company, the customer to be served by Panhandle, by reason of its interest, also filed a petition to intervene which was granted on February 25, 1966. Hearings were held on February 28, and March 3, 4, 7, 8, 9, 11, 14, and 15, 1966. Oral arguments were made before the Examiner on April 15, 1966, in lieu of the filing of reply briefs.

Panhandle is a large pipeline company which purchases and produces natural gas in the Texas and Oklahoma panhandle region, and transports it to numerous resale and direct customers, cities, towns, and industrial plants located in Kansas, Missouri, Illinois, Indiana, Michigan, and Ohio. It possesses three large parallel pipelines extending from Liberal, Kansas, into Michigan. It is a natural gas company within the purview of the Act.

The H. K. Porter Company, Inc., (Porter) is located in Pittsburgh, Pennsylvania, and maintains numerous plants throughout the country, a refractories division, and several brick plants in the midwest. The plant now under construction at Fulton, Missouri, will manufacture fireclay refractories primarily from Missouri raw materials (clay). Porter's product lines include pouring pit refractories—sleeves, nozzles, runner brick, and ladle brick, intermediate duty fireclay brick, high heat duty fireclay brick, super duty fireclay brick, and 60 percent and 70 percent alumina brick. Initial production is planned at 40,000 bricks per day with a possible increase in production to 54,000 bricks per day. Porter plans to use some natural gas by July 1, 1966, and to commence operation by August 1, 1966. Its plant is designed so that natural gas will be the sole source of fuel. It plans no standby facilities except electrically heated devices to prevent the water pipes from freezing. The primary use to be made of the gas is to provide heat for the drying and burning of brick. The plant expects to employ from 110 to 130 persons.

On June 1, 1965, Porter entered into a contract with Panhandle extending from October 1, 1965, for a period of five years, pursuant to which Panhandle agreed to supply the entire gas requirements of Porter's plant at Fulton on an interruptible basis up to 3000 Mcf per day and at a price of 40 cents per Mcf. At the hearing, Porter appeared in support of Panhandle's application. Porter's witness testified that the company's peak day requirements for the first three years were estimated at 2,073,160 cf, 2,127,160 cf, and 2,451,160 cf, respectively, and that the annual requirements would be 412,084,800 cf, 426,880,800 cf, and 515,656,800 cf. (Ex. 26, Tr. 84, 85)

The City of Fulton—renowned for Churchill's Iron Curtain Speech delivered at Westminster College in 1946—is located in the north-central part of Missouri, some 22 miles south of Panhandle's main pipeline. It is the County Seat of Callaway County. The city had a population of 10,052 in 1950 and 11,131 in 1960. Its Mayor testified at the hearing that the city's population in 1965 was 12,500. Fulton is the site not only of Westminster College, but of William Woods College, the Missouri School for the Deaf, and the State Mental Hospital No. 1. The city has its own gas and electric systems. It supplies gas to all users within the city except for the Harbison-Walker Refractories, which is served directly by Panhandle. The service to Harbison-Walker was initiated by means of a 6-inch lateral constructed by Panhandle in 1931. Service was extended by Panhandle to the City of Fulton from the same lateral in 1936. Both of these customers of Panhandle as well as another, namely, Auxvasse, continue to be served from this lateral. Auxvasse is located near the existing lateral and between Panhandle's main pipeline and the City of Fulton.[1] Panhandle is Fulton's sole supplier of natural gas. In 1965, the City purchased 782,191 Mcf and its peak day actual take was 6615 Mcf. (Ex. 45, 61) The contract between Panhandle and Porter provides that Panhandle "shall have the right to curtail or interrupt all or any part of the deliveries of gas to the buyer" (Porter) "when such gas is needed to meet the requirements of Panhandle's other customers." (Exh. 4, par. 6(a))

In addition to the requested authorization to transport gas in interstate commerce in order to serve Porter, Panhandle proposes to loop its existing lateral with 14.1 miles of 8-inch pipe and to install 1.25 miles of 4-inch pipe to connect the present lateral with Porter's plant.[2] Panhandle says that the new facilities are necessary because the present lateral is old and has insufficient capacity to carry the increased load required by the sale to Porter. Panhandle also says that the looping would enable it to serve Porter but, in addition, would be beneficial to its existing customers. This is borne out by the evidence.

The selection by Porter of a site for its plant near Fulton was dictated by several considerations such as transportation, water, and electricity, and more particularly, the supply of raw material. Negotiations and conferences accordingly were held by representatives of Porter with the city officials of Fulton and officials of Panhandle, and it was initially contemplated by the parties that Porter would secure gas directly from Panhandle. (Tr. 336, 344) Porter entered into a contract with Panhandle to this end on June 1, 1965. (Exh. 4) In a letter to Panhandle dated July 7, 1965, Fulton's mayor urged that the requisite authorization for the sale be applied for as soon as possible. (Exh. 31, Tr. 334) Panhandle's abbreviated application was filed with the Commission shortly thereafter, on August 15, 1965. At the hearing, however, it was contended by Fulton that the city was under a misapprehension as to its rights until October 28, 1965. Its petition to intervene was filed on the following day.[3]

---

[1] Exh. 2, reproduced as Appendix I hereto.

[2] Exh. 3, reproduced as Appendix II hereto.

In its petition to intervene, the City of Fulton requests "an order of the Commission under Section 7(a) of the Natural Gas Act directing Panhandle to sell to the city up to 3000 Mcf of gas on an interruptible basis under Rate Schedule I–2 for resale by the city to the H. K. Porter Co. *through the existing physical connection of Panhandle's transportation facilities with the city's distribution system.*" At the same time, Fulton alleges that it "has no objection to the stated plans of Panhandle to make improvements to its existing Fulton lateral to serve the increased loads through the construction of 14.1 miles of 8-inch loop, provided that the Commission finds this to be necessary and in the public interest," and, further, that it "believes that it would be more in the public interest for the city to serve the H. K. Porter Co. * * * than for the company to be served by a direct industrial sale," *requiring new construction.* Fulton also alleges that, "Panhandle has not obtained a franchise or authorization from the city to serve the proposed customer *soon to be within the city's boundaries.*"

Fulton filed no application with its petition but requests, as already indicated, an order from the Commission allocating additional gas under Section 7(a) of the Act so as to enable it to serve Porter through its municipal distribution system. In replying on November 26, 1965, to Panhandle's objections to Fulton's petition to intervene, Fulton says that it incorporates by reference Panhandle's application except that it seeks to serve Porter directly rather than that Panhandle be permitted to do so.

Fulton claims at the outset that Panhandle's application should be denied for the reason that Panhandle failed "to acquire a franchise from the city permitting it to construct facilities within the city and to sell to the Porter Company", citing Sections 157.14(a) and 157.7 of the Commission's Regulations. Counsel for Fulton also argues that under the circumstances and under Missouri law, Panhandle must obtain a franchise (Section 71.520, Revised Statutes of Missouri), and indeed contended in oral argument that if the Commission certificated the sale as proposed in Panhandle's application that it would be within the authority of the City of Fulton to thwart it by failing to issue a permit. These arguments are without foundation and are rejected.

It is clear from the record that when Panhandle filed its application the Porter plant site was outside the boundaries of Fulton. This is admitted in Fulton's petition to intervene and is borne out by the facts. After Fulton's petition was filed on October 29, 1965, the city immediately took steps to extend its boundaries. On November 4, 1965, Fulton enacted Ordinance No. 291 looking to annexation of the site (Exh. 41). This ordinance provided, among other things, that an election be held[4], and upon the fulfillment of certain other conditions, that the annexation become effective as soon thereafter as permitted by law. The sole purpose of this ordinance appears to have been to bring the Porter plant within Fulton's service area. But, since the Porter plant was outside the city limits when Panhandle filed its application, there was no need for Panhandle to secure a franchise in order to comply with the Commission's regulations. Fulton argues that Panhandle has no authority to construct facilities within the city or to sell gas to Porter under Missouri law without a permit from the city (Fulton Br. 11, 74). The Missouri statutes relied on by Fulton (Rev. Stat. 71.520 and 71.530), however, have reference specifically to local companies, incorporated in Missouri. Panhandle does not propose to sell and deliver gas to the citizens of Fulton. Even if the Porter plant is within the city boundary as contended, the record discloses that the city has not acted either to grant or deny authority to Panhandle to install facilities and serve natural gas to inhabitants of Fulton, nor has it taken any action to foreclose the issuance of such a franchise. Panhandle's application cannot be denied on this account.

---

[3] Mayor Murphy testified, "We first learned of that (the filing by Panhandle) on October 28, 1965, while on a trip to Washington when Panhandle's application in Docket No. CP66–50 came to our attention." (Tr. 41) On cross-examination he said that he first learned of this when he visited the Commission's Public Reference Room with Counsel and with Fulton's city attorney on the same date (Tr. 328).

[4] An election was held for this purpose on April 5, 1966, after the testimony was taken in this proceeding (Fulton Br., p. 74).

Fulton's contention that the city has the power to interfere with interstate commerce by refusing to grant a franchise for a direct sale is not supported by Missouri law. This is evident from a decision of the Supreme Court of Missouri in, *Missouri ex rel. Panhandle Eastern Pipe Line Company* v. *Public Service Commission of Missouri*, 93 S.W. 2d 675 (1936), and reproduced in Exhibit 8 sponsored by Fulton. There the Court said "So far as this record discloses, the work of relator to effect delivery as aforesaid is an incident to its interstate business as distinguished from the work upon the gas after delivery to effect its proper distribution for consumption by local consumers at retail (or to industrial plants for industrial purposes). Until such time as the natural gas here involved enters the distribution system of the local utility the movement remains interstate." Panhandle is not a local utility but an interstate pipeline company.

It should be remembered in passing that the Harbison-Walker plant, another refractory, is presently served by Panhandle and is located within the City of Fulton. Section 7(h) of the Natural Gas Act grants the right of eminent domain to natural gas companies engaged in the transportation or sale of gas in interstate commerce. This power may be resorted to when satisfactory agreements cannot be reached for the necessary rights-of-way. There is no application or proposal by Panhandle to install facilities or to serve natural gas to the inhabitants of Fulton, hence no application for a franchise was filed by Panhandle. As to the specific tracts of land to be traversed and roads to be crossed for the construction to serve Porter, Panhandle has obtained the necessary rights-of-way and authority.[5] The issue in point of fact, therefore, is rendered moot. Should it be necessary, however, for Panhandle to secure a franchise before rendering service to Porter, application might be made therefor.

Fulton argues further that the issuance of a certificate of convenience and necessity to Panhandle is inhibited by the decision of the Supreme Court in *Panhandle Eastern Pipe Line Company* v. *Michigan Public Service Commission*, 341 U.S. 329 (1951). We don't think so. We think this case is inapposite here. There the issue was whether Panhandle was required to secure a certificate of convenience and necessity from the Michigan Public Service Commission in order to serve the Ford Motor Company which was located within the service area of the Consolidated Gas Company, the local distributor of gas in Detroit. The Lower Court enjoined the Michigan Commission holding that its order was a prohibition of interstate commerce and therefore invalid. On appeal to the Michigan Supreme Court, the State Commission was upheld. The

---

[5] Tr. 843; Court order County Court of Callaway, dated October 18, 1965 (Exh. 57).

Federal Power Commission was not involved. The United States Supreme Court affirmed the Michigan Supreme Court holding that there was neither prohibition nor discrimination in the regulation by the State. The action of the State Commission was complementary to the regulation authorized by Congress under the Natural Gas Act.

In the instant case it is anamalous indeed, on the one hand, that Fulton should ask the Commission to order Panhandle to construct its proposed loop facilities, failing which the Commission should order Panhandle to connect its facilities with a partial lateral which Fulton suggests that it will hereafter build[6] so as to enable Fulton to serve Porter, and, on the other hand, that Fulton should deny that the Commission has authority to grant to Panhandle a certificate of convenience and necessity if the City of Fulton refused to issue a franchise.

After the testimony was taken before the Examiner, Fulton's counsel on March 28, 1966, filed a copy of a declaratory judgment of the Circuit Court of the County of Callaway, Missouri, dated March 25, 1966, and on April 15, 1966, filed a copy of an Ordinance of the City of Fulton, No. 315, dated April 7, 1966, in order to establish that the Porter plant was now located within the city limits of Fulton. Official notice is taken of these documents. Notwithstanding, we hold that the Porter plant was outside the city limits of Fulton when Panhandle filed its application, and that even if it is now within the city as contended by Fulton, the Federal Power Commission is authorized to grant a certificate of convenience and necessity to Panhandle to construct the appropriate facilities as may be required to serve Porter.

As already indicated, Fulton asks that the Commission issue an order directing that Panhandle sell the city an additional allotment of gas on an interruptible basis for resale to Porter. The evidence discloses that the capacity of the existing lateral would be inadequate to supply Fulton including its normal three-year load growth, and the proposed load of the Porter plans.[7] Without the construction of a pipeline to Panhandle's mainline or an intercepting lateral, Fulton would be unable to fulfill one of the necessary requisites of an application for an increase in allotment of gas. Panhandle's application is for the construction of facilities, namely a lateral to take care of its proposed sale to Porter. No application is made by Panhandle for an increased sale to Fulton. The issue arises, accordingly, whether it is within the power of the Commission to require Panhandle to construct a lateral to provide any proposed increased service to Fulton.

Section 7(a) of the Act provides that,

> Whenever the Commission, after notice and opportunity for hearing, finds such action necessary or desirable in the public interest, it may by order direct a natural-gas company to extend or improve its transportation facilities * * * Provided, That the Commission shall have no authority to compel the enlargement of transportation facilities for such purpose, * * * when to do so would impair its ability to render adequate service to its customers.

In Panhandle Eastern Pipe Line Company v. *F.P.C.*, 204 F. 2d 675 (CA3–1953), the Court of Appeals reversed the Commission, and in reviewing an order of the Commission which implied that Panhandle had a duty to enlarge its pipeline facilities on its Liberty lateral from 21,000 Mcfd to 30,000 Mcfd, said at page 680:

> In the light of section 7(a) we are compelled to conclude that Congress meant to leave the question whether to employ additional capital in the

---

[6] Fulton Br., p. 82.

[7] Staff Br., pp. 14, 50; Fulton Br., pp. 38, 76–77.

enlargement of its pipeline facilities to the unfettered judgment of the stockholders and directors of each gas company involved.

There are to be sure limitations on the application of the case cited. But in the instant case, an enlargement of the existing lateral capacity is necessary in order to serve the Porter load. Accordingly, by reason of this and the other facts of record, there is no warrant for ordering Panhandle to construct new lateral facilities to serve Fulton a G–2 or an I–2 allocation of gas for resale to Porter.

Fulton is uncertain of the type of service desired but in effect says it wants whatever service the Commission will authorize so as to enable it to (1) purchase firm service from Panhandle under its G–2 rate schedule for resale to Porter on a firm basis, or (2) purchase interruptible service from Panhandle under its I–2 rate schedule for resale to Porter on an interruptible basis, or (3) sell interruptible gas to Porter from the city's existing and future G–2 contract demand allotment.

The present contract demand of the City of Fulton is as follows:[8]

	Mcf/d		*Mcf/d*
April	4500	October	4400
May	3400	November	7500
June	1700	December	7500
July	900	January	7500
August	900	February	7500
September	2000	March	7500

Fulton's requested contract demand for 1966–1967, exclusive of gas that might be needed for Porter is:[9]

	Mcf/d		*Mcf/d*
April	4970	October	4400
May	3400	November	7960
June	1700	December	7960
July	1630	January	7960
August	1630	February	7960
September	3000	March	7960

It is apparent from the foregoing that in four complete months of the year Fulton's existing contract demand does not meet the 2073 Mcf/d first year peak day requirements of Porter, assuming a zero load from the city's regular utility business and, further, that in three months of the year the city's 1966–1967 requested contract demand fails to meet the 2127 Mcf/d second year peak day requirements of Porter, assuming a zero load from the city's regular utility business. Although Fulton's Mayor was of the opinion that Porter could be served out of the city's presently available volumes, this is not possible. Using 1965 as a test year, based on the testimony of Panhandle's witness Albertson, Fulton would have been unable to deliver the maximum daily requirements to Porter on 172 days of the year. (Tr. 848). Based on the third-year requirements of Porter and the City of Fulton's 1965 takes and G–2 contract demand, Porter would have been interrupted 225 days annually (considering Porter's peak day use). (Tr. 849). Although the city has a slack in the actual use of its existing contract demand, it is clear that the city cannot serve Porter out of its existing or future contract demand.[10] It must be concluded, therefore, that without an allocation of additional service from Panhandle under Section 7(a) of the Act, Fulton would be unable to provide adequate service to Porter.

---

[8] See Exh. 11, Panhandle's contract with Fulton dated September 1, 1964, but entered into as of November 1, 1965.

[9] See Exh. 38.

In its petition to intervene, Fulton asked for I–2 service in order to serve Porter. At the hearing, however, a substantial part of Fulton's evidence was offered in support of G–2 service. Panhandle's application contained no request for authority to construct mainline facilities since a direct interruptible sale is made from mainline capacity allocated to other firm sales, which when not utilized to supply the firm customers, is used to supply interruptible customers. In extremely cold weather, Panhandle must devote all or most of its mainline capacity to firm customers and its interruptible customers are then curtailed.

When Fulton presented its evidence embracing a request for firm service allocation, it was confronted with the fact that Panhandle has no excessive mainline capacity, all its peak day capacity is sold. (Tr. 286, 290.) In the absence of favorable action under Panhandle's application in another proceeding, Docket No. CP66–244, there is no assurance that Panhandle will have an available capacity of gas for the City of Fulton for resale to Porter. Panhandle could hardly be compelled to construct additional mainline capacity in the instant docket, since none is proposed. Although Panhandle is a large pipeline company, it cannot lightly be assumed that unallocated firm peak day capacity exists on its mainline system for additional firm service. It is evident, therefore, that without a showing of additional capacity there is no justification for an allocation of G–2 service to the City of Fulton for resale to Porter.

Mr. Lloyd Mason testified for Porter that its brick business is not seasonal, that some gas—less than one percent—would be used for space heating, that a complete interruption of gas supply would not damage bricks in its manufacturing process, and that Panhandle's gas curtailment history under its I–2 schedule was acceptable to Porter.

Fulton argues that it is economically feasible for Panhandle to sell gas to the city for resale to Porter and claims under an incremental cost study involving the lateral that Panhandle earns $25,593 annually, and under the "roll in" system it earns $234,543 (Exh. 16). Panhandle, on the other hand, claims that the revenues claimed by Fulton relating to the growth in Fulton's utility industry are erroneously allocated to the new facilities and that this follows since a new lateral loop is not required to serve the incremental third-year growth of the city's utility business, excluding the Porter sale. Panhandle also claims that it is erroneous to include any incremental sales to Harbison-Walker, and thus that it would be economically infeasible to install transmission facilities to make the City of Fulton's G–2 sale for resale to Porter. Panhandle further claims that Fulton credits $33,797 of added revenues to the utility's regular business, and that to earn these revenues the city would be required to sell 87,700 Mcf of additional gas over a two-year period, excluding the Porter sale. Panhandle says that the total volumes of gas purchased from Panhandle by Fulton between the years 1960–1965 increased from 741,117 Mcf to 782,191 Mcf, or less than 7,000 Mcf annually. Among other things, Fulton shows a depreciation of $14,900 covering lateral construction cost but this figure contains no depreciation on mainline facilities (using 1968 revenues and operating expenses, Exh. 16). At best, Fulton fails to include a substantial part of Panhandle's cost of providing a G–2 sale to Fulton for resale assuming responsibility in Panhandle for mainline facilities as well as a lateral in order to make the sale.

---

[10] Exhibit 61 shows a 54 percent load factor based on 1965 operations of the city, and giving effect to the 90 percent ratchet as appropriate.

As to the volumes of gas, it is evident from the above that Fulton's anticipated increase of some 87,700 Mcf over a two-year period of approximately 43,000 Mcf annually is speculative and is without foundation.

Panhandle's witness Albertson testified that the use of gas per customer in the City of Fulton was not increasing. The actual use by Fulton's customers in 1962 through 1965 was as follows:[11]

	Mcf/customer
1962	168.9
1963	161.3
1964	164.2
1965	168.2
Average	165.7

In its rebuttal, Panhandle offered evidence denying Fulton's contention that it was economically feasible for Panhandle to sell firm gas to Fulton for resale to Porter. Panhandle represented in response to Fulton's Exhibit 16 that its return would be but 0.86 percent for the first year, 0.97 percent for the second year, and 1.66 percent for the third year. The Staff argues that Panhandle's figures are erroneous[12] because of Panhandle's representation of its cost of gas (that coming from various fields and from its own production), the cost of the facilities for a firm sale, and a 48 percent tax return assigned to the incremental operating income. These items need not be discussed in detail. It is sufficient to say after an examination of the evidence adduced by Panhandle and more particularly of Exhibit 56, that its contention of unfeasibility is not convincing. But it does not necessarily follow, however, that Fulton's request for a G–2 allocation of gas should be granted.

The City of Fulton claims that, based on the Porter firm sales and added city sales of 87,000 Mcf in 1968, it is feasible for Fulton to make the firm sale and earn enough revenue to support a bond issue necessary for the construction of 14 miles of pipeline by the city at a future date.[13] In the event that Panhandle built the 14-mile lateral loop there would be no problem of economic feasibility on the part of the city. Fulton claims that this would follow because of the 5.5 cents per Mcf spread between the cost of G–2 gas and the proposed Porter firm contract (Exh. 25). Unfortunately, however, the revenues claimed by Fulton are unreliable, particularly in respect to the Porter sale. Among other things, the proposed contract with Porter is for seven years, while a Panhandle firm service agreement runs for 20 years. In addition, any contract between Porter and the City of Fulton is yet to be negotiated. Fulton's proposed contract with Porter contains a demand charge of $2.00 per month per Mcf, a commodity charge of 27.2 cents, resulting in a 100 percent load factor cost of 33.76 cents per Mcf. The contract level is 2250 Mcf/d. The contract also provides for interruptible gas at 35 cents per Mcf when Porter goes over its 2250 Mcf contract demand. Should Porter curtail its use, relocate, or refuse to renew the proposed contract after seven years, Fulton would have a large contract demand which might take several years to absorb. Fulton's witness Dysart admitted that Fulton's cost of gas could run as high as 39 cents per Mcf. Although the city proposes a contract on a firm basis to Porter, Porter might well demand gas on an interruptible basis in order to avoid the obligation of large fixed charges. For the foregoing reasons, and by reason of the fact, among others, that the industrial sale to Porter would constitute a large fraction of the city's total business, Fulton's requested allocation of G-2 gas under Section 7(a) is not properly supported.

---

[11] Exh. 12.

[12] Staff Br., pp. 30–34.

[13] It is of interest in passing that Fulton would be unable to proceed with construction for some 15 months. At the hearing, Fulton did not present detailed evidence of the location of its proposed lateral or evidence of the acquisition of a right-of-way.

Admittedly, the existing lateral possesses insufficient capacity to provide the increased service to Porter whether service is rendered either by Panhandle or by Fulton. Porter desires service as contracted for, not some 15 or 20 months hence. Admittedly, Fulton has no contract demand available from which Porter can be served during the summer months. Fulton's present contract demand in July and August is 900 Mcfd.

Porter's third year peak day requirement is 2451 Mcfd. Harbison-Walker, located within the City and served directly by Panhandle, has a maximum peak day load of about 3000 Mcfd. But, aside from this, one of the questions posed is whether it is economically feasible for Fulton to construct a new line from the City to intersect the existing lateral in order to serve Porter, having no clear long-time commitment. Fulton's cost of construction and debt service estimates are dependent essentially on the Porter load, otherwise the amortization of the line must be paid for by the citizens of Fulton. There is no assurance that Fulton would be able to substantially improve its load factor by securing interruptible service for resale to Porter. Accordingly, we cannot say that Fulton's request is economically feasible and it is therefore denied.

As adverted to heretofore, Panhandle proposes to loop its existing lateral for some 14.1 miles south of its mainline, and to lay 1.25 miles of 4-inch line from its existing lateral to the Porter plans. Fulton says that, in the event it receives an allocation of gas from Panhandle and Panhandle declines to construct its proposed loop, then Fulton will construct its own 8-inch pipeline north from the city to intersect Panhandle's existing lateral.[14] Fulton claims that it can build its facilities more cheaply than Panhandle, and could avoid duplication. But neither of these contentions are established. There is in this case no parallel or duplicate facilities as is sometimes found in a contest between a pipeline and a distributor. While Fulton's estimate was lower than Panhandle's some necessary costs had not been included. Panhandle's looping may be made on its present right-of-way. Fulton, on the other hand, must secure its own. Also, in Fulton's estimate, the cost of relocating and improving the measuring and regulating station is not included. It would be necessary to relocate this at the loop interception on the existing lateral.

The instant case is not one in which the right of a pipeline to serve an industrial customer in the service area of a distributor is fittingly equated with the right of a distributor. In such a case on balance of interest the Commission's policy properly requires that a wholesale supplier should not compete directly with its distributor customers. This view was expressed in the recent case of *Northern Natural Gas Company*, 33 FPC 501, 503 (1965). In that case the Commission referred to *Southern Natural Gas Company*, 25 FPC 925, 927 (1961), saying there, "We expressed the policy that in general, the wholesale supplier should not compete directly with its distributor customers", and concluded that each such case should be resolved on its individual merits. Here the evidence discloses that the proposals of the parties are unlike. Manifestly, if Panhandle constructed the lateral and Fulton obtained I-2 service from Panhandle and in turn resold to Porter on an interruptible basis and on a long term contract, there would be but little risk on the part of Fulton, and Fulton would inevitably benefit. The arguments advanced by Fulton in justification of its claimed right to serve the Porter plant are based on alternatives which are not supported by sufficient evidence and are based on the premise that the Commission should determine which of the alternatives[15] are in the best public interest for Fulton. However laudable the primary objective may be to the citizens of Fulton, the Commission should not be placed in the position of deciding what is in the best interest of the city without a concrete proposal by Fulton. A decision can only be made on the basis of the existing record, and record does not support Fulton's request.

---

[14] Fulton's Exhs. 18, 19, 20, reproduced as Appendices III, IV and V.

As indicated, Panhandle proposes no change in mainline capacities in the instant case. The 1965 maximum day or contract demand of Panhandle's customers from its existing lateral are: Harbison-Walker 3000 Mcfd, City of Fulton 7500 Mcfd, and Missouri Light and Power at Auxvasse 434 Mcfd, making a total of approximately 11,000 Mcfd. Harbison-Walker's direct sale contract, with Panhandle calls for 8500 Mcfd for two plants, one at Fulton, the other at Vandalia.

Panhandle's 6-inch, 21.4-mile lateral from its mainline 100 was laid in 1931 and, by reason of the fittings and valve design limits, has a maximum allowance of 500 psig. To upgrade this line would be unduly costly with a disproportionate yield in capacity. The flow in Panhandle's lateral reflecting maximum capacity with proposed added facilities will be 16,534 Mcfd. As related to some 14,000 Mcfd sales, about 2000 Mcfd of capacity will remain in the looped lateral. The proposed construction accordingly is needed in order to serve Porter's requirements and to serve increased needs of Panhandle's other customers.

Panhandle plans to finance its construction from funds on hand. The revenues, based on third-year sales to Porter of 515,656 Mcf, were estimated at $206,000 and, after making deductions of $172,000, the net operating income was estimated at $33,653.[16] This sum on Panhandle's total estimated cost of $437,087, results in a 7.7 percent rate of return, using 3½ percent annual depreciation on incremental facilities.[17] Based on this presentation, the project is economically feasible.

In the summer of 1965, Panhandle prepared its estimate of the cost of constructing the facilities to serve Porter. The estimate as shown in its application was $425,000. At the hearing, this sum was increased to $479,000. The reason for the increase was claimed to be justified by reason of increased costs in steel pipe, contingencies, interest, and more particularly labor. Although Fulton attacked the reasonableness of Panhandle's construction and operating costs, the estimate of construction cost of Fulton was open to more serious question than that of Panhandle. Although portions of Panhandle's estimate may be disputable, we conclude, based on the entire record, that Panhandle's estimate is not unreasonable.

---

[15] Fulton says, for example, that "If found necessary, Panhandle should construct its proposed 14.1 miles of loop to the Fulton lateral to sell gas to the city on a jurisdictional basis for resale to Porter"; that should "Panhandle refuse to construct new facilities found necessary to serve the city, the Commission should order Panhandle to do so" and "Should the Commission be unable to order Panhandle to construct new capacity found necessary, the Commission should order Panhandle to establish physical connection of its transportation facilities with the 14-mile lateral proposed by the city" (Fulton Br., pp. 78, 80, 82).

[16] Exh. 30

[17] The Staff claims that Panhandle's gas cost and federal income taxes are overstated so that its actual rate of return is higher. (Staff Br., 15, 30.) Panhandle's witness Albertson explained the change in cost of service by saying that, "In Exhibit 6, I was assuming for my purposes that this was the first year of operations, whereas the figures that were given by the Porter witness Monday used a third year volume of 515,657, and in order to make the two comparable I took the average plant down to the third year so that the two would be comparable." (Tr. 310.)

It cannot be gainsaid, based on the record, that Panhandle meets the requirements necessary for the issuance of a certificate of public convenience and necessity pursuant to Section 7 of the Act. Panhandle has shown that there is an available gas supply, an assured market, satisfactory engineering design for the facilities, adequate financing, economic feasibility, and that the public interest would be served by granting a certificate. Panhandle's application should be granted.

FINDINGS

Upon consideration of the record, the briefs, and arguments of counsel, it is found and concluded in addition to the findings and conclusions heretofore stated, that:

(1) The Panhandle Eastern Pipe Line Company is engaged in the transportation of natural gas in interstate commerce, and in the sale in interstate commerce of natural gas for resale, and is a "natural-gas company" subject to the Natural Gas Act.

(2) The City of Fulton, a customer of the Panhandle Eastern Pipe Line Company, is a municipality in the State of Missouri authorized to engage in the local distribution of natural gas to the public. Its present contract demand is as follows: 7500 Mcf per day for the months of January, February, and March, 4500 for April, 3400 for May, 1700 for June, 900 for July and August, 2000 for September, and 4400 for October, November, and December, respectively.

(3) The H. K. Porter Company, Inc., brick plant now under construction on the outskirts of the City of Fulton, Missouri, has estimated peak day requirements for the first 3 years of 2073 Mcf, 2127 Mcf, and 2451 Mcf per day, respectively.

(4) Under the circumstances herein, the City of Fulton is unable to supply the peak day requirements of the H. K. Porter Company, Inc., from its existing firm contract demand because such requirements are in excess of Fulton's total contract demand for several summer months of the year.

(5) Under the circumstances herein, the City of Fulton cannot be granted a G–2 firm allocation of gas for resale to the H. K. Porter Company, Inc., because its case falls short of establishing a firm market for this type of service and the desired economic feasibility therefor.

(6) Under the circumstances herein, the City of Fulton cannot be granted an I–2 allocation of gas for resale to the H. K. Porter Company, Inc., because its case falls short of establishing the desired economic feasibility therefor.

(7) The Panhandle Eastern Pipe Line Company cannot supply the City of Fulton a G–2 allocation of gas because it possesses no excess mainline capacity.

(8) Under the circumstances herein, the Panhandle Eastern Pipe Line Company cannot be compelled to loop or enlarge its existing lateral in order to serve a Section 7(a) allocation of gas to the City of Fulton for resale to Porter either on a firm or an interruptible basis.

(9) The Panhandle Eastern Pipe Line Company's existing lateral serving the Harbison-Walker Company in Fulton and the City of Fulton possesses insufficient peak day capacity to meet Panhandle's customer's existing requirements including the requested G-2 allocation of the City of Fulton for resale to the H. K. Porter Company, Inc.

(10) The sale and delivery of up to 3000 Mcf daily of interruptible natural gas by the Panhandle Eastern Pipe Line Company to the H. K. Porter Company, Inc., and the construction of the facilities therefor as proposed are and will be required by the present and future public convenience and necessity.

ORDER

WHEREFORE, *It is hereby ordered*, subject to review by the Commission:

(A) A certificate of convenience and necessity be and the same is hereby issued to the Panhandle Eastern Pipe Line Company authorizing the transportation and sale of natural gas, on an interruptible basis, to the H. K. Porter Company, Inc., and authorizing the construction of the required facilities to effect such transportation and sale, all as more fully described in the application and exhibits in this proceeding upon the terms and conditions of this order.

(B) The certificate issued in paragraph (A) above, and the rights granted herein are conditioned upon the applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(2), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation and the delivery of natural gas authorized by paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within one year from the date on which this order issues.

HARRY C. SHRIVER,
Presiding Examiner.

OHIO POWER COMPANY, PROJECT NO. 2570

ORDER ISSUING PRELIMINARY PERMIT

(Issued December 27, 1966)

Application was filed on February 2, 1966 by Ohio Power Company (Applicant) of Canton, Ohio, for a preliminary permit under Section 4(f) of the Federal Power Act (Act) for proposed Project No. 2570, to be known as the Racine Project, to be located on the Ohio River in Meigs County, Ohio. The proposed hydroelectric project would be constructed on the Ohio side of the U.S. Corps of Engineers' proposed Racine Dam and would utilize surplus water from the Government dam and affect lands of the United States under the jurisdiction of the U.S. Corps of Engineers.

The Department of the Army and the Chief of Engineers have recommended that any preliminary permit for the project should provide that Applicant coordinate its studies of design, construction and operation with those of the District Engineer, U.S. Army Engineer District, Huntington, West Virginia, in the interest of avoiding adverse effects on the operation of the Corps' Racine Dam for navigation, water quality, and recreation.

The Department of the Interior, through its Federal Water Pollution Control Administration, expressed its views and those of the Ohio River Valley Water Sanitation Commission concerning problems involving the possible reduction of oxygen content by the construction of hydroelectric plants and the need to undertake studies to determine what effect, if any, such a proposed operation would have upon the dissolved oxygen content of the water and, if adverse effect is indicated, what the best method of reaeration would be—as hereinafter provided for by Article II. The Department of the Interior has, in a further report, recommended for inclusion in any preliminary permit for the project, conditions in the interests of fish and wildlife and recreation as set forth in attached Form P-1, and two special conditions in such interests, set forth in Articles 12 and 13.

Applicant requests a preliminary permit for a period of 24 months. However, in order that Applicant may coordinate possible future construction of proposed Project No. 2570 with the U.S. Corps of Engineers' plans for construction of the Racine Dam proposed to be initiated in 1967 with completion in 1970, this permit is for a period of 12 months.

No construction is authorized by the issuance of this preliminary permit. This permit gives the permittee, during the period of the permit, the right of priority of application for license over other non-Federal entities, while the permittee undertakes the necessary studies and examinations required by Section 9 of the Act in order to determine the economic feasibility of the proposed project, the means of securing the necessary financial arrangements for construction, the market for power, and all other information necessary for inclusion in an application for license, should one be applied for under the permit. A license would authorize construction of a project.

The issuance of a preliminary permit for Project No. 2570, as hereinafter provided, shall not in any way be construed as precluding the exercise of Commission action contemplated under the provisions of Section 7(b) of the Act.

The Commission further finds:

(1) Applicant is a corporation organized under the laws of the State of Ohio.

(2) Public notice of the filing of the application has been given as required by the Act. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(3) The proposed project will affect a Government dam.

The Commission orders:

(A) This preliminary permit is hereby issued to Ohio Power Company (Permittee) for a period of 12 months, effective as of December 1, 1966, for the sole purpose of maintaining priority of application for license for proposed Project No. 2570, to be located on the Ohio side of the U.S. Corps of Engineers' proposed Racine Lock and Dam on the Ohio River in Meigs County, Ohio, and affecting lands of the United States, subject to the terms and conditions of Sections 4(f) and 5 of the Federal Power Act (Act) which are incorporated by reference as a part of this permit, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) According to the application for permit, the proposed project would consist of the installation at the Government dam of low-head hydroelectric generating units, the number, size and preferable type of which will be determined by Applicant's studies and investigations under this permit.

(C) This preliminary permit is also subject to the terms and conditions set forth in Form P-1 entitled "Terms and Conditions of Preliminary Permit," (16 FPC 1303–1305) which terms and conditions, designated as Articles 1 through 8, are attached hereto and made a part hereof, and further subject to the following special conditions set forth herein as additional articles:

Article 9. The Permittee shall submit at the close of each three month period from the effective date of this permit to the Regional Engineer, Federal Power Commission, New York, New York, having supervision over the project, or to such other offices as the Commission may designate, accurate statements of the work accomplished during the period and of the work contemplated under this permit for the ensuing period.

Article 10. The Permittee shall, during the period of project planning consult with the District Engineer, U.S. Army Engineer District, Huntington, West Virginia concerning design, construction and operation of the project.

Article 11. The Permittee shall, during the period of project planning, consult with the Federal, State, multi-State, and local agencies having an interest in water quality as affected by rates of discharge, reaeration of water, and flowage conditions below the dam.

Article 12. The Permittee shall, during the period of project planning, consult with the Federal, State, and local agencies having an interest in outdoor recreation on project lands and waters, in the preparation of an "Exhibit R" which is required for the filing of an application for license pursuant to Section 4.41 of the Commission's Regulations under the Federal Power Act.

Article 13. The Permittee shall, during the period of project planning, consult with Federal, State, and local agencies having an interest in fish and wildlife in project lands and waters, in the preparation of an "Exhibit S" which is required for the filing of an application for license pursuant to Section 4.41 of the Commission's Regulations under the Federal Power Act.

Article 14. The Permittee shall, for the purpose of assuring the cooperation required by the terms of the permit, designate a liaison officer to act for the Permittee in keeping the several agencies specified in this permit currently informed, and such liaison officer shall communicate with such agencies within 60 days from the date of issuance of this permit.

(D) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this preliminary permit. In acknowledgement of the acceptance of this preliminary permit, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

THE BRITISH-AMERICAN OIL PRODUCING COMPANY, DOCKET NO. G-10615, ET AL.[1]

ORDER APPROVING RATE SETTLEMENT PROPOSAL, SEVERING AND TERMINATING PROCEEDINGS, AND PRESCRIBING REFUNDS

(Issued December 28, 1966)

There is before us for consideration a Motion for Approval of Settlement Proposal, Termination of Rate Proceedings and for Shortened Procedure Certification filed on June 30, 1966, as amended by letter filed on September 19, 1966, by The British-American Oil Producing Company (British-American) encompassing the rates for 27 of its currently effective FPC Gas Rate Schedules. Protests, objections and comments were filed by some of the parties to these proceedings, but were withdrawn subsequent to the amendatory letter filed by British-American on September 19, 1966. In summary, the settlement proposal, as amended, filed by British-American provides:

(1) Settlement rates, including tax reimbursement, equal to or less than the Commission's applicable area rate ceilings;

(2) British-American waives the right to file for contractually authorized increased rates to be effective prior to July 1, 1969, for all of the rate schedules involved in the settlement. However, British-American reserves the right to file for any increased rates, if contractually authorized, up to the applicable area rate levels established by any order or rule of the Commission, or to file for any contractually authorized increase in tax reimbursement;

(3) British-American will delete any favored-nation, price-redetermination and periodic-pricing provisions which may be in its FPC Gas Rate Schedule Nos. 7, 9, 11, 15, 30 and 32 in accordance with the Second and Seventh Amendments to the Commission's Statement of General Policy No. 61-1, 18 CFR 2.56;

(4) In accordance with its letter amendment, British-American will make refunds, with interest at the applicable rate until June 30, 1966[2] under each rate schedule where collection was made subject to refund of the difference between the revenues actually collected and those collectible at the settlement rate, in each instance, commencing with January 1, 1964, to the date of issuance of this order for all of British-American's rate schedules excepting two sales in the San Juan Basin in the State of New Mexico where the proceedings per-

---

[1] The additional dockets involved herein are set forth in Appendices A, B, C and D attached hereto.

[2] However, British-American has acquiesced in payment of interest through September 30, 1966, as hereinafter ordered.

tain to the New Mexico Emergency School Tax Reimbursement which were excluded from the settlement;

(5) Exclusion from the settlement proposal of all Permian Basin sales.

In support of its proposal, as amended, British-American states that the settlement rates, refunds, the moratorium period, and other provisions thereof not specifically noted herein, are in the public interest in that they are reasonable and will provide price stability for a long period of time for natural gas moving in interstate commerce.

With respect to refunds, the parties to the settlement conference utilized cost-of-service studies and revenues based on contract rates to determine British-American's revenue-cost relationship. These studies indicate that it is appropriate that we require that refunds should be computed for sales where monies were collected subject to refund on and after January 1, 1964, as hereafter ordered. Such refunds will approximate $625,000, plus applicable interest computed through September 30, 1966, which approximates 50% of the monies collected subject to refund above the settlement rates. For all the reasons stated in our order in *Humble Oil & Refining Company*, Docket No. G-9287, *et al.*, 32 FPC 49, we shall order British-American to retain the amounts of refund ordered herein until further action by the Commission directing their disposition.

British-American's presently effective rates will be reduced under the settlement proposal so as to effectuate an annual reduction of approximately $260,000 in its jurisdictional revenues. Thus, approval of British-American's proposal will result in disallowance of approximately 50% of the increased rates currently being collected in Section 4(e) proceedings.

The settlement proposal includes rates for which issuance of related permanent certificates is pending, some of which are for deliveries presently being made under temporary authority.[3] We propose to set such applications for abridged statutory hearing in accordance with Section 7 of the Natural Gas Act, indicating that the settlement rates, as provided for herein, shall be the initial price.

Our action herein should not be construed as constituting approval of future rate increases, if any, that may be filed under the subject rate schedules, and is without prejudice to any findings or orders of the Commission in pending or future proceedings, including area rate or similar proceedings, involving British-American's rates and rate schedules.

The Commission finds:

The proposed settlement of the subject proceedings on the basis described herein, as more fully set forth in the Settlement Proposal, as amended, filed by British-American on June 30, 1966, is in the public interest and it is appropriate in carrying out the provisions of the Natural Gas Act that it be approved and made effective as hereinafter ordered, and good cause exists for approving the settlement rates, for severing and terminating certain proceedings and providing for refunds.

The Commission orders:

(A) The settlement of these proceedings on the basis of the settlement proposal, filed by British-American on June 30, 1966, as amended by its filing of September 19, 1966, is approved.

---

[3] See Appendix B attached hereto.

(B) The applicable settlement rates set out in Appendix A hereto are approved, and such rates shall be effective as of the date of issuance of this order.

(C) The approved settlement rates shall be applicable during the moratorium period herein provided for all sales of natural gas from all acreage dedicated as of the date of issuance of this order under each of the rate schedules currently on file with the Commission whether such sales are made by British-American, its successors or assignees.

(D) British-American shall compute the difference between the rates collected subject to refund and the related settlement rates or rates not subject to refund, whichever rate is the greater, for the period from January 1, 1964, to the date of this order, together with interest as specified in each docket through September 30, 1966. British-American shall, within 45 days from the date of this order, submit a report to the Commission, and serve a copy on each of the purchasers involved, setting out by purchasers the amount of refunds related to each rate schedule (showing separately the principal and applicable interest), the bases used for such determination and the periods covered.

(E) British-American shall retain the amounts shown in the report required under paragraph (D) above, subject to further action of the Commission directing the disposition of those amounts.

(F) If British-American elects to commingle these retained refunds with its general assets and use them for its corporate purposes, it shall pay interest thereon at the rate of 6% per annum on all funds thus available from December 15, 1966, to the date on which they are paid over to the person ultimately determined to be entitled thereto by final action of the Commission.

(G) If British-American elects to deposit the retained refunds in a special escrow account, British-American shall tender for filing on or before December 15, 1966, an executed Escrow Agreement, conditioned as set out below accompanied by a certificate showing service of a copy thereof upon each of its jurisdictional customers. Unless notified to the contrary by the Secretary within 30 days from the date of filing thereof, the Escrow Agreement shall be deemed to be satisfactory and to have been accepted for filing. The Escrow Agreement shall be entered into between British-American and any bank or trust company used as a depository for funds of the United States Government and the Agreement shall be conditioned as follows:

(1) British-American, the bank or trust company, and the successors and assigns of each, shall be held and formally bound unto the Federal Power Commission for the use and benefit of those entitled thereto, with respect to all amounts and the interest thereon, deposited in a special escrow account, subject to such Agreement, and such bank or trust company shall be bound to pay over to such person or persons as may be identified and designated by final order of the Commission and in such manner as may be therein specified, all or any portion of such deposits and the interest thereon.

(2) The bank or trust company may invest such deposits in any short-term indebtedness of the United States or any agency thereof, or in any form of obligation guaranteed by the United States which is, respectively, payable within 120 days as the said bank or trust company in the exercise of its sound discretion may select.

(3) Such bank or trust company shall be liable only for such interest as the invested funds described in Paragraph (2) above will earn and no other interest may be collected from it.

(4) Such bank or trust company shall be entitled to such compensation as is fair, reasonable and customary for its services as such, which compensation shall be paid out of the escrow account to such bank or trust company. Said bank or trust company shall likewise be entitled to reimbursement for its reasonable expenses necessarily incurred in the administration of this escrow account, which reimbursement shall be made out of the escrow account.

(5) Such bank or trust company shall report to the Secretary quarterly, certifying the amount deposited in the trust account for the quarterly period.

(H) The pending certificate proceedings set out in Appendix B hereto shall not be determined on the basis of the approval of the settlement proposal, but shall be determined after hearing in accordance with Section 7 of the Natural Gas Act.

(I) Within 90 days from the date of this order, British-American shall make such filings under its rate schedules as are required to make effective the terms of the settlement proposal.

(J) Upon full compliance by British-American with all the terms and provisions of this order, the Section 4(e) proceedings listed in Appendix A hereto, and the Section 5(a) proceeding in Docket No. G-10615 shall terminate.

(K) Upon termination of the Section 4(e) proceedings listed in Appendix C hereto, in accordance with Paragraph (J) above, said proceedings shall be severed from the consolidated proceedings in Docket Nos. AR61-2, AR64-1, and AR64-2, respectively.

(L) This order is without prejudice to any findings or orders which have been or may be made hereafter by the Commission, and is without prejudice to claims or contentions which may be made by British-American, the Commission staff, or any affected party hereto, in any proceedings now pending, including area rate or similar proceedings, or hereafter instituted by or against British-American or any other companies, person or parties affected by this order.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

COLORADO INTERSTATE GAS COMPANY, DOCKET NO. CP65-377

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 28, 1966)

On October 10, 1966, Colorado Interstate Gas Company (Colorado) filed in Docket No. CP65-377 a motion to amend the Commission's order issued August 24, 1965, 34 FPC 564, in said docket, by authorizing Colorado to continue until September 1, 1967, the sale and delivery of natural gas, on an interruptible basis, to Michigan Wisconsin Pipe Line Company (Michigan Wisconsin), all as more fully set forth in the motion to amend in this proceeding.

The order of August 24, 1965, authorized Colorado to construct and operate certain facilities and to sell and deliver to Michigan Wisconsin, on an interruptible basis, natural gas from Colorado's Mocane-Laverne supply area, Beaver County, Oklahoma, for a one-year period commencing from the date of initial delivery. Colorado states that the one-year period ended September 2, 1966.

Colorado now requests the extension of the term of the sale until September 1, 1967. Colorado and Michigan Wisconsin have entered into an agreement, dated September 21, 1966, providing for the extended sale at a rate of 18 cents per Mcf. Colorado states that, as was the situation at the time of the August 24, 1965, authorization, Colorado still has available a gas supply temporarily in excess of its system requirements and that the proposed extended sale will assist in relieving this excess supply situation.

Due notice of the filing of the motion to amend and opportunity for hearing thereon has been given by publication in the Federal Register on October 21, 1966 (31 F.R. 13621). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued August 24, 1965, in Docket No. CP65-377 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued August 24, 1965, in Docket No. CP65-377 is amended by authorizing Colorado to continue until September 1, 1967, the sale and delivery of natural gas, on an interruptible basis, to Michigan Wisconsin, all as hereinbefore described and as set forth in the motion to amend in this proceeding.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP67-16

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 28, 1966)

On July 22, 1966, Michigan Wisconsin Pipe Line Company (Applicant) filed in Docket No. CP67-16 an application, as supplemented on August 24, 1966, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in order to enable Applicant to sell to North Central Public Service Company (North Central), an existing customer, a maximum of 32,000 Mcf of additional gas per day at a price of 33.5 cents per Mcf under Applicant's proposed new Rate Schedule LVS-1 for resale to Sinclair Petrochemical, Inc. (Sinclair), all as more fully set forth in the application.

Specifically, Applicant seeks authorization for the construction and operation of 7.3 miles of 10-inch loop pipeline on its Keokuk lateral in Iowa and a 10-inch gas service line extending 10.4 miles from a point on its Keokuk lateral in the vicinity of its existing West Point delivery point in an easterly direction to a point near Fort Madison, Iowa, where Sinclair proposes to construct a fertilizer plant. Applicant also seeks authority to construct and operate seven segments of 24-inch main line loop aggregating 46.8 miles to complete the mainline looping of its southwestern system between its Meade Compressor Station (formerly Station No. 1) and its Sandwich Compressor Station (formerly Station No. 10).

Of the proposed additional delivery of 32,000 Mcf of gas per day to North Central, 19,200 Mcf will be sold on a firm basis and 12,800 Mcf on an interruptible basis. North Central proposes to make deliveries to Sinclair at the maximum daily quantity commencing September 1, 1967.

The total cost of Applicant's proposed project is estimated at $5,371,800. The aggregate cost of the proposed 7.3 miles of the Keokuk lateral loop line and the 10.4 miles of Sinclair lateral line is estimated at $501,160, exclusive of contingencies, engineering costs and interest. Applicant proposes to finance the cost of said project through bank loans and funds generated internally.

Seven of Applicant's wholesale customers and the Public Service Commission of Wisconsin filed petitions to intervene, none requesting a formal hearing but requesting only the opportunity to participate in a formal hearing in the event such a hearing was scheduled. In addition, the Iowa State Commerce Commission and North Central filed petitions supporting the subject application. Wisconsin Public Service Corporation, a distributor, filed a letter stating that it has no objection to the subject proposal. No other protests, petitions to intervene or notices of intervention have been filed herein.

At a hearing held on December 21, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Michigan Wisconsin Pipe Line Company, a Delaware corporation having its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G-235 (3 FPC 830).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the transportation and sale of natural gas by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The certificate hereinafter issued should be conditioned upon Applicant's filing with the Commission an appropriate revised service agreement with North Central Public Service Co. and an appropriate rate schedule in accordance with the Commission's Regulations under the Natural Gas Act.

The Commission orders:

(A) A certificate of public convenience and necessity is issued to Michigan Wisconsin Pipe Line Company authorizing the construction and operation of the facilities and the transportation and sale of natural gas as hereinbefore described and as more fully set forth in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and the transportation and sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within one year from the date of this order.

(D) The certificate issued by paragraph (A) above is conditioned upon Applicant's filing with the Commission an appropriate service agreement with North Central Public Service Co. and an appropriate rate schedule in accordance with the Commission's Regulations under the Natural Gas Act.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

ANNUAL REPORTS OF CLASSES A, B, C AND D NATURAL GAS COMPANIES SUBJECT TO THE NATURAL GAS ACT—MISCELLANEOUS AMENDMENTS TO F.P.C. FORMS NO. 2 AND NO. 2-A, DOCKET NO. R-283

ORDER NO. 310-B

AMENDING ANNUAL REPORT F.P.C. FORM NO. 2

(Issued December 22, 1966)*

The amendments to Annual Report F.P.C. Form No. 2 here being considered are among those proposed in the notice initiating this proceeding[1] but action thereon was deferred in our Order No. 310, herein, which adopted several of the amendments also proposed in that notice.[2] More recently the proposal also included in the notice relating to the schedule "Service Interruptions", page 568, was considered, revised and promulgated by Order No. 327.[3]

Comments on these particular proposals were received from or on behalf of 16 companies, INGAA, 4 state commissions, and a federal regulatory agency.[4] We have given careful consideration to all the points raised, objections offered and suggestions made. As usual, they have been extremely helpful in our consideration. Since no one submittal referred to all of the 8 schedules now before us, we will take them up seriatim by Form No. 2 page number for convenience.

---

*Published in the Federal Register on December 28, 1966 (31 F.R. 16562).

[1] Notice of Proposed Rulemaking, issued Sept. 20, 1965, and published in the Federal Register on Sept. 28, 1965, 31 F.R. 12361.

[2] Order No. 310, issued Dec. 8, 1965, 34 FPC 1436, 30 F.R. 15465. Amendments to two remaining schedules proposed in the original notice herein (Gas Purchases, page 535, and Contingent Gas Purchase Payments (new)) and not considered in Order No. 310, will be considered separately and apart from the order now being issued.

[3] Issued Sept. 8, 1966, in Docket Nos. R-283 and R-291, 36 FPC 591, 31 F.R. 12015.

[4] Carnegie Natural Gas Company; Columbia Gas System Service Corporation on behalf of Atlantic Seaboard Corporation, Columbia Gulf Transmission Company, Cumberland and Allegheny Gas Company, Home Gas Company, Kentucky Gas Transmission Corporation, The Manufacturers Light and Heat Company, The Ohio Fuel Gas Company and United Fuel Gas Company; El Paso Natural Gas Company; Natural Gas Pipeline Company of America; Northern Natural Gas Company; Panhandle Eastern Pipe Line Company; Tennessee Gas Transmission Company; Texas Gas Transmission Corporation; Trunkline Gas Company; Independent Natural Gas Association of America (INGAA); Virginia State Corporation Commission; Iowa State Corporation Commission; Public Service Commission of the District of Columbia; Kansas State Corporation Commission; Federal Communications Commission.

Page 102 We are adopting this amendment which will require reporting the names and businesses of companies associated, through common control, with the respondent. The information is not generally available from other sources and though it may be gleaned from data reported in one or more of the other schedules in Form 2, the data is not sufficient to spell out the actual associations and corporate relationships existing in an affiliated group. The added reporting burden is insignificant and is outweighed by the desirability of having a "family tree" of corporate interrelationships in one place. In our opinion, disclosure of the information is fully justified in the public interest and as an aid to the Commission's regulatory responsibilities.

Page 302 Although the state commissions listed in note 4, *supra*, objected to the proposed deletion of this schedule for reporting "Income from Merchandising, Jobbing and Contract Work", we have now been informed either that the objection has been withdrawn or that the information can be obtained by the states from other sources. The schedule is, therefore, being deleted as proposed.

Page 517 Though there were no industry comments with respect to the amendment to this schedule "Sales of Natural Gas by Communities" the Commission, upon further consideration, now believes that the proposal should not be adopted. However, instruction paragraph 4., relating to pressure base, on page 517 has been deleted. (Where appropriate, necessary changes in the other schedules here under consideration have been made where reporting volumes of gas is involved.) The instruction has become obsolete in view of the establishment by the Bureau of the Budget of a standard pressure measurement base of 14.73 psia and a temperature base of 60° F. for the statement of volumes of natural gas, effective January 1, 1967.[5] A clarifying comment by the Federal Communications Commission was received. We appreciate their interest, but, since it was directed at instruction 1. on page 516 which is not involved in this proceeding, we defer it from future consideration.

Page 519 We are adopting editorial and clarifying changes suggested by El Paso and Natural Gas Pipeline to this schedule for reporting mainline industrial sales of natural gas.

Page 521 "Sales for Resale" and *Page 524* — "Revenue for Transportation of Gas of Others." The revisions to these schedules, as was stated in the notice, require only a summarization of information presently supplied and though some objection as to page 521 was expressed by Columbia Gas System, we do not think that the added reporting burden is significant since the information is readily available. Clarifying suggestions, which we have adopted in essence, were made by El Paso and Tennessee Gas. In response to a request in the interest of uniform reporting by Northern Natural that the industry be furnished with a current list of "interstate pipeline companies," we note that such a list is issued, periodically, and is available to all respondents required to file Form No. 2.

---

[5] On February 15, 1966, the Bureau of the Budget advised all federal agencies, through the issuance of an Exhibit H to its Circular No. A-46, that the standard base referred to in the text is to be used in connection with the collection and publication of information on natural gas to promote uniformity and comparability of data. On the basis of the Bureau of the Budget Circular the printing of the blank forms for the reporting year 1966 was initiated. Subsequently, on November 17, 1966, the Bureau issued a *Clarification of Circular A-46* (*Exhibit H — Standard Gas Pressure Base*) to the effect that Exhibit H "is applicable to information pertaining to *1967* and thereafter." In view of this "clarification" we are providing that gas volumes may be reported for 1966 as they have been in the past, notwithstanding that the blank forms provided require use of the standard (14.73—60°) pressure base.

Pages 567, 567A "Gas Account—Natural Gas." As revised, the two pages of this schedule now distinguish between industrial sales made in the field and those which are transmission line sales and, as well, provide for reporting information with annual volumes of each respondent's own production and that received from or delivered to LNG storage. The first change was made in response to a suggestion from Natural Gas Pipeline and the latter information on each company's own produced gas and the receipts and deliveries of LNG storage gas will give a more complete picture of the source and destination of the gas handled by each respondent—the basic purpose of the schedule.

Of the two new schedules proposed in the notice we are here prescribing the new schedule page for reporting "Unauthorized Overrun Penalties and Waiver of Penalties" in a form slightly modified from that which appeared in the notice. Suggested changes have been made as follows: the cut-off date has been changed to the calendar year instead of April 1; the word "unauthorized" is used to indicate that only such overruns are involved; and provision has been added to allow reporting by rate zones if deemed appropriate. In response to the opposition expressed by Trunkline, we reiterate the statment in the notice herein that the reporting requirement is in lieu of imposing a uniform unauthorized overrun penalty provision in all pipeline tariffs—as was proposed in Docket No. R-242—so that we can obtain information as to the actual experience and practice of the pipeline companies in administering their various penalty provisions. With this information we will be able to determine whether such a uniform provision in tariffs should be inserted to eliminate discriminatory practices.

The Commission finds:

(1) Adoption of these amendments to the Annual Report F.P.C. Form No. 2 is necessary and appropriate for the administration of the Natural Gas Act.

(2) Since the revisions here adopted which did not appear in the notice herein do not constitute substantive changes in the amendments there proposed, further notice and opportunity for comment thereon under section 4 of the Administrative Procedure Act prior to adoption is unnecessary.

The Commission, acting pursuant to the authority of the Natural Gas Act, particularly sections 10 and 16 thereof (52 Stat. 826, 830; 15 U.S.C. 717i, 717o), *orders:*

(A) Effective for the reporting year 1966 and thereafter, Annual Report, F.P.C. Form No. 2, prescribed by § 260.1, Subchapter G, Chapter I of Title 18 of the Code of Federal Regulations, is amended as follows:

1. The schedule "Control Over Respondent" (p. 102) is amended by adding to the instruction the following new sentence:

If other companies are controlled by the organization which holds control over the respondent, list the names of such companies and the kind of business each is engaged in.

2. The schedule "Income From Merchandising, Jobbing, and Contract Work" (p. 302) is deleted.

3. Instruction paragraph 4. on page 517 of the schedule "Sales of Natural Gas by Communities (Continued)" is deleted.

4. The following four schedules are revised and as so revised are adopted in the form set out in the schedule pages appended hereto*:

Main Line Industrial Sales of Natural Gas — page 519.

Sales for Resale—Natural Gas — page 521.

---

*Omitted in printing.

Revenue From Transportation of Gas of Others—Natural Gas—page 524.

Gas Account—Natural Gas — pages 567, 567A.

(B) The following new schedule is prescribed for the reporting year 1967 in the form set out in the schedule page 515 appended hereto*.

Unauthorized Overrun Penalties and Waivers of Penalties.

(C) Paragraph (c) of the said § 260.1 is revised (1) by deleting from the list of schedules there set out the line "Income From Merchandising, Jobbing, and Contract Work" and (2) by adding after the title "Gas Operating Revenues" a new line as follows:

Unauthorized Overrun Penalties and Waivers of Penalties.

(Secs. 10, 16, 52 Stat. 826, 830; 15 U.S.C. 717i, 717o.)

(D) For the reasons set out in footnote 5 above, all gas volumes may be reported for the year 1966 on whatever pressure base respondents have been using in reporting such information in Form No. 2 for prior years. In all cases the pressure base used shall be stated.

(E) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

*Omitted in printing.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

ANNUAL REPORTS OF NATURAL GAS COMPANIES—UNIFORM PRESSURE BASE—OTHER MISCELLANEOUS MODIFICATIONS, DOCKET NO. R-314

ORDER NO. 333

AMENDING ANNUAL REPORTS FPC FORMS NOS. 2 AND 2-A

(Issued December 22, 1966)*

In the course of the Commission's continuing review of the annual reports which are required to be filed by the members of the electric power and natural gas companies subject to its jurisdiction, including the FPC Forms Nos. 2 and 2-A required of all classes of natural gas companies pursuant to §§ 260.1 and 260.2 of its regulations, respectively, here under consideration, many opportunities for simplification and improvement became apparent, either from our own review or as a result of suggestions made by the persons required to file the forms. Except for the two matters discussed below, all the amendments to the two forms here being ordered are minor editorial revisions in the several schedules affected and described below in detail.

It has come to the attention of the Commission that some of the companies submitting Form No. 2 issue not only their annual reports to stockholders but, as well, other regular reports of financial, statistical and operational reviews for the information of stockholders, security analysts and other interested persons. Some of these publications have come into our hands and we have found them to be of considerable value in the exercise of our functions. Accordingly, we are here amending the instructions in Form No. 2 to require the filing not only of any published annual reports to stockholders but also of any such other reports or similar documents which a reporting company may regularly issue for the information of its stockholders and others. Since we are requiring only the submittal of material which the respondents have already prepared, albeit for other purposes, the added burden of submittal will be minimal.

---

*Published in the Federal Register on December 8, 1966 (31 F.R. 16561).

It will be noted that the General Instructions (page i) is being amended by adding a new instruction (paragraph 15) to require that all gas volumes reported in the form "are to be stated on a pressure base of 14.73 psia and a temperature base of 60° F., pursuant to Exhibit H of Circular No. A-46 of the Bureau of the Budget issued February 15, 1966." Conforming changes have been made, as well, in several of the schedules requiring information relative to volumes of gas. On the basis of the Bureau of the Budget Circular the printing of the blank forms for the reporting year 1966 was initiated. Subsequently, on November 17, 1966, the Bureau issued a *Clarification of Circular A-46 (Exhibit H — Standard Gas Pressure Base)* to the effect that Exhibit H "is applicable to information pertaining to *1967* and thereafter." In view of this "clarification" we are providing that gas volumes may be reported for 1966 as they have been in the past, notwithstanding that the blank forms provided require use of the standard (14.73—60°) pressure base.

The Commission finds:

(1) The revisions of the several schedule pages of the annual reports, FPC Forms Nos. 2 and 2-A, are necessary and appropriate to the administration of the Federal Power Act.

(2) Since it is apparent from the foregoing discussion, that the revisions here prescribed are of a minor or clarifying nature and impose no added burden on the respondents, it is unnecessary to comply with the requirements of section 4 of the Administrative Procedure Act with respect to prior notice and opportunity to comment.

The Commission, acting pursuant to the authority of the Natural Gas Act, particularly sections 10 and 16 thereof (52 Stat. 826, 830; 15 U.S.C. 717i, 717o), *orders:*

(A) Effective for the reporting year 1966 and thereafter, Annual Report, F.P.C. Form No. 2, prescribed by § 260.1, Subchapter G, Chapter I of Title 18 of the Code of Federal Regulations, is amended as follows:

1. The General Instructions (page i) are amended by revising paragraph 1.; adding a new paragraph 15.; revising and redesignating as paragraph 16. the existing paragraph 15., all as set out in *Attachment A* hereto*.

2. The schedule (page 228) "Investment Tax Credits Generated and Utilized" is revised to read as set out in *Attachment B* hereto*.

3. In the schedule (page 229) "Accumulated Deferred Investment Tax Credits", the words "Electric Utility:" on line 1 of column (a) are changed to "Gas Utility:".

4. The schedule (page 548) "Natural Gas Reserves" is revised to read as set out in *Attachment C* hereto*.

5. In the schedule (page 553) "Natural Gas Production Statistics (Continued)" instruction paragraph 7. is revised to read as follows:

> 7. In stating pressure base of measuring M.c.f. of gas, pressure base should be reported at 14.73 psia at 60° F.

6. In the schedule (page 554) "Products Extraction Operation—Natural Gas", clause (c) in the second sentence of instruction paragraph 2. is revised to read as follows:

> (c) Mcf (14.73 psia at 60° F.) of gas received,

---

*Omitted in printing.

7. In the schedule (page 560) "Underground Gas Storage" instruction paragraph 5. is revised to read as follows:

5. Pressure base of gas volumes reported below is 14.73 psia at 60° F.

8. In the schedule (page 563) "Manufactured Gas Production Statistics" instruction paragraph 6. is revised to read as follows:

6. Pressure base of gas reported in this schedule is 14.73 psia at 60° F.

9. In the schedule (page 564) "Liquefied Petroleum Gas Operations" instruction paragraph 7. is revised to read as follows:

7. Pressure base of gas reported in this schedule is 14.73 psia at 60° F., and Btu content * * *

(B) For the reasons set out above, all gas volumes may be reported for the year 1966 on whatever pressure base respondents have been using in reporting such information in Form No. 2 for prior years. In all cases the pressure base used shall be stated.

(C) The annual report FPC Form No. 2-A, prescribed for Classes C and D natural gas companies by § 260.2 of the said Title 18, is amended, effective for the reporting year 1966 and thereafter, as follows:

1. The schedule (page 11) "Investment Tax Credits Generated and Utilized" is revised to read as set out in *Attachment D* hereto*.

(D) The amendments here made to FPC Forms Nos. 2 and 2-A shall be effective December 31, 1966.

(E) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP66-180

ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 28, 1966)

On November 4, 1966, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Petitioner), filed in Docket No. CP66-180, a petition to amend the order issued in said docket on May 10, 1966, 35 FPC 715. By the instant filing, Petitioner requests that ordering paragraph (F) of the subject order be amended so as to reflect revised storage inventory requirements for the period extending from November 1, 1966, to March 31, 1967, all as more fully set forth in the petition.

By the order issued in the instant docket on May 10, 1966, Petitioner was authorized to construct and operate certain pipeline facilities and to render additional natural gas service to its existing customers.

In the instant proceeding, a stipulation was entered into by all parties present that a certificate should be issued to Petitioner subject to certain conditions contained in the stipulation. Petitioner's Exhibit T-15 entitled "Summary of Actual and Estimated Storage Activities by Months" was relied upon as a basis for certain of said conditions.

Utilizing the end of month top storage inventories contained in Petitioner's Exhibit T-15, the Commission's order in the subject docket sets forth certain conditions in Ordering Paragraphs (F), (G) and (H). Such conditions apply primarily to when Petitioner would be permitted to make certain sales of natural gas under the various rate schedules set forth in said paragraphs.

---

*Omitted in printing.

At the time Petitioner prepared and submitted Exhibit T-15 to the Commission, its application in Docket No. CP66-303 was pending before the Commission. The beneficial efforts on storage inventories to be realized from utilization of the facilities proposed in Docket No. CP66-303 were not reflected in Exhibit T-15.

The Commission by order issued May 24, 1966, in Docket No. CP66-303, authorized Petitioner to construct and operate 14.18 miles of 36-inch O.D. loop pipeline on the Delta-Portland portion of its mainline system between MLV 547 and MLV 548. Said pipeline completed a dual pipeline system extending from Petitioner's supply region in the Louisiana Delta area to its mainline Compressor Station 87 in northern Tennessee. As a result of this construction of facilities Petitioner's pipeline capacity has been increased by some 98,000 Mcf of natural gas per day south of Station 87 and by a daily average of 34,000 Mcf north of Station 87 during the five winter months. Had the beneficial effect on top storage inventories resulting from operation of the facilities proposed in the application filed in Docket No. CP66-303 been reflected in Exhibit T-15, the required monthly top storage inventories contained in said exhibit and in Ordering Paragraph (F) would have been lower.

In addition to the above, there have been slight revisions of the requirements of certain of Petitioner's existing customers over and above those shown in the subject order. These changes reflected in the orders issued by the Commission in Docket Nos. CP66-398, CP67-46 and CP67-64 have an additional effect on Petitioner's required top storage inventories.

In view of the facilities authorized by the Commission in its order issued in Docket No. CP66-303, the revised requirements of Petitioner's customers and the actual operations through the end of October 1966, Petitioner has submitted a revised statement of top storage inventories for the period in question. Accordingly, Petitioner requests that Ordering Paragraph (F) of the subject order be amended so as to reflect the following inventory requirements for the end of each of the months indicated:

	MMcf
October 1966	14,516
November 1966	12,833
December 1966	8,388
January 1967	4,233
February 1967	96
March 1967	0

The Commission finds:

It is neessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued in the instant docket on May 10, 1966, be amended as hereinafter ordered.

The Commission orders:

(A) Ordering Paragraph (F) of the Commission's order issued on May 10, 1966, in Docket No. CP66-180 is amended as follows:

> (F) Without specific permission from the Commission, Tennessee shall make no sales under Rate Schedules R, SR, TWS, ERS, or excess withdrawal provisions of Rate Schedules SS-5 and SS-E prior to November 1, 1966: *Provided, however,* That sales under such rate schedules may be made of

such amount of gas which Tennessee is reasonably convinced cannot be moved beyond its Compressor Station No. 200.

During the period November 1, 1966, through March 31, 1967, Tennessee shall be permitted to make sales under such rate schedules of 1,300 MMcf each month plus or minus the amount of excess or deficiency, as the case may be, in top storage inventory based on the top storage inventory for the month ending prior to such sales as shown below:

		MMcf
October	1966	14,516
November	1966	12,833
December	1966	8,388
January	1967	4,233
February	1967	96
March	1967	0

Any sales of gas under such rate schedules as contemplated above shall be made so as to be consistent with the maintenance of the specified top storage inventory for the end of the then current month.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TRUNKLINE GAS COMPANY, DOCKET NO. CP67-119

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 28, 1966)

On October 31, 1966, Trunkline Gas Company (Applicant) filed in Docket No. CP67-119 an application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and operation of miscellaneous field facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new and existing supplies of natural gas in various producing areas generally coextensive with said system.

The total cost of the facilities covered by this application will not exceed a maximum of $2,500,000, with no single project to exceed a cost of $500,000, which costs are proposed to be financed from funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 21, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Trunkline Gas Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 29, 1949, in Docket No. G-882 (8 FPC 250).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $2,500,000, with no single project to exceed a cost of $500,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Trunkline Gas Company, to construct during the calendar year 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $2,500,000, with no single project to exceed a cost of $500,000.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CENTRAL ILLINOIS PUBLIC SERVICE COMPANY AND MIDWESTERN GAS TRANSMISSION COMPANY, DOCKET NO. CP67-22; COMMUNITY NATURAL GAS COMPANY, INC. AND MIDWESTERN GAS TRANSMISSION COMPANY, CP67-44; TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., CP67-112

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS, AND AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 29, 1966)

On July 29, 1966, the Central Illinois Public Service Company (Central Illinois), filed in Docket No. CP67-22 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing the Midwestern Gas Transmission Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Central Illinois and to sell and deliver to it volumes of natural gas for resale and distribution in the unincorporated area of Armstrong, Vermilion County, Illinois, all as more fully set forth in the application in Docket No. CP67-22.

On August 24, 1966, Community Natural Gas Company, Inc. (Community Natural) filed in Docket No. CP67-44 an application and a supplement thereto on August 31, 1966, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing the Midwestern Gas Transmission Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Community Natural and to sell and deliver to it volumes of natural gas for resale and distribution by it in the community of Holland, Indiana, all as more fully set forth in the application in Docket No. CP67-44.

On October 27, 1966, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), filed in Docket No. CP67-112 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale of natural gas to Midwestern Gas Transmission Company (Midwestern), all as more fully set forth in the application in Docket No. CP67-112.

Central Illinois specifically proposes that Respondent construct, own, and operate a line tap and metering station at or on its transmission line at a point approximately two and one quarter miles east of Armstrong, Illinois.

Estimated annual and peak day volumes required by Central Illinois for Armstrong are as follows:

	First year	Second year	Third year
Annual (Mcf)	11,506	18,180	22,777
Peak day (Mcf)	101	152	173

Central Illinois estimates that the total estimated cost of Respondent's construction is $15,000. Applicant also estimates its own cost of construction to be $59,630, which cost will be financed from funds on hand.

Community Natural proposes to construct and operate approximately 3 miles of 2-inch lateral line extending from a point of interconnection with the Respondent's transmission system in Pike County, Indiana, to the town border of Holland, and to construct additions and improvements to the existing Holland gas system, which system is being purchased by Community Natural from the Serv All Developing Company, Inc., of Holland, Indiana. Community Natural requests that the Commission order Respondent to make physical connection of its transmission system with Applicant's lateral line and to sell and deliver to it the volumes of natural gas required for resale in Holland, Indiana, and environs.

The application states that the third-year annual and peak day requirements of Community Natural are 64,000 Mcf and 560 Mcf respectively, which includes 150 Mcf per day of firm gas for a direct industrial customer, Holland Custard Company. The latter is to commence receiving service in 1969, but has not executed a contract for such service with Community Natural. This order is conditioned so as to require the execution of the said contract, or in the absence thereof for a reduction in requirements.

The total estimated cost of the proposed construction by Community Natural is $90,000, which cost will be financed through the sale of common stock in the amount of $45,000 and a bank loan of $45,000 for interim financing, which will be permanently financed at a later date.

Tennessee requests authorization to increase its contractual commitment to Midwestern from 409,963 Mcf per day to 410,696 Mcf per day in order to allow Midwestern to meet increases in demand on its system which may result from the Commission's directing Midwestern to serve the two Section 7(a) Applicants in the proceeding in Docket Nos. CP67-22 and CP67-44.

The additional service is to be rendered from the unallocated capacity which is available on that portion of Applicant's facilities south of its Compressor Station No. 87. No additional pipeline facilities are proposed.

Respondent was duly notified by letters of the Commission dated August 19, 1966 and September 9, 1966, of the filing of the applications in Docket Nos. CP67-22 and CP67-44, respectively, for orders directing it to provide the requested connections and services. The Respondent filed answers to the applications in the respective dockets stating it had no objection to the rendering of the requested connections and services, upon the condition that Tennessee be authorized to furnish the necessary additional supply of natural gas to Respondent for the services requested by Central Illinois and Community Natural.

Due notice of the filing of the subject applications and opportunity for hearing thereon have been given by publication in the Federal Register on August 17, 1966 (31 F.R. 19032) in Docket No. CP67-22, and on September 8, 1966 (31 F.R. 11774) in Docket No. CP67-44. No protest, petition to intervene or notice of intervention in opposition to the granting of the respective applications has been filed in these proceedings.

At a hearing held on December 28, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Respondent, Midwestern Gas Transmission Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as here-

tofore found by the Commission in its order of May 12, 1959, in Docket No. G–16841 (21 FPC 653, 663).

(2) Central Illinois Public Service Company, an Illinois corporation having its principal place of business in Quincy, Illinois, is a corporation legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Central Illinois and to sell and deliver to it under a service agreement to be executed by it with Respondent in accordance with the Commission's Regulations, up to 173 Mcf per day of natural gas for distribution and resale as hereinbefore described.

(4) The requirement that Respondent serve Central Illinois, as hereinafter ordered, will not impair Respondent's ability to render adequate service to its existing customers.

(5) Central Illinois should be prepared to receive natural gas from Respondent for distribution in Armstrong in Vermilion County, Illinois, and environs within one year from the date of the issuance of this order.

(6) Community Natural Gas Company, Inc. is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(7) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Community Natural, and to sell and deliver to it under a service agreement to be executed by it with Respondent in accordance with the Commission's Regulations, up to 560 Mcf per day of natural gas for distribution and resale as hereinbefore described and as more fully described in the application in this proceeding.

(8) The requirement that Respondent service Community Natural as hereinafter ordered, will not impair Respondent's ability to render adequate service to its existing customers.

(9) Community Natural should be prepared to receive natural gas from Respondent for distribution in Holland, Indiana, and environs, within one year from the date of issuance of this order.

(10) Applicant, Tennessee Gas Pipeline Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 12, 1947, in Docket No. G–910 (6 FPC 777).

(11) The proposed sale and delivery of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application and exhibits in Docket No. CP67–112 are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(12) The aforesaid proposed sale and delivery of natural gas is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(13) Tennessee is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(14) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that Tennessee shall make an appropriate tariff filing to reflect the service authorized herein in accordance with the applicable Commission Regulations.

(15) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(3) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) Respondent is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Central Illinois Public Service Company as herein described, and to sell and deliver up to 173 Mcf of natural gas daily to Applicant under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations, for transportation, distribution and resale in Armstrong, in Vermilion County, Illinois and environs, as hereinbefore described. Such service shall be rendered pursuant to Respondent's present filed appropriate rate schedule.

(B) Respondent shall report to the Commission, in writing the date of commencement of service to Applicant within 15 days after such service begins.

(C) Central Illinois shall be prepared to receive service as directed herein within one year from the date of issuance of this order.

(D) Respondent is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Community Natural, as herein described, and to sell and deliver to it up to 560 Mcf of natural gas daily, under a service agreement with Community Natural to be executed in accordance with the Commission's Regulations, for distribution and resale in Holland, Indiana, and environs as hereinbefore described. The peak day delivery of 560 Mcf shall be reduced to 410 Mcf unless Community Natural obtains and files with the Commission within six months of the date of this order a contract with Holland Custard Company for firm service to commence not later than January 1, 1969.

(E) Respondent shall report to the Commission in writing the date of commencement of service to Applicant within 15 days after such service begins.

(F) Community Natural shall be prepared to receive service as directed herein within one year from the date of issuance of this order.

(G) A certificate of public convenience and necessity is issued to Tennessee in this proceeding, authorizing the sale and delivery of an additional 733 Mcf of natural gas as hereinbefore described and as more fully described in the application and exhibits in this proceeding, upon the terms and conditions of this order.

(H) The certificate issued by paragraph (G) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3) and (e) of Section 157.20 of such Regulations.

(I) The volume of natural gas authorized in paragraph (G) above shall be reduced to 583 Mcf daily within six months from the date of this order unless Community Natural enters into and files with the Commission a firm contract with Holland Custard Company for the delivery of 177 Mcf of natural gas daily commencing not later than January 1, 1969.

(J) Tennessee shall make an appropriate tariff filing reflecting the service authorized herein, in accordance with the Commission's Regulations, within 30 days of the issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CITIZENS UTILITIES COMPANY, DOCKET NO. E-7253

SUPPLEMENTAL ORDER AUTHORIZING ISSUANCE OF PROMISSORY NOTES

(Issued December 29, 1966)

By order issued December 10, 1965, 34 FPC 1441, in the above-entitled matter, the Commission, pursuant to Section 204 of the Federal Power Act, authorized Citizens Utilities Company to issue up to $9,500,000 principal amount of Promissory Notes outstanding at any one time, upon the terms and conditions set forth in that order, which include, among others that the final maturity of all such notes be not later than December 9, 1966.

Pursuant to the above-described authorization, Applicant issued $3,800,000 in notes in December 1965 and paid them off in March 1966 and it issued $250,000 in notes in September and $200,000 in notes in November 1966 for a total of $450,000.

On November 4, 1966 Applicant filed a supplemental application, requesting that the authorization and terms thereof granted by the above-mentioned order be extended and modified to the extent necessary to provide that Applicant may issue Promissory Notes up to an aggregate principal amount of $9,500,000 at any one time outstanding and that the final maturity of all such notes be not later than December 8, 1967.

The supplemental application states that the notes are to have maturities of not more than 90 days from the date of issuance and are to bear interest at the New York prime rate. The notes will be payable in whole and in part at any time without penalty. The notes are to be issued to renew outstanding notes and to furnish funds for the Applicant's 1967 construction program which has an estimated cost of $9,741,400. This total includes $939,000 for electric facilities, $326,500 for natural gas distribution facilities, $4,816,000 for telephone facilities and $3,659,000 for water facilities. The Applicant is of the opinion that the issuance of notes is the most suitable method of financing for reason that the issuance of bonds can be delayed until an economical amount of bonds can be issued at one time and to a period in which the Applicant hopes for an improvement of money market conditions.

The Commission finds:

Good cause has been shown and it is necessary and appropriate for the purposes of the Act that the authorization granted in Commission order issued December 10, 1965, be extended for one year as hereinafter provided.

The Commission orders:

(A) Paragraphs (A) and (B) of the Commission order issued December 10, 1965 in the above-entitled docket are amended to read as follows:

> (A) The proposed issuance of Promissory Notes in the aggregate principal amount of $9,500,000 outstanding at any one time, upon the terms and conditions and confined to the purposes set forth in the application filed November 12, 1965 and, as amended by supplemental application filed November 4, 1966, is hereby authorized, subjected to the provisions of this order.

(B) This authorization is expressly conditioned upon the maturity of all notes to be issued pursuant thereto being not later than December 8, 1967.

(B) All of the terms and conditions, as set forth in paragraphs (C) and (D) of the aforesaid Commission order issued December 10, 1965, shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP67-109

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF NATURAL GAS SERVICE

(Issued December 29, 1966)

On October 25, 1966, Transcontinental Gas Pipe Line Corporation (Applicant) filed in Docket No. CP67-109 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon natural gas service under its Rate Schedule PS-1 (Peaking Service-Zone 1), as contained in its FPC gas tariff, Original Volume No. 1, all as more fully set forth in the application in this proceeding.

Applicant's PS-1 Rate Schedule provides for firm service, from November 1 through October 31 of each year, up to Peaking Service Demand (daily volumes) and the Annual Peaking Service Quantity (50 times PS Demand), at a demand charge of $2.30 per Mcf and a commodity charge of 22.7 cents per Mcf of natural gas.

By order issued in Docket No. G-12059, Applicant was authorized, *inter alia*, to provide a peaking service of up to 21,000 Mcf of gas per day, under its Rate Schedule PS-1, to Atlanta Gas Light Company (Atlanta).

PS-1 service was rendered to Atlanta by Applicant from December 1, 1957 to November 1, 1958, from excess capacity available to Applicant during that period. No other customer has elected to take PS-1 service and the system capacity which made the service possible during the limited period ending November 1, 1958, has since been devoted to other system requirements. Subsequent to November 1, 1958, additional volumes of natural gas were made available to Atlanta under Applicant's Rate Schedule CD-1, and the service agreement for PS-1 service to that customer was cancelled. Accordingly, Applicant filed on August 1, 1966, notices of cancellation of Rate Schedule PS-1 and its related service agreement. Processing thereof was held in abeyance pending receipt of the subject application.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on December 21, 1966, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a

"natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 28, 1950, in Docket No. G-1277 (9 FPC 32).

(2) Natural gas service under Applicant's Rate Schedule PS-1, as hereinbefore described, and as more fully described in the application in this proceeding, involves the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the abandonment of such service is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) Permission for an approval of the abandonment of natural gas service as proposed by Applicant should be accompanied by the acceptance of Applicant's notices of cancellation of Rate Schedule PS-1 and the related service agreement form, effective as of the date of this order.

(4) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered and conditioned.

The Commission orders:

(A) Permission for and approval of the abandonment by Applicant of the natural gas service hereinbefore described, all as more fully described in the application in this proceeding, are granted.

(B) Applicant's notices of cancellation of Rate Schedule PS-1 and the related service agreement form are accepted, effective as of the date of this order.

Before Commissioners: Lee C. White, Chairman; Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

MONSANTO COMPANY, DOCKET NO. G-18269, ET AL.[1]

ORDER APPROVING RATE SETTLEMENT PROPOSAL, SEVERING AND TERMINATING PROCEEDINGS, AND PRESCRIBING REFUNDS

(Issued December 30, 1966)

There is before us for consideration a Motion for Approval of Settlement Proposal, Termination of Rate Proceedings and for Shortened Procedure Certification, filed on November 15, 1966, and amended on November 22, 1966, by Monsanto Company (Monsanto) encompassing the rates for 77 of its currently effective FPC Gas Rate Schedules.[2] Comments have been filed by some of the parties to these proceedings, all of which have been given due consideration.

In summary, the settlement proposal filed by Monsanto, as amended, provides:

(1) Settlement rates, including tax reimbursement, equal to or less than the Commission's applicable area rate ceilings;

(2) Monsanto waives the right to file for contractually authorized increased rates prior to November 1, 1969, for all of the rate schedules involved in the settlement. However, Monsanto reserves the right to file for any increased

---

[1] The additional dockets involved herein are set forth in Appendices A and B attached hereto.

[2] Five of Monsanto's FPC Gas Rate Schedules for sales in the Permian Basin are shown in Appendix A, but were not considered by the parties to the settlement conferences as part of the settlement.

rates, if contractually authorized, up to the applicable area-rate levels established by any order or rule of the Commission, or to file for any contractually authorized increase in tax reimbursement;

(3) Monsanto will delete any favored-nation, price-redetermination or periodic-escalation provisions from its FPC Gas Rate Schedule Nos. 1, 8, 16 and 20 in accordance with the Second and Seventh Amendments to the Commission's Statement of General Policy No. 61-1, 18 CFR 2.56;

(4) Refunds, with interest at the applicable rates, under rate schedules where collection was made subject to refund, of the difference between the revenues actually collected and those collectable at the settlement rate, in each instance, commencing with January 1, 1965, to the date of issuance of this order, for all of Monsanto's rate schedules, excepting those for its sales of natural gas in the Permian Basin which were excluded from the proposed settlement.

In support of its proposal, Monsanto states that the settlement rates, refunds, the moratorium period, and other provisions thereof not specifically noted herein, are in the public interest in that they are reasonable and will provide price stability for a long period of time for natural gas moving in interstate commerce.

With respect to refunds, the parties to the settlement conferences utilized cost-of-service studies and revenues based on effective rates to determine Monsanto's revenue-cost relationship. These studies indicate that it is appropriate that we require that refunds should be computed for sales where monies were collected subject to refund on and after January 1, 1965, as hereinafter ordered. Such refunds will approximate $142,000, inclusive of applicable interest computed to November 1, 1966, which approximates 74% of the monies collected subject to refund above the settlement rates. For all the reasons stated in our order in *Humble Oil & Refining Company*, Docket No. G-9287, *et al.*, 32 FPC 49, we shall order Monsanto to retain the amounts of refunds ordered herein until further action by the Commission directing their disposition; except, however, those refund monies due and owing Panhandle Eastern Pipe Line Company, Southern Union Gathering Company, and Southern Natural Gas Company, may be paid as hereinafter ordered since the amounts concerned are *de minimis.*

Monsanto's presently effective rates will be reduced under the settlement proposal so as to effectuate an annual reduction of approximately $100,000 in its jurisdictional revenues.

The settlement proposal includes rates for which issuance of related permanent certificates is pending, some of which are for deliveries presently being made under temporary authority. We propose to set the application in Docket No. CI62-347 for abridged statutory hearing in accordance with Section 7 of the Natural Gas Act, indicating that the settlement rate, as provided for herein, shall be the initial price. Included among the pending certificate applications are four sales which are presently involved in court review. They are Monsanto's Rate Schedule Nos. 52, 53 and 56, (consolidated with Sinclair Oil & Gas Company, *et al.*, Docket No. G-16760, *et al.*) and Rate Schedule No. 44 (consolidated with Amerada Petroleum Corporation, *et al.*, Docket No. CI62-1544, *et al.*). Monsanto proposes that the settlement for these sales shall be subject to the final disposition of said proceedings whether after court review or otherwise.

Our action herein should not be construed as constituting approval of future rate increases, if any, that may be filed under the subject rate schedules, and is without prejudice to any findings or orders of the Commission in pending or future proceedings, including area rate or similar proceedings, involving Monsanto's rates and rate schedules.

The Commission finds:

The proposed settlement of the subject proceedings on the basis described herein, as more fully set forth in the Settlement Proposal filed by Monsanto on November 15, 1966, and amended on November 22, 1966, is in the public interest and it is appropriate in carrying out the provisions of the Natural Gas Act, that it be approved and made effective as hereinafter ordered, and good cause exists for approving the settlement rates, for severing and terminating certain proceedings and providing for refunds.

The Commission orders:

(A) The settlement of these proceedings on the basis of the settlement proposal, filed by Monsanto on November 15, 1966, and amended on November 22, 1966, is approved.

(B) The applicable settlement rates set out in Appendix A hereto are approved, and such rates shall be effective as of November 1, 1966.

(C) The approved settlement rates shall be applicable during the moratorium period herein provided for all sales of natural gas from all acreage dedicated as of the date of issuance of this order under each of the rate schedules currently on file with the Commission whether such sales are made by Monsanto, its successors or assignees.

(D) Monsanto shall compute the difference between the rates collected subject to refund and the related settlement rates or rates not subject to refund, whichever rate is the greater, for the period from January 1, 1965, to the date of this order, together with interest as specified in each docket to November 1, 1966. Monsanto shall within 45 days from the date of this order submit a report to the Commission, and serve a copy on each of the purchasers involved, setting out by purchasers the amount of refunds related to each rate schedule (showing separately the principal and applicable interest), the bases used for such determination and the periods covered.

(E) Monsanto shall retain the amounts shown in the report required under paragraph (D) above, subject to further action of the Commission directing the disposition of those amounts, *provided, however*, Monsanto shall within 90 days from the date of this order, (1) refund with interest as specified in each docket computed to November 1, 1966, the difference between rates collected subject to refund and the related settlement rates, on and after January 1, 1965, to the date of this order for all of such of Monsanto's Rate Schedules, where the rates were collected subject to refund for sales of natural gas to Panhandle Eastern Pipe Line Company, Southern Union Gathering Company, and Southern Natural Gas Company, and (2) report to the Commission in writing, the amount of refunds made to Panhandle Eastern Pipe Line Company, Southern Union Gathering Company, and Southern Natural Gas Company, showing separately the amount of principal and interest so paid, and the basis used for such determination, together with releases from its purchasers showing receipt of the refunds in conformity with the settlement proposal as approved herein.

(F) If Monsanto elects to commingle these retained refunds with its general assets and use them for its corporate purposes, it shall pay interest thereon at the rate of 6% per annum on all funds thus available from March 20, 1967, to the date on which they are paid over to the person ultimately determined to be entitled thereto by final action of the Commission.

(G) If Monsanto elects to deposit the retained refunds in a special escrow account, Monsanto shall tender for filing on or before, March 20, 1967, an executed Escrow Agreement, conditioned as set out below, accompanied by a certificate showing service of a copy thereof upon each of its jurisdictional customers. Unless notified to the contrary by the Secretary within 30 days from the date of filing thereof, the Escrow Agreement shall be deemed to be satisfactory and to have been accepted for filing. The Escrow Agreement shall be entered into between Monsanto and any bank or trust company used as a depository for funds of the United States Government and the Agreement shall be conditioned as follows:

(1) Monsanto, the bank or trust company, and the successors and assigns of each, shall be held and formally bound unto the Federal Power Commission for the use and benefit of those entitled thereto, with respect to all amounts and the interest thereon, deposited in a special escrow account, subject to such Agreement, and such bank or trust company shall be bound to pay over to such person or persons as may be identified and designated by final order of the Commission and in such manner as may be therein specified, all or any portion of such deposits and the interest thereon.

(2) The bank or trust company may invest and reinvest such deposits in any short-term indebtedness of the United States or any agency thereof, or in any form of obligation guaranteed by the United States which is, respectively, payable within 120 days as the said bank or trust company in the exercise of its sound discretion may select.

(3) Such bank or trust company shall be liable only for such interest as the invested funds described in Paragraph (2) above will earn and no other interest may be collected from it.

(4) Such bank or trust company shall be entitled to such compensation as is fair, reasonable and customary for its services as such, which compensation shall be paid out of the escrow account to such bank or trust company. Said bank or trust company shall likewise be entitled to reimbursement for its reasonable expenses necessarily incurred in the administration of this escrow account, which reimbursement shall be made out of the escrow account.

(5) Such bank or trust company shall report to the Secretary quarterly, certifying the amount deposited in the trust account for the quarterly period.

(H) The pending certificate proceeding in Docket No. CI62–347 shall not be determined on the basis of the approval of the settlement proposal, but shall be determined after hearing in accordance with Section 7 of the Natural Gas Act.

(I) Within 90 days from the date of this order, Monsanto shall make such filings under its rate schedules as are required to make effective the terms of the settlement proposal.

(J) Upon full compliance by Monsanto with all the terms and provisions of this order, the Section 4(e) proceedings listed in Appendix A hereto, shall terminate.

(K) Upon termination of the Section 4(e) proceedings listed in Appendix B hereto, in accordance with Paragraph (J) above, said proceedings shall be severed from the consolidated proceedings in Docket Nos. AR61–2, AR64–1, and AR64–2, respectively.

(L) This order is without prejudice to any findings or orders which have been or any which will be made hereafter by the Commission, and is without prejudice to claims or contentions which may be made by Monsanto, the Commission staff, or any affected party hereto, in any proceedings now pending, including area rate or similar proceedings, or hereafter instituted by or against Monsanto or any other companies, persons, or parties affected by this order.

[1] All rates expressed in cents per Mcf at the pressure base shown for Commission pricing area in which each field is located. All rates include applicable tax reimbursement and are subject to BTU adjustment as provided in various contracts.

[2] Settlement rate at the area rate for increased rates under §§ 2.56(b)(1) and 2.56(c)(1) of the Statements of General Policy and Interpretations under the Natural Gas Act. Where necessary, contract term will be extended so that contract will remain in effect a minimum of 5 years from date of settlement herein.

[3] Rate subject to outcome of judicial review of Opinion No. 476, 34 FPC 930, *Sinclair Oil & Gas Company, et al.*, Docket No. G–16760, *et al.*, now pending in *P.S.C. of New York* v. *F.P.C.*, D.C. Cir. No. 19800, *et al.*

[4] Redetermined rate contractually authorized by Letter Agreement dated Aug. 22, 1966, filed as supplement to Rate Schedule No. 65 to be effective Dec. 2, 1966, pursuant to notice of change dated Oct. 21, 1966.

[5] Includes 1.5¢ compression charge and 2.0¢ transportation charge.

[6] Rate subject to outcome of judicial review of Opinion No. 422, 31 FPC 623, *Amerada Petroleum Corporation, et al.*, Docket No. CI62–1544, *et al.*, now pending in *Sunray DX Oil Co., et al.* v. *F.P.C.*, 10th Cir. No. 7781, *et al.* Decision issued Dec. 9, 1966.

[7] No compression or compression by Buyer.

[8] Compression by Buyer if Seller operates Buyer's compressors.

[9] Compression by Seller's compressors.

[10] Applicable Permian Basin area rate for Texas Railroad District No. 8 pursuant to Opinion Nos. 468 and 468–A, 34 FPC 159, 1968.

[11] Moratorium until Jan. 1, 1968, pursuant to Paragraph (H) of order accompanying Opinion No. 468.

[12] Subject to upward and downward BTU adjustment pursuant to Opinion No. 464, 33 FPC 1228.

[13] Includes upward BTU adjustment.

[14] Initial contract price is 17.0¢. Monsanto reserves right to file up to area rate for new gas if area boundary between Oklahoma Other and Oklahoma Panhandle areas is changed prior to Nov. 1, 1969.

[15] Includes 0.5¢ dehydration reimbursement.

[16] Adjusted base area rate for Permian Basin New Mexico area pursuant to Opinion Nos. 468 and 468–A.

[17] Sale now made pursuant to conditioned temporary authorization.

[18] Includes 1.0¢ minimum for liquids.

[19] Excludes 1.35¢ handling charge.

[20] Subject to reduction for compression and/or treating costs if required.

[21] Plus Seller's share of actual liquids.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP66-169 (PHASE II)

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 30, 1966)

On December 1, 1965, Natural Gas Pipeline Company of America (Applicant) filed in Docket No. CP66-169 an application, as supplemented on March 17, April 7 and November 23, 1966, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during 1966 and 1967 and operation of natural gas transmission and storage facilities and the sale and delivery of natural gas for resale, all as more fully set forth in the application, as supplemented, in this proceeding.

The Commission's order of May 27, 1966, 35 FPC 828, issued in the subject docket divided the proceedings on Applicant's application into two phases: The 1966 proposals were designated Phase I and the 1967 proposals were designated Phase II. The order of May 27, 1966, also issued a certificate of public convenience and necessity authorizing the Phase I proposals and postponed consideration of the Phase II proposals until determination of Applicant's proposal to procure Texaco Inc. or other gas in lieu thereof. On October 20, 1966, Texaco filed an application in Docket No. CI67-505 for authorization to sell natural gas to Applicant pursuant to a contract between the two parties dated October 18, 1966. Said contract provides for the purchase of 1.4 billion Mcf of gas. On November 18, 1966, Texaco was issued a temporary certificate in Docket No. CI67-505 which it accepted on December 12, 1966. By order issued December 6, 1966, *supra*, p. 986, in Docket No. CP66-170, Natural was authorized to construct and operate the facilities necessary to take the gas which the temporary certificate authorized Texaco to sell. Accordingly, it now appears that the Phase II proposals in the instant docket may now be authorized.

In Phase II Applicant's customers' have executed precedent agreements to purchase 94,651 Mcf of gas per day of the proposed 156,000[1] Mcf per day increase in pipeline capacity. All of the proposed 78,000[2] Mcf increase in peak-day storage delivery capacity has been committed to customers. These precedent agreements state that the customers will execute service agreements to purchase the added contract volumes effective December 1, 1967. In the Phase II expansion 61,349 Mcf per day of pipeline capacity is unallocated. As a consequence of Phase I, Applicant currently has 8,053 Mcf of unallocated capacity of which 1,661 Mcf has been requested by customers in pending applications.[3] In addition, Applicant has filed letters with the Commission from Illinois Power Company and Peoples Gas Light and Coke Company requesting an additional 15,000 Mcf and 25,000 Mcf per day, respectively. Assuming the pending applications and customer requests will be granted, Applicant will have 27,741 Mcf or approximately 0.7 percent of its system capacity unallocated after certification of the proposed Phase II facilities.

---

[1] 150,000 Mcf at 1,040 Btu converted to 1,000 Btu sales basis.

[2] 75,000 Mcf at 1,040 Btu converted to 1,000 Btu sales basis.

Specifically, Applicant proposes to sell and deliver additional daily contract quantities, or maximum daily quantities, of natural gas to resale customers as follows:

Customer	*Mcf at 1,000 Btu per cubic foot and 14.65 psia*
Rate Schedule CD–1:	
Associated Natural Gas Co	144
Central Illinois Electric & Gas Co	6, 000
Illinois Power Co	5, 000
Interstate Power Co	600
Iowa Ill. Gas & Electric Co	5, 300
Iowa Power & Light Co	99
Iowa Southern Utilities Co	39
North Shore Gas Co	4, 000
Northern Illinois Gas Co	50, 000
Northern Ind. Public Service Co	20, 000
Princeton Gas Co	332
Wisconsin Southern Gas Co	2, 277
Total CD–1	93, 791

Customer	*Mcf at 1,000 Btu per cubic foot and 14.65 psia*
Rate Schedule G–1:	
American Gas Co	235
Central Illinois Public Service Co	50
Monarch Gas Co	75
City of Perryville, Mo	160
City of Pichneyville, Illinois	130
United Cities Gas Co	210
Total G–1	860
Total	94, 651

Applicant proposes to allocate additional storage withdrawal capacity to its customers in accordance with the procedure of allocation set forth in its FPC Gas Tariff, Second Revised Volume No. 1, Rate Schedule S–1. The additional maximum withdrawal quantities which will result from the application of the tariff allocation procedure are as follows:

---

[3] Docket Nos. CP67–136 and CP67–137.

Customer	*Mcf at 1,000 Btu per cubic foot and 14.65 psia*
Allied Gas Co	459
Associated Natural Gas Co	102
Central Illinois Electric & Gas Co	3,026
Illinois Power Co	1,857
Interstate Power Co	400
Iowa Electric Light & Power Co	1,470
Iowa Ill. Gas & Electric Co	7,113
Iowa Power & Light Co	637
Iowa Southern Utilities Co	291
North Shore Gas Co	3,164
Northern Illinois Gas Co	26,301
Northern Ind. Public Service Co	9,626
Peoples Gas Light & Coke Co	22,441
Princeton Gas Co	143
City of Sullivan, Illinois	79
Wisconsin Southern Gas Co	726
City of Nebraska City, Nebraska	165
Total	78,000

Transmission facilities proposed for 1967 consist of 236.07 miles of 36-inch loop and 14,500 horsepower of compression on Applicant's Gulf Coast-Chicago mainline. Cost of these facilities is estimated to be $38,816,000. Additional storage facilities to be constructed in the Cairo, Herscher and Keota storage fields consist of 20 injection-withdrawal wells, 3.66 miles of various size pipeline and 2,320 horsepower of compression. The 1967 storage facilities are estimated to cost $3,037,000. The total cost of transmission and storage facilities is estimated to be $41,853,000.

The proposed facilities will be financed initially through short-term bank loans and loans from Applicant's parent, The Peoples Gas Light and Coke Company. Permanent financing will be through the issuance of first mortgage bonds, debentures and preferred stock.

After due notice, several petitions to intervene in support of the application have been filed herein. No other petitions to intervene, notices of intervention or protest to the granting of the application have been received.

At a hearing held on December 29, 1966, the Commission on its own motion received and made a part of the record in this proceeding (Phase II) all evidence, including the application, as supplemented, and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G-235 (3 FPC 830).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding (Phase II), are proposed to be used in the transporta-

tion and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities (Phase II) and the proposed transportation and sale of natural gas (Phase II) by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder should be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Natural Gas Pipeline Company of America, to construct and operate the proposed facilities and transport and sell natural gas as hereinbefore described, all as more fully described in the application, as supplemented, in this proceeding (Phase II), upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c) and (e) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the transportation and sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Regulations under the Natural Gas Act, within one year from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. CP64-5

ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 30, 1966)

On November 8, 1966, Texas Eastern Transmission Corporation (Petitioner) filed in Docket No. CP64-5 a petition to amend the order issued in said docket on December 19, 1963, 30 FPC 1559, and amended on October 28, 1964, 32 FPC 1229, April 5, 1965, 33 FPC 699, and August 24, 1965, 34 FPC 572. By the instant filing, petitioner seeks authorization to sell and deliver an additional 25,909 Mcf of gas per day, on a firm basis, to the East Ohio Gas Company, The Peoples Natural Gas Company, The River Gas Company, and the Consolidated Gas Supply Corporation (collectively referred to as the Consolidated Gas Companies), pursuant to a joint service agreement between said companies and Petitioner, and an additional 1,224 Mcf of gas per day to the City of Somerset, Kentucky, all as more fully set forth in the petition to amend.

The proposed additional sales represent less than one percent of Petitioner's overall requirements and can be made from existing and previously authorized facilities.

The additional deliveries to the Consolidated Gas Companies will be made under Petitioner's Rate Schedule DCQ–C and the additional deliveries to the City of Somerset under Petitioner's Rate Schedule GS–C. Petitioner has entered into precedent agreements for the proposed additional volumes with each of the aforementioned companies.

The Consolidated Gas Companies, by written agreement, have informed Petitioner that they are willing to have the incremental 25,909 Mcf of gas per day curtailed on any given day during the winter months of January, February, and March 1967, if necessary in order for Petitioner to meet its system firm requirements. In November 1967, some 73,442 Mcf of gas per day will become available to Petitioner as a result of the completion of its 4-year expansion program and from the termination of limited term sales. This will permit service of the subject volumes of natural gas from Petitioner's system design capacity.

After due notice, no protest, petition to intervene, or notice of intervention has been filed herein.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate of public convenience and necessity heretofore issued in Docket No. CP64–5, as amended, be amended further as hereinafter ordered.

The Commission orders:

(A) The certificate of public convenience and necessity issued to Texas Eastern Transmission Corporation by the Commission on December 19, 1963, and amended on October 28, 1964, April 5, 1965, and August 24, 1965, is amended further by authorizing an increase of 25,909 Mcf of gas in firm daily deliveries to the Consolidated Gas Companies under Rate Schedule DCQ–C and an increase of 1,224 Mcf of gas in firm daily deliveries to the City of Somerset, Kentucky, under Rate Schedule GS–C, as hereinbefore described and as more fully described in the petition to amend.

(B) Applicant shall file appropriate revised service agreements reflecting the increased volumes authorized herein.

(C) In all other respects the subject certificate shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

TRANSWESTERN PIPELINE COMPANY, ET AL., DOCKET NO. CP63–204, ET AL. AND EL PASO NATURAL GAS COMPANY, DOCKET NO. CP64–76

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING SERVICE AGREEMENT FOR FILING

(Issued December 30, 1966)

On November 29, 1966, El Paso Natural Gas Company (El Paso) filed in Docket No. CP63–204, *et al.*, a petition to amend the Commission's order accompanying Opinion No. 500, issued July 26, 1966, as corrected August 19, 1966, 36

FPC 176, 491, in said dockets so as to authorize El Paso to commence on January 1, 1967, the delivery of the total additional daily quantity of 250,000 Mcf of natural gas authorized by said order to be sold and delivered to Southern California Gas Company and Southern Counties Gas Company of California (jointly Southern), all as more fully set forth in the petition to amend in this proceeding.

The order of July 26, 1966, among other things, authorized El Paso in Docket No. CP64–76 to construct and operate certain facilities and to sell and deliver additional daily quantities of natural gas to Southern. Said order authorized the delivery of a total additional daily quantity of 250,000 Mcf. The order provided that El Paso deliver the additional maximum quantities of gas per day as follows: commencing with the issuance of the order of July 26, 1966, 150,000 Mcf per day; commencing November 1, 1966, 200,000 Mcf per day, and commencing November 1, 1967, 250,000 Mcf per day.

El Paso states that Southern has requested that the delivery of the total authorized additional quantities of 250,000 Mcf per day to commence January 1, 1967. The petition indicates that Southern has made this request because of the anticipated inability of Transwestern Pipeline Company to complete before March 1, 1967, the facilities necessary to deliver the contract demand quantity of 640,000 Mcf per day authorized by the order of July 26, 1966, and because of its need for gas to meet the 1966–67 heating season requirements.

Concurrently with the filing of the subject petition, El Paso tendered for filing a service agreement, dated November 23, 1966, providing for the subject proposal.

Due notice of the filing of the petition to amend and opportunity for hearing thereon has been given by publication in the Federal Register on December 13, 1966 (31 F.R. 15711). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

(1) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order accompanying Opinion No. 500, issued July 26, 1966, as corrected August 19, 1966, in Docket No. CP63–204, *et al.*, be amended as hereinafter ordered.

(2) El Paso's service agreement, dated November 23, 1966, should be accepted for filing to become effective on January 1, 1967.

The Commission orders:

(A) The Commission's order accompanying Opinion No. 500, issued July 26, 1966, as corrected August 19, 1966, in Docket No. CP63–204, *et al.*, is amended so as to authorize El Paso to commence on January 1, 1967, the delivery of the total additional daily quantity of 250,000 Mcf of natural gas authorized by said order to be sold and delivered to Southern, all as hereinbefore described and as set forth in the petition to amend in this proceeding.

(B) El Paso's service agreement, dated November 23, 1966, is accepted for filing to become effective on January 1, 1967.

(C) The question as to whether the rate reduction prescribed in Paragraph (F)(3) of Opinion No. 500 and order issued July 26, 1966, should be made effective as of December 1, 1966, is reserved for future determination.

(D) In all other respects said order accompanying Opinion No. 500, as corrected, shall remain in full force and effect.

Commissioner O'Connor *not participating.*

APPLICATIONS OF PRODUCERS OF NATURAL GAS FOR CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY DISPOSED OF DURING THE PERIOD OF JULY 1, 1966 THROUGH DECEMBER 31, 1966; SERVICE BEGINNING SUBSEQUENT TO JUNE 7, 1954
